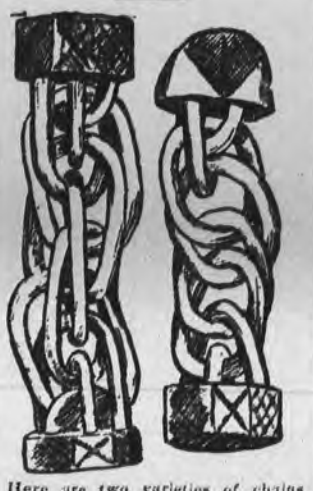
La Nature, an exceedingly trustworthy French publication, has the following in a recent issue: Last month there was born at Havre a horse which

TWO-LEGGED HORSE.

presents the singular condition of being deprived of its fore legs. The shoulders are clearly apparent under the skin, but the remainder of the legs are wanting. This foal was born with the physical characteristics of a kangaroo, but with less to console it, since the latter has legs in front, which, while small and short, are better than none at all, which represents the condition of the foal.

The foal is very healthy and obtains its food from a goat, there apparently being no reason to believe that it shall not live and learn to do entirely without the members of which it is lacking. We once saw a small dog, whose hind legs were missing, but this did not prevent it from walking and running on its front legs, elevating the rear portion of the body in the air. This animal ran easily and lightly, even descending and ascending flights of stairs without difficulty. We may thus believe that the Havre foal will adapt itself to its situation and that it will quickly learn to be a biped. Recently the Jardin des Plantes contained a goat which possessed no front limbs, but it succeeded in accommodating itself to its defects.

Cut From One Piece of Wood.



Here are two varieties of chains, each of which is cut out of one piece of wood. They were made by B. F. Clay, of Fernwood, Pa., who is seventy-five years old.

An Anti-Tipping League.

Chicago has started an anti-tipping league, which to a certain extent is the result of the waiters' strike. The motto of the Association is: "I will not tip," and the sign of membership, a button with the letters "A. T. L.," is pictured above.

In the United States nearly thirteen of every 10,000 inhabitants are studying at colleges of university status. The number in Great Britain is less than five.

HOUSEHOLD AFFAIRS

TO TEST JARS.

To tell if your jars are airtight when the precious preserves are ready to be put away, wipe perfectly dry about the cover and rubber, and then stand upside down on white paper for about ten minutes. If any moisture comes out, work up a little putty and put over the leaky spot.

USING CANDLES.

Lighting with candles is most difficult in summer, when the breezes make flames flicker and wax drip, but there are ways of overcoming this difficulty. For a straight glass or silver candlestick there can be had a tall, narrow glass shade, perhaps eight inches high and spreading a little toward the top. This really improves the appearance of the candlestick, and so thoroughly protects the flame that candle light may be used with comfort on the lawn or piazza on summer evenings.

THE SEWING APRON.

The sewing apron is now a feature of every industrious woman's wardrobe, says the Philadelphia Inquirer. It is constructed from strong material and is straight and plain, and gathered into a plain narrow band. It is cut long enough to reach almost to the hem of the gown. Then it is turned up straight across about at the line of the knees, as for a very deep hem—from nine to ten inches deep. The turned-up portion is hemmed before being folded, however, and the big, wide pocket thus furnished is stitched up and down so as to form four or five deep, rather narrow pockets instead of one. These pockets are for scissors, thread, cuttings and the like.

A PERTINENT QUESTION.

"Have you a casserole of Old French ware?" asks Laura A. Hill, in What to Eat. "No? Then hie to a shop where kitchen things are sold and get one, for you do not know half life's joys until those cunning dishes of brown sit on your kitchen shelves. Given a casserole, or baking dish, of this ware, a chafing dish and a coffee pot, in which coffee may be made at table, and the Sunday night supper, the cosey luncheon, and even the family dinner with an unexpected guest, becomes a delight to the housewife, even if cook is away. No one knows just what the secret is, but the old French cooks knew the delights of game, chicken, soups and other tidbits cooked in the old French clay ware, unglazed and porous. Go into any of the big hotels or men's clubs where French chefs reign, and call for the celebrated onion soup, and it will be served in a casserole of old French ware, with a napkin over the top and around the handle."

PLENTY OF SUNLIGHT.

The value of fresh air and sunlight cannot be too fully appreciated as a means of keeping a house healthy and cheerful, and its occupants in good condition of body and mind.

About twice a year every well-kept house undergoes that terrific convulsion—house-cleaning. During its progress there is not a nook or corner but what is given over for a time to air and sun, and the rigorous application of mop, broom and brush. As this finally settles down, with the result of the most delicious cleanliness and order, nothing could be more thorough than the semi-annual house-cleaning. But sometimes it seems that if this cyclonic rush of water, air and sun were divided up and distributed more evenly throughout the year we would probably get more of it in the end and object to it less in small doses. Too many houses are turned fairly inside out at house-cleaning time and then not aired and sunned enough the rest of the year.—New Orleans Picayune.

HOUSEHOLD RECIPES.

Berlin Salad—Cut six good-sized sardines in pieces; lay them in the bottom of a salad bowl, then put over a layer of sliced tomatoes, then cover with minced onion; garnish dish with crisp lettuce and pour over a French dressing.

Roasted Tomatoes—Peel the tomatoes; cut a slice from the top and take out a little of the pulp; put a bit of butter and a pinch of salt in each cavity; replace the top, sprinkle with crumbs, pepper and salt; brush each tomato with butter and roast in a moderate oven.

Cherry Fritters—Mix and sift one and one-half cupfuls of flour, two teaspoonfuls of baking powder, one-half teaspoonful of salt together and add gradually two-thirds of a cup of milk. Drain one and one-half cupfuls of pitted cherries thoroughly, sprinkle with powdered sugar at least half an hour before adding them to the batter, drop by spoonfuls in smoking hot fat, drain on brown paper and serve with sauce prepared as for roly-poly. Serve very hot.

Coffee Souffle—Mix one and one-half cupfuls of coffee liquid, half a cup of milk, half a cup of sugar and one tablespoonful of gelatine that has been soaking in one-fourth cupful of cold water one hour; cook in the double boiler; add yolks of three eggs, one-third cup of sugar and a pinch of salt; stir until thickened; remove from the range, add the whites of the eggs, beaten stiff, and half a teaspoonful of vanilla; turn into a mould; chill and serve with cream.

SCIENTIFIC & INDUSTRIAL

Soap, when one has been cut during shaving, plays the same valuable role as does the antiseptic in surgery, says the Lancet.

Molybdenum and titanium produce fast shades on leather. Molybdenum tannate has a great affinity for animal fibre. It is a deep yellow color, but a larger variety of shades can be obtained by employing it in connection with logwood extracts.

Harry Bartel, of New York, has been granted a patent on a lawn mower attachment, which is designed to pick up and deposit in a receptacle not only the grass which the mower cuts, but all extraneous substances with which the mower may come in contact in performing its functions.

M. Devic, a French engineer, has been trying experiments at Elbeuf with a new application of the monorail devised by him. With a small model on a scale of one-tenth of which the actual working train will be, he secured with ease thirteen miles an hour, from which he deduces that with a real train he can easily obtain from 300 to 400 kilometres an hour. He relies chiefly on two factors, a diminution of weight and a more effectual grip of the driving wheels on the single rail.

The Hewitt mercury vapor lamp was recently exhibited in London, and the remarkable effects exhibited by its light upon the appearance of colored objects attracted a great deal of attention. A report of Nature says: "The light plays such pranks with color that the color sense seems to have gone crazy. One red thing will appear blue, another black, one blue thing blue, another brown, but the skin becomes ghastly." The color of a particular hue of crimson is gloriously enhanced. For any purpose where color is not of importance the light is pronounced beautiful, and its production is very economical.

Professor Curie, of Paris, who, aided by his wife, discovered and extracted from pitchblende the strange substance called radium, recently remarked that he would not venture into a room containing one kilogram of radium because it would probably destroy his eyesight, burn off his skin, and even kill him. Radium gives off more abundantly than any other known substance the mysterious emanations named Bacquerel rays, which are supposed to consist of almost infinitely minute particles. They are driven off with a velocity as high as [illegible] per second, and cause serious inflammations upon the hands of persons working with the substance. They also give rise to luminous effects.

Life of Insects.

F. H. Chittenden, assistant entomologist of the Department of Agriculture, and a former Brooklynite, had before him the other day a large wooden tray, covered with specimens of beetles. He pointed out the striking similarity, both in size, shape and coloring, of the insects. This led to the remark that there is far more regularity in the distinctive features of insects than in human beings. In explaining this, Mr. Chittenden said:

"I think it is due to the fact that these insects lead a natural life, while that of human beings is quite unnatural, at least in many particulars. It is exceedingly rare to find a beetle, for instance, with a deformity not acquired by a blow or other injury. Cases of this kind, where there is a variation in the color or shape of the insect, are made subjects for special scientific treatment. But as I said, these are very rare occurrences, whereas in human life they are exceedingly common."—Brooklyn Eagle.

Won't Stop the Car.

If the conductors were to stop the car and wait for every man who wants to chase his straw hat, they would be able to make about four round trips over the road a day," said a Broadway Inspector, "to say nothing of the continuous blockade of traffic. Fully two-thirds of the complaints we get in summer are from men who get angry because the conductor won't stop the car while they chase a runaway straw hat. From reports that reach me, I should say that twenty or thirty men lose their straws every windy day on the Broadway cars. In front of the Flatiron Building I have often seen five or six men chasing their hats at one time. Now, how is it possible for a conductor to hold up a car there for two minutes, or even one minute? The fact is that if a man's straw hat blows off in busy Broadway he ought to be thankful to get it back at all in a fit condition to wear, let alone paying another nickel for carfare."—New York Times.

A Lesson in Manners.

The other day a young girl was talking to a business man whose lack of manners is notorious. During the conversation his hat remained on his head. The girl did not like it, as glances at the offending hat plainly showed. Finally he sniffed rather audibly and said: "I've a most fearful cold in my head."

"Ah!" said the girl, as if talking to herself, "that explains it."

"Explains what?" asked the man.

"Why, you're keeping your hat on when you are talking to a lady."

The hat came off in the time represented by the proverbial "jiffy."—New York Times.

"Well," retorted the Gladsome Guy, "the doctor can say the same, can't he?"

"What do you mean?"

"His patients are exhausted when he comes to you, surely."—Louisville Post.

Camping Out.

Timely is the warning given by a well-known actor against the folly of sleeping on the ground to which people who camp out are addicted. Leaving behind them feather beds, hair mattresses, close sleeping-rooms and partial heat available for cool summer days, they expose themselves to the sharp night air of the open, lying on the cold bosom of mother earth. They expect to derive immense benefit and much vigor from this. Well for them if they do not fall victims of rheumatism and bronchitis.

A safe general principle to follow is that the higher above the ground one sleeps the more healthful will be one's slumber. Campers out should allow themselves the luxury of cot beds, or, at all events, should sleep in hammocks swung at least six feet above the ground.

It is the height of absurdity for people accustomed to the artificialities of modern life to attempt emulation of Indian customs. We are no longer robust, as in the primitive age of the world, when luxury was yet unimagined. Folly of this kind will make the summer vacation injurious instead of beneficial.—New York World.

The Weekly is the Paper.

The daily papers are all right if you want them, but it is the weekly paper that advertises your business, your schools, your churches, your numerous societies, sympathizes with you in your affliction and rejoices in your prosperity. In short, it is your weekly paper that mentions the thousand and one items in which you are interested during the year and which you do not find in the daily papers.

BACKACHE.

Backache is a forerunner and one of the most common symptoms of kidney trouble and womb displacement.

READ MISS BOLLMAN'S EXPERIENCE.

"Some time ago I was in a very weak condition, my work made me nervous and my back ached frightfully all the time, and I had terrible headaches.

"My mother got a bottle of **Lydia E. Pinkham's Vegetable Compound** for me, and it seemed to strengthen my back and help me at once, and I did not get so tired as before. I continued to take it, and it brought health and strength to me, and I want to thank you for the good it has done me."—MISS KATE BOLLMAN, 142nd St. & Wales Ave., New York City.—$5000 forfeit if original of above letter proving genuineness cannot be produced.

Lydia E. Pinkham's Vegetable Compound cures because it is the greatest known remedy for kidney and womb troubles.

Every woman who is puzzled about her condition should write to Mrs. Pinkham at Lynn, Mass., and tell her all.

FOR THE FAIR

LATEST NEW YORK FASHIONS

New York City.—Cape effects are much in vogue and are seen upon many of the latest waists. This stylish mode, designed by May Manton, is adapted

BLOUSE WAIST.

to both the costume and the separate blouse and is shown in white pongee, with the cape and trimmings of cream-colored lace and the tucked front of mousseline, and is stitched with corticelli silk, but the design suits many other materials equally well. All silks and light-weight woods are admirable and many of the handsomer linens and cottons are satisfactory. When preferred one material can be used for the entire waist and the cape and stole can be omitted when a plainer blouse is desired.

The waist is made over a smoothly fitted foundation that closes at the centre front. The back is tucked in groups which extend from the shoulders to the waist line and give a tapering effect to the figure, but the fronts for part their length only and are made to pouch slightly at the belt. The centre front, or vest-like portion, also is tucked to form a deep yoke, then falls in soft folds to the waist line. The cape is circular and snugly fitted by means of shoulder seams, and is finished with shaped pieces which give a stole effect. The sleeves are tucked above the elbows, but are full and soft below and are gathered into deeply pointed cuffs.

The quantity of material required for the medium size is five and three-quarter yards twenty-one inches wide, four and three-quarter yards twenty-seven inches wide, or two and a quarter yards forty-four inches wide, with seven-eighth yards of all-over lace for the collar, and three-quarter yards of mousseline for centre front.

Tucked Blouse Waist.

Blouse waists that combine tucked fronts with plain backs are much worn and are very generally becoming.

The admirable one designed by May Manton and depicted in the large drawing is shown in pongee, stitched with corticelli silk and trimmed with bands of narrow brown velvet ribbon, but is equally well adapted to washable fabrics and indeed to all waisting materials.

The waist consists of the fitted foundation, which can be used or omitted as preferred, the back and the fronts. The back is plain and drawn down in gathers at the waist line. The front is tucked to form a graduated pleat at the centre and from the shoulders to yoke depth. It also is gathered at the waist line and blouses slightly over the belt. The closing is made invisibly beneath the full length tuck at the left of the centre. The sleeves are the prevailing ones that are snug from the elbows to the shoulders, full from the elbows to the wrists.

The quantity of material required for the medium size is four yards twenty-one inches wide, three and seven-eighth yards twenty-seven inches wide, three and three-quarter yards thirty-two inches wide, or two and one-eighth yards forty-four inches wide.

The Underskirt.

When deciding on one of the long, close yokes that are so much in vogue on dress skirts, one must give a thought to the underskirt which is to be worn with it. The underskirt should be most carefully adjusted over the hips, and there is, as a rule, only one way to accomplish this—the underskirt must be made to order. The feeling seems to be general that to have a petticoat made to measure means too much, both in time and money, and that a well-cut skirt can easily be altered to suit any figure. It is, however, much better to go to a little more expense in the first place than to have to pay extra to have a skirt refitted, or to fuss at home with shortening and relenging.

Features of the New Coats.

Pleated sleeves, cape effects, cords, balls, pendants, fringes, buttons and embroidered bands are features of the new styles in separate coats.

The Styles of 1830.

Reproductions of the styles of 1830 are expected to be much in evidence during the next few months.

Sleeves Becoming Longer.

Sleeves grow in width and lengthen perceptibly. The dolman sleeve figures on some of the coats, fitting the arm inside, and made very baggy from the elbow on the outside; others are tight

A GENERALLY BECOMING SHIRT WAIST.

from the bend of the arm to the wrist, and very wide above.

Woman's Sailor Blouse.

Sailor blouses are always satisfactory to the wearer and generally becoming. This one, designed by May Manton, is made of pongee in the natural color with shield of tucked Liberty silk, and is trimmed with bands of the same embroidered in Chinese characters; but the design is suited to linen and cotton materials of many sorts and also to light weight wools and simple silks, and can be used for the odd waist or the entire costume with equal success.

The waist consists of the fronts, the back, the collar, shield and sleeves. The back is smooth across the shoulders and drawn down in gathers at the waist line, but the fronts pouch slightly over the belt. To the open neck is joined the big sailor collar and beneath this collar the shield is attached. The sleeves are snug above the elbows, full below and are gathered into straight cuffs.

The quantity of material required for the medium size is four and a half yards twenty-one inches wide, four and a half yards twenty-seven inches wide, three yards thirty-two inches wide, or

SAILOR BLOUSE.

two and a half yards forty-four inches wide, with half-yard of tucking for shield and two and a quarter yards of trimming to make as illustrated.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "TRIALS AND TEMPTATIONS."

The Rev. George P. Eckman Differentiates Between Enticement to Evil and Temptation in the Sense of Providential Trial —Taking Account of Heredity.

NEW YORK CITY.—The Rev. George P. Eckman, pastor of St. Paul's M. E. Church, preached Sunday morning on "Trials and Temptations." He took his text from James i. 12: "Blessed is the man that endureth temptation; for when he is tried, he shall receive the crown of life, which the Lord hath promised to them that love Him." Mr. Eckman said:

The beatitude chosen for our text stands central to the discussion of temptation which James pursues in this chapter. The subject is considered under two aspects. The writer begins with temptation in the sense of providential trial, and concludes with temptation in the sense of seduction to evil. The one may be understood as proceeding from God, though it is permitted by Him in the process of human discipline. The one is hailed as an occasion of good. The other is denounced as the source of injury. Before the one the author sounds a trumpet of gladness. Before the other he waves a signal of danger. Toward the one we should assume an attitude of friendliness. Toward the other we must maintain a bearing of hostility. To the test of both phases of temptation we are bound to be subjected. From the contest with each we may return triumphant. Over the victorious contestant in each combat the author shouts, "Blessed is the man that endureth temptation." Let us turn to the apostle's discussion of this ever important theme.

"Count it all joy when ye fall into divers temptations!" he exclaims. Observe that these are providential troubles. They are not self-inflicted. The sufferer has fallen into them. They are unsought, unexpected and unwelcome. They constitute what in worldly parlance are called calamities. Yet in the very midst of the maelstrom of misfortune the Christian is urged to rejoice with exceeding great joy.

Jubilant in trouble—the thing is utterly preposterous to the mind which knows nothing higher than earthly philosophy. Shall the merchant sing cheerily while his commercial structure is crashing in ruins about him? Shall the youth smile serenely while the fondest ambitions of his life are being ruthlessly defeated? Shall the just man be exultant while society condemns him for his piety and godless men hate him for his virtue? Yes, if he is a Christian. James would reply. Let him count it all joy when he falls into these dire straits. They are deeply significant of good to him, however difficult it may be to discover their value. What madness this seems to the worldling!

A moment's reflection will prove even to the children of this world that joyousness in affliction which at the first appears to be an unnatural and superhuman temper under the circumstances, is actually easier and more philosophic than mere resignation and fortitude. Is it not better for a man in the midst of a rushing stream to race the torrent, breast the waves and stride up against the current than to turn his back upon the flood and try to stand erect where he is? Will he not be sure to fail to keep his feet in the latter instance? Will he not have immensely better chances to stem the tide in the other fashion? It is much the same with trouble. He who submits his back to the stroke of adversity and strives to bear a calm countenance and a brave heart while his head is bowed with grief, will succumb more easily to the sorrows of life than he who has a thankful joy in his heart born of the knowledge that to a Christian all the miseries for which he is not personally responsible are intended for his advantage. With such a fate the sufferer's face may shine, his heart may leap and he may assert himself with wondrous aggressiveness. So he will stalk on against the current, throwing off the billows as they pile upon him, and shouting for joy in the very mid-stream of affliction.

There is something deeper in the philosophy of James, however, than the mere offering of a wise method of confronting trouble. He sees a close relation between trouble and a triumphant life. "Count it all joy when ye fall into divers temptations (or troubles); knowing this, that the trying of your faith worketh patience. But let patience have her perfect work, that ye may be perfect and entire, wanting nothing." There is the formula for producing a strong and symmetrical character. It reminds one of Paul's statement, "We glory in tribulations also, knowing that tribulation worketh patience, and patience experience, and experience hope, and hope maketh not ashamed." The person of good character has no occasion for shame, being perfect and entire, wanting nothing. But such fulness of life can only be obtained through ministry of trial.

We can, at least, measure some of the effects of this kind of discipline. The trying of faith, the proving of one's confidence in the invisible but eternal administration of God is not the least of these results. Who will deny that without faith in the unseen it is impossible to construct a great character? Said a distinguished teacher, "Great imagination may make a great poet; great logical power a great philosopher; great faculty of observation a great scientist, but nothing makes a great man but great faith." It is only small people who insist on walking by sight. The great souls dwell in the invisible. The cheap crowd call such persons dreamers. But these dreamers alone attain eminence and power.

It was the faith of Columbus which swung the Western Hemisphere out of oblivion into light. It was the faith of Luther that rent asunder the papal domination and civil and religious liberty to Europe and the western nations. It was the faith of Lincoln that swept "the sum of all villainies from our borders and sent millions of ebon-faced men from chains to sovereignty." It is the faith of some valorous soul that removes every mountain of difficulty, straightens every crooked path and solves every problem that balks the progress of truth. The list of faith's champions lengthens with each decade. Bright are the glories of those "who through faith subdued kingdoms, wrought righteousness, obtained promises, stopped the mouths of lions, quenched the violence of fire, escaped the edge of the sword, out of weakness were made strong, waxed valiant in fight, turned to flight the armies of the aliens." By faith the greatest achievements of the spiritual as well as of the material world are won.

Endurance is the test of character. Is there any permanence in its fiber? Misfortune will answer the question. A great conflagration sweeps over a city. Structures of wood are devoured with avidity. Stone edifices resist the flames with some success, but they, too, crumble and dissolve under the intense heat. The steel safe drops from the counting house and is frightfully bent and blistered. But heaps of gold coin, now a mere molten mass, from which image and superscription have entirely faded, still reveal the quality of the yellow metal. Society discloses in its catastrophes a similar test. Adversity sweeps like a plague over the land. Fortunes are lost in the twinkling of an eye. Business is unsettled from the Atlantic to the Pacific. The foundations of commercial stability seem to be shattered before the advancing tide of financial ruin. Then only the strong stand firm. The weak resort to dissipation, to waste of body and soul, to crime. The pure become more pure. The wicked grow more vicious. And thus the event which brings blessing to one brings curse to another. It is all a matter of personal character, of moral fiber. "Blessed is the man that endureth temptation."

Temptation in the sense of enticement to evil is totally different from temptation in the sense of providential trial. If James is jubilant over the advantages of the latter, he is no less intense in His abhorrence of the former. The sorrows and misfortunes of life may come in the order of divine providence to rebuke character. Yielding to sin because of allurements of evil must be traced to some other origin. James boldly declares that the fault lies in the corrupt human heart.

He will find objectors to his doctrine. Some will lay the charge of man's temptation to evil upon God Himself, who made men with a disposition to love sin and to pursue it. But that cannot be true, if God is good. "Every good gift and every perfect gift is from above and cometh down from the Father of lights." It is absurd to accuse God of enticing men to wickedness. "God cannot be tempted of evil, neither tempteth He any man." He would not be God if He could do this. He would be the devil. It is illogical to call Him God—eternal goodness—and yet ascribe seduction to Him.

James holds up the lustful human heart and contends that no external circumstances constitute in themselves alone a seduction to sin. They may provide the occasion for wrong doing. They may make a powerful appeal to the passions and appetites of men. But they would be utterly futile to influence conduct and choice but for the corrupt logging of the heart. The trouble is this, James explains: "Every man is tempted when he is drawn away of his own lust and enticed." Then, when lust hath conceived, it bringeth forth sin, and sin, when it is finished, bringeth forth death."

But will you make no account of heredity? Certainly, the children of the opium eater, the user of intoxicants, the gluttonous, the lascivious, will bear in their enfeebled wills, impaired nerve centres and scrofulous blood the foul taint of sinful parents. And may God pity the progeny of the vicious! But shall the victim of a father's sins yield weakly to the propensities he has inherited, and plunge deeper into the turbid pool of iniquity? Will it excuse a man's blood-stained hand that he received a fiery temper from his ancestry, and in a moment of ungoverned fury murdered his fellow?

But will you make no account of environment? Certainly, the generations rising from the slums of the great cities can scarcely be expected to come naturally to the virtues of your clean-faced, church-bred boys and girls. What, then—shall the soul make no effort to rise superior to its surroundings? Is there any environment in which allurements to evil will not exist? Do they not obtrude themselves upon the scene of public worship and private devotion? Is there exemption for any one? Surely not, but in the last analysis the temptation is not in the enticements of one's environment, but in a heart that hints after evil, and which must be denied its desires if good character is to be made.

To ration to evil, then, is a matter in which our personal moral ideas is involved, just as in trial through suffering our powers of endurance are tested. What is your attitude toward evil? Is it one of apology and condonement? How perilous! Is it one easy familiarity? God pity your weakness! We have a duty to ourselves. Luther used to say: "We cannot keep the birds from flying around our heads, but we can prevent them from building their nests in our hair." We may not be able to keep temptation away, but we need not let it in the house. We should not expect God to lock the door and keep His hand upon it. We are the doorkeeper of our own souls.

Naturalists tell us that the scorpion will never use his sting, of which he is exceedingly careful, unless he can find a spot on the body of his desired victim sufficiently soft to admit its insertion without fear of injury. Temptation never assails the soul except at vulnerable points. Our own lusts determine the spots which the enemy strikes.

But fortunately the whole burden of resisting temptation to evil does not rest with us. Divine help is promised. "If any of you lack wisdom, let him ask God." Wisdom is called by a sound writer "the art of Christian conduct." That art can be acquired of Christ Himself. He was tempted in all points as we are, yet without sin. He can and will impart the power of successful resistance. Moreover, there is specific promise in the premises. "There hath no temptation taken you but such as is common to men, but God is faithful, who will not suffer you to be tempted above that ye are able, but will also with the temptation make a way to escape, that ye may be able to bear it."

For him that endures there is the blessed recompense of the crown of life. What the sculptor has wrought is not to be shattered by the hammer of judgment. When the ship comes bounding over the stormy sea she is not to sink in view of the harbor. But after the struggles of this human life will come the felicities and fulness of the perfect life. May the victor's wreath be ours.

"Home-Wellness."

How often we hear it said, "It is worth while to travel to have the joy of getting home again. One never realizes how good home is till one has been away from it for some time." How seldom we comprehend the disgrace involved in that remark! For it is our business to understand the joys of home. It is our business to appreciate it while we are at home, and while our appreciation can do our dear ones and the precious home life some good, and not wait till we go away or till some confused return, whose transient emotions are so speedily forgotten. Home-wellness thinks every morning as we rise: "How good it is to be a member of this household! How blithely the sun shines in at my window! How I bless God for this good home!" Home-wellness looks around at the breakfast table upon all the dear ones there, and shines out its gratitude from beaming eyes, and carols it out with cheery laugh and loving praises. Home-wellness goes through the entire day with a song in the heart. It irradiates the whole family with its satisfaction, for home-wellness is very contagious. It makes every one work better and play better. And when the evening comes, and the sacred night takes the home in its keeping, it is a home of thanks giving and peace that it broods under its olion wings. Homesickness is said to produce, very often, physical results as serious as a genuine disease; indeed, it deserves to be ranked with the diseases of the body as well as the maladies of the soul. But home-wellness is the opposite of disease; it is the household health.—Christian Endeavor World.

A True Christian.

Children enjoy music long before they understand the color, scale and the laws of harmony. Indeed, millions go through life enjoying the beautiful in nature and art without ever knowing anything about the laws by which colors complement each other. Also millions go through life as Christians without ever stopping to work out philosophically their ideas about the Bible or the church or the creed. And yet they are Christians, because they are loyal to Christ. History tells of a young paint-grinder in the studio of Italy's great master who developed striking evidences of artistic skill. When an enemy of the great teacher came to the boy and urged him to found a school of his own, saying that wealth and honors and invitations to kings' palaces might be his, the youth answered in effect: "I am not ambitious to found a school or dwell in a palace, but I am ambitious to catch Raphael's spirit and reproduce in myself his ideals." Now, that simple thought condenses in a word the essence of the Christian life. It is an ambition to rise to the level of Christ's thoughts, to feel His throb of sympathy toward the poor and weak, to abhor evil as He abhorred it, to hunger for righteousness as He hungered for it and to walk with our Father as Christ walked with His. He is a Christian who is loyal to Christ in thoughts, sympathies, friendships, purposes and ideals.—Newell Dwight Hillis.

FREE PROOF FORBIDS DOUBT.

GAINES, PA., August 3, 1903.—"I received your sample of Doan's Kidney Pills and since have taken two boxes, and I can truthfully say they are as good as they are recommended to be. When I began taking them I could not bend my back enough to pick up a stick of wood—sometimes could not walk or move my feet—had two doctors but did not get relief. I saw your ad., and got a trial box and have taken two besides, and I am able to do a very hard day's work. Doan's Kidney Pills are a God-send to humanity."—MRS. ELLA A. MATTISON, Gaines, Pa., Box 186.

The great fame of Doan's Kidney Pills is won by the wondrous power of the free trial to demonstrate surprising merit.

Aching backs are eased. Hip, back, and loin pains overcome. Swelling of the limbs, dropsy signs, and rheumatic pains vanish.

They correct urine with brick dust sediment, high colored, pain in passing, dribbling, frequency, bed wetting. Doan's Kidney Pills remove calculi and gravel. Relieve heart palpitation, sleeplessness, headache, nervousness, dizziness.

For free trial box, mail this coupon to Foster-Milburn Co., Buffalo, N. Y. If above space is insufficient, write address on separate slip.

GALESBURG, ILL., March 8th, 1903.—"The sample of Doan's Kidney Pills came to hand. I also got one 50-cent box from our druggist, and I am thankful to say the pain across the small of my back disappeared like a snow bank in hot sun. Doan's Pills reach the spot."
ELMER WARFEL.

CAMBRIA, WYO.—"Previous to taking the sample of Doan's Kidney Pills I could scarcely hold my urine. Now I can sleep all night and rarely have to get up, and that aching across my back, a little above my hips, is gone."
ISAAC W. STEVENS, Cambria, Wyo.

BEST FOR THE BOWELS

Cascarets

Address Sterling Remedy Company, Chicago or New York. 502

Beauty is Italy's Bane.

Florence and Venice and the rest are cursed with the burden of a most dangerous legacy from their past—the legacy of beauty. Because of this beauty (which the people themselves do not enjoy) the rich of all nations flock to them, bringing full purses and a disposition to spare no expense. The native begins to regard these visitors as his natural prey. Why should he work when foreigners are so easily fleeced? Accordingly he does not work—at least in the productive sense. He touts and begs and sells ornaments at three times their real value.

The victory instead of going to strength goes to weakness. Parents of the poorer class look upon a deformed or crippled child as a blessing, since its pitiful helplessness makes it a more efficient beggar. Into these cities, where such a fine harvest can be gathered on such easy terms, the strong, industrious peasantry are sucked until they become idle, demoralized gamblers. And all because they are the most beautiful places in the world; because their past is so glorious that strangers come from the ends of the earth to see its grave. Thus the modern Florentine lives like some horrible cannibal, upon his own dead.—London Outlook.

An Ancient Schooner.

Shipping men are much interested in a claim by a writer in a New York magazine that the oldest ship in the world—the Vigilant, running into St. Croix, French West Indies—was built at Essex, Mass.

At the rooms of the Board of Trade Secretary Love stated that the Vigilant was built in Baltimore.

"In order to make sure of it," said Colonel Love, "I recently wrote to Lloyd's Register in London and received a reply stating that the Vigilant was built at Baltimore in 1790."

The Vigilant is a mail schooner of forty-five tons and was long under the Stars and Stripes.—Baltimore News.

Mexican Iron Mill.

Mexico has entered the ranks of the steel manufacturing countries of the world. The new $10,000,000 steel plant at Monterey has recently turned out its first product.

Gray Hair

"I have used Ayer's Hair Vigor for over thirty years. It has kept my scalp free from dandruff and has prevented my hair from turning gray."—Mrs. F. A. Soule, Billings, Mont.

There is this peculiar thing about Ayer's Hair Vigor—it is a hair food, not a dye. Your hair does not suddenly turn black, look dead and lifeless. But gradually the old color comes back,—all the rich, dark color it used to have. The hair stops falling, too.

FREE! TO WOMEN

A Large Trial Package of

PAXTINE TOILET ANTISEPTIC

A NEW SPECIALTY FOR WOMEN.

Internal cleanliness is the key to woman's health and vigor. Inflammation, Soreness, Pelvic Catarrh cannot exist with it.

Paxtine used as a vaginal douche is a revelation in combined cleansing and healing power. It kills all disease germs. In local treatment of female ills it is invaluable. Heals Inflammation and cures all Discharges. Never fails to cure Nasal Catarrh. Cures offensive perspiration of arm pits and feet. Cures Sore Throat, Sore Mouth and Sore Eyes. **As a tooth powder nothing equals it.** Removes Tartar, Hardens the Gums and whitens the teeth, makes a bad breath sweet and agreeable.

Thousands of letters from women prove that it is the greatest cure for Leucorrhoea ever discovered. We have yet to hear of the first case it failed to cure.

To prove all this we will mail a large trial package with book of instructions **absolutely free.** This is not a tiny sample, but enough to convince anyone.

At druggists or sent postpaid by us, 50 cts. large box. Satisfaction guaranteed. The R. Paxton Co., Dept. , Boston, Mass.

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

TO ADVERTISERS

Frequent changes of advertisements is one of the main requisites for a successful result; we therefore urge our advertisers to change their ads at least once a month. Try and get such changes to us as early in the week as possible, never later than Thursday noon.

NEW ELECTION OFFICERS TO SERVE

It has been decided by Attorney-General McCarter that the newly appointed election officers are to serve and take charge of the primaries and election next month, and not the old board.

This is the official report made by the Attorney-General last Tuesday, after a conference with Secretary of State Dickinson and Congressman Lanning, his special counsel.

This decision is final unless reversed by the courts, and will be welcomed by many who have been in doubt about the matter, and especially to those directly interested in conducting the election.

THE NEW PRIMARY BALLOT.

The ballots to be used in primaries in this state are now official ballots, and the law regarding marked ballots applies to those used in primaries as well as to regular elections. On these primary ballots the municipal clerk must print the names of all candidates for whom petitions have been presented.

There may be any number of names on these ballots, although only one delegate is to be elected. The voter should cancel all names except those he desires to vote for. An uncancelled ballot will be thrown out. Care should be taken to learn how many candidates the district is entitled to before going into the election booth.

TO HAVE MUNICIPAL WATER WORKS

The borough of Garfield had a special election Thursday and decided to have its own municipal water works. The town has been supplied since it became a borough with water by the Garfield Water Company, which is composed of men from Passaic, New York and Garfield. The company also furnished water to Lodi, a distance of two miles away, under the name of a different company whose stockholders were the same. Recently the water company was asked to extend its mains to a new part of town which had been recently added. The company refused unless the borough would guarantee three hundred subscribers in addition to those already on the books. This refusal started the agitation for municipal ownership.

"BLACKLISTING."

What has been termed "blacklisting" in labor struggles has been declared legal in a suit brought against the Western Union Telegraph company in the United States court at St. Louis. The action was instituted by one Boyer and others, who alleged that they were discharged from the service of the company solely because they belonged to a telegraphers union; that the company maintained a "blacklist" on which had been placed the names of members of the union who had been discharged, and that by reason of this list having been furnished to others, the discharged employes were prevented from obtaining other employment. The judge held that the latter had the right to discharge an employe for any cause or without cause and that a like right to sever his relations with the company existed on the part of the employe, and that there could be no conspiracy to commit a lawful act such as the discharge of an employe not under contract. It was further held that the company had a right to maintain a list on which might be placed the name of a discharged employe and the cause of discharge, and that this list might be given to others, provided its contents were truthful and its circulation honest.

CHOOSING A VOCATION.

A youth should not choose a vocation merely because he thinks he will attain distinction or make money in it, says Success. Above his ambition to become a great merchant, lawyer, statesman, physician, artist or musician should be a desire to become a noble man. Other things being equal, he should choose that vocation which offers the largest opportunity for growth, and which will keep pushing his horizon a little farther and farther away from him. There are many callings that do not tend to develop a man and keep him growing after the first few years. The discipline in them is only a repetition of the exercise of certain faculties. There is no pushing out, no variety of experience.

THE SPECIAL ELECTION.

On September 22, 1903, a special election will be held in this state to amend the constitution regarding the manner of holding courts.

For many years this vexed question has been agitated, and unsuccessful attempts have been made to remedy the matter, but this will be the first time for it to be brought to a vote.

Attorney-General Robert H. McCarter regards the adoption of the amendments as of great importance, and believes their defeat would be nothing short of a calamity. In an interview on the subject Mr. McCarter said:

"The main features in the proposed amendments to the Constitution are the creation of a separate Court of Appeals of five Judges to take the place of the present court of sixteen members; making the Vice Chancellors constitutional officers and providing for their appointment by the Governor instead of by the Chancellor. The present Court of Errors and Appeals was constituted at least fifty years ago and consists of the Chancellor, Chief Justice, the Supreme Court Judges and six specially appointed Judges who are, or can be, laymen.

"The court was thus constituted when its business was small, and it is within the recollection of members of the bar when but two or three cases were argued before it. Now, between 200 and 300 cases are annually disposed of by the court. The Supreme Court Justices have in addition all their Supreme Court work.

"Up to a few years ago it had been the boast that Jersey justice was quick. We can no longer claim this, unless immediate relief be given to the Judges who are overrun with work. One cause of this congestion of the lists has been the great increase during the past fifteen years in the formation of corporations in New Jersey, from which the State last year derived in annual taxes $2,963,208.30, besides nearly half a million dollars paid for the privilege of commencing business. I think it can be truly said that more than one-third of the court's time is taken up with questions affecting corporations which have no business in the State.

"The Plan of the amendment involves an independent Court of Appeals of five members, all lawyers, who shall devote their entire time to appeal work. The Judges of the Supreme Court will remain in charge of all the work of that court, and will find themselves fully occupied. They will be enabled to try all jury cases instead of turning them over to Circuit or Common Pleas Judges, as now.

"I consider that a continuance of the present Court of Errors add Appeals would be a calamity. The Judges have striven manfully to attend to their duties, but the situation has now become, as most of them freely admit, intolerable.

"The other important change is in the transfer of the appointment of our Vice Chancellors from the Chancellor to the Governor. There are now six Vice Chancellors, all exercising practically coordinate power with the Chancellor in dispensing the business of the court. The Constitution not providing for the appointment of Vice Chancellors, these Judges have really no power or authority, except to recommend certain courses, with the result that their decisions, being merely advisory, are utterly ineffective till the Chancellor has performed the perfunctory duty of affixing his name—with a rubber stamp—to their orders. If he is sick or out of the State, though there are six able men daily transacting business, the work of the court must cease till the Chancellor is accessible.

"For these and many other reasons that might be expressed I heartily favor the adoption of the amendments."

UNDER certain conditions the Shamrock is a good reacher, but she can't reach far enough to get a grip on the cup.

THE managers of the Louisville Horse Show have adopted a rule requiring all roadsters to have long tails. Kentucky is noted for its fine horses, and the people there understand and love the animals. The people of Kentucky do not believe in docking horses tails.

THE Newark Evening News facetiously observes that "this alleged scandal in the Interior Department seems to indicate that the Indian still has a little something of which he can be robbed." It will come as a big shock to most people, and when considered in this light, great difficulty will be experienced in getting them to believe in the guilt of those charged.

AN exchange says the most infallible signs of prosperity are the enormous increase in postal receipts, the more than enormous increase in savings banks deposits, and the absurdly enormous number of strikes throughout the country. The people only can indulge in these things when prosperous, and the fact that they are doing so to a greater extent than ever before establishes the high degree of their general prosperity.

The Jersey City Journal says New Jersey has had 77 governors during its 238 years of existence. Of these 37 were provincial governors between 1665 and 1776, and 40 were state governors during and since the revolution. Since the state was created there have been twenty-three governors who were Democratic and seventeen who were of opposite parties. Federalists, Whigs or Republicans. The state owns portraits of only thirteen ex-governors.

IT IS A matter of congratulation to the whole State that President Roosevelt has accepted the invitation extended by Governor Murphy and Senators Murphy and Kean, to deliver the address at the unveiling of the monument on the battlefield at Antietam in memory of the New Jersey soldiers who fell in that battle.

The President being our highest representative, his delivering the dedicatory address will be a fitting tribute to those heroes for whom it is eminently proper that the greatest possible honor should be shown.

Growls from the Tiger.

Money is no object; most of us believe it a myth.

Most girls close their eyes when they are kissed; do you blame them?

The poor ye have always with you—often so close that they touch you.

Politeness is the salt of life; you hate to have it rubbed into you when you are cut up.

A lot of people who should be spending good time getting good money spend good money getting a good time.

It does not make it right to do what you ought not to do when you don't do what you ought to do.

It is all very well to get a good start, but the start you get when some fool puts his cold hands down your neck may be too good.—Princeton Tiger.

The Rewards of Culture.

It used to think it was nothin' but time and money wasted to send a girl to college.

Why, of course, the money power rules. Even the one cent postage stamp frequently has a corner on the envelope.

"There's a brandy smash!" as the wall said when a drunken man fell through a pane of glass.

The tide of the sea follows the moon—the tied of life the honeymoon.

He who knows not that he is victimized and knows not that he knows not, needs a guardian.—Adapted.

An Established Proof

of the superiority of LIFE INSURANCE is that farsighted and successful business men invest in it for large sums, notwithstanding their opportunities for other forms of investment.

Groceries, Meats, Vegetables, Butter, Bread, and Other household provender.

that can be purchased, at as low prices as consistent with quality.
A specialty of vegetables and fruits.

THE MARSHAL OF ABILENE

"Capt. Jack Crawford, the veteran scout and writer of sensational literature, recently penned for a Chicago newspaper some highly laudatory stuff about the famous 'Wild Bill' Hickok, marshal of Abilene, in which the captain portrays 'Wild Bill' as a good deal of a gent in a blue flannel shirt and leather chaps," said an old-time Washington civil engineer who has a good deal of work in connection with the building of the Pacific railroads, and especially those that run through Kansas. "Now, 'Wild Bill' was all right—a game and nervy man, as he had to be in his business—but he didn't perch on any little private Olympus of his own, and when it came his turn he was forced to take his medicine like any of the rest of the nervy and game ones of his day. Capt. Crawford doesn't make any mention in his story of a certain occasion upon which 'Wild Bill' was stuck up at the point of a gun just like anybody else of his day and date, but the thing happened all the same, as I well remember, for I was in Abilene at the time it occurred.

"There was a quiet, civil sort of a chap named Dave Harper running a monte game in Abilene at the time. 'Wild Bill,' like all of the marshals of tough towns in those days, had a way of dipping into the cash drawers of the gamblers when he needed change—it wasn't exactly protection money, for the games would have gone on, marshals or no marshals, but it was just one of the little 'perks' of the marshals of those days to pick out of the dealers' tills the dough that they happened to require. It was called 'tolling out.' When a marshal needed some money he would just drop into a place where one of the games was going on and 'toll out' of the drawer the amount that he felt he needed, and it was all right.

"'Wild Bill' was hitting the juniper juice one night while he bucked a faro game across the way from where Dave Harper was running his monte plant, and he, therefore, got a little reckless with Dave's money drawer. He entered the place the first time while Harper was out for a bite to eat, and reached in and took what he wanted. The lookout of the game didn't say anything.

"It was the custom, and, if it hadn't been, lookouts weren't saying things to 'Wild Bill' in those days. 'Wild Bill' went across the way to the faro bank, where he was sloughing off his chips, and dropped the 'toll out' in one deal. Then he returned to Harper's outfit. Dave Harper was seated at the table this time, dealing monte himself. 'Wild Bill' reached down into the drawer, leaning over the table to do it, and picked up a few pieces of the yellow bullion. Dave knew that that was 'Wild Bill's' second swoop on the till that evening, but he didn't say anything. But, when, about an hour later, 'Wild Bill,' pretty well used up with the mesquite fluid by this time, sailed in and started to reach for Harper's dust heap for the third time, Dave did what nobody in Abilene or anywhere else had up to that time had the nerve to do to 'Wild Bill.' He snapped up the gun that was hanging from a nail right alongside the money drawer, and he had it on the marshal so suddenly that 'Wild Bill' was for a second paralyzed with astonishment.

"'Stick 'em up, Bill,' quietly ordered Harper.

"'Wild Bill's' hands went up.

"'I ain't no hog, Bill,' said Harper then, 'an' that bein' th' case, I ain't a-goin' t' stand f'r your bein' one. This is th' third time that you've hiked along this way t'night f'r tollin' out. That's crowdin' th' mourners a bull heap, an' it don't go. You kin back out, Bill, keepin' 'em up.'

"And 'Wild Bill,' for the first time in his life, had to back thirty paces out of Dave Harper's monte plant, with his digits pointing to the zenith. The incident hurt 'Wild Bill's' prestige in Abilene a good deal, and he never entirely forgave Harper for the humiliation inflicted upon him that time. Harper left Abilene a very short time after that, which is no doubt the reason why he and 'Wild Bill' didn't figure in the gun play that Abilene awaited from the hour that its night marshal had to call heaven to witness with all ten of his fingers, while his guns hung uselessly in his belt."—Washington Star.

Mixed Classes in Anatomy.

Prof. Ludwig Stieda, probably the most famous anatomist in Germany, recently published a powerful protest against the movement among the professors of medical faculties in German universities for permitting women to attend medical lectures in the same classroom with men. He expresses the opinion that the presence of women must have an injurious effect both on the professors and on the women themselves. Prof. Stieda will not exclude women from medical study, but it is absolutely necessary, he says, that they be instructed in anatomy in separate classrooms.

HOUSEHOLD RECIPES.

For codfish balls, beat together until the mixture is light a cupful each of shredded codfish and mashed potato, to the latter seasoned with milk and butter as if for the table. When it is light, form into small, round balls, handling them as little as possible. Roll the balls in egg and bread crumbs and fry in a wire basket in deep fat.

The dishonest grocer seldom tries to correct the error of his weighs.

Policy of British Trade-Unionism.

By Frank Fayant.

THE refusal of the English higher classes to educate the working classes accounts, in a large measure, for the state of contented ignorance in which the submerged millions live. But no amount of education, unattended by an effacement of caste barriers, will put the English workingman on the same footing as the American. Our workers throw their whole strength into their tasks because they are ambitious to go higher, and because they know that no one will try to stop them from climbing. But the English worker looks upon his trade merely as a means of gaining a livelihood, and knowing that he is expected to keep in his own social plane, he does not seek to achieve greater things.

English workmen have banded themselves together into organizations that not only cripple the industries in which they are employed, but deprive them of any chance of bettering their condition. The whole idea of English trade-unions is that the workers are fixed on a certain level of material prosperity; as they cannot reach a higher level, therefore they must take measures to prevent their dropping to a lower. Labor, therefore, arrays itself in direct antagonism to capital. It accepts the caste brand set upon it by the higher classes, instead of fighting to efface the mark.

The "ca' canny" system permeates English industry. To "ca' canny" is to "go easy." The English worker's idea is that the less work he does, the more there will be left to do, and therefore the less will be the chance of his or his fellow-workers getting out of employment. This system went on very well before the days of American competition; but now that the products of American industries are invading English markets, the "ca' canny" workers are in a sad plight. Their slothful way of working so increases the cost of manufacture that the products of American shops may be sold with profit in the very towns in which the English articles are made, despite the fact that American workmen receive much higher wages, while their products have to be transported thousands of miles.—From "The Plight of the English Worker," in the American Monthly Review of Reviews.

Personal Triumph of the Late Pope.

By William T. Stead.

THAT the little Italian lad who was learning his letters when the Battle of Waterloo was fought should have succeeded in impressing the whole world at the beginning of the twentieth century with a sense of his own personality, that he should have towered aloft above us all without exciting envy or provoking dislike, and have demonstrated to a thousand jarring and intolerant sects and churches the supreme beneficence of his character, is an exploit the like of which we have not seen in our time. No doubt the Roman Church helped. The organization which covers Christendom with its twelve hundred bishops was no doubt essential to his success. But it was necessary for him to capture the organization. And it must not be forgotten that although the organization helped, it also handicapped him badly with at least one-half of Christendom. And the greatest triumph of the late Pope was not that which he won within the Church, but that which he achieved outside its pale. Greek Orthodox, Protestant and Freethinker alike learned to recognize that Leo XIII., despite all his papistical trappings, was a great statesman and a true man. The Russian Government was most anxious to welcome him to the conference at The Hague. The German Government repeatedly found occasion to appeal to his love of peace to assuage the bitterness of ecclesiastical strife within the empire. The King of England this Easter visited him in the Vatican, and in the United States the press with one voice has proclaimed him as the wisest and best of modern men.

That Pope Leo XIII. failed in many things is less surprising than that he should have succeeded in so many. He has left the chair at St. Peter surrounded by the aureole of his own virtue and his own wisdom, which not even the bigotry and intolerance of the Roman Curia can dim.—From a Character Sketch of Pope Leo XIII., in the American Monthly Review of Reviews.

Whistler and His Art.

By Ernest Knaufft.

IN the death of Whistler the world of art loses one of its foremost light. His fame presents, however, some curious contrasts. Though at every exhibition his works receive the highest award—while he was an officer of the Legion of Honor—while his portrait of his mother is one of the treasures of the Luxembourg, and his portrait of Carlyle in the Glasgow gallery one of the greatest of modern portraits, so far from being universal is his fame, it is notable that there are none of his paintings in the permanent galleries of London, where he worked for half a century, nor are there any in the permanent exhibitions of New York!

His art will ever be difficult to classify. Realizing that, though designated as an American painter, his art cannot justly be called American art, so pre-eminently cosmopolitan is it, future historians may be tempted to weave a theory of exotic influence from the painter's life-history, which is, that his grandfather was a colonel, his father a West Point engineer, his mother came from Wilmington, N. C.; he was born—some say in Baltimore, some in Stonington, Conn., and others in Lowell, Mass. He himself has testified in court that he was born in St. Petersburg, Russia; but in White's "National Cyclopaedia of Biography" an article which he revised, gives the place and date as Lowell, Mass., in 1834. At any rate, he spent his childhood in St. Petersburg, Russia, where his father was superintending the construction of the St. Petersburg & Moscow Railroad. In 1851 Whistler entered West Point, where he was far from being an ideal student. In drawing alone did he receive first class marks; chemistry was one of his stumbling blocks, and he has said: "If silicon had been a gas, I should have been a soldier." And it is not surprising that the man who was afterward so entirely a law unto himself should have cut a sorry figure in the army, where discipline takes precedence of the three R's.—From a sketch of James Abbott McNeill Whistler, in the American Monthly Review of Reviews.

Uncle Sam's Young Brothers.

WITHIN the domain of the United States on the North American continent there have been divers independent republics, the very name of three of which is known to but a few, while the record of two others, though memorable, is fast fading. How many Americans of to-day have heard, for example, of the Commonwealth of Watauga, which in 1772 was organized as an independent community by North Carolinians who had crossed the Alleghenies, and, descending into the basin of the Tennessee, had made themselves homes in the valley of the Watauga River? How many remember the Commonwealth of Transylvania, which was organized in the eastern part of what is now Kentucky in 1775, and which sent to the Continental Congress a delegate—who, however, was not admitted? How many have heard of the short lived State of Franklin, or Frankland, which at a somewhat later period was self created out of certain western counties of North Carolina? Of the present generation of schoolboys in the North, not many are familiar with the early history of Texas, which declared its independence of Mexico in 1836, and which for some nine years remained an autonomous republic entering into treaties with foreign countries, including the United States. Again, but little attention is now paid to that part of the annals of Vermont which deals with the fourteen years during which the territory bearing that name was an independent republic, unadmitted to the union of the American colonies, although it disclaimed allegiance to the British crown, rejected the overtures of British generals, and bore a conspicuous and useful part in the War of the Revolution. Vermont assumed a position calculated to test the stuff of which her patriots were made.—Harper's.

OUT OF A PIONEER'S TRUNK.

IT was a slightly cynical, but fairly good-humored crowd that gathered about a warehouse on Long Wharf in San Francisco one afternoon in the summer of '51. Although the occasion was an auction, the bidders' chances more than usually hazardous, and the season and locality famous for reckless speculation, there was scarcely any excitement among the bystanders, and a lazy, half-humorous curiosity seemed to have taken the place of any zeal for gain.

It was an auction of unclaimed trunks and boxes—the personal luggage of early emigrants—which had been left in storage in hulk or warehouse at San Francisco, while the owner was seeking his fortune in the mines.

The difficulty and expense of transport, often obliging the gold seeker to make part of his journey on foot, restricted him to the smallest impedimenta, and that of a kind not often found in the luggage of ordinary civilization. As a consequence during the emigration of '49 he was apt on landing to avail himself of the invitation usually displayed on some of the doors of the rude hostelries on the shore: "Rest for the Weary and Storage for Trunks." In a majority of cases he never returned to claim his stored property. Enforced absence, protracted equally by good or evil fortune, accumulated the high storage charges until they usually far exceeded the actual value of the goods; sickness, further emigration, or death also reduced the number of possible claimants, and that more wonderful human frailty—absolute forgetfulness of deposited possessions—combined together to leave the bulk of the property in the custodian's hands. Under an understood agreement they were always sold at public auction after a given time. Although the contents of some of the trunks were exposed, it was found more in keeping with the public sentiment to sell the trunks unlocked and unopened. The element of curiosity was kept up from time to time by the incautious disclosures of the lucky or unlucky purchaser, and general bidding thus encouraged—except when the speculator, with the true gambling instinct, gave no idea in his face of what was drawn in this lottery. Generally, however, some suggestion in the exterior of the trunk, a label or initials; some conjectural knowledge of its former owner, or the idea that he might be secretly present in the hope of getting his property back for less than the accumulated dues, kept up the bidding and interest.

A modest-looking, well-worn portmanteau had just been put up at a small opening bid, when Harry Flint joined the crowd. The young man had arrived a week before at San Francisco, friendless and penniless, and had been forced to part with his own effects to secure necessary food and lodging, while looking for employment. In the irony of fate that morning the proprietors of a dry goods store, struck with his good looks and manners, had offered him a situation, if he could make himself more presentable to their fair clients. Harry Flint was gazing half abstractedly, half hopelessly, at the portmanteau without noticing the auctioneer's persuasive challenge.

In his abstraction he was not aware that the auctioneer's assistant was also looking at him curiously, and that possibly his dejected and half-clad appearance had excited the attention of one of the cynical bystanders, who was exchangding a few words with the assistant. He was, however, recalled to himself a moment later, when the portmanteau was knocked down at $15, and considerably startled when the assistant placed it at his feet with a grim smile.

"That's your property, Fowler, and I reckon you look as if you wanted it back bad."

"But—there's some mistake," stammered Flint. "I didn't bid."

"No, but Tom Flynn did for you. You see, I spotted you from the first, and told Flynn I reckoned you were one of those chaps who came back from the mines dead broke. And he up and bought your things for you—like a square man. That's Flyn's style, if he is a gambler."

"But," persisted Flint, "this never was my property. My name isn't Fowler and I never left anything here."

The assistant looked at him with a grim, half-credulous, half-scornful smile.

"Have it your own way," he said, "but I oughter tell ye, old man, that I'm the warehouse clerk, and I remember you. I'm here for that purpose. But as that thar valise is bought and paid for by somebody else and given to you, it's nothing more to me. Take or leave it."

The ridiculousness of quarrelling over the mere form of his good fortune here struck Flint, and, as his abrupt benefactor had as abruptly disappeared, he hurried off with his prize. Reaching his cheap lodging house he examined its contents. As he surmised, it contained a full suit of clothing of the better sort and suitable to his urban needs. There were a few articles of jewelry, which he put religiously aside. There were some letters which seemed to be of a purely business character. There were a few daguerreotypes of pretty faces, one of which was singularly fascinating to him. But there was another, of a young man, which startled him with its marvellous resemblance to himself! In a flash of intelligence he understood it all now. It was the likeness of the former owner of the trunk, for whom the assistant had actually mistaken him! He glanced hurriedly at the envelopes of the letters. They were addressed to Shelby Fowler, the name by which the assistant had just called him. The mystery was plain now. And for the present he could fairly accept his good luck and trust to later fortune to justify himself.

Transformed in his new garb, he left his lodgings to present himself once more to his possible employer. His way led past one of the largest gambling saloons. It was yet too early to find the dry goods trader disengaged; perhaps the consciousness of a more decent, civilized garb emboldened him to mingle more freely with strangers and he entered the saloon. He was scarcely abreast of one of the faro tables when a man leaped up with an oath and discharged a revolver full in his face. The shot missed. Before his unknown assailant could fire again the astonished Flint had closed with him and instinctively clutched the weapon. A brief but violent struggle ensued. Flint felt his strength failing him, when suddenly a look of astonishment came into the furious eyes of his adversary, and the man's grasp mechanically relaxed. The half-freed pistol, thrown upward by this movement, was accidentally discharged point blank into his temple and he fell dead. No one in the crowd had stirred or interfered.

"You've done for French Pete this time, Mr. Fowler," said a voice at his elbow. He turned gaspingly and recognized his strange benefactor, Flynn. "I call you all to witness, gentlemen," continued the gambler, turning dictatorily to the crowd, "that this man was first attacked, and was unarmed." He lifted Flint's limp and empty hands, and then pointed to the dead man, who still grasped the weapon. "Come!" He caught the arm of Flint and dragged him into the street.

"But," stammered the horrified Flint, as he was borne along, "what does it all mean? What made that man attack me?"

"I reckon it was a case of shooting on sight, Mr. Fowler; but he missed it by not waiting to see if you were armed. It wasn't the square thing, and you're all right with the crowd now, whatever he may have had agin you."

"But," protested the unhappy Flint, "I never laid eyes on the man before, and my name isn't Fowler."

Flynn halted, and dragged him in a doorway.

"Who the devil are you?" he asked roughly.

Briefly, passionately, almost hysterically, Flint told him his scant story. An odd expression came over the gambler's face.

"Look here," he said abruptly, "I have passed the word to the crowd yonder that you are a dead broke miner called Fowler. I allowed that you might have had some row with that Sydney duck, Australian Pete, in the mines. That satisfied them. If I go back now and say it's a lie, that your name ain't Fowler, and you never knew who Pete was, they'll jest pass you over to the police to deal with you, and wash their hands of it altogether. You may prove to the police who you are, and how that d—d clerk mistook you, but it will give you trouble. And who is there here who knows who you really are?"

"No one."

"Then take my advice and be Fowler, and stick to it! Be Fowler until Fowler turns up and thanks you for it; for you've saved Fowler's life, as Pete would never have funked and lost his grit over Fowler as he did with you; and you've a right to his name."

He stopped and the same odd superstitious look came into his dark eyes.

"Don't you see what that all means? Well, I'll tell you. You're in the biggest streak of luck a man ever had. You've got the cards in your own hands! They spell 'Fowler.' Play Fowler first, last and all the time. Good-night and good luck, Mr. Fowler."

The next morning's journal contained an account of the justifiable killing of the notorious desperado and ex-convict, Australian Pete, by a courageous young miner named Fowler.

"An act of firmness and daring," said the Pioneer, "which will go far to counteract the terrorism produced by those lawless ruffians."

In his new suit of clothes and with this paper in his hand, Flint sought the dry goods proprietor—the latter was satisfied and convinced. That morning Harry Flint began his career as salesman and as "Shelby Fowler."

From that day Shelby Fowler's career was one of uninterrupted prosperity. Within the year he became a partner. The same miraculous fortune followed other ventures later. He was mill owner, mine owner, bank director—a millionaire! He was popular, the reputation of his brief achievement over the desperado kept him secure from the attacks of envy and rivalry. He never was confronted by the real Fowler. There was no danger of exposure by others—the one custodian of his secret, Tom Flynn, died in Nevada the year following. He had quite forgotten his youthful past, and even the more recent lucky portmanteau; remembered nothing, perhaps, but the pretty face of the daguerreotype that had fascinated him. There seemed to be no reason why he should not live and die as Shelby Fowler.

His business a year later took him to Europe. He was entering a train at one of the great railway stations of London, when the porter, who had just deposited his portmanteau in a compartment, reappeared at the window, followed by a young lady in mourning.

"Beg pardon, sir, but I handed you the wrong portmanteau. That belongs to this lady. This is yours."

Flint glanced at the portmanteau on the seat before him. It certainly was not his, although it bore the initials "C. F." He was mechanically handing it back to the porter, when his eyes fell on the young lady's face. It was the face of the daguerreotype.

"I beg pardon," he stammered, "but are those your initials?"

She hesitated; perhaps it was the abruptness of the question, but he saw she was confused.

"No. A friend's."

She disappeared into another carriage, but from that moment Harry Flint knew that he had no other aim in life than to follow the clew and the beautiful girl who dropped it. He bribed the guard at the next station and discovered that she was going to New York. On their arrival he was ready on the platform to respectfully assist her. A few words disclosed the fact that she was a fellow-countrywoman, although residing in England, and at present on her way to join some friends at Harrogate. Her name was West. At the mention of this he again fancied that she looked disturbed.

They met again and again; the informality of his introduction was overlooked by his friends, as his assumed name was already respectably and responsibly known beyond California. He thought no more of his future. He was in love. He even dared to think it might be returned; but he felt he had no right to seek that knowledge until he had told her his real name and how he came to assume another's. He did so alone—scarcely a month after their first meeting. To his alarm, she burst into a flood of tears, and showed an agitation that seemed far beyond any apparent cause. When she had partly recovered, she said, in a frightened voice:

"You are bearing my brother's name. But it was a name that the unhappy boy had so shamefully disgraced in Australia that he abandoned it, and, as he lay upon his deathbed, the last act of his wasted life was to write an imploring letter begging me to change mine, too. For the infamous companion of his crime, who had first tempted, then betrayed him, had possession of all his papers and letters, many of them from me, and was threatening to bring them to our Virginia home and expose him to our neighbors. Maddened by desperation the miserable boy twice attempted the life of the scoundrel, and might have added that of blood-guiltiness to his other sins had he lived. I did change my name to my mother's maiden one, left the country and have lived here to escape the revelations of that desperado should he fulfil his threat."

In a flash of recollection Flint remembered the startled look that had come into his assailant's eye after they had clinched. It was the same man who had too late realized that his antagonist was not Fowler.

"Thank God! you are forever safe from any exposure from that man," he said gravely, "and the name of Fowler has never been known in San Francisco save in all respect and honor. It is for you to take back—fearlessly and alone."

She did, but not alone, for she shared it with her husband.—Waverley Magazine.

A Woodland Echo.

As became the idle man having the time of his life in the primeval forests of the Temagamie Reserve in Canada, the Clerk of the New York Court of Special Sessions was graciously inclined to instruct the workers in camp. These, says the New York Tribune, were two young, unknown men who, with a canoe and a camping outfit, were likewise seeking backwoods experience.

He came once upon one of them baking bread in a portable aluminum oven before a smoldering log fire.

"Ah," said the clerk, assuming a reclining position of graceful ease, "baking bread, I see."

"Yes. It doesn't come up for a cent."

"You see," continued the clerk, with rising wisdom, "the baking-powder, which contains cream of tartar, liberates when heated a certain amount of carbonic acid gas, which——"

"Oh, don't talk shop!" interrupted the cook. "I hate it out here!"

"Oh, you do!" the clerk observed, astonished. "What business are you in, may I ask?"

"I'm an assistant professor of chemistry at Yale."

A Use For Prairie Dogs.

Scientists may some time find use for mosquitoes. On the western plains prairie dogs have been regarded as even more useless pests, and now comes a man who says that they serve such a purpose that henceforth instead of States offering bounties for them they will encourage the propagation of the little beasts. Louis Grosmentir (nomen et omen?) has, according to the Omaha Bee, discovered that prairie dogs are a very great aid to the cultivation of alfalfa. Mr. Grosmentir says that alfalfa, to grow, must be infected with a certain fungus, and that there is no agency of infection so good as the despised prairie dog. His discoveries are the result of four years of experiments.

The Power of Radium.

Suppose one should hold a crystal of radium in his hand with his face turned to the East. Suppose that one of the electrons were a leaden bullet circling the earth to its starting point. He would be shot in the back from the westward five times before he could fall to the ground, so rapid is the movement of the electrons.

THE BEE'S COMPLAINT.

I got up this morning as soon as the sun,
And any one fairly intelligent knows
That ever since summer has truly begun
There isn't much time for a bee to repose.
It's into this blossom and then into that
From earliest dawn till the day shall decline.
And show me the bee who could grow very fat
Upon labor like mine.

A butterfly coaxed me to wander away.
I bade him farewell at the apricot wall,
For how could I spare him a moment of play
With ninety-nine roses expecting a call?
It's "into the poppy and into the pink,
Remember the pansy and blossom-vine."
And small are the pleasures, whatever you think,
With labor like mine.

A buzz in the clover, a hum in the corn;
The cross-looking nettle says, "Don't forget me!"
And, thinking I've passed her, she mutters in scorn:
"I never thought much of that indolent bee."
It's blame in the garden and blame in the grove.
In terms of reproval the blossoms combine,
And, if on a troublesome path you would rove,
I prithee take mine.
—Chicago Record-Herald.

A MONKEY'S PETS.

Buck Inspector Sam Macy, who has been known for years as a fancier and owner of fine animals, tells the following story of a pet monkey which he owned several years ago and whose loss was almost as greatly felt as if it had been one of the members of the inspector's family. The monkey was brought to this country when very young and bought by Sam, who started to educate the beast immediately. It was a very willing and intelligent monk and soon learned to do many amusing tricks, being exhibited to the friends of the inspector and causing much wonder by its cleverness. When its master was at work it was chained in the yard, and soon became accustomed to the domestic animals which were its neighbors. The family cat and Joko were the first to make real friends, and when Tabby brought a family of nine kittens from under the house, Joko nearly went wild with delight.

Having none of its own species to associate with, the lively little monkey took to the company of the tabbies, and soon shared the responsibility of the care of the numerous family with Mrs. Tabby. The little tabbies grew up after a while and shifted for themselves, leaving their foster parent lonesome again, and so Joko next adopted a small pig. The monkey bossed the little porker about to its heart's content until the pig also grew up, and then the monkey, which was not very large, rode the pig about in a very comical fashion. After several years' captivity Joko learned to gather eggs, which he dutifully brought to the kitchen every day, one at a time.

His last accomplishment was learning to fish. He would haul in a small net which was set at Puuloa, and taking the fish out one by one, bite them in the head as he had seen the native fishermen do, and put them in a basket. One day he attempted to drag the net all by himself, and succeeded in making a pretty good job of it, but in his excitement he got himself entangled in the meshes and was pulled into the sea and drowned. When his master went to get his net he found poor Joko's body along with a large haul of fish. The monkey was buried, but the memory of his amusing tricks and useful assistance will long live in the recollection of the hack inspector.—Honolulu Bulletin.

TO MAKE A SQUARE KITE.

One of the easiest kites to make, perhaps, is the square kite. The frame is composed of split bamboo, and should be covered with tightly stretched Scotch cambric. Although called "square," yet it is not exactly so, it

being about one-half longer than it is broad. The frame should be bent backward, both at the top and bottom. This is to make the kite bulge outward, a position which should be maintained by means of twine stretched from the corners, both above and below. The breast-band should be attached in the usual manner, and the completed kite should have two tails instead of one, one at each lower corner.—New York World.

A PICTURE PUZZLE.

"Do you know who those ladies are, Andrew?"
Where is Andrew?

CONUNDRUMS.

What plant stands for No. 4? IV.

If a man bumped his head against the top of a room, what article of stationery would he be supplied with? Ceiling whacks (sealing wax).

Why is a tight boot like an oak tree? Because it produces acorn (a corn).

Why is a plum pudding like the ocean? Because it contains so many currants.

What is that which never uses its teeth for eating? A comb.

What ships hardly ever sail out of sight? Hardships.

Why is a peach stone like a regiment of soldiers? Because it has a colonel (kernel).

When is a watch not a watch? When it is a ticking (bed ticking).

What is the difference between a bald headed man and a rooster? One has a comb and the other doesn't need one.

When is a rose like a book? When the leaves are read (red).

Why should we ask a sailor if there is a man in the moon? Because he has been to sea (see).

What is that which shows others what it cannot see itself? A mirror.

When does a little girl eat music? When she has a piano for tea (pianoforte).

If you were on a high church steeple and had a handkerchief, a goose and a cane, how would you get down? Pick it off the goose.

Why is a bootblack like the sun. Because he shines for all.

What herb is like a bite from a kitten? Catnip.

What musical instrument should we never believe? A lyre.

ASSACRES IN THE BALKANS

en and Children Slain and Houses Burned by Turks.

VILLAGES DEVASTATED

thenticated by the Russian n Consuls at Monastir—Santing in Adrianople—Greatar — Turks Arming Bapparming to the Porte.

The latter sisted, whereupon the Mahometans became excited, and bands of soldiers and bashi-bazouks attacked the Bulgarian quarter of the town.

Constantinople, Turkey.—According to Turkish advices, when the insurgents captured Vasiliko, in the eastern part of the vilayet of Adrianople, they killed the garrison, consisting of fifty soldiers, and about 100 of the inhabitants.

The insurgents were threatening Midia, sixty miles northwest of Constantinople on the Black Sea, and were [illegible] attacking [illegible] in [illegible] drawn [illegible] Bosphorus. Greek and Montenegrin refugees have arrived at the mouth of the Bosphorus from the neighborhood of Midia, fearing a massacre there. They have been sheltered in the lazaretto at Anadoli-Kavek and are being fed by the authorities.

The lighthouse at Kuru-Burun, in Inada Bay, has been abandoned by its keepers on account of the nearness of the insurgents.

The Italian embassy has notified the Porte that it holds it responsible for any injury which may be done to the Consul of Italy at Monastir, and demands punishment of those who insulted the Consul recently by calling him a "giaour" (infidel).

All Turks to Be Called Out.

London.—A dispatch from Uskub to the Daily Mail reports that every able-bodied man in the European vilayets of Turkey will be called to the colors, sufficient proof of the gravity of the situation.

As a result of Russia's demands all the officials proved guilty of great cruelty in the vilayet of Kussovo by the Austro-Russian consuls two months ago have been dismissed and punished.

TROTS IN TWO MINUTES.

Lou Dillon Smashes the World's Record at Readville, Mass.

Readville, Mass.—Lou Dillon broke the world's trotting record on the mile track here, going in 2.00 flat.

The best previous record was 2.02¼ by Cresceus.

Lou Dillon's time by quarters was: First quarter, 30½; second, 30½; third, 30¼; last quarter, 29.

Lou Dillon is a five-year-old trotting mare. She was bought by C. K. G. Billings at a public auction in Cleveland, Ohio, last winter for $12,500. Her latest performance passed all expectations. But two living pacers have gone the mile faster than two minutes.

AWFUL LOSS OF LIFE.

Fire in Budapest — Over 100 Persons Burned to Death.

Budapest, Hungary.—Fire broke out in a four-story building, whose two lower floors were occupied by a fancy goods dealer named Goldberg and the upper floors by dwellers. There were 200 work people in the building, and the escape of many of them and of those who lived on the third and fourth floors was cut off by the flames.

One hundred and twenty persons lost their lives, including Goldberg's wife and son. The police announced that by jumping from the windows thirteen persons were killed and sixteen injured, nine seriously.

The damage is estimated at 4,000,000 kronen, mostly covered by insurance.

Prices Too High For Public Buildings.

In the cases of sites for public buildings in Carbondale, Pa.; Meadville, Pa., and Woonsocket, R. I., the Treasury Department, at Washington, is unable to purchase desirable property at prices within the appropriations, and will refer the cases back to Congress.

Waiters' Strike a Failure.

The strike of restaurant waiters and employes in Chicago was a failure, less than ten per cent. of the men responding to the call of the union officials.

HUMBERTS ALL CONVICTED

Promised "Revelation" of "Secret" Fails With the Jury.

Madame and Husband Go to Prison For Five Years, Her Brothers For Two and Three Years.

Paris, France.—Maitre Labori, the lawyer who conducted the defense of Dreyfus, sprang a dramatic climax to the trial of the Humberts. He timed it a minute or two before the case was given to the jury. His client, Madame Therese Humbert, delivered an impassioned speech to the twelve men who decided her fate. She closed by making a theatrical show of revealing the true identity of the mysterious Crawford, the mythical American whose millions she was supposed to have inherited.

"Now, gentlemen of the jury," she said, "I will give you the name of the Crawfords, as they told it to me. They told me in answer to my insistent questions. I cannot guarantee its accuracy, as I had to rely on their word. M. Crawford said to me: 'We are known as Crawford, but our real name is Regnier. My fortune was made during the war of 1870 by speculation in rentes, which were then very low, and a large number were bought here.'

"Regnier! That is his name! Not Crawford!" she declared; "the Regniet who was intermediary between Marshal Bazaine and the Germans."

Then she made a long pause, during which she and her husband, Labori and Romaine Dauregnac watched the effect of her revelation on the jury. The faces of the latter suggested that it had done little more than kindle a half-amused interest.

"You know of this Regnier," she continued. "He intrigued with Bismarck. He was connected with the treason of Marshal Bazaine. He was condemned to death by court-martial. His identity seems to be otherwise unknown. What I say is true. I learned Crawford's real name in the manner I have stated. I never told my husband. I swear it on my daughter's head. This is the first time my husband has heard the name."

She paused again and turned to the presiding judge. "What I say is true," she reiterated. "The Crawfords exist the fortune exists. I have cheated no one. I have made no false representations. I shall bring actions against the Crawfords."

Once again she addressed the jury: "I will say no more, gentlemen. It is enough to assure you that the fortune exists. There you have the whole Humbert case and the whole Crawford case."

Then she pitched her voice to a much higher key. "I have full confidence," she declared, "complete confidence, and now I await my fate."

There was a prolonged movement among the spectators. Their faces, like those of the jury, evinced a feeling of disappointment.

Maitre Labori arose and delivered a brief address to the jury. The substance of it was that the twelve men were now in full possession of the secret of Mme. Humbert; that she had told them the same as she had told him. He read from a paper some facts bearing on the secret history of the Franco-Prussian War. By these it was shown that a Regnier acted as intermediary between Prince Bismarck and Marshal Bazaine.

The grand climax came a little later when the jury brought in a verdict of guilty. From the manner in which it was received by the people it was a decidedly popular verdict.

There was no delay in pronouncing sentence. Mme. Therese and Frederick Humbert were each sentenced to five years' imprisonment. Romaine Dauregnac to three years and Emile Dauregnac to two years.

Following the announcement of the verdict Maitre Labori raised technical objections to the proceedings as a probable basis of appeal.

The great epoch of Mme. Humbert's career of fraud dates from the invention of the American millionaire, Robert Henry Crawford. The story she told was that at Nice, in the South of France, she saw a stranger, Robert Crawford, suddenly fall as he was getting into a train. She went to his assistance and nursed him back to life. In gratitude he left to her his whole fortune, amounting to $20,000,000.

The fictitious millions served as security on which loans were raised from all classes of people, bankers, usurers, small tradespeople and country squires. In order to prevent the opening of the safe, in which she declared the will had been placed, and the inevitable exposure of the fraud, she instructed lawyers who represented the phantom nephews, and other lawyers who argued her own case, thus putting off from year to year the opening of the safe. The whole cumbrous legal machinery of the French Republic was turned to her own purpose, but the crash finally came, and she and the members of her family were arrested.

BRITISH KILL 700 TRIBESMEN.

Battle in Northern Nigeria in Which Most of the Chiefs Were Slain.

London.—The Colonial Office issued a dispatch received by Secretary Chamberlain from the Governor of Northern Nigeria, which states that a British column, consisting of thirty whites and 500 natives, with four Maxim guns, successfully attacked Burmi. After a determined fight the rebellious tribesmen were routed.

They suffered a loss of 700 killed. The town was destroyed. The British loss was eleven killed and seventy wounded.

The former Sultan of Sokoto and most of the chiefs were killed.

Sunday Law in Florida.

The Sunday League, of Florida, has sent letters to the Sheriff and Mayor of Pensacola, demanding a rigid enforcement of the Sabbath observance laws, which had become gradually relaxed since their temporary enforcement a few months ago. The Mayor replied that the laws were State statutes and that he had no authority for their enforcement. The Sheriff refused to do anything in the matter unless those who called for the enforcement of the laws would swear out warrants for the arrest of the offenders.

TAFT WILL SUCCEED ROOT

Philippines Governor to Be Secretary of War.

OFFICIAL LETTERS MADE PUBLIC

Secretary Root Will Retire in January Under an Arrangement With the President, Who Sends Him a Letter of Appreciation — General Luke Wright Selected For Governor of Philippines.

Oyster Bay, L. I.—Secretary Root, under date August 19, has presented his resignation formally to the President. The resignation was accepted by the President with the understanding that Mr. Root continue as Secretary of War at least until January 1.

Governor William H. Taft, of the Philippines, will succeed Mr. Root as Secretary of War, and General Luke E. Wright will succeed Judge Taft as Governor of the Philippines.

President Roosevelt authorized the following statement:

"The President some months ago tendered the Secretaryship of War to Judge Taft, and at that time it was arranged that he would succeed Secretary Root. Secretary Root will go out of office some time in January, and Judge Taft will assume the duties of the office shortly afterward."

The President also authorized the publication of the correspondence between him and Secretary Root concerning the latter's resignation.

In his letter to the President Mr. Root referred to his wish to retire to private life after the establishment of the General Staff of the Army and the completion of his four years of service as Secretary of War. Now, on the eve of sailing to England to sit on the Alaska Boundary Tribunal, he tendered his resignation, to take effect upon the appointment and qualification of his successor. Mr. Root continued:

"I shall carry with me unabated loyalty to your Administration, confidence in the sound conservatism and patriotic unselfishness of your policy, and enduring gratitude for the kindness and consideration with which your friendship has honored me. I shall not cease to appreciate the sympathy and loyalty to President McKinley with which you took and carried on his work, and I shall always be happy to have been a part of the Administration directed by your sincere and rugged adherence to right and devotion to the true interests of our country."

President Roosevelt, in his acceptance of Mr. Root's resignation, said that his personal loss in the withdrawal of the Secretary of War from public life was very great, but that his sense of loss to the nation was even greater. The President, after highly praising Mr. Root's work in the War Department, said:

"Your duties have included more than merely the administration of the Department, and the reorganization of the army on an effective basis. You have also been the head of the department which dealt with the vast and delicate problems involved in our possession of the Philippine Islands, and your success in dealing with this part of your work has been as signal as your success in dealing with the purely military problems. To very few statesmen, indeed, in any country is it given at one and the same time to achieve signal and striking triumphs in the administration and reform of the military branch of the Government, and in the administration of what was in effect a department of insular dependencies, where the problems were new to our people and were in themselves of great difficulty.

"Moreover, aside from your work in these two divisions of the Government service, I appreciate most keenly the invaluable advice and assistance you have rendered me in innumerable matters of weight not coming directly in your departmental province, but in which I sought your aid with the certainty of not being disappointed. Your position on the Alaskan Boundary Commission at the present moment is an illustration of these services.

"May all good fortune attend you wherever you are; the American people wish you well, and appreciate to the full the debt due you for all that you have done on their behalf."

RAPS BRITISH WAR OFFICE.

Boer War Commission Condemns Lack of Preparation.

London.—The report of the Royal Commission on the South African war, just issued, refrains from commenting on the conduct of individual officers; strongly condemns the lack of preparations for war; indorses Lord Lansdowne's opinion that such a condition is full of peril to the empire, and says an "unsatisfactory and insufficient safeguard has since been suggested to prevent a recurrence of so serious a scandal."

From the beginning to the end of the war 448,435 troops were engaged. Owing to the drain Great Britain, in 1900, became dangerously weak.

No system, it is declared, is satisfactory which does not provide for expansion outside the limit of regular forces. A higher degree of intelligence and a well-educated staff are necessities.

Kaiser Buys Another Estate.

The Emperor of Germany has added another residence to the fifty-three he already owned by buying the estate of Drewa-Muehle, called "the Pearl of Brandenburg," for $500,000. It was owned by a country squire, Herr von Mollank. The house will be rebuilt and converted into a hunting castle.

Peasant Outbreak Near Rome.

The peasants around Rome, Italy, have invaded the estates of Princes Chigi, Torlonia and Piombino, claiming the right to cultivate the land and share in its profits. Soldiers have been sent to the scene to re-establish order.

First White Hanged in Sixty Years.

Robert Kilpatrick was hanged in the jail yard at Media, Pa. for the murder in February, 1902, of Elizabeth Bearmore, his housekeeper. He was the first white man to be executed in Delaware County in more than sixty years.

VESUVIUS SPOUTS FIRE

Volcano Belches Forth a Great Stream of Lava and Stones.

Side of the Mountain Opens Out — Superstitious Neapolitans Want Professor Krull Expelled.

Naples, Italy.—The people of Naples and the environs witnessed a remarkable spectacle at noon a few days ago. One thousand feet below the central cone of Vesuvius the volcano opened like a huge mouth, out of which belched a fiery stream of lava, which ran down the side of the mountain and at first seemed to menace the observatory. This building, however, is protected in the direction of the stream by a mound of lava 200 feet high, which was thrown out during the eruptions of 1895 and 1898.

The eruption occurred without any warning whatever. There was no earthquake, detonation or rain of ashes—nothing but a clear stream of lava and red-hot stones, which were thrown to a height of 700 feet, producing an extremely beautiful effect seen from Naples. The stream of lava, which was fifteen feet broad, at 11 o'clock p. m. had covered a distance of 2700 feet. It deviated later from the direction of the observatory, which is no longer menaced. The only danger is for the new electric tramway up the volcano, which, however, has thus far not been touched. The eruption already seems to be decreasing, and it is hoped that no damage will result from it.

The spectators far enough away not to be frightened stood entranced at the spectacle, but those nearer to the volcano were seized with panic when the eruption began and rushed down from the sides of the mountain and from the adjacent country to the villages of Portici and Resina, which are built over the ruins of Herculaneum. The alarm in these villages was somewhat quieted by the Mayors affixing notices declaring that there was no danger and exhorting the people to remain calm.

The Chief of Police of Naples has gone personally to make a tour of the villages around Vesuvius in order to reassure the peasants and superintend any measures of protection which may be deemed necessary. The superstitious lower classes are agitating for the expulsion of Professor Krull, of Munich, who predicted the eruption, saying that he has the "evil eye."

TOM JOHNSON FOR COVERNOR.

Named by the Ohio Democrats in State Convention at Columbus.

Columbus, Ohio.—At the Democratic State Convention here Mayor Tom L. Johnson, of Cleveland, was named for Governor and John H. Clarke, of Cleveland, was indorsed for United States Senator. Although the opposition obstructed the proceedings with minority reports for some hours, the name of John L. Zimmerman, of Springfield, was not presented for the nomination for Governor, and every nomination on the State ticket was made by acclamation.

A platform indorsing the Kansas City declaration of William Jennings Bryan was adopted, and a special resolution asking Mr. Bryan to speak during the campaign was also passed.

The declarations upon national questions are as follows:

"Assembled in convention at Columbus, preparatory to the State election of 1903, we, the Democrats of Ohio, reaffirming the declaration on national issues in our platform of 1902, adopted at Sandusky, hereby renew our allegiance to the Democratic party of the nation, and again avow our devotion to the principles of its last national platform. We accordingly condemn colonialism and imperialism, denounce trusts and trust fostering tariffs, repudiate government by injunction, and oppose financial monopoly, together with every other legalized monopoly and legalized privilege. Adhering to these principles of the Kansas City platform, we repeat our condemnation of all efforts to renounce or ignore them.

"Until United States Senators are required by amendment of the Federal Constitution to be elected by popular vote nominations of candidates for United States Senator should be made by State conventions."

"BILL ARP" PASSES AWAY.

Death of Major Charles H. Smith, the Noted Southern Humorist.

Atlanta, Ga.—Major Charles H. Smith, better known as "Bill Arp," is dead.

Mr. Smith was born in Lawrenceville, Ga., June 15, 1826. He was the son of A. R. Smith and Caroline Ann Maguire, and was graduated from Franklin College, Athens, Ga., in 1848. He went to Rome, Ga., where he practised law for twenty-seven years.

He wrote weekly letters to newspapers in the South for many years. Among some of the works of which he was the author are "Bill Arp's Scrap Book," "A Side Show of the Southern Side of the War" and "Georgia as a Colony and State, 1733-1892."

KING PETER'S LIFE IN DANGER.

Six Plotters Condemned to Death, Five of Them Army Officers.

London.—The Daily Mail's correspondent in Belgrade says King Peter is determined to suppress the military malcontents with an iron hand.

Three army colonels, two captains and a newspaper editor have been condemned to death for participation in a plot which has been discovered.

Despite this, however, says the correspondent, the King is obviously in the hands of the recent regicides, who are causing a veritable reign of terror.

Colombians Menace a Turkish Colony.

Honda, the most important town on the Magdalena River, situated sixty-five miles northwest of Bogota, Colombia, and having a population of 4000, is in arms against a Turkish colony which has been established there.

Sisters to Work Among Lepers.

Sister Leata, of Louisville, Ky., is at the Franciscan convent in Syracuse, N. Y., making preparations to accompany Sister Mary Leonida to the Sandwich Islands, where they will work among the lepers.

RELIANCE AGAIN WINNER

Sir Thomas Sees His Boat Beaten by a Small Margin.

DEFENDER THE BEST, HE SAYS

The Second Race Sailed Over a Triangular Course—Shamrock III. Reaches as Well as Reliance — Challenger Made a Bad Start, But Both Yachts Were Admirably Handled—Magnificent Contest.

New York City.—Shamrock III. "found herself" in the triangular race off Sandy Hook, the second of the series, with the cup defender Reliance, in a sea that did not disturb the daintiest amateurs in gilt-fronted cap, and with just the sort of wind the Briton's admirers say she has been longing for, she was defeated, but not ingloriously.

The time of defeat might have been reduced to mere seconds if bad seamanship aboard the challenger at the beginning of the contest had not resulted in a handicap of nineteen seconds for her. As it was, Reliance won by three minutes and sixteen seconds, elapsed time, and one minute and nineteen seconds, corrected time, Reliance allowing one minute and fifty-seven seconds to Shamrock III. Notwithstanding that the breeze blew with force varying from only six to twelve miles, Reliance's time over the course

AMERICA'S CUP.

(three hours, fourteen minutes and fifty-four seconds) was only one minute and thirty-six seconds slower than that made by Columbia when she defeated Shamrock II. on October 3, 1901, in a piping northwester through choppy seas, establishing a record for single-stickers in a cup race. Considering the lightness of the breeze, the time of the racers may be considered remarkable.

Reliance's gain on the first, or windward leg of the course, was one minute and eight seconds; deducting the handicap of Shamrock III. at the start, the actual gain of the defender was only forty-nine seconds. On the second leg of the course, with the wind over the starboard quarter, Reliance gained one minute and twenty-three seconds. In the reach for home, during which the breeze shifted somewhat to westwa Reliance gained forty-five seconds.

The first leg was ten miles to the south, about parallel with the Jersey coast; the second leg, ten miles northeast by east, one-half east; the third leg, ten miles northwest by one-half west. When the preparatory gun was fired the giants were maneuvering north of the line, drawn between Sandy Hook Lightship on the east and the tug Navigator, anchored about a quarter of a mile away to the west. They carried mainsails, clubtopsails, forestaysails and jibs, with handkerchief jibtopsails in stops ready to break out.

Sir Thomas Lipton, on the second defeat of Shamrock III. by Reliance, philosophically said: "You have all seen the results, and the only thing I can say is that we did better to-day than in the last race, which is hopeful. I figure my defeat at a little over one minute. If I make as much progress in the next race as I have in this one over the last I'll be a good bit ahead when the finish line is reached. I was more than pleased at the way my boat was handled to-day.

"It is hard to admit it, but the best boat won. Perhaps if we had had more wind at the finish the result might have been different. But I do not want to throw cold water on the victory. It is hard to win every race in such a series, and I hope our turn will come next."

In returning from the yacht race in the afternoon the steamboat Monmouth, loaded with member of the New York Yacht Club, and J. P. Morgan's yacht, the Corsair, were in collision.

The Corsair was on the starboard side of the Monmouth, and the two were steaming in parallel lines. The Corsair suddenly deflected to port, expecting, presumably, that the Monmouth would do the same. But the Monmouth was unable to do so, owing to the fact that the Josephine, also loaded with people, was on her port side. The prow of the big black yacht struck the Monmouth amidships. Fortunately she slid off, tearing away the awnings and the rail of the Monmouth. The Corsair also was somewhat damaged, one of her lifeboats being smashed.

Woman Cured of Lockjaw.

Mrs. Feberiff A. Mecento, who was shot in the ankle July 4, and who was ill for twenty-six days with lockjaw, at St. Paul, Minn., has been pronounced completely cured by her physician. During all the time of her illness her muscles were rigid, and she suffered intense pain.

Descendant of Daniel Boone Dead.

Richard Boone, the great-great-grandson of Daniel Boone, the famous Kentucky pioneer, died at Bethlehem, Pa., of consumption.

NATIONAL GAME.

Lush is playing wonderful ball for Detroit.

Keeler has apparently regained his batting eye.

Binghamton has released outfielder Smith for light hitting.

Wagner is the real leader of the National League batsmen.

Joe Kelley, of the Cincis, is one of the best general players in the country.

Pitcher Doheny has been permitted by Manager Clarke to rejoin the Pirates.

Ed Grenanger is playing great ball for Boston hitting hard and covering third base.

Long Tom Hughes is one of the five great pitchers who recovered the use of a broken arm.

Kitteridge has made his first error in thirty games with Washington. He accepted 148 chances.

The New York League Club has purchased pitcher Leon Ames from the Ilion Club of the New York League.

Acting Manager Wagner, of Pittsburg, predicts that Veil will some day be one of the League's star pitchers.

Jiggs Donahue, the first baseman of the Milwaukee Association Club, has been sold to the Chicago White Stockings.

Tim Murnane says: "If the Pittsburg champions go against the Boston Americans this fall for the world's championship, they must be in better shape than they have been so far this season, to make anything like a good showing."

Said the New York Sun the other day: "No player in a long time has so impressed New Yorkers by his snappy work in all departments as Elberfeld. He is a player of the Tinker-Parent style. Gilbert is just as fast and lively but does not hit as well as the other three."

SPORTING BREVITIES.

Dugglelby is pitching great ball for the Phillies.

The new race track at Los Angeles, Cal., will be called Ascot Park.

The football game between Princeton and Annapolis has been cancelled.

Harvard expects to have the new stadium ready for the big football games.

The upper end of the New York Speedway has recently been resurfaced.

J. A. T. Bramston, with a record score of seventy-five, won two cups at the Homewood links, at Chicago.

W. B. Leeds and Mrs. V. E. Macy, of Philadelphia, were the chief winners at the horse show at Bar Harbor, Me.

Africander won the Champlain Handicap in the mud at Saratoga, N. Y., Hermis and McChesney not starting.

John Bullman has been suspended by the stewards of the Saratoga (N. Y.) race track for his rough ride on Choate.

A number of small towns in the vicinity of Middleboro, Mass., are talking of forming a half-mile trotting circuit.

Gold Saint won the Albany Stakes at the Saratoga (N. Y.) race track and James R. Keene's Futurita, at thirty to one, beat the best sprinters.

Albert Champion has lowered the Rhode Island record for twenty miles motor paced, defeating Harry Caldwell by two miles and four laps, and covering the distance in 25.21 4-5.

The Doherty brothers successfully defended their title to the American lawn tennis championship in doubles by defeating the Western champions Kreigh Collins and L. H. Waidner, winning three straight sets.

Plans for the resumption of football relations between Pennsylvania and Lafayette College have been started, and there is now a possibility that the two institutions will again meet on the gridiron next fall, after a break of three seasons.

LABOR WORLD.

England has nearly 1000 female butchers.

The price of labor in Alaska is $4.50 to $6.50 a day, with board.

Planers in Holland are paid at the rate of eight cents an hour.

Cab drivers of Paris, France, threaten to strike for increased pay.

Carpenters at Hoquiam, Wash., have demanded an eight-hour day.

French Canadian carpenters at Providence, R. I., have formed a union.

In Saxony, Germany, there is an industrial school for every 14,611 inhabitants.

The strike of building laborers at Minneapolis, Minn., is causing a departure of many bricklayers to other fields.

A legal bureau has been established by the Chicago Federation of Labor to fight injunction and other Court proceedings.

Employes of Santiago, Chile, electric railways are dissatisfied with present working conditions and threaten a strike.

In the Austrian textile industry the working hours are ten to eleven a day. Men's weekly wages average $3.60; women's $1.50.

Tailors and cutters at Indianapolis, Ind., will demand a uniform system of work, a minimum wage scale and uniform hours.

The Retail Clerks' International Union now numbers 60,000, and has recently been increasing at the rate of 4000 a month.

Silver workers at Toronto, Ont., are out to form a union of their calling. They have in the past affiliated with the brass workers.

The striking meat cutters at Rochester, N. Y., have opened several union meat markets in competition with their former employers.

Longshoremen at Nilo, Hawaii, have demanded a shorter work day. They now work ten hours.

Fatal Collapse of a Wall.

One man, an Italian laborer known as No. 1268, was killed and two others sustained probably fatal injuries by the collapse of a section of a foundation wall built under the Adams building on Court street, at Boston, Mass., in connection with excavation for the East Boston tunnel.

The man who rides a hobby is apt to decide that of his neighbor.

SALISBURY PASSES AWAY

British Statesman Succumbs to Bright's Disease at Ancestral Home.

THRICE MADE PRIME MINISTER

Lord Salisbury, in His Youth, Forced to Earn His Own Living for Marrying Against His Parents' Wish, Turned Newspaper Writer and Gold Digger—Mourning in England.

London.—Lord Salisbury died at Hatfield House in the seventy-third year of his age. He was kept alive for hours by the constant administration of oxygen, but the ravages of the disease—Bright's disease—were such that all methods of scientific stimulation could not put off the final collapse.

It is understood that Lord Salisbury recently expressed a wish to be buried beside his wife at Hatfield.

The end of the distinguished statesman was a peaceful one, without the slightest evidence of pain. When death became imminent the attending physician summoned the waiting members of the family, who gathered at the bedside and bade farewell to the dying man, who, however, was unconscious of their presence.

Viscount Cranborne, who now assumes the title of Marquis of Salisbury, immediately notified King Edward and Queen Alexandra, the Prince and Princess of Wales and others, including Lord Edward Cecil, the soldier son of Lord Salisbury, who is now in Egypt, and who was the only child of the Marquis absent from the death bed. Soon messages of condolence began coming in, and the little telegraph office at Hatfield was swamped with unprecedented business.

Chief of four Cabinets of the English Empire, nineteen years a Cabinet Minister, fourteen years Foreign Minister, twelve years Premier of England, a Premier of great strength of character and of almost despotic sway, in his youth an adventurer in the gold fields of Australia and a journalist in London, the life of Robert Cecil, Marquis of Salisbury and chief of the great house of Cecil, ended at the ripe age of seventy-three years.

Lord Robert Cecil was the first title that he bore, for the Viscount Cranborne, his elder brother, stood as heir to the title of Marquis of Salisbury and the great estates of the house of Cecil, including the mansion and grounds at Hatfield, where Lord Salisbury died.

Lord Robert Cecil found himself facing the necessity of maintaining a position as member of this great household on an exceedingly slender income. He tried to improve his fortunes in the Australian gold mines. He made some money and returned to England. There despite the protests of his family he married Miss Alderson, daughter of a barrister. She came to him dowerless.

The future Premier was driven to supporting himself by journalistic work, and it is true that even when his years were young his political and economic opinions as expressed in leaders that he wrote for London newspapers, and which appeared also in the Saturday Review brought him into such prominence that he earned a nomination for Parliament. He left no doubt of his calibre in anybody's mind on that successful campaign. He was the very personification of a hard fighter. This was in 1851.

His was no meteoric rise. He fought fifteen years to gain higher rank than that of a member of the House of Commons. In 1866 he was made Secretary for India. In 1867 his father died, and shortly afterward, while in the midst of a heated debate in Commons he was interrupted and called to the lobby and informed of the death of his brother. Thus he succeeded to the Marquisate and the wealth and estate and chief place of the house of Cecil, and moved from the House of Commons to the Lords.

After the Berlin conference, where, as Britain's representative, he checkmated so iron-willed a diplomat as Bismarck in the latter's desire to dismember Turkey, he returned to England, and was the logical successor of Lord Beaconsfield as the leader of the Conservative party.

Lord Salisbury at a single stride placed himself as premier in the debaters of the Lords. His was the oratory of repression, usually clear, succinct, unemotional. But there were times when the Premier could rise to a fast and powerful flow of vituperative rhetoric that was brilliantly figurative and exceedingly picturesque, aided as it was by his giant form and clear, ringing voice.

His first term as Premier was brief—from 1885 to 1886—but in that time he proved himself a great leader, and when the Conservatives returned him to power in 1887 his tenure of office lasted until 1892. Then he gave way to Gladstone and followed him in 1895.

The close of the Boer War found him ready to step down from power. This he regarded as the crowning event of his long career. He intended staying in power until after the coronation of King Edward, but as the coronation was postponed, he decided to retire at once.

Lord Salisbury was consistently a conservative in the matter of home affairs. He was the enemy always of home rule, the champion of a policy of protection for British industries and a firm upholder of gold as the standard metal. But in foreign affairs he was aggressive and radical. He was ever favorable to adding new territory to the empire. In the matter of the Venezuelan controversy alone did he ever recede from this aggressive position. Then he admitted the validity of the Monroe doctrine.

Fish Nibble Cost His Life.

A fish nibbling at his line so excited Frank Yaniski, a Polander, that he lost his balance and tumbled into the Christiana River at a wharf in Wilmington, Del., and drowned before the gaze of several companions, too terror-stricken to render any aid.

Manchurian Open Door.

Recent developments indicate that Russia does not intend that the Manchurian open door shall be attractive to other countries, and means to monopolize the trade as much as possible.

A Unique Children's "Nursery."

There is one place at Atlantic City where the children of aristocratic parents mingle with those of the humble, all bent upon having a royal time. It is indeed the children's paradise, and it is the product of a man whose years have bent his figure. He is Thomas E. Weer, and he has always been fond of youngsters.

About four years ago Mr. Weer conceived the idea that a spot where little ones could enjoy all the amusements so dear to their young hearts and at the same time be secure from wandering away and causing heartaches for their parents, would be a good institution. So he put his idea into practice and secured a spot under the boardwalk and installed swings, hobby horses, slides and other devices calculated to attract the interest of the juveniles.

It was not long after Mr. Weer started his "nursery" before he had been intrusted with the care of several scions of wealthy families who, while anxious to take the dip into the surf, did not wish to trust their children entirely to the care of the maids who, in many instances, were entire strangers to the beach and its peculiarities. From a small beginning the "nursery" has grown to be one of the large institutions of the resort. Children from all paris of the United States and occasionally from foreign shores are to be found there playing as one happy family.

Many of these children have been patrons of the "nursery" before and always remember "Old Grandpa" who cares for them.

When the Goulds were there in the spring they intrusted their children to Mr. Weer's keeping, with the maids in attendance, and for several days these future magnates enjoyed rustic life as they had never experienced it before. The grandchild of Senator Matthew Stanley Quay was also a charge of Mr. Weer's at various times. While the rich are accorded the privilege, the poor are by no means barred, and the daily excursionist fares just as well as does the owner of millions.

Every child wears a bright red tag fastened to some portion of the clothing. This is familiar to the policemen along the boardwalk and the life guards on the beach. So if a tot should by any chance happen to stray away while the guardians were busy attending to the pleasures of other little guests they are sure to fall into safe hands and are speedily returned to the fold. Remarkably few of them ever wander away, however, the majority being all too willing to remain within the confines of the playground, where they have everythidg to amuse them.

Fleeting Glory.

Where is the spring, where the summerdays gone?
Gone, where the glorious sunbeams are born:
They vanish'd away like the dew on the grass
Seasons are silently coming, they pass.

Midsummer's over, the harvest is past,
The hay crop and grain in the garner at last;
Farmers are gath'ring from valley and hill
The fruit of hard labor, their store house to fill.

Though springtime and summer are fast passing away,
And beautiful autumn is doom'd to decay,
We know there exists a perpetual spring
In the land beyond Jordan—the home of the "King."

SOPHIE STAHL.

Road to Stirling Being Macadamized.

Warren Township is having the road from North Plainfield Township line to the Passaic river macadamized. A portable stone crusher is located at the corner of E. E. Cooper's land.

Notice to Correspondents.

Personals, social gatherings, celebrations, anniversaries of various kinds, reception, etc., will be published in the REVIEW free. All copy must be written plainly, preferably in ink; and names must be clearly written and correctly spelled. write only on one side of the paper. Full information in regard to weddings is always desired, and when requested a reporter will call to secure facts for publication. No attention will be paid to items of news forwarded to this office unless the sender gives his or her name and address. These will not be printed, but it is necessary to have them properly vouched for.

Ambition.

I'd rather give the world a smile
Than preach a mile long sermon,
For honest laughter's worth the while,
And mirth is quite confirmin'.

There's medicine in "ghoulish glee,"
Rare tonic force in laughter;
But may my humor kindly be—
No bitterness come after.

I'd rather make a nation's jokes
Than preach a nation's sermon,
And tickle ribs with friendly pokes
Than set the race a-squirmin'.

"There goes that funny, funny man!"
O words more sweet than honey.
Besides, a reputash, like that
Is worth a pot of money!

Moral.

'Tis funny to be funny,
But
There is such a thing as money.

There is an old maid probate judge in Kansas. She says she has the drop on the men now. If any of 'em come in at all they must come in to court.

The slang name for dollars is cases. No wonder money talks—there is a woman in the case.

The ho-down dancer always seems to enjoy himself though kicking on the situation.

Horses hardly come right at the command of the driver.

If You Want

If you want posters,
If you want bill heads,
If you want envelopes,
If you want statements,
If you want note heads,
If you want show cards,
If you want letter heads,
If you want calling cards,
If you want business cards,
If you want invitation cards,
If you want business circulars,
If you want job printing of any description done in a satisfactory manner, you can have your wants gratified by calling on THE REVIEW, 33 Somerset street North Plainfield, and leaving your orders or if preferable, use the telephone and our representative will call on you.

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address,
Rev. EDWARD A. WILSON, Brooklyn, N.Y.

LEGAL NOTICES

PROPOSED AMENDMENTS

TO THE

CONSTITUTION

STATE OF NEW JERSEY
DEPARTMENT OF STATE

As required by an act entitled "An act to provide for submitting proposed amendments to the Constitution of this State to the people thereof," approved April 8, 1903, notice is hereby given that on Tuesday, the twenty-second day of September, 1903, a

SPECIAL ELECTION

will be held in the several election districts or precincts of this State, at such places as the clerks of the several townships, cities, and municipalities of the State shall provide, to enable the electors qualified to vote for members of the Legislature to vote for or against each of the following proposed amendments to the Constitution.

S. D. DICKINSON,
Secretary of State.

ARTICLE V.

EXECUTIVE.

1. Insert in lieu of paragraph 10 a new paragraph, as follows:

10. The governor, or person administering the government, the chancellor and the attorney-general, or two of them, of whom the governor, or person administering the government, shall be one, may remit fines and forfeitures and grant pardons, after conviction in all cases except impeachment.

ARTICLE VI.

JUDICIARY.

1. Insert in lieu of Section II a new section, as follows:

1. The court of errors and appeals shall consist of a chief judge and four associate judges or any four of them.

2. In case any judge of said court shall be disqualified to sit in any cause, or shall be unable for the time being to discharge the duties of his office, whereby the whole number of judges capable of sitting shall be reduced below four, the governor shall designate a justice of the supreme court, the chancellor or a vice-chancellor, to discharge such duties until the disqualification or inability shall cease.

3. The secretary of state shall be the clerk of this court.

4. When a writ of error shall be brought, any judicial opinion in the cause, in favor of or against any error complained of, shall be assigned to the court in writing; when an appeal shall be taken from an order or decree of the court of chancery, the chancellor or vice-chancellor making such decree or order shall inform the court in writing of his reasons therefor.

5. The jurisdiction heretofore exercised by the supreme court by writ of error shall be exclusively vested in the court of errors and appeals; but any writ of error pending in the supreme court at the time of the adoption of this amendment shall be proceeded upon as if no change had taken place.

Section IV.

1. Insert in lieu of paragraph 1 a new paragraph as follows:

1. The court of chancery shall consist of a chancellor and such number of vice-chancellors as shall be provided by law, each of whom may exercise the jurisdiction of the court; the court shall make rules governing the hearing of causes and the practice of the court where the same is not regulated by statute.

Section V.

1. At the end of paragraph 1 add the following:

The court may sit in divisions at the same or different times and places.

Strike out paragraph 3.

Section VI.

1. Insert in lieu of paragraphs 1 and 2 the following:

The court of common pleas shall be constituted and held in each county in such manner as may be provided by law.

ARTICLE VII.

CIVIL OFFICERS.

Section II.

1. Insert in lieu of paragraph 1 a new paragraph, as follows:

1. Judges of the court of errors and appeals, justices of the supreme court, the chancellor, the vice-chancellors, and the judges of the circuit court and the court of common pleas shall be nominated by the governor and appointed by him with the advice and consent of the Senate; all persons now holding any office in this paragraph named, except the judges of the court of errors and appeals as heretofore existing, shall continue in the exercise of the duties of their respective offices according to their respective commissions or appointments; the judges of the court of errors and appeals, except those first appointed, the justices of the supreme court, the chancellor, and the vice-chancellors shall hold their offices for the term of seven years, and shall, at stated times, receive for their services a compensation which shall not be diminished during the term of their appointment; and they shall hold no other office under the government of this State or the United States; the judges of the court of errors and appeals first appointed shall be appointed one for three years, two for five years and two for seven years; judges of the court of common pleas shall hold their offices for the term of five years.

Strike out paragraph 2.

SPECIAL ELECTION

—ON—

Constitutional Amendments.

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or voting Precinct in the County of Somerset, must meet on

TUESDAY, SEPT. 15, 1903,

from one to nine o'clock p. m., at such places as may be designated by the Township Clerks of the respective townships of said county, for the purpose of making, altering and revising, as the case may require, the registry of voters entitled to vote in their several districts or voting precincts for use at the special election to be held on Tuesday, September 22, 1903, as required by an act entitled "An act to provide for submitting proposed amendments to the Constitution of this State to the people thereof," approved April 8, 1903,

Special Election
SEPTEMBER 22, 1903.

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHURTS,
CHARLES H. BATEMAN.

Election Notice!

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the County of Somerset will hold their first meeting on

TUESDAY, SEPT. 1, 1903.

At 10 o'clock in the morning, at such places as may be designated by the Township Clerks of the respective townships of said county. Such boards shall organize according to law and then proceed to ascertain the names and residences of all the legal voters in their respective districts by making actual inquiry at every dwelling house or habitation, or of the head of every family residing therein and shall continue such enumeration of voters from day to day, on successive days, completing same on or before Friday, Sept. 4 (Sec 24 Election law.)

SECOND MEETING

AND PRIMARY ELECTION

Said Boards of Registry and Election will also meet on

TUESDAY, SEPT. 8, 1903,

At the same places from 1 until 9 p. m., for the purpose of transcribing and making up from its canvass books two lists of all persons entitled to vote in its election District, who shall personally appear before the board for that purpose, or be shown to its satisfaction by the affidavit in writing of some voter in the election district to be a legal voter therein.

On the same day between 1 and 9 o'clock p.m., the Primary Election shall be held in every election district in the County of Somerset.

THIRD and FINAL MEETING.

Said Boards of Registry and Election will also meet on

TUESDAY, OCT. 27, 1903,

At the same places, and between the hours of 1 p. m. and 9 p. m. for the purpose of revising and correcting the Original Registers, and for adding thereto the names of all persons entitled to the right of suffrage in such Election District at the next election.

Notice is hereby given to all Boards of Registry and Election in the County of Somerset that they are required to strictly observe Sections 24 and 32 of "An Act to Regulate Elections (Revision of 1898)," approved April 4, 1898, and that the County Board of Elections will be in session in Somerville on

Wednesday, Oct. 28, 1903,

For the purpose of receiving the registers and receipting for affidavits, etc.

General Election Nov. 3, 1903

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHURTS,
CHARLES H. BATEMAN.

SPECIAL MASTER'S SALE.
IN CHANCERY OF NEW JERSEY.

By virtue of a Decree of the Court of Chancery of the State of New Jersey, bearing date on the Twenty-ninth day of June, A. D. Nineteen hundred and three, in a cause pending in said court wherein Abram M. Vail, is complainant and Edgar B. Vail and others are defendants, I shall expose for sale at public vendue to the highest bidder on

FRIDAY, THE FOURTH (4) DAY OF SEPTEMBER A. D. NINETEEN HUNDRED AND THREE,

between the hours of twelve o'clock noon and five o'clock in the afternoon, to wit, at two o'clock in the afternoon of said day, at the dwelling house on the premises hereinafter described, all of the following tract of land and premises being a certain farm or tract of land situate, lying and being, in the Township of North Plainfield, in the County of Somerset and State of New Jersey, bounded and described as follows, to wit:

Beginning at a point in the center of the mill race in the southwesterly line of property known as property of Goldson Smalley, said point being distant fifty (50) feet in a magnetic course of north twenty-eight degrees and fifty-four minutes West (N. 28° 54' W.) from a stone monument on the northwesterly bank of Green Brook, and running thence along line of said Smalley's property in a magnetic course of north twenty-eight degrees and fifty-four minutes West a distance of two thousand six hundred seventy and seven tenths (2670.7) feet to a stone monument being the southerly corner of property known as property of Garretson and Gray; thence along the line of said last mentioned property, north twenty-three degrees and thirteen minutes West (N. 23° 13' W.) a distance of one thousand six hundred fifty-nine (1659) feet to a stake and stone heap in line of land formerly of Ephraim Runyon and making a corner; thence along the line of said last mentioned property south sixty-seven degrees and thirty-two minutes west (S. 67° 32' W.) a distance of thirty-four and sixteenths (34.6) feet to a stake and stone heap, thence along another line of said last mentioned property, north twenty-one degrees and forty-eight minutes West (N. 21° 48' W.) a distance of three hundred nine and fifty-four one-hundredths (309.54) feet to a stake and stone heap and corner of property of Helen H. H. Pellow; thence along the line of said last mentioned property South sixty-seven degrees and thirty-two minutes west (S 67° 32' W.) a distance of sixty-six (66.0) feet to a stake and stone heap; thence still along another line of said last mentioned property, south twenty-one degrees and forty-eight minutes east (S. 21° 48' E.) a distance of three hundred nine and fifty-four one hundredths (309.54) feet to a stake and stone heap; thence still along another line of said last mentioned property, south sixty-seven degrees and thirty-two minutes west (S. 67° 32' W.) a distance of one hundred ninety-one and four tenths (191.4) feet to a stake and stone heap, being the northerly corner of other property known as property of Garretson and Gray; thence along the line of said last mentioned property, south twenty-two degrees and twenty-eight minutes east (S. 22° 28' E.) a distance of one thousand one hundred and seventy-eight (1178.00) feet to the easterly side of an Elm tree being the northerly corner of property of John Grogan; thence along the line of said last mentioned property, south twenty-two degrees and nineteen minutes east (S. 22° 19' E.) a distance of six hundred two (602) feet to a stake and stone heap; thence still along line of said last mentioned property, south fifty-eight degrees and thirty minutes west (S. 58° 30' W.) a distance of one hundred and nineteen and seventy-two one hundredths (119.72) feet to a stake and stone heap; thence still along property of said Grogon, south thirty-one degrees and forty-four minutes east (S. 31° 44' E.) a distance of two thousand two hundred and seventy-nine and two tenths (2279.2) feet to an iron monument in the center of the Green Brook Road; thence along the center of said road, north sixty-three degrees and forty-two minutes east (N. 63° 42' E.) a distance of two hundred thirty-six (236) feet to an iron monument and corner of property of Abram M. Vail; thence along the line of said last mentioned property south thirty-one degrees and forty-four minutes east (S. 31° 44' E.) a distance of four hundred five (405) feet to a point in the center of the mill-race; thence up the center of the mill race in a general northeasterly direction a distance of three hundred seventy-six (376) feet more or less to the place of beginning; containing 63.762 acres of land more or less, which said property is shown on the map annexed to the bill of complaint in this cause, including the inchoate estate of dower and interest of Sarah A. Vail, wife of complainant, Abram M. Vail, in the said premises, together with all and singular the hereditaments and appurtenances to the said premises belonging or in anywise appertaining.

VOL. 4—NO. 24 NORTH PLAINFIELD, N. J., SATURDAY, SEPTEMBER 5, 1903. PRICE 3 CENTS

ATTERS OF LOCAL INTEREST.

ocal Paragraphs Occurring n North Plainfield and andPlainfield.

y will be Labor Day.

North Plainfield public schools reopen Tuesday.

T. E. Currin, of Summit Avenue, has returned fro n his vacation.

Many people listened to the band concert held here Thursday night.

A special meeting of the Borough Council was held Monday evening.

Special music will be rendered at Trinity Reformed Church tomorrow (Sunday).

Rescue Mission will entertain the newsboys Thursday evening, September 17.

John H. Van Winkle and family, of Duer Street, have returned from Ocean Grove, where they spent the month of August.

Rev and Mrs. W. E. Honeyman, of Lincoln place, have returned from Mt Freedom, where they spent the month of August.

Fred. Nelson has sold his hotel in the "Notch" and will dispose of all the furniture at a public auction to be held Tuesday, September 15.

The members of Howell Division, Sons of Temperance had a lunch box sociable Monday evening which was well attended and greatly enjoyed.

Miss Lotta Willard, of Buffalo is visiting her brother A. E. Willard, of Somerset street, the local manager of the Matthushek & Sons Piano Co.

Pending the repairs to the building in which the law offices of Van Winkle & Son are located, they will be found in the Coward Building, Park Ave. Room 3.

C. O. Smith, of Watchung avenue had his hand severely injured last Monday by

[redacted]

...ence of Methodist ministers ... in the Methodist ... ord on Tuesday and ... day, September 22 and 23.

...George Martin, of Harmony street, this borough, while fishing on the Duke farm at Somerville this week caught 16 pounds of eels with hook and line. One of the eels weighed 5¼ and another 4 pounds.

The following entertainments will be given at Grace M. E. Church, of this borough this fall and winter: October 19, The Mozart Symphony Club; December 1, J. Williams Macy; January 26, New York University Glee Club.

Miss Gertrude R. Conover, of this borough was tendered a farewell reception in the Chapel of the First Presbyterian Church last Tuesday evening. Miss Conover left yesterday for Dorland Institute, Hot Springs, N. C., where she has been sent by the Woman's Board of Home Missions to take up mission work among the poor white people in the mountains.

The young son of Lewis Bimble, of Harrison avenue, this borough, nearly lost his life Monday evening. The boy was sent to his father's barn for some gasoline which was kept there. While near the gasoline he struck a match and an explosion was the result. The boy badly burned reached the barn door and called for help. An alarm of fire soon had West End Hose Company on the scene, and a little later Warren Engine Company arrived. The loss will amount to about $300, covered by insurance.

Board of Education Met.

A meeting of the Board of Education was held Monday night. At the meeting it was decided to renew the lease on Spencer Hall on the same terms as last year. The Collector reported as follows: on hand, $177.98; received State tax, $1,380; total $1,527.98.

Fatal Accident to County Clerk Somers.

County Clerk Frank W. Somers fell and broke his kneecap Sunday night at South street. He was taken to Somerville Hospital, but on Monday was transferred to Dr Cooley's Brookside Sanitarium, in this borough. It will be some time before he will be able to resume his duties.

LATER. As a result of the about accident Mr. Somers died at the Sanitarium yesterday afternoon about two o'clock.

Death Followed Operation.

Mrs. Ida G. Simmons, of Park Lane, Netherwood, who died at Muhlenberg Hospital last Saturday afternoon, following an operation performed several days before, was buried from her late home Tuesday. She was the wife of Hermann Simmons, a coffee broker, of New Orleans, and the daughter of the late Rev. John Baker, a well-known Presbyterian minister, of Baltimore, in which city she was born. She leaves a husband and seven children.

Twenty Fifth Anniversary As Pastor of Church

Rev. J. C. Buchanan, D. D., father of Dr. J. Hervey Buchanan, of this borough, celebrated the anniversary of his twenty-five years' pastorate of the Baptist Church of Pemberton, N. J., last night. The Reverend Doctor was once pastor of the Baptist Church of Scotch Plains.

Interesting Services At Rescue Mission Tomorrow.

Two very interesting services are promised all who attend the Rescue Mission tomorrow (Sunday) afternoon at 4 o'clock and in the evening at 7:30 o'clock. Mrs. Wells, an evangelist, of Newark, and Mr. Shackler, of Elizabeth, will be present at both services.

A cordial invitation is extended to all to be present.

Mrs. Letitia Swartout Remsen a Centenarian.

Mrs. Letitia S. Remsen, has been more favored with birthdays than usually falls to the human race since the Bible times, as she passed the one hundred mark Tuesday.

Mrs. Remsen makes her home with her son Abram G. Remsen, of Sandford avenue, and it was at this place an informal reception was held from 2 until 6 o'clock in the afternoon. About forty representatives of three generations besides that of Mrs. Remsen's were present.

Among the floral tributes was a set piece composed of one hundred dahlias with the inscription "1803-1903."

The Tri-County Fair.

The farmers of Morris, Somerset and Hunterdon counties held a great tri-county picnic last Wednesday.

The speakers and their subjects were: Professor John B. Smith, the State entomologist, "The San Jose Scale and How to Control It;" Assemblyman S. S. Swackhamer, of this borough, "Our Vicious Laws;" E. E. Potter, of Port Oram, "True Democracy;" Rev. J. B. Cleaver, of Bound Brook, "Party Shortcomings;" James R. Brown, of New York, "Single Tax."

...t Work of the Pasteur Institute

...September McClure's is an ex... article by Cleveland Moffett on the great work of the Pasteur Institutes throughout the world in the treatment and cure of diphtheria, tetanus, the bubonic plague, hydrophobia, and snake poisoning. The preparation, at the great institute in Lille, of the various antitoxins, the inoculation of the patient serum horses with enough disease germs to kill thousands of human beings is described in detail. Dr. Calmett's discovery of an antitoxin for snake poisoning is the latest wonder of the science, and 22,000 livres' worth of it are now yearly sent to the government of India to aid in fighting the ravages of the cobra.

Wife Seeks Divorce.

A suit for divorce has been brought in the Court of Chancery by Mrs. Catherine Clark, of Plainfield, through her attorney, Horace Codington, against her husband, Elias Clark, who lives two miles from Basking Ridge and who is well known. Mrs. Clark alleged in her petition that she was married to the defendent, at Union Village, Somerset county, in 1876; that they lived together only four years, when, in 1880, he deserted her and left the State, remaining away until a few years ago, when he returned to this section and took up his residence on a farm two miles from Basking Ridge.

At the time of her marriage to Clark she was the widow of John F. Long, a veteran of the Civil War, who lived at Union Village.

Mrs. Clark, it is said, intends to file supplemental petition, asking for alimony and counsel fee. Two children were born to her as the result of her marriage to Clark. One is now married.

Dayton Jury Couldn't Agree.

The official inquiry into the sanity of Samuel C. Dayton, of Basking Ridge, which has been held in Lyon's hotel at Bernardsville, ended Monday, the jury failing to agree. The action was based on the assumption that Mr. Dayton was, on acount of his age, no longer capable of protecting his personal interests, and emanated from his three daughters. Vice-Cancellor Pitney ordered a trial, and appointed as commissioners, C. A. Reed, Mayor of Morristown, and C. D. Smith and Thomas Day, of Bernardsville. W. W. Culter, of Morristown, appeared for complainants, and Moses De Witt, of Newark, for the defendant. The jury after sitting for three hours failed to agree, eight being in favor of appointing a gaurdian and four against. Mr. Dayton is the owner of considerable property both at Basking Ridge and in Brooklyn.

Dr. Elizabeth B. Stowe, the chiropodist and manicure for ladies and gentlemen, has taken apartments in the Babcock Building and is no longer at 150 East Fifth street with Mrs. Waldron.

May Vote on Freeholder Question

Somerset county is seriously agitating the adoption of a county commission under the Strong act, in the place of the present Board of Chosen Freeholders says the Newark *Evening News*. There is little doubt that other counties still under the cumbersome and antiquated freeholder system are considering the same question. The result of the investigation of Middlesex county's finances, if one is ordered by the court, may give an impetus to the sentiment already existing in several counties in favor of a change. The Board of Freeholders system was well enough in its day, and it is still fairly representative and adequate in counties that have no large cities and are not cut up into a score or more of boroughs, each with its chosen freeholder, but in counties in which one-half or more of the population and taxable property is in a single city and the semi-urban sections are filled with incorporated towns and boroughs, Boards of Freeholders are neither representative nor adequate. The rural members far outnumber and outvote the city members, and there is an uncontrollable desire on the part of some members, as shown in Middlesex county, to charge and collect full pay for every working day in the year. The Strong law provides for three or five commissioners who are salaried and are required to devote their whole time to the county's business. The tendency of thetimes is toward the smaller board with larger attention to business.

Honeyman Party Off for the Adirondacks

In the Honeyman party which left for the Adirondacks yesterday were the following:

Bauer, Miss A. Mame,	236 Pacific Ave., Jersey City.

Webster, Miss Hattie M.,	1925 Indiana Ave., Chicago, Ill.
Woodward, Mr. William W.,	Newton, N. J.
Woodward, Mrs. William W.,	Newton, N. J.

Found Dead Near Railroad Tracks.

Dead in a ditch near the Central Railroad tracks, three miles east of Somerville, the body of Margaret Davis, sixty-five years old, an eccentric character, was found early Sunday.

The woman had evidently been struck by a train some time during the night and hurled into the ditch. She was well dressed in a gown of dark blue material and wore two diamond rings and a brooch.

The stone from one of the rings is missing. The only other articles found on her person were two rolls of hand-made lace and several spools of cotton, which she carried in the bosom of her dress.

The body was at first discovered by the crew of a drill engine which arrived at Somerville at daylight.

The Easton express, which left New York at 4 o'clock yesterday morning, was ordered to pick up the body. On arriving at Somerville the body was taken to Johnson & Maxwell's morgue.

Mrs. Davis was well-to-do, and lived the life of a recluse. She owned considerable real estate, but she lived in small apartments in the residence occupied by William Vossler, in Grove street. She frequently shut herself in her apartments for days at a time, and the Vossler family failed to notice that she was missing until friends of the old woman called at the house to see if the dead woman at the morgue and Mrs. Davis were not the same person. Then it was discovered that her apartments were empty, and that she had left the house without her wraps or making any preparation for travel.

It is believed that Mrs. Davis became temporarily insane and left the house some time during Saturday night, and walked into the country, and was crossing the Central Railroad tracks near the junction of the Chimney Rock Railroad when she was struck and killed.

Monday a Big Day For Sir Knights.

The New Jersey Knights of Pythias will go on their annual outing to Asbury Park, Monday. It is estimated that there will be at least five thousand Knights representing about one hundred lodges present and this number will be swelled to several thousand more by the relatives and friends of the Knights. The parade of the uniformed rank will be reviewed by officers of the Grand Lodge.

IMPRESSIONS OF EUROPE.

Homer J. Wightman Tells of His Trip Abroad.

On Wednesday last Mr. A.V.D. Honeyman returned from his usual summer trip abroad, and started next day with a party for the Adirondacks for ten days. A reporter of the REVIEW saw Mr. Honeyman on his arrival and learned from him that his European tour had been a delightful one. He said he thought those who went from Plainfield and North Plainfield could best speak for themselves as to their share in the pleasure. Mr. Honeyman's main party consisted of about 25. After coaching in England and on the Isle of Wight, they went to Paris and then made an extensive trip through Switzerland and Italy, returning from Naples. The new Pope was crowned at Rome a few days prior to their arrival in that city. He said there seemed to be a general satisfaction with Pope Pius X., but no especial exhilaration over it. The better classes all look for peace and harmony even between the Vatican and the royal house of Italy. Being asked concerning Vesuvius, Mr. Honeyman said that the Neapolitan people declared that they usually hear of its eruption in foreign newspapers, but know nothing of it themselves. The mountain was smoking more than it was last year, and at night flames were visible from Naples, but parties were making ascents almost every day and, so far as appeared when he left, there were no unusual signs of an eruption.

Mr. and Mrs. C. A. Seymour, Mrs. Tennant and daughters, and Mr. Hugh Baldwin, of Plainfield; also Dr. Wm. H. Larrabee and Superintendent Wightman and wife of the Boston, were of the party and returned at the same time. Mr. M. Kettl was a member, but returned earlier. Dr. Larrabee went independently to Switzerland in order to make a special Swiss tour, and joined the party there. Mr. and Mrs. Wightman, with a number of ladies, also made a separate tour in Scotland, Mr. Wightman being the conductor there, joining Mr. Honeyman's party in going to the Continent.

Our reporter saw Mr. Homer J. Wightman and he gave the following interview concerning his separate trip in Scotland and part of England:

We took the northern route across the Atlantic which carried us along the coast of Newfoundland sufficiently near to get a good view of that bleak, fisherman's coast. After passing Newfoundland, we sighted several icebergs, six in one day. One of these, sighted on the last day of June, was an immense mountain of ice, and although several miles away made us feel rather uncomfortable for several hours, as the thermometer dropped to 40 degrees. Three hundred miles out from Newfoundland we encountered for two or three days a dense fog, invariably formed by the meeting of the Arctic current, which brings down the icebergs, and the Gulf Stream, which is deflected oceanward by the Newfoundland coast.

It was a pleasant change after two weeks of almost continuous rain in Plainfield, to find a spot where no rain fell. The sea was very calm until the 4th of July, when Neptune chose to celebrate off the Irish coast, and we were all sent to bed for thirty-six hours. We had planned to "keep" the glorious Fourth but Dame Nature was mistress of ceremonies and dictated the whole program. The ship did fire fourteen bombs and blew fourteen deafening blasts which was the most any English vessel could do in honor of any foreign flag. (The English national salute is fifteen guns.)

On the morning of the 6th of July we sailed into Moville Bay, in the north of Ireland, and landed the passengers for the Emerald Isle. Our first glimpse of Ireland gave us a clear view of Green Castle, an old ruin dating from the time of William of Orange. These old ruined castles, which take us back to the time of chivalry, are scattered all over Europe, and form the first striking feature that impresses an American with the fact that he is in a foreign land.

During the afternoon of the same day we sailed up the beautiful Firth of Clyde with its picturesque villages on either side crowded close to the water's edge by the immense estates and game preserves of the English nobility.

My first disappointment came when we reached Greenock and entered the Clyde river which in reality is barely a canal in width lined almost its whole length with shipbuilding plants where we saw crafts of almost every size and description in various stages of construction. One cannot travel far, especially in a foreign country, without having the mental pictures he has formed sadly changed, even though he has read widely.

Glasgow where we landed is a bustling business city as large as Philadelphia where Americans can learn a few lessons in Municipal Economics. One can ride anywhere about the city on the car lines for a "ha'penny." My curiosity revealed the facts that the street car lines, the water works, the lighting plants, the ferries and even the concert halls are all owned and managed by the city at a small profit, but the people get these things practically at cost. The city builds houses to rent to workmen at very low rates. The city owns lodging houses and fine public baths where a swim can be had for four cents. There are public washhouses where stalls supplied with hot and cold water can be rented for four cents an hour. It seems in Glasgow, as well as in many other European cities, that this economic principle is fully substantiated; viz., "Public necessities should be under public control."

We left Glasgow as soon as convenient for the beautiful lake district of Scotland. From Balloch Pier we took steamer the whole length of Loch Lomond which is the center of Rob Roy's patrimony. Old Ben Lomond looked down upon us all the way to Inversnaid where we took coaches over the mountains and Moorlands to Stronachlacher. Here we again took steamer, this time for a trip on Loch Katrine, the scene of "The Lady of the Lake," the gem of all the lakes I have visited.

On leaving Loch Katrine we again took coaches to the wild gorge known as the "Trossachs," then along Loch Achray and over the mountains and heaths to the quaint old highland town of Aberfoyle. This day's trip is the most delightful I remember ever taking. There is not the boldness that there is in the Swiss lake region; there is not the quiet beauty that there is in the English lake district; there is not the laziness that is both seen and felt in the Italian lake section; but there is a combination of boldness, of beauty, of restfulness and of charm, and then history and literature are written over every nook and crag about these Scottish lakes.

We spent some time at Aberfoyle and took several photographs including some of the old thatched houses which are kept just as they were when the bold robber Rob Roy roamed this country. The house of Helen McGreggor, Rob Roy's wife is still pointed out to the traveler who takes this journey. Here we had that delightful Scottish dish, gooseberries and cream, served in a large soup plate, as is the national custom.

The traveler on this Trossachs trip goes for miles and miles over the estate of the Duke of Montrose. Practically the whole section has been turned from cultivation back to the wild state and is now covered with heather, bracken and myrtle which furnish brooding places for grouse, pheasants and rabbits. Such is the Englishmen's love of sport that these large estates give a greater return as game preserves than when cultivated. The fact that more than one half of all the land of Scotland is owned by seventy men gives an American another striking impression that he is far from home.

Our next move was to Sterling where there is a very interesting old castle and then on to Edinburgh over the great Firth of Fourth bridge. A grand old castle, a cathedral, a palace and Scott's monument, one of the finest memorials in the world, are among the interesting sights of this beautiful city. We were so fortunate as to get into the old parliament house where we saw the Supreme Court of Scotland in Session and heard something of the case being reviewed. The lawyers were all clothed in gowns and wigs and the judges were sitting on woolsacks, presenting the same appearance, I fancy, as in the days before America was known to the white man.

From Edinburgh we drove seven delightful miles to Rosslyn where I saw my youthful conception of a strong castle with its prison and dungeon carved from the solid rock. At Rosslyn we saw the queerest architectural monument of which I have any knowledge, the famous Rosslyn Chapel in which each pillar, arch and buttress differs from every other and in which the sunflower is the only figure repeated in the entire marble decoration.

From Edinburgh we went to Melrose and loitered in and around the ruined Abbey and drove to Abbotsford, Scott's home, where we saw very many interesting things including Rob Roy's long gun and sword, and the "Mistletoe Chest."

We visited the cathedral at Carlisle and then went on to Windermere where we joined Mr. Honeyman for the coaching through the English lake district and Sunday at the walled town of Chester. We left the main party at Warwick and journeyed to Oxford, a city of great beauty and exorbitant prices. Nearly every one of the twenty-one colleges has something of special interest.

After Oxford we spent a most enjoyable week in London. We saw London life, Piccadilly to Petticoat Lane, from Milk Street to Rotten Row. We visited Buckingham palace and saw the King and Queen as they left for their Irish trip and with the kind permission of the guard took their pictures. We rode on the Thames to the Kew Gardens, on the smoky underground and on the "tup n'y" tube (the finest rapid transit in the world). We rode on the top of trams and busses, in a brake, in cabs and hansoms and finally by sad mistake in a "pirate buss." We visited Parliament and Westminster, the Tower and The Old Curiosity Shop, the Whitechapel sections and the Wallace Collections, the Tate and National Galleries, the Albert and Victoria museum, the finest in Europe, and many other places of interest.

From London we went to Winchester where we again joined Mr. Honeyman for the continental tour.

SUBURBAN NOTES.

WATCHUNG.

Arrival and departure of mails at Watchung.

Leave Plainfield	9 a. m.	6.30 p. m.
Arrive Watchung	9.30 a. m.	6.00 p. m.
Leave Watchung	12.30 p. m.	6.10 p. m.
Arrive Plainfield	1.00 p. m.	*6.40 p. m.

*This mail makes connection for all outgoing mail from Plainfield the same evening.

The Watchung Knitting Mills are receiving large shipments of cotton and will soon be ready to start up the mill.

Karl Ruppenstein has sold his farm to Rev. Dr. Chas. Moldenke, and will soon move to South Plainfield.

The Dugway hill was the scene of another accident last week. A party of four from Berkley Heights stopped their horses on one of the water breaks before the wagon reached the level. The load was too much for the horse and the whole outfit went over backward and rolled down the mountain. The wagon was badly wrecked but no serious damage to the occupants beyond bruises.

Dr. Richard Moldenke and family spent Friday on the Passaic fishing.

Mrs. Koch expects her sister from Germany to arrive today.

Regular school meeting last week demonstrated that everything is ready to start up on the eighth of this month. Mrs. S. S. Higgins and daughter will again have charge.

* * *

LIBERTY CORNER.

Henry L. Stegman, of New York City, spent Sunday with Mrs. Ziegler.

Mrs. Lockwood has moved to the Lowery Cottage.

Mrs. Smith, of New York City, is visiting her daughter, Mrs. Barretts.

Joseph Stantial has moved in the house on Main street that he recently purchased.

Rev. C. H. Von Glahn and son Ralph, of Bernardsville, spent Sunday with Mrs. Wm. J. Hayes.

Miss Ada Westlecroft, of Mine Brook, is visiting Miss Ella Love.

Annual Horse Show at Bernardsville.

The second annual horse show, under the auspices of the Somerset County Polo Club, will be given on September 11 and 12 on the club's grounds at Bernardsville. The committee in charge of the affair comprises E. T. H. Talmage, chairman; C. Ledyard Blair, Walter P. Bliss, Clarence Blair Mitchell and Robert L. Stevens. The exhibits are confined to owners in Morris and Somerset counties, excepting the class for polo ponies, which is open to all exhibitors, irrespective of residence. There are twenty-one competitions, and the counts are as follows: 1, horses in harness; 2, tandems; 3, four-in-hands; 4, horse and depot wagon; 5, combination harness and saddle horses; 6, ponies in harness; 7, saddle horses; 8, ponies under saddle; 9, polo ponies; 10, jumpers; 11, farm teams.

Barn Burned at North Branch.

At an early hour last Saturday morning fire destroyed the large double barn on the country residence of James A. Lowe, at North Branch. It is supposed the blaze originated from the spontaneous combustion of grain.

All the season's crops were stored in the barn and are a total loss. The livestock was saved. The flames spread to two big cow barns adjoining and these were also destroyed. A great quantity of machinery was stored in them and it was ruined. Neighbors fought the flames. It was with difficulty that a number of smaller outbuildings were saved. The loss will amount to about $5,000. It is partly covered by insurance. Mr. Lowe was at his home in New York, but it is said that he will soon make arrangements to rebuild.

At the Academy.

The handsomest, and the most successful production "Robin Hood" ever had, is that now being given by the favorite Bostonians at the Academy of Music, New York City, where they are playing a short engagement. That the popularity of both company and opera has not lessened in the slightest degree, has been demonstrated by the enthusiastic audiences that pack the house nightly, and by the popular favor accorded by the New York newspapers.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

William Burk, of Pedricktown, has a patch of strawberries that the second crop, now ripening, will clear him $250.

Andrew Dunkel, section foreman on the West Jersey and Seashore Railroad, caught a young bird which is said to be a robin. It is perfectly white and has pink eyes.

It is reported that there is market at Medford for live and healthy blacksnakes and good prices will be paid for reptiles delivered. Cranberry growers desire the snakes to place in the bogs and clear them of mice, which are particularly destructive to growing bushes. The growers consider blacksnakes so valuable that they object to their destruction.

An odd-shaped potato of large size is on exhibition in Washington. It was grown on the farm of Jacob Slater, near Changewater. The potato is nearly a foot long and several inches thick. In the center is a protuberance about four inches long and as thick as the rest of the potato. The weight of this large vegetable is two and one-quarter pounds.

The old stone cracker building, which has been standing at Glen Gardner for the last thirty-five years, has been purchased by John Van Syckle, and will be torn down and the material used to rebuild a barn on the site of one destroyed by fire a month ago. The machinery was removed from the building by the Central Railroad company a few weeks ago.

Jonas Livermore, of Blackwood, the retired builder, who in April celebrated the 101st anniversary of his birth, fell downstairs last Monday and broke one of his legs. At first he refused positively to have a physician do anything for him, but finally permitted Professor White, of the University of Pennsylvania, to reduce the fracture. There is little hope of his recovery. He is a most remarkable man. He enjoyed rugged health up to the hour of his mishap.

Announcement has been made by the carnival committee of the New Brunswick Boat Club that entries will be received up to the day of the carnival. The committee has set aside the sum of $250 for prizes, and they will be awarded to five different classes of boats. The first prizes will be $25, the second $15, and the third $10. It is expected that the attendance will be twice as large as that at the carnival two years ago. The committee is making plans for the entertainment of Sir Thomas Lipton, who has promised to attend, if his engagements will permit.

Edward Wansten, of Morristown, an enthusiastic collector of curios, has found a white potato that resembles a human heart in almost every particular. It was dug from the potato patch of Charles Bowden, of Boonton. The potato was boiled in alcohol and was afterward placed in a store winnow, where it was viewed by several thousand people during the three days it was on exhibition. Mr. Wansten received an offer of $100 from a New York museum for the curio, which he refused, saying that he considered his find one of the best he had made in his long search for curios, which has covered the best part of the last half-century.

Stewart T. Bell, constable of Lebanon Township, and who has held various offices in the township since 1866, has a cupboard full of old and odd relics, including deeds and newspapers of ancient date. Among the lot is an original copy of Blackstone, bearing date of 1726, "Laws of New Jersey from 1703 to 1799," giving the laws regarding the formation of the counties in the State. The most valued relics are a couple of old-fashioned, long-handled fireside pans, made from a solid piece of iron and forged at the old forge which was standing and in operation at Changewater during the Revolutionary War. Mr. Bell also possesses a complete set of flax machinery, such as was used in his great-grandparents' day. All the implements, from the breaker to the spinning wheel, are in a good state of preservation. He has samples of flax in the different stages of preparation, and a great many other curiosities of ancient date.

According to reports from Marlton, cranberry growers are complaining of the ravages of swarms of katydids, which are very destructive to the bogs, and there

[*Continued on Last Page.*]

Autos and Railways.

By Sylvester Stewart.

THAT the automobile has a great future I do not deny. Its chief mission is to change city streets from manure yards to clear thoroughfares. The horse is unfit for use on city streets. He occupies too much space; he is too hard to steer; he has the wrong kind of feet on him; besides, on crowded streets, his worried driver whips, frets and jerks ten per cent. of his energy out of him and shortens his life.

But whatever efficiency the auto may attain by future improvements, it will always remain true, that if it is put on steel rails, the same engine and the same quantity of fuel necessary to pull ten passengers or one ton of freight on the best macadam road will pull at least forty passengers or four tons of freight on steel. So, instead of "making railways obsolete," the auto will call for light steel rails for itself, in hundreds of thousands of localities, and will probably be equipped, in many cases, with guides, so that it can run either on or off rails.

The automobile, instead of being a menace to the railway, will be a feeder to it. Light railways—T rails, plateways, etc.—will branch from main lines and on these branches will run freight and passenger automobiles. In roadways there is nothing like steel, nor anything that makes any approach to it. Of course, in sections too thinly settled to justify two roads in common road and a light railway, the business automobile will have to use the common road, but wherever it does it will be compelled to charge a high rate for freight and passengers, on account of the great resistance to progression encountered on all roads but steel.—Engineering Magazine.

The Nebular Hypothesis.

By Agnes M. Clarke.

IT is stated that things may be improved beyond recognition, nay, out of existence. So it has happened to the nebular hypothesis. Stat nominis umbra. The name survives, but with connotations indefinitely diversified. The original theme is barely recalled by many of the variations played upon it. Entire license of treatment prevails. The strict and simple lines of evolution laid down by Laplace are obliterated or submerged. Some of the schemes proposed by modern cosmogonists are substantially reversions to Kant's "Natural History of the Heavens," the long discarded and despised Cartesian vortices reappear, with the eclat of virtual novelty, in others; nor are there wanting theories or speculations reminiscent even of Buffon's cometary impacts.

Moreover, the misleading fashion has come into vogue of bracketing Kant with Laplace as co-inventor of the majestic and orderly plan of growth commonly designated as the "nebular hypothesis." This has been, and is, the source of much baffling confusion. Save the one fundamental idea—and that by no means their exclusive property—of ascribing unity of origin to the planetary system, Kant's and Laplace's evolutionary methods had little in common. Their postulates were very far from being identical; they employed radically different kinds of "world stuff;" and the "world stuff" was subjected, in each case, to totally dissimilar process.—Knowledge.

The Rose---Undisputed Queen of Flowers.

By John N. May, Treasurer of the American Rose Society.

THE history of the race is full of romance and poetry. When the flower was first introduced as a garden bloom must ever remain a matter of conjecture; but it is certain that the ancients knew and admired this Queen of the Flowers many, many centuries ago.

Early Greek writers mention it in many of their writings asserting that it was consecrated to Venus as an emblem of beauty, to Cupid as an emblem of love and to Harpocrates as the god of silence. Probably this last fact explains why the white rose was regarded as a symbol of silence, and at ancient carnivals was suspended from the ceiling and around it was written this sentence:

"He who doth secrets reveal
Beneath my roof shall never dwell."

What faith and what confidence must have existed between man and man in those days when only the presence of a flower was needed to insure silence and to impress upon those present the injunction that secrets were to be kept inviolable!

The Romans also held the rose in great esteem. The beautiful varieties we know to-day were unknown to them, for it is a matter of history that until the beginning of the nineteenth century very few double roses had been introduced. Since that time innumerable and grand varieties have come into existence, and to-day they range in color, size and fragrance from the small dainty button size to those measuring five inches and more in diameter, and in color from the purest white to the deeper maroon, or nearly black. The only shade of color not yet attainable is blue. Though nature has been lavish in bestowing all other shades, forms and sizes, the lover of the rose must be content without this color. But this, I am sure, will be no great hardship, as one has a glorious range of hues from which to choose.

The wild or native rose can be found growing in abundance in nearly every temperate zone. It is found in Asia, Africa, the whole of Europe and North America. The native varieties are the original parents of all the grand roses that now embellish the gardens and homes of millions of the earth's inhabitants. The old-fashioned rose, with its single row of petals, found growing by the roadside in the country districts of New England is the ancestor of some of the highly colored and fragrant blooms that now lend their beauty to decorative purposes.

No one will dispute the popularity of the rose. Certain flowers become the fads of the hour and hold sway for a time, but are soon dethroned. The rose is always in demand, summer and winter, and the sales of its blooms are not exceeded by those of any other flower. Its season of special favor is winter, when no special function is deemed complete without the presence of this beautiful flower.

Can Floods Be Prevented?

THE Middle West, meaning the territory of the lower Missouri, the Kaw and the Des Moines rivers, suffered a flood loss last spring estimated at $25,000,000. And this despite the fact that millions of dollars are used each year by the Government and by States in building levees and otherwise endeavoring to confine the lower Mississippi and Missouri within safe bounds. It has proved thus far impossible to control entirely the mighty force of these rivers; their frequent rebellions result in inundations with alarming regularity. Suppose the money lost this one season, to say nothing of the vast sums wiped away during all the forty years of Western settlement, had been spent in intelligent preventive measures at the heads of the streams, would it have been effective? Already many Western farmers have thrown up dams across ravines and sloughs on prairie farms, which hold back the rain's bounty. These are constructed primarily as cattle watering places, but they keep the floods from the land below and save many a field from having its crop washed out. If this system be extended over the whole area of the upper basin on a larger scale, it would not only retain a great portion of unseasonable rainfall, but give opportunity for irrigation on the lower levels from the stored water. The Senate of the recent Congress has already realized the necessity of doing something, for it passed a bill appropriating $10,000,000 for the purchase of 2,500,000 acres on the top of the Appalachian range in the States of North Carolina, Tennessee, Kentucky and Georgia, the object being to protect the forests and to prevent floods by holding the waters on the hillsides, rather than allow them free course over deforested areas. The bill failed in the House, but it ought to succeed at next session. The establishment of a permanent reservoir system under Government control and with ample appropriations for its construction should be the next step in the development of the West. It will mean a tremendous body of water held high up on the prairie slopes, exerting its influence in the modification of the hot winds and the droughts; it will furnish to the growing area of irrigated lands a steady supply through the summer months; it will retain the rains the life of the agriculturists of the lower Mississippi and Missouri one of and so prevent the floods that annually spoil the low-lying farms and make anxiety.—The Independent.

CALEB POWERS SENTENCED

Thrice Convicted Murderer of Governor Goebel to Be Hanged.

DRAMATIC SCENE IN COURTROOM

Brother of Victim Overcome When He Realized That His Work For Vengeance Had Been Successful — Condemned Man Once the Secretary of State of Kentucky.

Georgetown, Ky.—Caleb Powers, formerly Secretary of State of Kentucky, was convicted for the third time of the murder of Governor Goebel and sentenced to death.

Judge Robbins overruled a motion for a new trial and fixed November 25 next as the day for the execution.

At his two previous trials, which were reversed by the Court of Appeals, Powers was sentenced to life imprisonment.

Powers' counsel permitted him to make a speech to the jury in this case. *He made an impassioned appeal* to them, declaring that he was innocent of the murder of Goebel and had no knowledge of it. Those who heard Powers' speech thought it would have considerable effect on the jury, but this proved to be untrue. The jury retired and soon brought in a verdict of guilty as charged. Caleb Powers, like the man of iron he has proved himself through all his trials, received the verdict without emotion. When the jury went out he was sitting chatting with *friends, and aside from glancing up as* the jurymen filed out, made no move.

After this cursory glance he turned to his companions and resumed his conversation. "It's an unjust verdict, not warranted by the evidence," declared Powers. "I shall certainly appeal again."

Arthur Goebel, a younger brother of the murdered Governor, has spent practically the whole of the last three years working on the case, and it is largely to his efforts that the confessions of others implicated in the murder were secured. He collapsed under the strain when the verdict was announced. He has sworn that he will do nothing until *his brother's murder is avenged by the* law. Immediately after the conviction and sentence of Powers he sent this telegram to a brother who is in the West:

"Powers' trial ended. Sentenced to death."

At the two former trials, which took place here, Judge Cantrell presided. For this trial, however, Governor Beckham appointed Special Judge Robbins. From him the attorney for the defendant secured the granting of an appeal for the case to the Kentucky Court of Appeals. It was this court, when composed of Republicans, that twice granted new trials for Powers. The court is now Democratic. *Should it refuse* to grant a new trial the counsel for the defense may try to get the United States Supreme Court to take the case under consideration.

Powers was removed to the Scott County jail immediately after sentence was passed, to be held there pending the appeal of his case to the higher courts. A telegram from Indianapolis states that former Governor W. S. Taylor said: "This verdict affects me very much. I cannot say a word."

1000 BULGARIANS SLAIN.

The Situation in Macedonia is One of Extreme Gravity.

Salonica.—The Bulgarian insurgents sustained a severe reverse at Smilovo, 1000 of them being killed.

The insurgents to the number of 3000 occupied a position on the heights, which was stormed by six battalions of Turkish troops, commanded by Servet Pasha. After losing 1000 of their number, the Bulgarians fled in the face of the heavy Turkish artillery fire. The Turkish losses were insignificant.

The Bulgarian insurgents on capturing the town of Nevesska, seized the arms and ammunition of the garrison, levied a contribution of $5000 on the town and withdrew to the mountains. The Turkish troops on their arrival bombarded the town, but receiving no response, they entered without molesting the inhabitants.

London.—The Salonica correspondent of the Daily Mail describes the situation in Macedonia as being one of the utmost gravity. The insurgents are everywhere increasing in numbers and holding their own against the Ottoman soldiers. Anarchy reigns supreme.

In a few weeks famine must ensue, causing untold misery. Any outrage in the city of Salonica now would turn the Turks into soldiers and the populace into wild beasts. The country west of the River Varda toward the vilayet of Monastir is expected to rise daily.

Thief Returned Useless Booty.

After stealing certified and cancelled checks aggregating $65,000, a thief took the trouble to restore them to the bank, from whose messenger he stole them on a cable car, at Chicago. The thief left the valise with the cashier of a restaurant and sent a telephone message to the bank.

Agitation on the Milk Question.

The Agricultural Department at Washington has issued a bulletin on the milk question, in which it says that the agitation has done good, but that at the same time much unnecessary alarm has been caused; suggestions are made for the improvement of the milk supply.

Cotton Trade's Bad State.

The cotton trade in England is in a worse state than for the last fifteen years, in consequence of the shortness of the supply of cotton. Heavy demands are being made on the benefit societies owing to the large number of persons who are idle.

Swept Away by a Geyser.

Two women and two men who were watching the Waimunga geyser at Lake Potorua, New Zealand, were swept away by a rush of boiling water into the river.

FEEL CASTRO'S IRON HAND

Foreign Merchants Arrested For Refusing to Pay Taxes Twice.

Letters From Legations Instructing Aliens to Send in Claims Said to Have Been Seized in the Post.

Willemstad, Curacao.—Harsh injustice is being meted out to foreigners residing in the interior of Venezuela, where the local authorities are hunting down all foreigners who dare to present claims against Venezuela in accordance with the recent protocol.

Near Coro a local tribunal refused to accept the testimony of five Italians. On the latter insisting on tendering their depositions three were arrested and thrown into jail. Two of them attempted to escape and were fired upon, one being killed.

The Venezuelan Government does not deny this occurrence, but is doing nothing to prevent repetitions of it.

It is learned on good authority that letters sent to foreigners from the Italian and other legations instructing them to send in their claims were seized in the post so as to prevent the claims from arriving in Caracas in due time.

Cumana, Venezuela.—A gibbet was erected in a street of this city on which was hung an effigy representing a foreigner, and the populace beat the dummy with sticks amid shouts of "Death to the foreigners!"

Two leading traders, M. Palazzi, a Frenchman, and Herr Sprick, a German, were recently arrested in Ciudad Bolivar, by order of President Castro for refusing to pay their taxes, which had already been collected by the revolutionists at the time of the latter's occupation of the city. Many other persons were also arrested on the same charge.

The French and German Ministers at Caracas protested, and obtained the immediate release of their fellow-countrymen.

General Rolando and 200 of the rebel officers who were captured at Ciudad Bolivar have arrived at Maracaibo. They are incarcerated in the fortress of San Carlos, with their feet in irons.

ESCAPED DESPITE SENTINEL.

Imprisoned Soldier Breaks From Cell Though Specially Guarded.

Old Point Comfort, Va.—Private Valentine, of the Seventy-third Coast Artillery, a prisoner in solitary confinement at Fort Monroe, made his escape during the night, going through iron bars, while a sentinel was guarding his cell. When the officers of the fort lately discovered that five prisoners were gone, they immediately placed sentinels at guard over all the cells. Valentine, *guarded in this manner, nevertheless escaped.*

As soon as it was learned by his Colonel that Valentine had made his escape he had the sentinel placed under arrest and incarcerated, pending a court-martial.

LONDON SUPPLIED MAD MULLAH.

English Firm Has Furnished Arms and Ammunition to Fight Crown.

Aden, Arabia.—The principal sources for the supply of rifles and ammunition to the Mad Mullah's forces in Somaliland have been traced through a complete identification of trade marks by agents in Harrar and Jibutil, Abyssinia, to a London firm.

Since the beginning of the operations in Somaliland an aggregate of 3,000,000 rounds of Lee-Metford rifle ammunition and correspondingly large numbers of Lee-Metford and Gras rifles have been shipped by this London firm to Jibutil and Harrar by way of Manchester and Marseilles.

WIRELESS SECRETS LEAK OUT.

Recent Berlin Congress Said to Have Favored International Control.

Berlin, Germany.—A technical paper published in this city says the delegates of almost all the countries which participated in the recent secret sessions of the International Congress of Wireless Telegraphy in this city favored international control of wireless telegraphy.

It also advocated that no land station refuse to take a message, if comprehensible, from any ship using a system different to that of the company owning the station.

Italian Banker Murdered.

Vincenzo Tilli, the proprietor of an Italian bank at Philadelphia, Pa., was shot and killed by a fellow countryman named Giovanni Viola. The murderer ran from the bank and as he was pursued by a large crowd he turned and fired his revolver at his pursuers. One bullet struck Policeman Thomas Conly in the breast, and he was removed to a hospital in a serious condition. The police were unable to learn what his motive was in killing Tilli.

Ex-Mayor Ames' Last Appeal.

Judge Elliott, of the Hennepin District, has denied Dr. A. A. Ames' motion for a new trial. Nothing now remains between the former Mayor of Minneapolis, Minn., and six years in the penitentiary for bribery except an appeal to the Supreme Court. The case will be certified and heard at the October term, although this last effort is generally believed to be a vain one.

Twenty-five Men Guard $5,000,000.

The Transport Thomas, which has just sailed from San Francisco, Cal., for the Philippines, touching at Honolulu and Guam, carries $5,000,000 in Philippine silver certificates, accompanied by a guard of twenty-five enlisted men of the Fourteenth Cavalry.

Death Ended Judge's Fast Cure.

Judge J. C. Ellis, one of the most widely known lawyers in Western Kansas, is dead at his home in Pratt, Kan. He had followed a theory of fasting to cure dyspepsia, and had gone thirty-seven days without food.

Army Officer Killed at Targets.

In target practice in Wesel, Prussia, a revolver in the hand of an officer went off prematurely. The bullet struck a Sergeant of Infantry, killing him.

U. S. CONSUL WAS NOT SLAIN

Bullets Fired at Mr. Magelssen at Beirut Did Not Touch Him.

ORDERS TO WARSHIPS STAND

President Wishes to Have an American Squadron in Turkish Waters Owing to the Disturbances in the Empire — Report of Death of Vice-Consul Due to Cipher Error—Attack Premeditated.

Constantinople, Turkey. — It transpires that the report that United States Vice-Consul Magelssen was killed at Beirut is incorrect. An unknown individual fired at him and the bullets passed close to the Vice-Consul, but did not touch him.

The Vali of Beirut afterward visited Vice-Consul Magelssen, expressed his regret for the outrage, and ordered measures for the arrest of the perpetrator.

The error in stating that Mr. Magelssen had been killed rose from a mistake in a cipher telegram.

Washington, D. C.—A decidedly new turn in the case of United States Vice-Consul William C. Magelssen at Beirut, Syria, who was reported to have been assassinated Sunday, developed when it became known that the report was incorrect, and that although Mr. Magelssen had been shot at he had not even been injured.

This information came to the State Department in a dispatch from United States Minister Leishman at Constantinople, who said the mistake in making the original announcement was due to an error in the transmission of the cipher dispatch from Consul Ravndal, at Beirut, in reporting the incident to the Minister.

The dispatch from the Minister was communicated at once to the President at Oyster Bay. *The dispatch was extremely gratifying* to the officials of the Government here.

Acting Secretary Loomis declined to make public the text of Minister Leishman's dispatch, but he gave a summary of its contents. As stated in the press dispatch, it shows that Mr. Magelssen was shot at by some unknown person, but was not hit. The local Turkish officials were prompt to express their regret at the occurrence, and are exerting themselves to apprehend the would-be assassin, but thus far have been unsuccessful.

The Minister's dispatch also said that Consul Ravndal had reported to him that *some of the foreign Consuls at* Beirut had reported to their governments that the situation at that place had become exceedingly unsafe, that this condition of affairs had existed for some time, and that something ought to be done to relieve the tension. The opinion was expressed that the attempted assassination of Mr. Magelssen would probably bring matters to a focus.

Oyster Bay, N. Y.—President Roosevelt was informed of the incorrectness of the report that Vice-Consul Magelssen had been assassinated. The President expressed gratification that Mr. *Magelssen had escaped without injury.*

He announced, however, that no change at present would be made in the plans of this Government, and that the European squadron, which he ordered to proceed immediately to Beirut, would continue to its ordered destination.

It can be said that the President and Secretary of State Hay both regard it advisable, in view of the present state of unrest in Turkey, to have American war vessels in Turkish waters.

For a long time President Roosevelt and Mr. Hay were in conference at Sagamore Hill. They discussed every suggested phase of the situation in Turkey. At the conclusion of the conference Secretary Hay announced his intention of returning immediately to Washington.

It can be said that it is the purpose of President Roosevelt to afford American citizens in the disturbed provinces of Turkey all the protection possible. For that reason and for others which may develop in a short time the decision is reached that no change will at present be made in the orders to the European squadron. Admiral Cotton *will proceed with his vessels to Turk*ish waters with the idea of fully safeguarding Americans and American interests.

New York City.—In response to a telegram of inquiry regarding the reported assassination of Vice-Consul Magelssen at Beirut, Mr. Freyer, Treasurer of the Board of the Presbyterian Mission at Beirut, has cabled as follows:

"Although the attack made on Vice-Consul Magelssen was evidently premeditated, the bullets missed him and he escaped uninjured. FREYER."

CHICAGO AS AN "ADAMLESS EDEN."

Windy City Rapidly Losing Male Population to Grim Reaper.

Chicago.—The papers of this city are pointing out that Chicago is in danger of becoming an "Adamless Eden." That this menace is borne out by the increasing excess of male over female deaths is strengthened by the bills of mortality for the week. There were 483 deaths reported, exactly the same as for the previous week. Of these *291 were males and 192 were females*—an excess of fifty per cent. in male deaths. In 1901 this excess was 23.4 per cent.; in 1902 it was 29.5 per cent.; during the first six months of this year it was 27.4 per cent., and now fifty per cent. more males than females are dying.

Takes Her Fifth Husband.

Married five times within twenty-five years, a widow once, divorced three times, and now a bride, is the record of Mrs. Mary L. Muir-Thompson-Colvin-Neal-Conway-Smith, of Ohio Falls, a suburb of Jeffersonville, Ind. Mrs Smith is not over fifty years old.

Quit a "Hoodooed" Mine.

Because of continued disasters, resulting in loss of life, 100 men have quit work in the Treadwell mine, on Douglas Island, Alaska. The men intimate that the property is "hoodooed."

STARVING MEN MARCH

Foodless Miners in Alaska Trying to Reach Yukon River.

Some Fall With All Hope of Succor Gone But Are Saved Just in Time —A Relief Expedition.

Tacoma, Wash.—Two hundred foodless men are attempting to cross the Alaskan divide and make a 500-mile journey through the wilderness on Nazina River and the Copper River Valley to Tanana Valley and the Yukon River.

These miners joined a stampede to Nazina last spring, and finding there only shallow placers, determined to *push on to Yukon. Most of them sold* their outfits, understanding that supplies could be purchased at several posts in Tanana Valley. In this belief they were mistaken. Walsh & Lawrence, owners of the trading post at Tanana Crossing, had only a small stock, and most of this they gave to the impoverished miners as they passed along.

News of the men's destitute condition was carried to Fort Egbert, on the Yukon, by Henry Bratnober, of San Francisco, a noted mining expert, who represents the Rothschild family in this country. Bratnober saved three men from starvation, and urgently recommended to Captain Perkins at Fort Egbert that he send a military relief expedition to the rescue of the foodless miners, whose number was stated to Bratnober to be not less than 200.

Captain Perkins immediately wired Washington for authority, and is presumed by this time to have dispatched a detachment of soldiers with supplies to the Upper Tanana Valley.

The men rescued by Bratnober were P. A. Retig, of Delano, N. Y.; William Krahm, of Baltimore, and Herry Behrens, of New York City.

When Bratnober reached them these men were lying down exhausted in a small tent, being too weak to move and scarcely able to speak. For several weeks they had lived on berries. Bratnober furnished them with provisions from his pack train and inquired regarding others along the trail.

Retig has spent two years in stampedes to Koyukuk, Nome and Nazina. He formerly lived in Philadelphia. Bratnober is known as the most conservative mining man in the West. He said at Dawson that without doubt many will perish unless assistance reaches them, and he fears some already have died of starvation. He praises very highly the generosity of Walsh and Lawrence, who gave away their stock, though provisions were worth $1 per pound.

TAUGHT IN SCHOOL OF THEFT.

Boy Shoplifter Caught in St. Louis Exposes Chicago Institute For Thieves.

St. Louis, Mo.—Fred Spies, the boy shoplifter, who was arraigned on charges of petit larceny [illegible] various department stores, [illegible] ted to Chief of Detectives Desmond that he was educated in the art of stealing in a Chicago school of crooks, and that he was sent to St. Louis on purpose to steal.

He said that he sent the stolen goods to a "fence" in Chicago, conducted by the persons who taught him to steal, and they disposed of the property, sending him part of the money. He had a letter, written in German, and inclosing a money order for $2500 from Chicago. It commended his efforts in St. Louis, and made suggestions about what he should send in future.

Spies gave Desmond the names of all the persons in the gang, and Desmond hopes to aid the Chicago police in capturing the entire bunch. According to Spies' story many boys are educated in the same way that he was, and afterward are sent to other cities to steal for the gang.

SIX DROWNED IN COLLISION.

Metropolitan Steamship Sinks a Schooner Off New Haven, Conn.

Stonington, Conn.—The Metropolitan steamship H. M. Whitney, from New York to Boston, ran down and sank the schooner John Booth just west of New Haven during the night. The Whitney rescued Captain Emmons, of the Booth, and the Maine, of the Stonington Line, saved a sailor, but the five other men in the Booth's crew and a passenger, who belonged in Salem, were drowned.

The schooner had been struck about amidships and her side crushed in. Being granite laden she settled quickly and sank before boats could get near her. One of the Maine's boats rescued a sailor named Hassel, who says he *was one of the deck watch with the* captain at the wheel. The weather was fairly clear, but the collision, he says, was entirely unexpected. The schooner John Booth hailed from New London, Conn., and was 414 tons burden. She was bound for New York.

PROFESSOR'S FATAL CAT HUNT.

W. H. Detweiler, a Philadelphia Teacher, Accidently Kills Himself.

Philadelphia, Pa.—While attempting *to shoot a sick cat at Hatboro, Pa.*, near here, Professor W. H. Detweiler accidentally shot himself and died a few hours later.

Professor Detweiler was a teacher in the Manual Training School in this city, and was spending the summer with his family at Hatboro. A neighbor asked him to make away with the cat. In crawling under a porch to shoot the animal his foot slipped and the revolver exploded, sending a bullet crashing through his brain.

Professor Detweiler was thirty-five years of age. He is survived by a widow and two children.

Lightning Kills Three in Indiana.

Central Indiana was visited by a severe storm of rain, wind and lightning. Hugh Arnold, living near Muncie; Jesse Irwin, a farmer of Millersville, and William Enoch, of Cumberland, were killed by lightning.

10,000 Cattle Dipped in Crude Oil.

The experiment of dipping 10,000 steers in vats filled with Beaumont crude oil to relieve them of fever ticks is in progress at Ozona, Texas. It is *thought that the oil will be an effective* eradicator of the ticks.

REVOLUTION PROCLAIMED

Macedonian Insurgents Issue Their Long-Expected Document.

CHRISTIAN VILLAGES BURNE

Turks Massacre the Entire Popular Armensi and Velesi — A War Being Imposed Upon All the Subjects—Bulgarians Lose 1' The Insurrectionary Leade

Sofia, Bulgaria.—While [illegible] versary of the Sultan's ac[illegible] being celebrated throughout [illegible] man Empire the Macedonic[illegible] sued the long anticipated [illegible] of a general insurrection in [illegible] The signatures of all the [illegible] *the insurgent generals* [illegible] tached to the document.

The new outbreak is headed famous Macedonian leaders, Geo[illegible] Zontcheff, President of the Macedonia[illegible] Committee, and Colonel Jankoff, who was wounded in the rising of 1902.

The new territory covers the district in the valley of the Struma, at the base of the Rhodope Mountain chain, and to the north of the River Vardar. Colonel Jankoff is directing the movement of the insurgents in the southern part.

News of severe fighting is still coming in. At the village of Armensi, after a day's fighting, the Turkish troops *in the night time massacred the entire* population of 180 men and 200 women. The Turks have also massacred the inhabitants of the village of Velesi.

It is reported that Hilmi Pasha, the Inspector General for Macedonia, fears to leave his headquarters in the Konak at Monastir. The insurgent leader, Gruneff, in a letter to Hilmi Pasha, demanded that he prevent the barbarous acts of the Turkish soldiers and Bashi-Bezouks, otherwise the revolutionaries would massacre all the Turkish inhabitants. The insurgents have occupied the mountain pass of Gergele, on the main line from Salonica to Uskub, and Turkish troops have been sent to dislodge them.

The town of Malkotornovo is reported to be in a state of anarchy, the Turks plundering the houses and committing unspeakable atrocities on the women.

A strong force of Turkish infantry, cavalry and artillery recently attacked the village of Stoilovo, northwest of Malkotornovo, which had been occupied by insurgents. The latter retreated, after which the Turks entered the place, massacred the entire population and destroyed the village.

According to the latest Turkish official estimate about 1500 Bulgarians were killed in the recent fighting at Smilero, Neveska and Kilissura. The Turkish losses are not stated. [illegible] [illegible] [illegible]

GUESSING.

Oh, life may be a blessing,
But it has its share of gloom,
For it somehow keeps you guessing
From the cradle to the tomb.

When a little child first glances
On this world he cries and frets,
'Cause he knows he's taking chances
On the parents that he gets.

He takes chances on instructors
When at school he first appears,
And on brakemen and conductors,
And especially engineers.

Your doubts keep coming steady
And they fill your mind with pain;
Scarce you get one answer ready
Ere you've got to guess again.

—Washington Star.

THE NAHRABAD GHOST TIGER

By CLARENCE PULLEN.

FOUND the Rajah of Budrapore at home in his place. He received me cordially enough, but, try I would, I could not enlist his interest in the matter about which I had come. He was gloomy and silent. Finding he could not be persuaded to talk, I gave over the business for the day and took my leave. But before I left the place I met Ram Abadhur, the half-caste court interpreter, and learned the cause of the Rajah's depression.

"It is the tiger that disturbs his highness," Ram Abadhur said. "He has appeared in the jungle about Nahrabad, and there is much talk of him among the people. He is a man-eater, but that is nothing. Strange reports have come to the palace that the beast is in the likeness of a tiger pictured on the flag of the old Kehab kings, and the story has spread that he is the reincarnation of Raj Kehab. His coming, it is whispered, means some misfortune to the reigning family—a death, or it even might be that which his highness most dreads—this is very secret, unless the return of the old ruling family to the throne."

Through many traditions I knew Raj Kehab, the mighty founder of the royal family that had ruled Budrapoor for a thousand years, up to the ... half a century before, when the ... India Company installed in power ... dynasty, which began with the ... Rajah's grandfather, and I ... in the Viceroy's palace at ... as a relic, the flag which ... time of Raj Kehab down to ... descended from him had ... of the Kehab dy... design was a tiger worked ... embroidery upon a dark-green ... fool.

"I sta... home, and at the bungalow ... Khatra Ahab, the shikari, await... in the compound. He was ... of his craft. He knew the ... all the jungle beasts and ... read the tokens of their goings ... comings as surely as the white man reads the business signs in the city streets. Before I had time to speak with him I was hailed from the verandah by Captain Bent Murdoch, Chief of the Budrapore police, who had ridden with his orderly from Carambat that morning. After bidding him welcome I questioned Khatra as to the truth of the report of a man-eating tiger in the Nahrabad jungle.

"I have seen him," the shikari answered. "Watching from a tree, I saw him pass not twenty paces away. On that day he carried off my cousin's wife from the rice field. He had feasted and had no need to kill, but he looked at me. Sahib, his color! I swear by Krishna, he was white. And his eyes! The color of a tiger's eyes in daylight is yellow, but his were red—as red as the blood smears on his jowls. When I saw his tracks I knew them, for I had seen them before. Sahib, it is useless to follow him, for he is a ghost tiger. His lair is in the haunted city of Nahrabad."

"Then to Nahrabad we will go for him," exclaimed Captain Murdoch, who was famous as a hunter of big game. "Ghost or no ghost, white or striped, we'll wait for him there to-night. If lead fails we'll try a silver bullet. I suppose, major, you can lend me a gun?"

"Two, if you wish," I returned. "Khatra, you know the tiger's path. You will guide us this afternoon to where we shall watch to-night by the Nahrabad ruins."

The shikari tried to object, but I overruled his objections, and he unwillingly agreed to be our guide. The details having been arranged, I had time to talk with Murdoch. For several months he had been unusually busy suppressing the dacoits who, at the beginning of the year, had started their annual carnival of robbery and murder in the Rajah's dominions. He had broken up the principal band, and, so far as could be known, those of the outlaws who had not been killed outright were in jail awaiting the trials which would determine whether they should be hanged or sent to penal servitude in the Andamans. One only had escaped, Nadraj their chief, and no search could discover his hiding place.

"His death or capture would be worth more than that of all the rest of the band," Murdoch said. "There won't be an end of dacoity in Budrapore so long as he is alive."

Everybody in Budrapore knew of Nadraj, and most people, native or European, had cause to dread him. A high-born Hindu, fanatically hating everything associated with the English rule in India, his crimes and cruelties had been inspired as much by hatred and revenge as by desire of plunder. Native mothers stilled their children with the threat of his name. As he was utterly desperate, even the Rajah himself, who favored the English, could not be safe from the chance of assassination while Nadraj was at large.

"I can't think where he can be concealed," the captain continued. "If he were friendly to the Rajah I could understand, but his Majesty has the greatest motive of any one for wishing him off the earth. Do you know that this dacoit is of the old royal family—a lineal descendant, it is said, of Raj Kehab? If the old dynasty had not been overthrown by the help of the English he might be Rajah of Budrapore to-day. We are going to his ancestral city to-night to wait for the tiger."

Our preparations for the hunt were simple—two heavy rifles, a haversack with provisions, and a mat to sit on. We made our start for Nahrabad in the afternoon and rode to a little village at the jungle's edge, where the people had already gathered the wood for the fires which they would burn at night to keep the tiger away.

Leaving the horses there in charge of the captain's orderly, we walked along the bullock path which led through a dense jungle to the ruined city. An hour's walking brought us to a spot where the path emerged into an open, grassy space. On the right, across a nullah, a ruined wall encircled the face of an embankment, and a vast heap of fallen stone rising like a hill within it was Nahrabad, Raj Kehab's city. Wild vines and bushes hid the ruin in places, and a few trees had forced their way into the open among the stones of the fallen walls. Here and there a carved column or stretch of wall stood in place. Far up in the ruins, at the very top, the crown from the debris two marble posts, with the capstones still resting upon them. Here had been the main entrance of the Rajah's palace, and from it a rock stairway, on which ten men might have marched abreast, could be traced down to a broad platform where a gate had opened in the city wall. The gate and its posts were gone, but a flight of steps, with the hewn stones broken and awry, but still in place, remained, leading from the platform down to the foot of the slope below the wall. Between the foot of the wall and the nullah, which once had been a moat, there was a thick growth of jungle shrubs as high as a man's shoulders.

With Khatra leading, we went cautiously on until he paused at a line of bent and trampled grass where some large, soft-footed creature had made a pathway between the jungle and the nullah opposite the gateway. We followed the path into the nullah, which was swampy at the bottom. On the hard ground the tracks were invisible to the white man's eye, but here they were deeply imprinted in the moist soil, the great paws of a tiger, which, not many hours before, had descended from the jungle into the nullah and thence up the other side to the foot of the broken steps leading to the gateway.

"The tiger is at home," the shikari said. "If he comes out to range to-night he will pass here. We must await his coming beyond the nullah."

We went back across the nullah to chose our places. The sun was near its setting, and we had no time to lose. About thirty yards from the brink was a korinda bush large enough to shelter us all. We crawled under this, and the long, horizontally growing branches, with their tips drooped to the ground on every side, made a perfect place of concealment. Through the leafage we cut loopholes from which we could command the path on both sides of the nullah and the steps and gateway beyond. This done, we opened the haversack, ate our supper and settled ourselves for waiting. The sun had plunged down behind the ruins, and soon the blackness of the Indian night hid the ruined city a hundred yards away. The very stars were shut from our view by the overlapping branches above our heads. We tipped our rifle sights with phosphorus in order that they might readily be caught in the darkness, and then made ourselves as comfortable as possible. There were the usual night noises of the jungle, and our ears quickened at the rustling of small animals in the grass about us, but there was no sound to indicate that the tiger had come forth. In an hour the round moon came up behind us, flooding the scene with light, and the shikari, crouching behind me, touched my arm.

"See, sahib! Below the wall, to the left of the steps."

Just above the tops of the bushes, between the nullah and the foot of the wall, a white spot was moving, as if afloat in the air, toward the steps that led down from the gateway to the ground.

"What is it, Khatra?" I whispered, but the shikari did not answer. With puzzled curiosity Murdoch and I watched the thing slowly skirting the foot of the wall. It was not difficult to understand that a superstitious native should see in it the spirit of Raj Kehab patrolling the bulwark of his city.

Up in the ruins two jackals, chasing each other about the palace steps, suddenly checked their play, paused in an attitude of listening and slunk away out of view. The shikari, crouching behind me, trembled violently. Turning our gaze upward, Murdoch and I looked at the palace doorway, where a new figure had appeared. The capstone on which, by tradition, Raj Kehab's tiger emblem stood carved in marble, had in the daylight rested level and bare upon the posts. Now upon the capstone, in the full rays of the moon, while as the marble beneath it, the form of a tiger was silhouetted against the night sky. For a few long seconds, while we waited and wondered, it remained like a statue of alabaster, then in an instant vanished. It was all very quick and eerie.

"It is no delusion; we both saw it'm. What do you think?" I whispered to Murdoch.

"We're here to shoot whatever comes," the captain answered. "If it isn't a trick of imagination, if that's the fellow that made the tracks in the nullah, he should show up next at the gateway. Ha! What's that—below the wall, at the foot of the steps? The tiger can't have gone down there so soon! It's a man—and he's going up into the city."

In the excitement of watching the apparition on the capstone we had taken no further thought of the white object afloat above the bushes, until now, emerging into the open space at the foot of the steps, it took form of the turban of a tall man in native garb, who began to ascend the steps to the gateway. As his head and shoulders rose above the landing he looked around, bringing his profile into view. Murdoch started.

"Khatra!" he whispered, shaking the trembling shikari, "tell me who it is you see!"

"Captain sahib's," the answer came quiveringly, "it is the spirit of his great ancestor, Raj Kehab. It is Nadraj."

The man went on, stepped upon the landing and stood upright, while his shadow, stretching across the platform before him, fell upon a square-faced marble stone. A pale arm swung across like a great snake, then suddenly, performing ceremonially, was forward in a white streak which gathered upon and overwhelmed the tall figure on the landing. The sound of a man's cry of alarm was lost in the deep-throated note of a tiger's snarl, as the two went together down to the pavement. A savage snake, the sound of crunching bone, heard plainly by us a hundred yards away, and the tiger, rising to his feet, lifted his head, and with eyes glowing with opaline flames looked over his victim across the nullah as if in challenge to us.

Our rifles were already sighted upon him, and we fired together. Through the smoke we saw the tiger rise into the air above the man, fall half way down upon the steps below, and roll to the bottom. Before the rattle of our shots had died away among the ruins he lay outstretched and motionless at the foot of the steps, while at the top the head of the man he had killed, hanging limply over the edge of the landing, seemed peering down at his slayer.

We reloaded our rifles, crawled from under the bush, and went over to where the tiger was lying. By the light of a torch we examined the mysterious beast which had terrified the Rajah and his kingdom. Its hair was milk-white from nose to tail tips, and its eyes the color of reddened brass. It needed no naturalist to tell us that the rarest of jungle trophies, an albino tiger, had fallen to our guns.

"I am an old man and have hunted the jungle for all my days," said the shikari, "but never have I seen or heard of anything so wonderful."

Then we went up the steps to the landing where the dead man lay. Murdoch lifted the head—the neck was broken—and as Khatra held the torch down to the upturned face they both exclaimed together, "It is Nadraj."

We left the dead dacoit out on the platform, with his folded turban covering his face, and went back to the tiger. The threat of death would not have induced Khatra to touch the body, but he held the torch while Murdoch and I skinned the beast. We carried the skins by turn through the jungle to the village, and, after informing the people that the tiger was dead, rode back to the bungalow. With a squad of police summoned from Caramchal, Murdoch and I next morning went to Nahrabad, where, having fully identified him as Nadraj, we buried the dacoit chief by the side of the nullah, at the foot of the old wall of the city his ancestors had reigned.

Our white tiger skin was one of the year's wonders in India. It had seemed pure white in the night, but in the clear daylight the markings of the ordinary tiger could be seen faintly indicated by colorless streaks, like light crayon pencilings on the white ground color. The Rajah was delighted with what we had done, and he sent two splendid emeralds to Murdoch and one in appreciation of our service in ridding his dominions of the ghost-like depredations of the royal dacoit. He greatly desired the skin and repeatedly asked us to name a price for it, but Murdoch and I held it with the intention of presenting it to her Majesty the Empress at a convenient time. But we delayed too long, for it vanished from the bungalow one day in my absence, and no search could recover it. I suspect that the Rajah and his priests could have accounted for its disappearance. Held in their esteem, they would regard it as a heaven-sent fungus representation of Raj Kehab. But nothing we could do helped the matter, and Murdoch and I had to regard the Rajah's emeralds as recompense for the loss of our priceless trophy.—Washington Post.

An Increase From Carelessness.

The income of the British Postoffice from money in envelopes having no or insufficient address is $30,000 or $35,000 a day.

NEW IDEAS IN TOILETTES

New York City.—Waists made with tucks that extend from the shoulders to yoke depth always are becoming and provide most desirable of all lines.

BLOUSE WAIST.

This pretty May Manton one combines that feature with the plain centre front which is attached to the tucked ones beneath their edges. The original is made of embroidered batiste with trimming of Valenciennes lace, but the design suits all the materials of the season, cotton, linen, wool and silk, and can be made lined or unlined as may be deemed desirable.

The waist consists of the fitted foundation, the back, the tucked fronts and the centre front. The back is tucked for its entire length. The fronts are laid in one tuck at each edge and in three from the shoulders to yoke depth. The centre front is plain and trimmed on indicated lines and is attached to the right side, hooked or buttoned into place at the left. The sleeves are made in the latest style, which means that they are somewhat snug above the elbows but full and ample below.

The quantity of material required for the medium size is four and a half yards twenty-one inches wide, three and three-quarter yards twenty-seven inches wide, three and three-quarter yards thirty-two inches wide, or two and a half yards forty-four inches wide.

SHIRT WAIST AND NINE GORED WALKING SKIRT.

A Popular Costume.

Shirt waists are among the good things of which no woman ever has enough. The very stylish May Manton one, shown in the large drawing, is new and becoming to the generality of figures. The tucks, which are arranged to give a pleat effect, are stitched only to yoke depth at the front, so forming becoming folds over the bust, while the back gives tapering lines to the figure. The original is made of dotted chambray, but all waist materials are equally suitable.

The waist consists of the smoothly fitting lining, which can be used or omitted as preferred, the fronts and the back, and is shaped by means of shoulder and under-arm seams. The back is drawn down smoothly and snugly at the waist line, while the front blouses slightly over the belt. The sleeves are cut in one piece and are full below the elbows and gathered into straight cuffs at the wrists.

The quantity of material required for the medium size is four and a half yards twenty-one inches wide, four yards twenty-seven inches wide, three and three-quarter yards thirty-two inches wide, or two and a quarter yards forty-four inches wide.

Walking skirts have become so much of a necessity as to be included in every wardrobe. The very stylish one illustrated in the large picture is adapted to cloth of all grades, to etamines and the like and to the heavy linens now in vogue, but as shown is made of Sicilian mohair in royal blue with stitching in corticelli silk.

The skirt consists of nine gores which are shaped to fit with perfect snugness above the knees and to flare freely about the feet. The fullness at the back is laid in inverted pleats.

The quantity of material required for the medium size is five and three-quarter yards twenty-seven inches wide, three and three-quarter yards forty-four inches wide, or three and a quarter yards fifty-two inches wide.

A Mirror Fad.

Within the past few years a decided fad for the collecting of antique mirrors has developed, and many a looking glass of ancient days, treasured more for association's sake than for its intrinsic value, has assumed considerable importance commercially. Colonial mirrors are having a decided vogue at the present time, more particularly those decorated with a pastel across the top, but in the opinion of one critic they are not entitled to consideration on the score of beauty.—New York Journal.

The Triumph of the Mistletoe.

In lace and embroideries it looks as if the too, too popular grape was about to be replaced by the mistletoe. Though less showy than the fruit of Bacchus, its artistic possibilities are quite as good. Furthermore, it has traditions and associations of its own that are distinctly pleasant, and, last of all, it is new.

Top Collars and Auto Cuffs.

Top collars and cuffs are daily growing deeper, and rather more important. Vandyke points are favorite shapes, and they are treated with vivid splashes of embroidery in colors, red, pale blue and black being most effective.

Tulle Arrangees.

A new and novel material of the net class is arrangees, a fine silk tulle with no-ones forming symmetrical lace designs. It is much more durable than the ordinary tulle.

A Hand-Painted Frock.

Among the hand painted mousseline frocks worn at a recent Paris function was one in soft gray mousseline, painted in shadowy orchidas in their natural tints.

MISSES' TUCKED BLOUSE.

Tucked Blouse.

Blouses made with horizontal tucks are greatly in style and suit girlish figures to perfection. This one, designed by May Manton, shows three tucks in the blouse and three in the sleeves made on continuous lines, so giving the broad effect which is demanded by present fashions. The model is made of white handkerchief linen with collar and cuffs of lace and is unlined, but the design suits wool and silk as well as cotton and linen fabrics, and the lining can be added whenever desirable.

The blouse is made with the fitted foundation, the tucked front and tucked backs, and is shaped by means of shoulder and under-arm seams. The fullness in the front is laid in five tucks at the neck and both front and backs are gathered at the waist line. The sleeves are the new ones that are snug above the elbows but form full soft puffs at the wrists.

The quantity of material required for the medium size is three and three-quarter yards twenty-one inches wide, three and three-quarter yards twenty-seven inches wide, two and three-quarter yards thirty-two inches wide, or one and seven-eighth yard forty-four inches wide, with one-quarter yard of all-over lace.

FOR THE FAIR

HAIR BOWS.

Hair bows grow larger.

If only one be worn, at the nape of the neck it may be immense.

Two bows are but the "hunting pair" of the horsey set over again.

Broad black ribbon is most worn just among young girls in addition.

One pretty girl ties her crossing at the neck with a yard and a quarter of white seven-inch satin taffeta ribbon.

Women as well as girls wear the coil so low on the back of the neck that it rests on the shoulders.

When girls are really truly grown up the bows are replaced by shell slides, though those who look young often cling to the bows.—Philadelphia Record.

LONG-DISTANCE BELLES.

It is a familiar statement that women who go to the country for the summer seem to find more delight in their trips to town than their sojourn at the summer resort. The frequency with which they come into town depends on their ingenuity in inventing some pressing necessity for seeing the dressmaker, the dentist of the doctor. It is usually the dentist who serves them best as an excuse, for so many be made the pretext for a visit to town at any time.

The superiority of the girl who goes often to town over her associates in the hotel is always noticeable. She shares frequently the excitement [illegible] and is looked up to [illegible] The girl who is not frequently called up on the telephone is regarded as a favorite of fortune. To be called up on the long-distance 'phone from New York must mean something serious, unless [illegible] The expense [illegible] is almost ready to announce.

To be called up once a week to the 'phone will fill the other young women at the hotel with excitement, while to be called up daily fills the hearts of the others with chagrin, not excluding the engaged one and the one that goes off next to town.

It is only by these various methods that girls may be belles in the summer hotels to-day. The number of men in these places is so small and most of them are so young that actual superiority among the girls struggling for their attention is a hollow victory.—Indianapolis News.

BEAUTY DON'TS.

Don't indulge in the frequent frown, which is responsible for more wrinkles and crow's-feet than age or illness.

Don't scorn to learn of an almond-eyed Japanese the secrets of retaining a smooth, unfurrowed face. The secret is that she displays nothing in the drawing room except a lovely flower and a screen.

Don't get tired if you care to preserve the pristine beauty of a rose-leaf complexion.

Don't shop—that is, don't shop the whole day long in feverish excitement, running bargains to earth. Not only are dress and temper ruined, but complexions as well.

Don't wear gloves too new or too old. New ones cause wrinkles because of their tightness, old ones because of their want of respectability. Gloves are worn too much anyway.

Don't always be doing something; have intermittent attacks of idling.

Don't neglect the afternoon "forty winks." If you don't rest your mirror will show a new line in your face every day.

Don't sleep with the head under the clothes; it will numb and wrinkle the skin.

Don't let the jaw drop just at the moment of falling asleep; it tends to make lines on either side of the mouth.

Don't use powder on the face. It digs its way into every line and digs it deeper and deeper.

Don't be afraid of friction for the face. Freshness is produced by the rapid bath in which brush has been stirred followed by long friction. This keeps the blood at the surface.

Don't indulge in the essentially feminine habit of "knitting the brow;" take life less strenuously.

Don't always be thinking of something. Sometimes think of nothing.

Don't let a day pass without relaxing limbs, muscles and expression.

Don't fret and don't worry—these are the best cosmetics. Worry is called our national disease and "American tis" is its distinctive name.

Don't "putter;" either work, rest or play. "Puttering" is twin sister to worrying.

Don't put too much of yourself into the ordering of the household or the management of the servants if you wish to keep fagged cheeks and hollow eyes at a distance.

Don't get wildly excited if Bridget has neglected to dust the legs of the tall table. Neither the welfare of your family nor that of the nation is involved.

Don't exhaust all your reserve force over petty cares. Each time that a woman loses control over her nerves she moves a fraction of an inch farther on in the path that leads to premature old age.

Don't forget that an ounce of prevention is worth several pounds of cure. It is better to begin to take care of complexions before they begin to show wear and tear.

Don't think it supernaturally virtuous to disregard beauty. The divine gift of beauty is the second great blessing of life, health being the first.—Washington Star.

Boudoir Chat.

Mrs. Elizabeth Caplinger died in West Virginia leaving sixteen children, seventy-two grandchildren and ninety-[illegible] great-grandchildren.

"Carmen Sylva," the Queen of Roumania, is now busy on a play the text of which is said to be that marriages between queens and princes are, to all intents, sparred per cent against nature.

The late Margaret Thoreson was one of the best-known Norwegian writers; her last novel has just made its posthumous appearance. She was a pupil of Bjornson and stepmother-in-law of Ibsen.

Miss Eva Humbert, daughter of the woman of the phantom millions, is now said to be living in a charming little German nook in the valley of the Weser and near the Westphalian woods.

The mother of President Loubet of France still manages the farm at La Terrasse, Marianne, where the President was born. The old lady, to whom he is devoted, is over ninety, but [illegible] hale and hearty.

Miss Ward, the young New York [illegible] who recently won the $2,000 commission to make a drinking fountain for the St. Louis World's Fair grounds, spent her childhood on her father's Missouri farm. She was born in Howard County and lived there till a few years ago.

Miss [illegible] the second lady [illegible] Royal Society of Painters [illegible] are Miss A. Fowler, Mrs. Mary A. [illegible] and Miss Martha Hayes, all [illegible] the first two married ladies.

Two cyclones were [illegible] done on [illegible] and never celebrated their [illegible] birthday.

Mrs. Percy Goodrich Smith, who died at Waterbury, Conn., recently, in her seventy-third year, was the daughter of Samuel Griswold Goodrich, who was known years ago as little [illegible] as "Peter Parley." She did considerable writing herself. Her grandfather was a Revolutionary officer.

Princess Victoria Louise, Emperor William's youngest daughter, is taking a course in cooking under the direction of the chef of the imperial kitchen. The princess has a small kitchen of her own, and has already mastered the art of bread making. She also made some [illegible] seed cakes which were served on her father's table.

The necklace coat is the quintessence of elegance and costliness.

Chrysoprase—that lovely green stone—is pushing the ubiquitous turquoise hard in the race for favor.

Pepper red is a new shade. We all know that darling, brilliant hue. Very effective in touches and if properly handled.

White pongee is gaining favor for the morning gown. It seems to have a bit more body than china silk, and the weave is more fascinating.

Having all the charm of weave of the linen canvas, and the softness and finish of a scrash silk, scrash linen is hound to be a blue ribbonet.

The suggestions lace collar is giving way to the use of cambric or batiste, elaborately hand-embroidered. Here is [illegible] opportunity for the deft needlewoman.

A woven head covering is now the [illegible] ing in parasol handles. Not a bad idea. One might make several of these coverings to go with different [illegible] and thus bring her parasol into harmony with many gowns.

The new handkerchief sleeve is most elegant and yet quite simple of construction, the top portion is plain and [illegible] fitting and reaches to the elbow [illegible] old almost be better for a thing [illegible] than one handkerchief shaped frill would be stitched to the outside and the lining rolled over it.

Wide girdle belts are popular. They are very pretty and becoming for the [illegible] ed woman, but for her short-waisted sister they are a miserable [illegible] Patent velvet is the chosen material for most of the girdles, though wide sash ribbons are also used. Those made of the ribbons are pleated front and back with long ends tied behind in a bow and fringed.

Daintiness and simplicity mark a negligee of white crepe de chine, which is made over pale liberty silk. It is gathered with half a dozen shirrings at the figure, and the neck has a deep collar of the soft crape, which is turned back, showing a prettily draped effect of pink liberty silk, arranged like a crossed fichu. The sleeves are cut into several deep points and do not extend even to the elbows, but beneath these are closely fitted liberty silk sleeves which ruffle in a delightful [illegible] fashion to the wrist.

Encouraging Builders.

To encourage the erection of beautiful residences in Paris the authorities award three gold medals annually to the designers of the most artistic dwellings. The owners of these homes are relieved of half their annual taxes.

North Plainfield Weekly Review.

SATURDAY, SEPTEMBER 5, 1903.

TO ADVERTISERS

Frequent changes of advertisements is one of the main requisites for a successful result; we therefore urge our advertisers to change their ads at least once a month. Try and get such changes to us as early in the week as possible; never later than Thursday noon.

GIVE IT A FAIR TRIAL.

Like all things departing from the beaten path of custom, the new primary law, to be first tried next Tuesday, has had its full share of censure.

It is unjust to condemn a law before it is tried. No one can honestly deny that a decided reformation was needed in our primaries, and while the new law may, and probably will, need amending before it is perfected, yet we doubt if it were possible to codify a more satisfactory law of this magnitude, with no experience to guide the legislators who framed it.

The greatest [illegible] we have heard against the new law is that the people are taking no interest in it. This is no fault of the law, and we fail to see wherein it could offer more encouragement for the people and less encouragement to the politician and ward heeler.

The great trouble with the old law was that the people had no voice at the primaries, and realizing this they took no part in them, but allowed the politicians to control the primaries and thereby the elections.

Under the old law there was an excuse for the voter to remain away from the primaries, but not so under the new law.

Contrary to popular opinion there is nothing hard to understand about the new law. We have already shown how easy it is to nominate the delegates for the county convention. Ten or more voters simply sign a petition asking that certain names be voted for. This having been done, it now remains on next Tuesday to vote for such of these delegates as may be desired.

In North Plainfield the following delegates have been lawfully nominated -

REPUBLICAN

1st District	2d District
Charles Place	Harrison Coddington
Dr. J. H. Buchanan	Albert Runyon
Charles A. Lee	Dr. J. H. Cooley
Dr. A. A. Dundon	Wm. C. Smith
Wm. G. Debele	J. J. Stahl
	Robt. Clark Jr.

DEMOCRATIC

Charles Keller	L. R. Bird
George W. Bird	C. W. Harden
Wm. J. Kiely	
John T. Cave	

North Plainfield is entitled to three delegates in each of the two districts. The primaries will be conducted practically as regular elections, except as to hours, which are from 1 till 9 o'clock p. m.

Upon entering the polling place to vote at the primary, the voter should ask if he is registered, and then request a primary ballot of the party in which he wishes to participate. He will receive the party ticket he asks for and no other. He must designate which party ticket he wishes to vote. He cannot get both.

The voter will then come to a booth, the same as on election day, and prepare his ballot by erasing with a black lead pencil all names thereon other than those for whom he desires to vote. He will then fold the ballot so as to disclose the official indorsement on the reverse side.

The voter of the primary must be careful not to vote for more candidates for delegates than his election district is entitled to; and not to erase more names than he means to.

Should he make a mistake in preparing a ballot, render it illegible, soil or destroy it, he may obtain another from the election board. He can have but one ballot at a time, and not more than three in all.

That is all there is to it. There is no reason whatever why any voter should hesitate to vote next Tuesday. The importance of a primary election cannot be overestimated; it is really more important than the general election, because at the primary it is generally settled who the candidates shall be, and the new primary law recognizes this fact and gives every voter an opportunity to freely express his sentiments.

Let every voter in North Plainfield make it his business to attend the primary next Tuesday, and by so doing show that he believes in honest elections.

THE TAX BUDGET.

The County Board of Assessors made up the tax budget for the year at the Court House on Tuesday. Elston M. French was elected chairman and Frank M. Ross, secretary. The valuation of real estate in the county has increased by the last assessment $721,766 over last year, but that of personal has decreased $96,737. The deductions outside of mortgages however are about $200,000 less than last year, so that the total valuation taxable is about $100,000 more than last year. The county rate will be 64 cents on the $100 against 58 cents last year, and the State school tax 18 cents, the same as last year. Following is a table of ratables:

Somerset County Ratables for Year 1903.

Townships	Acres	Real Estate	Personal Estate	Deduct Debts	Taxable Real Estate	Taxable Personal	Valuation Taxable	School Tax	County Tax
Bedminster	26,000	$ 1,098,300	$ 321,480	$ 212,100	$ 886,200	$ 321,480	$ 1,207,680	$ 217 44	$ 772 91

A GUBERNATORIAL POSSIBILITY.

Our fellow townsman, Hon. S. S. Swackhammer, is fast coming to the front as a probable candidate for Governor on the Democratic ticket. The Newark *Evening News* last Wednesday has the following editorial regarding his chances:

"Just why Somerset county is shying so many castors in the Gubernatorial arena at this early date is more or less of a mystery. Only a few short months ago County Clerk Somers, the former Assemblyman from that county, was named as the possible choice of the next Republican State convention. Now Assemblyman Samuel S. Swackhammer is brought forward with not a few political ribbons and other decorations, and is announced as the probable choice of the Democratic State convention. Somerset county is certainly ambitious. It casts less than 7,500 votes, all told, yet it has two Gubernatorial candidates, while counties five times as great haven't even one. Somerset seems to think that the largest trout are sometimes caught in the smallest streams.

"The candidacy of Mr. Somers was never taken seriously, even by himself, but the nomination of Mr. Swackhammer is not beyond the possibilities. During the last legislative session he attracted considerable attention by his breezy, short speeches and retorts, and of late he has been pleasing the farmers by making very acceptable addresses at their gatherings. Already his opponents have acknowledged his strength by calling him the "Tall Sycamore of the Raritan," "Swackie," "Slim Sammy," and similar appellatives, and it must be admitted that as soon as a man becomes popular or unpopular enough to be nicknamed lovingly by his friends and derisively by his enemies, he is in a fair way to receive a nomination of some kind.

"Moreover, Mr. Swackhammer's party is in need of a candidate whose name has not been worn threadbare, and Mr. Swackhammer fills this want. It is not impossible that the county which produces two presidents of the Senate in quick succession, Lewis A. Thompson and Charles A. Reed, may cut a heroic figure in the next Democratic State convention. Stranger things have happened."

There is no mystery whatever why Somerset county is "shying so many castors in the arena." We have the timber here and are not ashamed to let it be known, taking our chances with the rest of the State of knocking out chips of the presidential [illegible].

The law passed by the last Legislature raising the age from twelve to fourteen when children may be legally employed by various manufacturers, went into effect last Tuesday. It is a good law and meets general approval.

HAZED A TENDERFOOT.

But He Was Dead Game and Determined.

"When I first struck the Snake River country," said the old ranchman to a Chicago "Tribune" man, "I was as green a tenderfoot as ever left the States. And the boys used to lay it over me in them days in a way that was killing.

"One cold winter day, I remember, Dave Orcutt and Hank Timms were driving our ponies over to the ranch. I had only been in the country two weeks and this was the first time out to Slawson's. There was a sharp wind blowing from the north. We humped along lively till suddenly the trail came to a sharp at the edge of a

"'Buffaloes,'" says Hank Timms, "the little Cimaroon is on a stampede. Don't try to ride across her course, but ride around her end.'

"'I have to ride around to Hartford,' says Dave Orcutt.

"'How far is that?' I asks.

"'Too dang deep for comfort,' says Hank. 'Your clothes 'd freeze to your back in two minutes if you got 'em soaked.'

"'Well, it appeared to me that here was my chance to show that I was dead game, even if I was a tenderfoot.

"'I'm going to ride cross right here,' I says.

"'Don't you do it,' pleads Hank. 'You're new to the country yet, you know, and me and Dave has to look after you. You'll be foolish if you try it. Do you want your clothes froze to you?'

"'I'll take my clothes off,' I says, 'and stand up on my saddle.'

"'But the people over to the ranch'll see you if you strip that way,' says Dave.

"'I'll fix it so they won't,' I says, and with that I stripe to the skin in the cold wind and puts on a long linen duster that I had in my gunny sack. Then I ties up my clothes and hitches them around my neck, climbs up on top of the saddle and starts down the trail.

"Say, how the wind did whistle around my bare legs! And standin' up in the saddle like I was it had a mighty good show at me. That linen duster wasn't much protection, either.

"'Go ahead if you must,' says Dave, solemnly. 'We boys'll wait here on the bank till you get across. An' remember that we warned you that you were foolish to try it that way.'

'I starts my horse into the crick. As carefully as I can I steers him across, and they ain't a blame spot in that whole stream where the water is six inches deep."

Saving It.

"Say—I tell ye what, Mandy, there's a lot uv good in thet young Abbott boy.

Mandy—There must be, if there ever was. Leastwise I never heered uv him lettin' any uv it out.

Power of Habit.

"What's that you are sending away, Will?" asked his wife.

"That," replied Mr. E. Will Borus, the struggling author, as he sealed the envelope, "is a letter of regret in reply to an invitation to attend a reception at the Hossfords' next week."

"But what did you enclose all those stamps for?"

"*To be sure—I forgot!*" *he said opening the letter again, in some confusion.* —Chicago Tribune.

A Scientific Grafter.

"That is Professor Dygge, is it? He seems to be the lion of the evening. What has he ever done to make him famous?"

"Haven't you heard about him. He's the man that succeeded in supplying a Manx cat with a tail by grafting the latter half of a snake on the animal."—Chicago Tribune.

He Really Cared.

"My love," said the beaver, passionately, "*come and live with me in my* newly built house in the stream."

For a moment the beaver maid was silent, then coyly slapping her tail on the bank she whispered, "Then you do give a dam for me, after all?"—Cornell Widow.

The Right Sort.

Mac—What is your idea of a man?

Ethel—One who is clever enough to make money, and foolish enough to spend it freely.—Life.

Koreans in Russia.

Ten young Koreans are being sent by the Emperor of Korea to finish their education in Russia, the first of regular parties whose expenses the Emperor will pay.

You cannot dream yourself into a character; you must hammer and forge yourself one.

In England the annual consumption of southern fruit amounts to fifteen pounds a head. In Germany it averages not quite three pounds a head.

The Rivera memorial to the late Queen Victoria is to take the form of a cottage hospital at Nice.

Beware of Ointments for Catarrh That Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists; price, 75c. per bottle.
Hall's Family Pills are the best.

Piso's Cure for Consumption is an infallible medicine for coughs and colds.—N. W. SAMUEL, Ocean Grove, N. J., Feb. 17, 1900.

It sometimes cost more to accept a favor than reject it.

PUTNAM FADELESS DYES are fast to light and washing.

The good die young, especially good resolutions.

Miss Gannon, Sec'y Detroit Amateur Art Association, tells young women what to do to avoid pain and suffering caused by female troubles.

"I can conscientiously recommend **Lydia E. Pinkham's Vegetable Compound** to those of my sisters suffering with female weakness and the troubles which so often befall women. I suffered for months with general weakness and felt so weary that I had hard work to keep up. I had shooting pains and was utterly miserable. In my distress I was advised to use **Lydia E. Pinkham's Vegetable Compound**, and it was a red letter day to me when I took the first dose, for at that time my restoration began. In six weeks I was a changed woman, perfectly well in every respect. I felt so elated and happy that I want all women who suffer to get well as I did."—MISS GUILA GANNON, 359 Jones St., Detroit, Corresponding Sec'y Mich. Amateur Art Association.—$5000 forfeit if original of above letter proving genuineness cannot be produced.

It is clearly shown in this young lady's letter that Lydia E. Pinkham's Vegetable Compound will surely cure the sufferings of women; and when one considers that Miss Gannon's letter is only one of hundreds which we have, the great virtue of Mrs. Pinkham's medicine must be admitted by all.

If Bilious use TARRANT'S SELTZER APERIENT. TRADE MARK. REGISTERED.

Of Interest to Business Men.

THE UNION PACIFIC, on account of the varied character of the country it traverses, offers to those who contemplate a change to the West a more diversified territory for selection than does any other transcontinental line. Its main line runs through or reaching via it are the States of Nebraska, Kansas, Colorado, Texas, New Mexico, Utah, Wyoming, Utah, Idaho, Montana, Oregon and Washington. Every business interest is represented along its line.

For the Farmer, there are thousands of acres of rich agricultural land are for sale at low prices.

For the Stock-Raiser, immense areas of excellent grazing land can be secured.

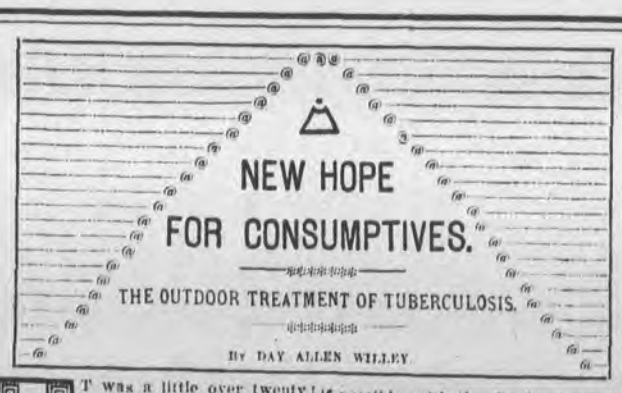
For the Miner, the great mountains of the West await but the opening of railroads to become the source of large fortunes.

For the Business Man, the growing cities and towns of the West are constantly offering new opportunities for investment of capital and location of industries which are encouraged by older sections of the United States.

Write for free pamphlets, "Business Opening on the Union Pacific."

E. TENBROECK, G. P. A., Union Pacific Railroad, 287 Broadway, New York City.

25 CTS. PISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION 25 CTS.



NEW HOPE FOR CONSUMPTIVES.

THE OUTDOOR TREATMENT OF TUBERCULOSIS.

BY DAY ALLEN WILLEY.

IT was a little over twenty years ago that Koch discovered the minute form of life which has been called the bacillus of tuberculosis, —a proof that consumption is infectious. What the eminent savant detected beneath the microscope resulted in a radical change in the method of treating this disease. As medical men have studied the various methods, the benefit which nature could confer in eradicating it has been *more and more appreciated*, until the time seems to have come when medicine may be considered but an incidental in successful treatment.

It may be an exaggerated prediction to make, that twenty years hence may see the man or woman whom the physician has diagnosed as suffering from lung trouble starting for the health camp in the vicinity of his or her abode, to return a few weeks or a few months later restored to health, and able to again take up life's pursuits,—an era when some of the hospitals which have been constructed and equipped purposely to care for pulmonary patients will be needless, and consumption in its advanced stage almost as rare as smallpox or yellow fever; yet, *judging by the results* which have thus far been attained,

GETTING READY FOR A NOONDAY MEAL AT A WINTER CAMP.

if possible, with the sky for a canopy. *The medical man of the olden time* would indeed be shocked if he could visit one of these places, to see so-called invalids hard at work in the forests making their camps, lolling about in hammocks in summer with *heads uncovered, and lying muffled in* blankets and furs in the sunlight in the dead of winter, with no shelter but the blue sky above them. But *these are only some of the ways* in which health is sought. Patients who

PATIENTS TAKING A SUN-BATH IN WINTER IN MASSACHUSETTS.

there is a possibility of this state of *affairs coming to pass, and not far in* the future. The fact is, that out in the open, even amid snow drifts of winter, there are elements which have more curative properties than any compound which has yet been prepared by the chemist, and the one who is not too far advanced in illness to spend nights as well as days living in almost as primitive manner as the Indian of the last century can be restored to health without the necessity of going thousands of miles to sojourn on a mountain top or in a land where snow is unknown.

At a recent gathering in Pittsburg, Pa., one of the most prominent physicians of the State made an address, in which he gave his formula *for the cure of tuberculosis.* It was this: "Eight hours a day in the open air, unless the weather is so inclement as to make this a practical impossibility; a clean, healthy diet, consisting largely of milk and eggs; and the exercise of proper precaution against

PATIENTS TAKING MORNING EXERCISE.

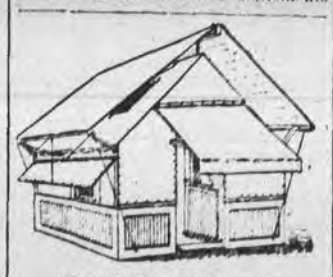
infection from the germs of the disease." The physician in question knew of what he was speaking, for he has been using fresh air for several years as one of the principal remedies in a sanitarium among the Pennsylvania hills, which has received many a patient whose life had been "given up" by the family doctor, and who had come here as a last hope.

It is truly an easy and enjoyable way of getting well for any one who is a lover of nature for the main principle carried out is to get in touch with that which is out of doors, to be amid the trees, continually breathing the air purified by natural processes, to exercise and eat and sleep, are able to stand the exercise amuse themselves by clearing away the snow from the verandas in the winter,—even the women handling the broom and shovel and enjoying it. Coasting on the hillsides is another strange recreation for those whom we call consumptives encouraged at the Massachusetts institutions. Physical culture is one of the requisites for those who are able to attempt it, and daily a dozen or a score of patients are put through these simple movements, under the guidance of perhaps one of their number or a member of the medical staff. The tent life is a part of the routine of the women in summer as well as of the men, and it is an actual fact that in Massachusetts some of the women have erected their own camps for winter, decorating the walls with posters and photographs, and converting them into miniature club houses, where they occupy themselves in conversation, reading, sewing and various games.

SUMMER VIEW OF ONE OF THE MODEL CAMPS.

These camps are unique in many respects. The buildings are composed simply sheds, having a floor to prevent of but three sides, that facing the south being left open. They are the dampness from the ground affecting the inmates. *Some forest trees* are used for posts, and the walls made of planks or boughs fastened to them. If the temperature is too low for comfort, it is moderated by the use of a small stove, sometimes an open fire. Draught is furnished by digging a tunnel through the earth beneath the shed, terminating in a length of clay pipe. When a fire is started the air *is sucked through this conduit*, and that keeps it burning brightly.

These men and women realize that every breath of the pure atmosphere is a bar to their ailment, and their eagerness to be in it—to inhale it—is not strange when one considers the years some of them have fought to regain their health,—years of suffering and endurance which none could appreciate save those who have the same affliction as themselves. Recognizing nature's remedy, it may be said that only when considered absolutely necessary is medicine or stimulant administered, and the comparatively few who require these are usually recent arrivals, whose systems have been weakened by long duration of the complaint. As they improve, an effort is made to substitute food for the tonic. The menu is not limited. It includes the usual meats and vegetables, with tea and coffee; but, as already indicated, milk and raw eggs are considered of special value, and all are expected to *add these to their daily diet.* Sleep is another essential and physical effort is encouraged as a promoter of it. The occupation of the mind also tends to keep off the melancholy feeling which often affects the consumptive especially, so the sociable atmosphere is considered to be one of the most valuable features. In fact the absence of so many of the dreary accompaniments of hospital life is remarked by the visitor, who might easily mistake the purpose of one of these settlements



THE HOLMES TENT COTTAGE.

(On three sides are double canvas walls, which may be opened by raising the upper half of outer wall like an awning, and dropping the inner wall, thus making a pavilion tent. When closed, a space just above wainscoting of outer wall admits air, which enters the tent at the eaves.)

were it not for the appearance of some of the patients, whose features tell too plainly the inroads which disease has made upon them.—From "The Outdoor Treatment of Tuberculosis," in the American Monthly Review of Reviews.

Knows His Own Land.

Mr. Gully, the Speaker of the House of Commons, has one hobby, which is to know more thoroughly than any one else the geography of his own country, and his knowledge in this direction is really wonderful. He was one day, some few years ago and before he came to his present high position, traveling from Carlisle to London, and on the way was able to tell a companion the name of every stream they crossed, even down to the smallest brooks.

Weather Signals in India.

Monsoon stations are to be established in India for the purpose of taking observations by means of kites and kite balloons. The first station will be in the Himalayas at Simla, 7000 feet above the level of the sea.

FOLDING PROPELLER BLADES

The use of auxiliary yachts is coming into increased vogue, for the evident reason that in them are combined the delights of bounding along under the influence of the wind, without the uncertainty of the craft entirely dependent on sails. Men of business who wish to enjoy the pleasures of the sea cannot indulge themselves, for the reason that there are so many possibilities of a delayed return, owing to the absolute dependence of the craft on wind, weather and tide, but with the auxiliary yacht this element is entirely eliminated, and when the wind dies out or the tide is unfavorable, it is only necessary to start the engines and proceed without loss of time.

The presence of the propeller hanging idly on the bottom of the boat when the sails are in use has always been regarded as a drawback to the completeness of this combination, and many ways have been devised to dispose of it under these circumstances. There has been recently invented a folding propeller shown in the accompanying cut, which has the merit of novelty if nothing else. This one is so arranged that when it is in use it is as effective as any other, but the minute the engines are stopped and the sails raised it folds up of its own accord, and the blades are disposed of in such a way that

FOLDING PROPELLER BLADES.

they in no way impede the forward motion of the boat.

The blades are shown in the accompanying cuts in their closed and open positions. The inventor is that of Arthur W. Learned.

Charm of Circus Life.

"There is a charm, a fascination about circus life that is hard to explain," said a veteran showman. "It is surely a tough existence, being buffeted about from place to place, often without a bed to sleep in, and the wages, outside of the salaries paid to a few stars, are amazingly small. Yet when a man once gets a taste of circus life it's all up with him. He's never good for anything else and never wants to be. There must be a germ, bred of the sawdust, that gets into his blood. Take the canvasser, for instance. They get $20 a month and their board, which usually consists of bad grub and an impromptu bed in a wagon. Often they don't take their clothes off for weeks at a time. There's one fellow I know who possesses more than the average intelligence. He has a trade and during the winter he makes, on an average, $20 a week. And yet, just as soon as the circus season opens, he throws up his job and goes out on the road with a show for $20 a month. In almost every town the management is besieged by men and boys who want to go along, and many of them offer their services for their board. It's a queer state of affairs."—Philadelphia Record.

Eggs as a Food.

An Italian authority finds that when hens are fed on food containing a large percentage of iron the eggs also reveal the presence of iron in the very digestible form of the albuminate. Such eggs exert a tonic effect on persons who eat them. The case illustrates the fact that all eggs are not alike by any means and that, according to the food fed, they may vary greatly in dietic value and effect.

All But the Right Way.

Some men try to make a living in every way except working.

The Funny Side of Life.

THE BANQUET.

The moth he is an epicure
Who eats full oft with vanity zeal,
He eats his fill,
You foot the bill
For his nice fifty-dollar meal.
—Washington Star.

COMES HIGH.

Knicker—"Experience is the best teacher."

Backer—"Well, aren't we always raising her salary?"—Harper's Bazar.

AT CLOSE RANGE.

Mrs. Upperton—"I had all the conceit taken out of me yesterday."

Mrs. Nextdoor—"Indeed! And where did they find room to put all of it?"—Chicago News.

SELF-DEPRECIATION.

"What I like," said Willie Washington, "is a good sensible girl."

"Why don't you propose to one?"

"What is the use? If she were sensible she would say no!"—Washington Star.

DEFINED.

"What is your idea of a popular tune?"

"A popular tune," said the man who *takes music seriously*, "is one that gets to be universally disliked."—Washington Star.

DEALER WAS WISE.

Brown—"Why do you want me to pay in advance? Are you afraid I won't bring the horse back?"

Liveryman—"No, no; not at all. But you see the horse might come back without you."—Atlanta Journal.

CRUEL.

His Wife—"Charles, I do think you ought to give me more of your time."

Her Husband—"Give you more? Why, you take so much of my time that I couldn't be a second in a duel."—Harper's Bazar.

HE KNOWS BETTER.

"Do you know what I'm going to whip you for?"

"I s'pose I might make a guess, but I ain't goin' to do it, 'cause I might guess something you didn't know about. I ain't takin' no foolish risks like that, not if I know myself."—New York Journal.

INSEPARABLE.

Affrighted, he turned on his pursuer.

"You black thing, why do you follow me constantly? What are you?"

"I am your sunshine companion," mockingly replied his shadow.—Chicago Tribune.

A QUESTION.

"Here's something that has been puzzling me," remarked the man who thinks too deeply.

"What's that?"

"If all flesh is grass are cannibals really vegetarians?"—Philadelphia Press.

NOT LESS DEVOTED.

"You used to sing 'Every morn I send you violets,' before we were married," said Mrs. Brimkin, with a sigh.

"Yes," answered Mr. Brimkin, "but my devotion has taken a more practical form. Every month I pay the meat bill."—Washington Star.

AN ACHIEVEMENT.

"I don't see why you should be proud of winning that case," said the intimate friend. "You were plainly in the wrong."

"You don't understand these things at all," answered the lawyer. "That's the very thing that makes me so proud."—Washington Star.

NO SUCH MAN.

Manager—"Strange, there haven't been any answers to my advertisement for a clerk."

Proprietor—"No wonder. You made a mess of that 'ad.' The idea of advertising for a man of 'average intelligence.' Everybody who isn't hopelessly below it feels he's far above it."—Philadelphia Public Ledger.

PASSED IN THE RACE.

"Alas!" said the unhappy woman, "and we were once considered wealthy!"

"But, my dear," said her husband soothingly, "we have as much money as ever."

"Oh, yes, I know, but there are so many who have a lot more that nobody says any attention to us any longer!"—Brooklyn Life.

AN ODD INDIAN BELIEF.

Tradition Connected With the Division Into Castes.

According to the tradition of one of the tribes of India, the sun created a man and a woman at the beginning of time and this couple had twelve children. When they had all come to an age to shift for themselves the sun divided them into pairs and placed food of all kinds before them. Upon their choice depended the fate of their descendants. Those who took the tables only became the ancestors of the highest caste of all, the Brahmans, while the Santals, who are of all castes, spring from those who chose pigs. The Kols declare that they are descended from the pair who chose bullocks' flesh and to get the greatest power of the food of the bullock, Larka, or fighting Kol, to increase their strength and fighting qualities. When these latter at the beginning of the last century first came in contact with the troops they were quick to see that with the fighting powers of the foreigners, and, finding that they, too, loved bullocks' flesh, the Kols paid them the great compliment of assigning them to the same pair of ancestors as the Kols. But by the time eleven pairs had chosen their share of the food provided there was nothing left for the unfortunate twelfth couple, and they had to beg food from the others who had fared better. From this unlucky pair spring the Ghasis, who do not work, but support themselves on the charity and leavings of others.

NOT A BLOOD RELATION

Death of Life's Partner Caused a Fine Distinction.

It was in one of the farming districts of New England. The young folks had banded themselves together for monthly jollifications during the winter and were about to celebrate the last dance of the season, as well as a couple of engagements which had resulted from the assemblies. Ben Hawkins, the local Paganini, and his Stradivarius had been engaged to lead them through the mazes of the country dance, and all were looking forward to the "time of their life."

But death inconsiderately claimed Mrs. Hawkins for his own on the afternoon of the eventful party. The young people gathered as arranged, but bemoaned the absence of "Ole Ben," and games were being substituted for the dancing, when in! Hawkins and his fiddle appeared on the scene.

Great astonishment and many questions greeted the old man, but he calmly slipped his fiddle out of its green bag and as he meditatively rubbed the resin on the bow said:

"Wall, yes, Maria's gone; died this afternoon, but I reckon 'taint no sin for me to play for you to-night, seein' she wa'n't no blood relation."

The Brookside.

I wandered by the brookside,
I wandered by the mill;
I could not hear the brook flow;
The noisy wheel was still;
There was no burr of grasshopper
No chirp of any bird,
But the beating of my own heart
Was all the sound I heard.

I sat beneath the elm tree;
I watched the long, long shade,
And, as it grew still longer,
I did not feel afraid;
For I listened for a footfall,
I listened for a word,
But the beating of my own heart
Was all the sound I heard.

He came not, no, he came not,
The night came on alone,
The little stars sat, one by one,
Each on his golden throne;
The evening wind passed by my cheek.
The leaves above were stirred,
But the beating of my own heart
Was all the sound I heard.

Fast silent tears were flowing,
When something stood behind;
A hand was on my shoulder,
I knew its touch was kind;
It drew me nearer—nearer—
We did not speak one word,
For the beating of our own hearts
Was all the sound we heard.
—Lord Houghton.

Shame!

When a man's foot gets tangled up with a woman's under the table and she gets mad about it, you can make her madder by pretending you thought it was somebody else.

Only one medical student in twelve holds a degree in arts. N. Y.—36

We are so certain of the wonderful results obtained from Johnson's Happy Pills for the curing of malaria, chills and fever or liver complaints, any one sending a two-cent stamp and this notice to the Happy Medicine Co., West Brighton, S. I., will receive a box free.

The opinion we have of ourselves is never so valuable as the opinion other people have of us.

Half-Sick

"I first used Ayer's Sarsaparilla in the fall of 1848. Since then I have taken it every spring as a blood-purifying and nerve-strengthening medicine."
S. T. Jones, Wichita, Kans.

If you feel run down, are easily tired, if your nerves are weak and your blood is thin, then begin to take the good old standard family medicine, Ayer's Sarsaparilla.

It's a regular nerve lifter, a perfect blood builder. $1.00 a bottle. All druggists.

Ask your doctor what he thinks of Ayer's Sarsaparilla. He knows all about this grand old family medicine. Follow his advice and we will be satisfied.
J. C. AYER CO., Lowell, Mass.

ION FOR SUNDAY

IT DISCOURSE ENTITLED ER OF RELIGION."

Strong Deliverance on the Moral and Intellectual Divinity—Religion Gives Incentive to Reach It.

Rev. Henry Knott, D. E. Church in this g sermon on "The ower of Religion." n Matthew v: 48: t even as your ven is perfect."

t contains the istianity. In be the very ne precepts the loftiest spoken by me with the ve but mir-endous real-nd of genius n revelation ing and the command at-humanity the ist has drawn sed the way, the vealing the character radiant with love—we o face with the possibil-it through the law and the alvary's cross. By imitating of holy self-sacrifice we shall that glorious perfection of the fected in His only begotten

wish you to misunderstand the t quoted. Man shall never at-solute perfection of God, for impassable gulf between the and the created. In being, for rtality had a starting point has even been in an eternity of pace, man subject to localiza-r there—the infinite Father om-verywhere. In power man a environment circumscribed by er natural or spiritual, free, yet mysterious paradox, his soul the and 'twixt wills human and di-God is the source of creation, and Omega of all things in heav-h, even holding in His almighty rest link of that wondrous chain

perfection: All His love and tributes blended together in one whole, incomprehensible in wis-e and truth. Man fallen, per-ceiving no natural worth, bear-the curse of sin, a subtle tend-vard right, that supreme law of By nature prone to evil, cor-less, his only virtue that which poor rough state. No, he can never God is perfect, but through and moral power of relig-fluence to its commands he can limb undreamed heights of spir-hood, and by the evolution of his soul in Christ win that glorious destiny which the heavenly Fath-willed all born of woman should obedience secure perfection. Thus e the full meaning of the text: al in its implication, giving us the of success. Divine in its com-disclosing the possibilities of our that we as Christians have a divin-ing within us the source of a glor-wer to "press toward the mark for e;" a life complete in its fulfillment end which God intended it to at-be perfect in obedience to the su-law of its existence, even as its is perfect.

[illegible] to a sense of the and infinite. Many people take a ial view of Christianity and never understand what blessings it con-Man was not created to be the play-of the Almighty, but for a purpose—a son, worthy to stand before his r's face and to live with Him in lov-mmunion.

u are all familiar with the story of n's dreadful fall into disobedience and Through the marvelous faculties of oul many Christian men have, at one or another, experienced a momentary riousness of what then was lost. To le us to regain much of that pristine Christ came into the world, lived, red, died and made it possible for us, making known its glories in His own et life, to once more become the sons daughters of God. Religion leads us from worldliness to self-recollection gives to souls fevered with sordid de-a quickening principle of a higher and r life; inspiring intellect with truth, the heart with a pure and exalted

It animates conscience with a su-ne sense of duty and places thought in position with the will of God, clothing y aspiration with a purifying virtue, leading all the faculties of our being ard and onward toward perfection. he immortal longings of the soul can be satisfied by God. Every faculty possess leads us to His feet. There is real happiness apart from that which prehends His love and finds its su-me good by a steadfast devotedness to precepts of His law. Unfortunately, e are men and women who look upon gion as a means to conciliate the divine er, which through sin they have of-ded. They imagine it places them in a ciliatory attitude with Deity, and that its medium they will obtain in the fu-e some indefinable reward, forgetting t religion is a life, a state, which calls operation all the spiritual potentiali-of their glorious nature and through ptation, sorrow and suffering crowns m at last with victory over the world self.

Thus we perceive that Christ came upon earth to save sinners, giving them a wer of endless life. Revealing the char-ter of God, He made it possible for men conform to that perfect original. In s Gospel He lays down a code of morals, sublime, that if we would absorb them to thought and action we should fulfill vile here our destiny. Religion's blessing the supreme good for every man to at-n. It is not an emotion, or merely he-, it is a vitalizing energy in the depths the human soul, subduing to God all the vers of being, incarnating in the heart onsciousness of a magnificent future, kening the intellect, conscience, affec-s and will into vigorous and holy ac-inspiring the mind with a profound of truth and flooding the soul with a which the crash of worlds could not h. Religion, then, is a necessity of Without it existence is a delusion, a tow, lacking substance and meaning.

To grow into the stature and fulness of Christ, in other words, to become a Christ-an, is the design for which we are en-owed with certain faculties. Man is pre-minently a moral being. This is his nature nd the path of his life winds toward the erfection of those qualities which consti-te the essence of his spiritual life. His ue happiness consists in bringing himself nto relation, into union with God. God s holy, the source of all perfection. In he heart of man He has placed a deep and bbiding consciousness of right and wrong. t every turn duty confronts him; on one ide lies goodness, on the other evil, with an inward voice ever commanding with di-ine authority to discriminate between them, urging the choice of that which is awful and protesting against sin, every thought and action being approved or con-demned by this inward monitor. There is not a man or woman living who does not feel that conforming to the will of God is the paramount duty of life. The soul is the great battleground where the material and corruptible strive in ceaseless warfare against the spiritual and eternal. By submitting to the lower instincts of our nature we are destroying that which is highest and best and willfully striving (unconsciously, it may be) to thwart the great end which the heavenly Father's marvelous love would have us attain.

Brethren, you may possess untold wealth. Fortune may load you with her favors, the world may fawn at your feet, but I declare there is no happiness to be found in these; neither does religion confer any outward benefit that shall appeal as pleasures of sense, but its blessedness, the highest, purest, noblest gift in heaven or earth is character—character which finds its likeness in the Christ, conferring a joy which the angels wonder at, and fencing the soul with impregnable battlements of Godlike moral rectitude, from which the concentrated furies and powers of hell are hurled back in confusion as the ocean's waves on the mighty walls of a rock-bound shore. Thus true happiness comes from being, not by having; from the life within, not influence without.

Every man possesses a conscience, and you will hear many declare that they can be just as good, quite as moral as a Christian through the lower of that conscience. But what is conscience apart from religion? In many cases it is a slave in front of a master. The power of passion drowns its voice and weakens it by every deliberate sin. A man believing in the existence of no higher authority will drift upon the current of his animal nature, for those tendencies which are strongest will eventually enslave him. No, without a living faith in God or a personal union with Him the conscience loses its power to govern and guide, but religion clothes it with exceeding strength by revealing to man the source of those magnificent moral attributes with which he is endowed, thus giving to that "still small voice" within the soul an infinite worth.

There is not a heart but has some conception of a higher life than it now feels. Every young man and woman at the gateway of responsibility is fired with enthusiasm and ambitions with a great purpose which they long to accomplish; going out into the world they have to stem mighty currents, within and without, the tendencies of their lower nature and temptations to sin clothed with beguiling finery. Crises will arrive when the future will be determined. Moments of dire peril fraught with tremendous responsibility. They will then feel the need of a higher power, a greater strength than their own to thwart the enemy of rectitude. The ideal of pure manhood and womanhood shining before them will appear unattainable beyond their reach, lost forever. How, then, can they safeguard against this dread experience which has blighted many promising young lives which, unable to stand against the waves of adversity have sunk hopeless and despairing? I answer: By using religion. Religion alone can give them that victory which crowns a life complete in Christ. It places them into direct communication with God, whose delight is that they should become worthy to share His glory. Temptations will surely come, but religion gives them a new meaning; they are but reminders of the existence of a Father who ever waits to aid and sustain, and, as blessings in disguise they carry messages of an infinite love for every individual soul, proclaiming that virtue is the beginning and the end of holiness, the narrow road to perfection.

Another wonderful revelation of religion asserts that you and I sprang from the bosom of the eternal Father. That as He is eternal we too shall live through endless ages, created in His image, sustained by His spirit, our life shall gather unto itself magnificent growth. Religion sets before us a destiny whose divine splendor startles and overpowers our weak conception of its glory. The Word of God calls into being an amazing sense of power. To think, my brother and sister, that through aeons of time we shall be ad[illegible]

[illegible] grandeur and beauty, scaling heights of happiness beyond the dream of angels. The incomprehensible destiny of a living soul loyal to God and duty brings our faces to the dust when we consider that this is our heritage; you and I, with all our weakness, conquering death and the power of moral evil.

In the midst of the trifling follies of the world, the conceit of fashion, the decrees of a thoughtless society, and the whirl of vapid pleasures, let us keep this thought like a burning fire within the brain—the thought of God, holiness and heaven.

Brethren, allow the character of your heavenly Father as revealed by Jesus Christ to stand before you as the goal of all attainment. Religion gives us an ideal and an incentive to reach it. By contemplating and really loving this excellence is to be inspired by it. The Christian man is always conscious of a divine presence. In every phase of his life he marks the guidance of God. He beholds His handiwork in every flower of the field. The hosts of shining stars as they whirl through space declare His majesty, and in the phenomena of nature he discerns a living expression of His glory. Thus by contemplating and adoring His handiwork in the natural world without and the spiritual world within, a Christian is given grace to subdue all things unto the one great end of moral growth. True religion is not belief in a set of dogmas, or the recitation of a creed, or a profession of faith; these are but the accessories of a particular attitude toward truth, but it is infinitely more than this—it is the life giving breath of the spirit of God which rules, not certain relations, but all correspondence of the heart, soul and body with the Creator and with fellow men.

There is no limitation to the exercise of the intellect, yet without a moral principle to guide and enlighten its research, there can be no advance in the path of truth. Many of the greatest thinkers have died atheists. Religion gives to intellect an added power of analysis and discrimination, a medium whereby we discern truth. It places the mentality of man in communion with infinite knowledge. "Gifted with the eye of the spirit," the glory of God streams upon the page of history, and every department of scientific research testifies to His perfection and wondrous love. The mind of the most brilliant scholar will only see in phenomena natural results. Religion alone has power to permeate his work with magnificent meaning. There is a hidden wisdom only revealed to the child of a "new birth" who has had a special and individual revelation of the Father.

Religion crowns intellect with a deep insight into the mysteries of life. The earth, sea and sky, the complex organism of society, the depths of human nature, the history of nations, all these things shine with a new luster, and flood the mind with profound meaning. A blade of grass becomes worthy of study, for the Supreme Intellect has imprinted on its fragile stem divine thought and action. In everything we see God. Under the beneficent influence of His Spirit our faculty of comprehension is robed with sacredness and grandeur, for He calls it forth to a glorious communion and expansion, until one day it shall fully understand the love which now passeth knowledge.

True religion above all things forms an upright mind; it elevates the judgement above prejudice, and creates a noble purpose to receive knowledge through all legitimate channels. It endows a man with sincerity and a quality of fair dealing which no university can teach. It breaks down the barriers of set opinions and destroys the bitterness between sects and parties. It opens the heart to conviction and a ready candor to confess error. The intellect was never intended to be bound to set rules or encompassed with man-made regulations. Its destiny is an upward, onward march toward truth, and true religion fashions all our inquiries and misgivings with reverence and ever leads us to the feet of Him "with whom there is no variableness nor shadow of turning."

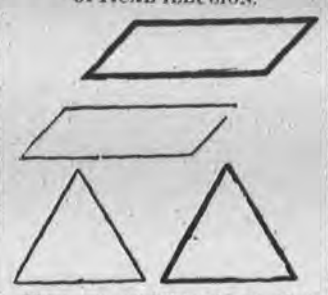
Fame is only lasting after a man is dead.

CHILDREN'S DEPARTMENT.

AND IF.

If I were an elm tree, tall and strong,
And you were another across the street,
We'd reach our arms out straight and long
Until our hands—our leaves—would meet,
And this is the way we'd swing and sway
Up to the sky the whole long day;
And, oh, when a great wind blew us about,
How we would toss our arms and shout!
You and I would have glorious fun
If I were a tree and you were one!
—Lattie Folks.

OPTICAL ILLUSION.



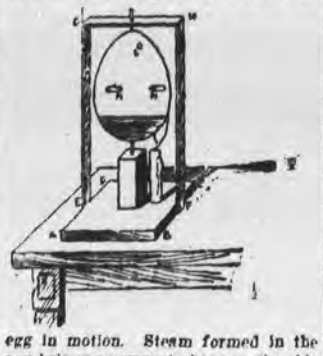
These two quadrilaterals are of exactly the same dimensions. So are the two triangles. Yet, at first glance, there is an apparent difference in size. This is an optical illusion due to the lightness and heaviness of the lines.

A STEAM-ENGINE EGG.

Here is a very interesting little recreation which does not require much apparatus in order to present a scientific demonstration. Set up the little structure as shown in the cut, a few small boards being sufficient for the construction.

A B C D will be the floor; E G and F H two upright pieces joined above to a crosspiece G H. The height of the upright pieces should be about five inches, and they should stand about three inches apart. Into a block of wood about half an inch across and an inch high stick a strong pin. Then place the block in the centre of the platform between the upright pieces; into the crosspiece insert another pin; the two pivots so formed will serve to hold the egg.

Prepare your egg by emptying it through a small aperture L; then make two other openings (N M), to which glue two little paper tubes, disposed as indicated in the illustration. Through the opening L introduce a little cold water, and close the opening with a piece of gummed paper and set your egg in position, balancing it on the pin points. The flame of a candle on a lamp burning feebly will set the



egg in motion. Steam formed in the egg brings pressure to bear on the side opposite an opening, and a rotary motion is communicated to the egg.—New York World.

AN ADOPTED MOTHER.

Arthur Allan was a very tender-hearted little boy, and there were tears in his eyes when he came into the kitchen one morning carrying in his arms a big brown hen, which had been run over by a hay-wagon and killed.

"What will become of Brownie's little chickens, mamma?" he asked. "They are out under a currant-bush, all peeping for their mother."

Mrs. Allan went out in the garden with Arthur to look at the poor little chickens. There were thirteen of the yellow, fluffy little things, and they were only three days old.

"They mustn't die," said Arthur. "I'll take care of them myself."

He brought a basket and put all the little chickens into it. Then he carried them off to an empty oat bin in the barn, where there was plenty of room for them to run about.

The next morning, when Mrs. Allan went out to the barn to tell Arthur to hunt for some eggs, she stopped at the oat bin to look at the motherless little chickens.

There in one corner of the bin hung the big feather duster, and gathered under were all the little chickens!

"I thought the duster could be a mother to them, mamma," said Arthur. So Mrs. Allan let the duster hang in the bin, and the thirteen little chickens gathered under it until they were old enough to roost on a bar.—Florence Hallowell Hoyt, in Youth's Companion.

A SHETLAND PONY FARM.

A Shetland pony farm, where ponies are raised and trained for their life-work, is full of interest to one who admires the gentle little creatures. The Chicago Tribune describes such a farm, located in Wayne County, Indiana, where about 200 of the little animals are raised every year.

There are warm barns with long rows of straw-littered stalls. Overhead are mows of sweet-smelling hay, and a trough of pure running water sparkles and gurgles at one end of each barn.

Each stall contains a pony, and they are all as quiet and well behaved as a thoroughly disciplined school of children. If a stranger enters the barn, it is instantly known by every pony there; and there is a turning of heads and a switching of tails indicative of restrained curiosity.

There is a broad and long space of clean flooring between the two rows of stalls. To walk along this floor and inspect the ponies from the rear recalls the remark of a famous man about Chinamen, "They all look alike until seen separately." In training the ponies, kindness is practiced under all circumstances. When the little pony colt, which a man can take up in his arms and carry about, is strong enough to run and play with its mother, and a little halter is put on it, and it is taught to lead and start and stop at the word. When it grows stronger, but is not yet fully grown, a little set of buff harness with silver buckles is fitted on it, and it is driven about with reins. A gentle pressure of the bit on the tender mouth is sufficient to guide it.

Later on it is hitched to a little yellow cart, and trotted about the smooth gravel drives that wind among stately trees in every direction. It is taken close to puffing locomotives and alongside queer-looking vehicles, and into the neighborhood of shops where there is the sound of clanging iron and pounding hammers and ringing bells. Its actions under all these conditions are carefully noted and recorded, and its special qualifications for particular purposes fully ascertained.

It has been learned at this farm that a pony's natural characteristics are not easily changed, although vicious propensities may in a measure be subdued, and a timid, shrinking spirit encouraged by kindness to assume more confidence and aggressiveness.

It is never attempted to teach the ponies any special tricks, the sole purpose being to make them useful, tractable and safe under all circumstances. When a pony is sold and started away from the only home and friends it has ever known, the purchaser is recommended to be kind and considerate to it at all times.

Missing Dinner Puzzle.

Where is the duck and chicken we ordered?

Useful Dog.

A man went to the city clerk of Horton to get a license for his dog. When asked for the name of the dog he said it was "Blacksmith." "How did you come to pick out such a curious name?" asked the clerk. "Why, you see," responded the man, "every time I give him a kick, he makes a bolt for the door."—Horton (Kan.) Headlight.

SCIENCE & MECHANICS

In a number of German, Belgian and Austrian mines benzine locomotives have been run for a time, and the results attained are said to be very satisfactory in every respect. A little engine draws a train composed of twenty-five trucks on a narrow-gauge underground line, and has a capacity of twenty-five tons. The capacity of the benzine motor is eight-horse power.

If a tube containing radium bromide is wrapped in black paper and brought within three or four inches of the eye in a dark room, a curious sensation of general illumination of the eye is experienced; this occurs whether the eyelid is closed or not. It is difficult accurately to describe the sensation produced; the eye seems filled with light. Probably the effect is due to general fluorescence of every part of the eye.

Typewriter keys, invented for the use of the blind, have their tops in different forms so as to be recognized by the touch. It is claimed that by making use of these figures one can readily acquaint himself with the arrangement of the keyboard. It may be said, however, that the blind are easily taught the ordinary keyboard. One needs to know what the letter is before he strikes it—with these keys he would know afterward. Seeing pupils are now taught from the start to use the keys without looking at the letters on them.

A report received by Sir Ronald Ross, from the general secretary of the Suez Canal Company regarding the effects of the anti-malarial campaign at Ismailia, has been translated for a foreign journal. In it he says: While it is obviously too early to speak definitely regarding the result on the malaria rate the secretary is able to announce that mosquitoes of the genus culex have been largely exterminated. There is also confirmatory evidence from a gentleman in Egypt, who says that he was recently able to sleep at Ismailia without mosquito nets. The campaign against Culex at Ismailia originally promised to be a difficult one, owing to the large number of sewage cisterns under the houses, and the result shows how easily a simple and obvious idea like that of diminishing mosquitoes by dealing with their breeding places can be acted upon by an intelligent and effective executive which sets to work at once, instead of wasting time on useless discussions.

Dr. Blochmann, of Kiel, has been at work for some time trying to concentrate the waves of the wireless telegraph so that they will only be transmitted in one direction, and so that their reception at the other end of the line will indicate the direction from which they come. He has succeeded by means of lenses composed of resin, paraffin, glass and other materials having a high di-electric constant in limiting the rays to special directions. The detector lens at the receiving station only admit rays nearly at right angles to its surface, so a close approximation to their source may be attained. Apparently Dr. Blochmann has not as yet succeeded in using his apparatus over distances of more than a mile or two; but if it should prove available for longer signalling, up to fifty miles, for instance, the value of wireless telegraphy would be much enhanced. By picking up signals from several coast stations a ship lost in a fog could accurately determine her position, and a practical secret system could be readily procured.

It Looked Like Home.

Every night when the man left the office he went around to the north side of the park and sat down on a stone pile that marked the site of a historic building and stared with dreamy, wistful eyes at a small frame shanty on the opposite side of the way. One night another man, who had seen him sitting there often, asked him what he was thinking about. "About home," said he. "That little frame house over there and a few others like it that have been put up by the subway company are the only things in all this town that look the least bit like home. In the place I came from most of the houses were frame, with gingerbread trimmings around the eaves, and a good many of them were shaped like that shanty, and some were painted that very color."—New York Times.

Reversible.

Wishing for a book I sent a boy to the different rooms in the building to see if any teacher had it, at the same time handing him a list of the numbers of the different rooms to aid him in his search.

On returning, he handed me the book with the remark that he had found it in room twelve.

Glancing at the list I inquired: "Why have you written the letter 'H' after each number?"

"Why, that means 'hasn't.'"

"But there is an 'H' after twelve," I persisted.

"Oh, but that means 'has,' don't see?"—Harper's Drawer.

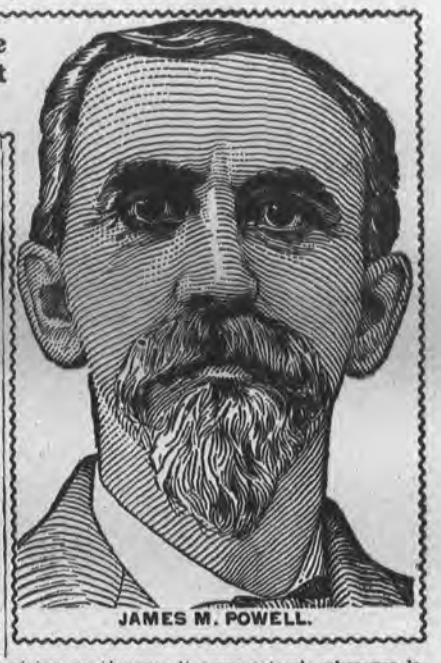
Lifting Power of Coal.

It is estimated that the lead cell of an automobile storage battery is capable of lifting its own weight through a height of about five and three-quarter miles, in expending its energy without waste. Compared with a good piece of steam coal, however, the figure sinks into insignificance. The latter contains enough of potential energy to raise its weight some 2000 miles, against the attraction of gravitation; this makes it about 350 times as rich in energy as is the storage battery.

CATARRH DESTROYS THE KIDNEYS

Was Miserable---Could Not Stand Up or Walk---Pe-ru-na Cured.

Many Persons Have Catarrh and Don't Know It.



JAMES M. POWELL.

Mr. James M. Powell, 633 Troost street, Kansas City, Mo., Vice Grand of I. O. O. F., of Cherryville, Kan., writes:

"About four years ago I suffered with a severe catarrh of the bladder, which caused continued irritation and pain. I was miserable and could not stand up or walk for any length of time without extreme weariness and pain. I began taking Peruna and it greatly relieved me, and in eleven weeks I was completely cured and felt like a new man."—James M. Powell.

Hundreds of Dollars Spent In Vain.

Mr. Cyrus Hershman, Sheridan, Ind., writes:

"Two years ago I was a sick man. Catarrh had settled in the pelvic organs, making life a burden and giving me little hope of recovery. I spent hundreds of dollars in medicine which did me no good. I was persuaded by a friend to try Peruna. I took it two weeks without much improvement, but I kept on with it and soon began to get well and strong very fast. Within two months I was cured, and have been well ever since. I am a strong advocate of Peruna."—C. Hershman.

Peruna cures catarrh of the kidneys, liver and other pelvic organs, simply because it cures catarrh wherever located. No other systemic catarrh remedy has as yet been devised. Insist upon having Peruna. There are no medicines that can be substituted.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

Peculiar Marriage Ceremony.

Among the Kherrias of India the marriage ceremony is quite elaborate. After many preliminaries the priest begins this singular performance: Taking a small portion of the hair of the bride and groom in turn, from the center of the forehead, he draws it down to the bridge of the nose. Then pouring oil on the top of the head, he watches it carefully as it trickles down the portion of hair. If the oil runs straight on to the tip of the nose their future will be fortunate; but if it spreads over the forehead or trickles off on either side of the nose bad luck is sure to follow. Their fortunes told, generally to their own satisfaction, the essential and irrevocable part of the ceremony takes place. Standing up side by side, but with faces strictly averted, the bride and bridegroom mark each other's foreheads with "sindur" (vermilion). Great care is always taken that neither shall catch a glimpse of the other during this important process, which finally makes the couple man and wife.

School Music and Mad Cats.

A ladies' school of music in a suburb of Vienna has owned three cats during the course of the past year, and each has gone raving mad, according to the testimony of a veterinary surgeon. The diurnal discord within the establishment is reported to be ear-torturing in the extreme. The school now owns a deaf cat, which sits out the strumming of a dozen pianos with sphinx-like imperturbability.

Silk From Wood.

The threads of silk made from wood in Germany have eighteen strands, a single one of which is hardly visible to the naked eye. Real silk is two yards stronger.

SUFFERED FOR FIFTEEN YEARS. Completely Restored to Health.

Mrs. P. Brunzel, wife of P. Brunzel, stock dealer, residence 3111 Grand Ave., Everett, Wash., says: "For fifteen years I suffered with terrible pain in my back. I experimented with doctors and medicines, but got little if any relief. I actually believe the aching in my back and through the groin became worse. I did not know what it was to enjoy a night's rest and arose in the morning feeling tired and unrefreshed. My suffering sometimes was simply indescribable. Finally, I saw Doan's Kidney Pills advertised and got a box. After a few doses I told my husband that I was feeling much better and that the pills were doing me good. When I finished that box I felt like a different woman. I didn't stop at that, though. I continued the treatment until I had taken five boxes. There was no recurrence until a week ago, when I began to feel miserable again. I bought another box and three days' treatment restored me to health. Doan's Kidney Pills set very effectively, very promptly, relieve the aching pains and all other annoying difficulties. I have recommended them to many people and will do so when opportunities present themselves."

A FREE TRIAL of this great kidney medicine which cured Mrs. Brunzel will be mailed to any part of the United States on application. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists. Price 50 cents per box.

Peculiar Marriage Ceremony.

Cross?

That Douglas uses Corona Colt proves there is value in Douglas shoes. Corona is the highest grade Pat. Leather made. Fast Color Eyelets used. Our $4 Gilt Edge Line cannot be equalled at any price. Shoes by mail, 25 cents extra. Illustrated Catalog free. W. L. DOUGLAS, Brockton, Mass.

Sour Stomach

"I used Cascarets and feel like a new man. I have been a sufferer from dyspepsia and sour stomach for the last two years. I have been taking medicine and other drugs, but could find no relief only for a short time. I will recommend Cascarets to my friends as the only thing for indigestion and sour stomach and to keep the bowels in good condition. They are very nice to eat." Harry Stuckley, Mauch Chunk, Pa.

ANNUAL SALE, TEN MILLION BOXES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

HAPPENINGS IN NEW JERSEY.

seems to be no way of combatting the pest. This is about the only field in which the insects have ever been known to be destructive and no one has ever suggested means for their killing. The growers are equally anxious to cultivate the companionship of all the blacksnakes they can find and, if it can be prevented they will not permit anyone to kill this variety of snake. The reptiles are very fond of field mice, and as the little animals are very harmful to growing crops the snakes are permitted to roam at pleasure over the bogs and, it is said, some growers have suggested sending to other sections for a supply.

Fishermen from the Oranges have had great luck at Greenwood Lake lately, several splendid catches of wall-eyed pike, blue pike, white bass and Oswego bass having been made during the last week. Graham King, of East Orange, was the lucky captor of a fine string of large mouth bass, and on Thursday Frank W. Baldwin, of Orange, with "Nate" Davey, of the Waterstone cottage, as guide, landed twenty-four fine fish, the smallest of which weighed one and one-half pounds, and the largest, a fine wall-eyed pike, tipping the scale at five and one-quarter pounds, while others varied between two and one-half and three pounds. One of the catches of the week by Mr. Baldwin, was a five-pound catfish. It is believed that the recent stocking of Greenwood Lake with pike is bound to make that body of water the best fishing place near New York.

A Fine Display.

J. P. Powers, the Somerset street druggist, has a beautiful window display this week. With crepe paper and other materials he has a fine representation of sky and sea, with "Reliance" skimming over the waves as natural as life. The windows attract many complimentary remarks.

Two Famous Characters.

At Newton this week, Sussex county is celebrating its one hundred and fiftieth anniversary as a county, and incidentally it may be noted that the children of "Old Sussex" should know that the county can boast of producing the fattest person the world has ever known and of having been the abiding place of one of the oldest men who has ever lived.

Mrs. Catherine Schooley, who a half century ago was on exhibition in all the principal cities of the United States, was born in Greenwich Township, Sussex county, in the year 1816. Her parents, Anthony and Catherine Leach, were German. At the age of nineteen she married William Schooley and soon after they moved to Ohio. When she had reached maturity Mrs. Schooley weighed 764 pounds. Her arm was three feet two inches in circumference and her waist measure about nine feet six inches.

Matthew Williams died at his home in the township of Frankford, at the age of 124, January 3, 1814. He was a native of Wales. He served in the British army and navy for thirty years and was with Wolfe at the taking of Quebec. After that engagement he retired from active service and took up his residence in Sussex county. He married when a little more than seventy years old, but his wife died after giving him two sons. Upon the breaking out of the Revolution he enlisted in the Continental army and fought through the whole war. He survived the peace of 1783 more than thirty years and died a pensioner of the United States Government.

The Victoria Medal.

The Victoria medal is made out of bronze from Russian guns captured in the Crimean war. The design is the work of the prince consort of Queen Victoria. The medals are made separately and only when one is needed. Thus when some soldier or sailor, no matter what his rank may be, has shown "conspicuous bravery or devotion to the country in the presence of danger," as the act reads, the war office sends to the royal jewelers the bronze ingotted for the metal. It is carefully cast, filed smooth around the edges and then the design is brought out by chasing. The soldier's medal is suspended by a red ribbon and that of the sailor by a blue piece of silk.

A Letter to Mother.

"You promised mother a letter. Write it now," is one of the mottoes on the walls of the Nagasaki Home For Seamen, a motto that, it is asserted, has restrained more men from going wrong than almost any other influence of the place. Wanderers over the globe are not the only ones who need such a reminder. Indeed they might be able to give lessons in filial duty to many who have never realized how fortunate they are that home and mother are not far away, but near at hand.—Youth's Companion.

Making Matters Worse.

Amateur Artist (in the studio of Z., the great painter)—Splendid picture, really! Allow me to compliment you. But why did you choose such an ugly model?

"She's my sister."

"Oh, pardon! How foolish of me! I ought of course to have noticed the resemblance."

After It.

A.—Let me see! Somewhere I read of a book entitled "A Young Girl's Heart." Do you know anything of it?

B. Yes; it came out just after "A Young Man's Purse."

LEGAL NOTICES

SPECIAL ELECTION
—ON—
Constitutional Amendments.

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or voting Precinct in the County of Somerset, must meet on

TUESDAY, SEPT. 15, 1903,

from one to nine o'clock p. m., at such places as may be designated by the Township Clerks of the respective townships of said county, for the purpose of making, altering and revising, as the case may require, the registry of voters entitled to vote in their several districts or voting precincts for use at the special election to be held on Tuesday, September 22, 1903, as required by an act entitled, "An act to provide for submitting proposed amendments to the Constitution of this State to the people thereof," approved April 8, 1903.

Special Election
SEPTEMBER 22, 1903.

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHURTS,
CHARLES H. BATEMAN.

Election Notice!

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the County of Somerset will hold their first meeting on

TUESDAY, SEPT. 1, 1903.

At 10 o'clock in the morning, at such places as may be designated by the Township Clerks of the respective townships of said county. Such boards shall organize according to law and then proceed to ascertain the names and residences of all the legal voters in their respective districts, by making actual inquiry at every dwelling house or habitation, or of the head of every family residing therein, and shall continue such enumeration of voters from day to day, on successive days, completing same on or before Friday, Sept 4. (Section 6 Election law.)

SECOND MEETING
AND PRIMARY ELECTION

Said Boards of Registry and Election will also meet on

TUESDAY, SEPT. 8, 1903,

At the same places from 1 until 9 p. m., for the purpose of transcribing and making up from itcanvass books two lists of all persons entitled to vote in its election District, who shall personally appear before the board for that purpose, or be shown to its satisfaction by the affidavit in writing of some voter in the election district to be a legal voter therein.

On the same day between 1 and 9 o'clock p.m., the Primary Election shall be held in every election district in the County of Somerset.

THIRD and FINAL MEETING.

Said Boards of Registry and Election will also meet on

TUESDAY, OCT. 27, 1903,

At the same places, and between the hours of 1 p. m. and 9 p. m. for the purpose of revising and correcting the Original Registers, and for adding thereto the names of all persons entitled to the right of suffrage in such Election District at the next election.

Notice is hereby given to all Boards of Registry and Election in the County of Somerset that they are required to strictly observe Sections 24 and 32 of "An Act to Regulate Elections (Revision of 1898)," approved April 4, 1898, and that the County Board of Elections will be in session in Somerville on

Wednesday, Oct. 28, 1903,

For the purpose of receiving the registers and receipting for affidavits, etc.

General Election Nov. 3, 1903

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman
J. H. MATTISON, Secretary,
JACOB SHURTS,
CHARLES H. BATEMAN.

PROPOSED AMENDMENTS
TO THE
CONSTITUTION

STATE OF NEW JERSEY.
DEPARTMENT OF STATE.

As required by an act entitled "An act to provide for submitting proposed amendments to the Constitution of this State, to the people thereof," approved April 8, 1903, notice is hereby given that on Tuesday, the twenty-second day of September, 1903, a

SPECIAL ELECTION

will be held in the several election districts or precincts of this State, at such places as the clerks of the several townships, cities, and municipalities of the State shall provide, to enable the electors qualified to vote for members of the Legislature to vote for or against each of the following proposed amendments to the Constitution.

S. D. DICKINSON,
Secretary of State.

ARTICLE V.

EXECUTIVE.

1. Insert in lieu of paragraph 10 a new paragraph, as follows:

10. The governor, or person administering the government, the chancellor and the attorney-general, or two of them, of whom the governor, or person administering the government, shall be one, may remit fines and forfeitures and grant pardons, after conviction in all cases except impeachment.

RTICLE VI.

JUDICIARY.

1. Insert in lieu of Section II a new section, as follows:

1. The court of errors and appeals shall consist of a chief judge and four associate judges or any four of them.

2. In case any judge of said court shall be disqualified to sit in any cause, or shall be unable for the time being to discharge the duties of his office, whereby the whole number of judges capable of sitting shall be reduced below four, the governor shall designate a justice of the supreme court, the chancellor or a vice-chancellor, to discharge such duties until the disqualification or inability shall cease.

3. The secretary of state shall be the clerk of this court.

4. When a writ of error shall be brought, any judicial opinion in the cause, in favor of or against any error complained of, shall be assigned to the court in writing; when an appeal shall be taken from an order or decree of the court of chancery, the chancellor or vice-chancellor making such decree or order shall inform the court in writing of his reasons therefor.

5. The jurisdiction heretofore exercised by the supreme court by writ of error shall be exclusively vested in the court of errors and appeals; but any writ of error pending in the supreme court at the time of the adoption of this amendment shall be proceeded upon as if no change had taken place.

Section IV.

1. Insert in lieu of paragraph 1 a new paragraph as follows:

1. The court of chancery shall consist of a chancellor and such number of vice-chancellors as shall be provided by law, each of whom may exercise the jurisdiction of the court; the court shall make rules governing the hearing of causes and the practice of the court where the same is not regulated by statute.

Section V.

1. At the end of paragraph 1 add the following:

The court may sit in divisions at the same or different times and places.

Strike out paragraph 3.

Section VI.

1. Insert in lieu of paragraphs 1 and 2 the following:

The court of common pleas shall be constituted and held in each county in such manner as may be provided by law.

ARTICLE VII.

CIVIL OFFICERS.

Section II.

1. Insert in lieu of paragraph 1 a new paragraph, as follows:

1. Judges of the court of errors and appeals, justices of the supreme court, the chancellor, the vice-chancellors, and the judges of the circuit court and the court of common pleas shall be nominated by the governor and appointed by him with the advice and consent of the Senate; all persons now holding any office in this paragraph named, except the judges of the court of errors and appeals as heretofore existing, shall continue in the exercise of the duties of their respective offices according to their respective commissions or appointments; the judges of the court of errors and appeals, except those first appointed, the justices of the supreme court, the chancellor and the vice-chancellors shall hold their offices for the term of seven years, and shall, at stated times, receive for their services a compensation which shall not be diminished during the term of their appointment; and they shall hold no other office under the government of this State or the United States; the judges of the court of errors and appeals first appointed shall be appointed one for three years, two for five years and two for seven years; judges of the court of common pleas shall hold their offices for the term of five years.

Strike out paragraph 2.

North Plainfield Weekly Review.

VOL. 4—NO. 25 NORTH PLAINFIELD, N. J., SATURDAY, SEPTEMBER 12, 1903. PRICE 3 CENTS

MATTERS OF LOCAL INTEREST.

Local Paragraphs Occurring in North Plainfield and and Plainfield.

We are no cases of contagious se in this borough.

.. band concert will be given this evening corner of Watchung and Fairview Avenues.

The Westfield Club and the Park Club of Plainfield will have a series of bowling contests this Fall.

B. A. Hegeman, Jr., and family have returned home from Massachusetts, where they spent the summer.

The congregation of Warren Chapel welcomed home their pastor, Rev. J. O. McKelvey, Thursday evening.

The upper floor of Scheur & Co's barn collapsed last Saturday, and killed a horse owned by P. C. Johnson.

Members of the Carpenters' and Joiners' Union held a picnic on Labor Day, at Union Grove, Somerset street.

Mr. and Mrs. Edward D. Hutchinson and family of Westervelt avenue, have returned from a three weeks' vacation.

McDonough Brothers, of Madison avenue, have purchased the stock of coal formerly owned by the D. C. Ivans Company.

The annual reunion of the survivors of the Ninth New Jersey Volunteers will be held in Trenton on Wednesday of next week.

Mr. Vostch, of Regent street, is building a substantial residence at 67 Grandview avenue, and will occupy same when completed.

Mr. and Mrs. E. P. Stevens, of Grandview Avenue, celebrated their twenty-fifth anniversary of their wedding Thursday evening.

Miss Edith Schenck, of Jackson Avenue, in honor of her eleventh birthday, entertained a number of friends at her home Wednesday.

C. M. Burt, general passenger agent of the Central Railroad of New Jersey, has leased a house on Washington Avenue and will take possession in October.

... Labor Day, and took part in ... 's parade, which was held ...

...bers of the Plainfield ... Insurance Company with the ... an outing to Mauch C... by Superintendent C. E. ...

The Somerset Coun... will meet in annual conv... day Sept. 22, at Basking Ridg... by Rev. J. A. Thompson. Special... by Rev. John Fox, D. D.

Mrs. Honeyman, wife of Rev. W. E. Honeyman, of Lincoln place, who has been very ill, threatened with pneumonia, is resting more easily, her temperature much lower and pulse more normal.

The marriage of Miss Elizabeth Weiss, daughter of Mrs. Henry Weiss of Regent Street, this borough, and Frederick Jones Dixon, will take place Tuesday afternoon September 29, at 243 Somerset Street.

Thomas Oliver an old soldier eighty years of age, who was on a ninety days' furlough from the Newark Soldiers' Home, was found hanging to the bed in a room he had hired at Norman's Hotel, South Plainfield, last Saturday.

Announcement is made of the marriage of Miss Albertine Barber and Wesley Brokaw, of Plainfield, in the First Baptist Church, Stamford, Conn., Saturday. Rev. J. W. Richardson, formerly pastor of the Park Avenue Baptist Church Plainfield, officiating.

William G. Dillingham, who installed the bowling alleys at the Y. M. C. A. gymnasium, ten years ago, has the contract for placing four alleys at the Park Club, this borough. Titus H. Laury, the contractor, will lay the concrete foundation, and it is expected by October 1st that the alleys will be ready for the bowlers.

Howard George, son of Edgar George, Craig place, this borough, has been awarded $7000 by the jury that tried his action against the Central Railroad of New Jersey for injuries received in the Westfield wreck last January. The railroad company had offered this amount, but as the young man is a minor, a form of a suit had to be entered against the company.

During the electrical storm which passed over Plainfield last Saturday the steeple of the Park Avenue Baptist Church was struck and a hole was torn into it, ripping off slates and timber. A horse belonging to Cormack Caulfield, of West Third street, while tied to a tree, was instantly killed by a bolt, and three young men who had crawled under the wagon to get out of the rain, were rendered unconscious.

Death of G. W. Smith.

George W. Smith, of this borough, died from typhoid fever at Muhlenberg Hospital Thursday.

Funeral services will be held at the home of David Smith, of Steiner place, this afternoon at 2:30 o'clock.

Mrs. Pheobe Smith, wife of the deceased died from the same dread disease two weeks ago.

Union County Republican Convention.

At the Republican convention of Union county, held at Elizabeth Thursday, these appointments were made:

For members of Assembly, E. S. Coyne, of Elizabeth; Peter Tillman, of Rahway; and William T. Kirk, of Plainfield. For Coroner, Dr. J. C. Anderson, of Plainfield.

A sensational feature of the convention was 15 of the 19 Plainfield delegates leaving the hall because their favorite candidate for Assembly, James F. Buckle failed to receive the nomination. All efforts to induce the delegates to return failed.

"Si" Drake Discharged From Bankruptcy.

Silas Dewey Drake, who has been carrying on extensive real estate transactions, was discharged from bankruptcy by Judge Kirkpatrick in the United States District Court on Monday. When Drake filed his petition in bankruptcy he gave his liabilities as $54,629.80 and his assets as $47,121.

New Teachers in Public Schools.

William Barbett, of New York, will take charge of the department of science and mathematics in the High School. Miss Emma Dorr succeeds Miss Elsie Horton in the kindergarten department, in the Watchung School. Miss Jessie Hill, of Class 5 A, has been granted a year's leave of absence on account of ill health. Miss Maud Bateman will take her place.

Funeral of Frank W. Somers.

Funeral services over the remains of Frank W. Somers, County Clerk of Somerset county, were held last Monday afternoon. The services were conducted by the members of the Bound Brook Lodge, F. and A. M., in the Somerville Reformed Church. Rev. Dr. E. T. Anderson and Rev. G. T. Read, of Bound Brook, preached. The interment took place in the Bound Brook Cemetery.

The lodges represented at the funeral services were the F. and A. M., Jr. O. U. A. M., New Brunswick Lodge B. P.O.E., and Royal Arcanum.

Annual Session Knights of the Golden Eagle.

The Grand Castle of the Knights of the Golden Eagle met in annual session at Trenton Monday and Tuesday. Members were present from all parts of the State.

The following officers were elected:

Past grand chief, Thomas B. Seals, Annandale; grand ... priest, George Charberlain, New Egypt; grand master of records, A. L. Clark, Trenton; keeper of exchequer, George Sutton, Camden; sir herald, Frank Schenck, Passaic; trustee, A. Q. Bloom, Trenton; inside guard, C. K. Myer, Swedesboro; sword guard, George Wenthlat, Trenton.

Sharks Along Jersey Coast.

...ctor Townsend, of the Aquarium ... Park, in New York City, says ... coast, from Sandy Hook to ... is infested with man-eating sharks. The Director is fitting out an expedition to capture some of these big fellows for exhibition in the tank. He has offered as high as $200 apiece to fishermen for specimens, but the fishermen are afraid to try catching the creatures. Consequently Mr. Townsend has fitted up a floating tank ship, which will be used to convey the captured sharks to New York. Great pound nets will be used to catch the huge fish, and it is expected that within the next two or three weeks some monster sharks will be on exhibition at the Battery.

The Borough Election.

At the primary election held in North Plainfield Tuesday, very little interest was shown. Out of a total registration of over twelve hundred, only 318 ballots were cast, or about 25 per cent. of the total vote.

The vote was as follows:

First District, Republican.	
J. H. Buchanan	32
Charles Place	22
L. A. Hummer	19
William G. Debele	87
Charles A. Lee	82
A. H. Dundon	80
Rejected	2
Total vote cast	110
Second District Republican.	
J. H. Cooley	29
Harrison Coddington	24
Albert Runyon	22
Robert Clark, Jr.	101
William C. Smith	99
J. J. Stahl	84
Rejected	3
Total vote cast	120
First District, Democratic.	
John T. Case	32
George W. Bird	31
W. J. Kieley	29
Charles Kellar	28
Rejected	3
Total vote cast	68
Second District, Democratic.	
Charles W. Harden	19
Lewis R. Bird	18
Rejected	2
Total vote cast	20

Borough Manufactory Improvements.

Extensive improvements have been made by W. J. Conroy to his carriage and wagon factory on Somerset street, which adds greatly to the appearance of the building and will facilitate the handling of work.

Mr. Conroy is alive to the interests of his business and leaves no stone unturned to help up with the times and to turn out first class work and to do it promptly.

A visit to his place of business will astonish many borough residents when they see the immensity of it.

BATTLE WITH FIERCE FLAMES

Borough Firemen Have Hard Fight on Vine Street.---Two Women Injured.

Fire created considerable damage and caused one woman a sprained ankle and another, painful burns about the face, neck and arm, yesterday just before noon, at 29 Vine street, this borough.

The house is occupied by Peter Markey, a baker, his wife and family, and Mrs. Catherine Hansen, his mother-in-law.

Mrs. Markey was getting luncheon ready on an oil stove. A gallon can of kerosene was on the floor near the stove, and one of her little boys accidentally upset the oil by falling over the can. The oil quickly spread over the floor, and it is thought that the wind blew some of the oil, or the gas from the oil, into the flames of the stove. At any rate, the oil on the floor became ignited and burst out into a furious blaze. Mrs. Markey tried to beat out the flames with a broom, but only succeeded in making matters worse and then ran upstairs where Mr. Markey was asleep and awoke him. Before they could escape by the stairs, the flames had become so fierce that it was impossible for them to use the stairs, and Mrs. Markey, in jumping from the second story window to the ground, sprained her ankle quite severely.

Mrs. Hansen and a two weeks' old baby of Mrs. Markey's were in the living room, which is separated from the kitchen, where the fire was, by a small hall. So quickly did the flames spread that Mrs. Hansen was unable to leave the room with the little one except at the risk of her life. She chose to take the risk and wrapping the baby tightly in a woolen wrapper, she made a dash for the outside.

... sides of her face, neck and arm were badly burned, but the baby came through the fire safely without a burn.

Kind neighbors took the women and children to their homes, and Dr. Buchanan quickly administered to their sufferings.

Vine street is thickly built up with small frame dwellings and the firemen had a hard fight to save the building and adjoining property, which they did in their usual prompt and hearty manner.

The loss on the house will probably reach four or five hundred dollars, while the furniture was damaged about $150.

As the fire was confined to the part of the house in which the kitchen is situated, the loss is much lighter than it otherwise would have been.

There was a small insurance on the household goods.

County Sunday School Convention.

The forty-fourth annual convention of the Somerset County Sunday School convention held in the Presbyterian Church at Basking Ridge on Tuesday, was well attended. The morning session was opened by Rev. Theodore Shafter, President of the Association; with devotional service. Rev. John T. Reeve, Pastor of the Presbyterian Church of Basking Ridge, made an address of welcome, which was responed to by President Shafer.

The reminder of the morning session was devoted to the reports on Sunday school work in the country by the township secretaries, Primary Superintendent Home Department Superintendent and Corresponding Secretary and Treasuer, followed by an address made by Miss J. Baldwin, State Primary Superintendent.

The following officers were elected:

President, Rev. J. T. Reeve.

First Vice President, Rev. John Hart.

Second Vice President. Philip A. Vroom.

Third Vice President, Peter A. Garretson.

State Executive Com., James L. Griggs.

Superintendent Primary Department, Mrs. J. A. Powlison.

Superintendent Home Department, Philip Lindsly.

Township secretaries, Bedminster, Geo. S. Van Arsdale; Bernards, Joseph Dobbs; Branchburg, Minna V. Saums; Bridgewater, John H. Perlee; Franklyn, Henry Van Doren; Hillsborough, F. V. L. Wyckoff; Montgomery, Peter S. Polhemus; North Plainfield to be filled by Executive Committe; Warren, Theodore S. Quick.

A feature of the convention was the after dinner conferences for elmentary teachers lead by Mrs. Powlison, with a round table on primary and junior work by Miss Baldwin; round table on intermediate work by Mr. Furgusson and superintendents led by Philip Lidsley, and home department problems by Rev. A. S. Van Dyck.

Interesting addresses were made by Rev. Dr. Bret, of Jersey City, and Rev. E. M. Fergusson.

The convention adjourned to meet next year at Neshanic.

Knights of Pythias Field Day.

It was estimated that about 10,000 Knights of Pythias of New Jersey, and their friends, were at Asbury Park last Monday. Of this number not more than 1,500 Knights were in the parade which was reviewed by officers of the grand lodge.

The prize for the largest percentage of members in line was won by Arion Lodge No. 68 of Bayonne. The prize for the lodge with a membership of over 100 was captured by Hancock Lodge No. 114, of Jersey City. The competitive drill was participated in by only two commanderies. The first prize, $60, was won by Palestine Commandery of Jersey City, Captain Periberg commanding. The second award, $40, was taken by Black Prince Commandery, of Newark, Captain DeMott commanding.

SUBURBAN NOTES.

WATCHUNG.

Arrival and departure of mails at Watchung.

Leave Plainfield	9:15 a. m.	5:35 p. m.
Arrive Watchung	9:30 a. m.	6:00 p. m.
Leave Watchung	12:30 p. m.	6.10 p. m.
Arrive Plainfield	1.00 p. m.	*6.40 p. m.

*This mail makes connection for all outgoing mail from Plainfield the same evening.

Mrs. Theodore Leuersen and daughter are visiting friends in New York.

Wm. H. Smith is seriously ill and under the care of Dr. J. H. Buchanan.

The Board of Education wishes it to be known that the Truant Law will be enforced.

Mr. and Mrs. Springmeyer, of New York, have been visiting with Dr. Chas. Moldenke and family.

School opened Tuesday with twenty-five enrolled in the Grammar department and thirty-five in primary department.

Mrs. Harden, sister of Mrs. Jno. H. Koch, arrived here from Germany last Saturday. On account of the steamer being disabled, Mrs. Harden was delayed five days on the trip.

The mail now leaves Plainfield at 9:15 a. m. and arrives at Watchung about ten ... necessary in the ... of new delivery ... has to make.

Very little interest was manifested at the primary election Tuesday. Stephen Beeching was elected as delegate on the Republican ticket and Theo. Leuersen on the Democratic ticket. There was no opposition on either side.

Mr. White, a coffee broker, of New York City, has purchased the Ketchum farm, formerly owned by Robert Clark, Jr., who will make extensive improvements and expects to make it his permanent home. A. Church, who has had charge of the farm will move to East Orange, to take charge of a stock farm.

* * *

LIBERTY CORNER.

Miss Fanny Jones, of Summit, N. J., is visiting Mrs. Dewey Wheat.

Miss Milly Doherty is visiting friends in Hoboken.

Mrs. Sadie Carson, of Plainfield, has returned home after a pleasant visit with Mrs. L. H. Nuse.

Mrs. Peter Layton has a second crop of strawberries coming on in her garden.

The Sunshine Band met at Mrs. Wood's last Friday and elected officers for the ensuing year.

Miss Carrie Froehling is spending a few days with friends in Plainfield.

The public school opened last Tuesday.

W. D. Wheat and family have returned to New York.

C. L. King is improving his place.

Miss Lizzie A. Nuse is spending two weeks with friends in Plainfield, Elizabeth and Bayonne.

Concerning Proctor's.

A "glance ahead" at the repertory of plays to be presented during the early Fall months by the F. F. Proctor Stock Companies, at Mr. Proctor's Fifth Avenue and 125th Street Theatres, seems to promise several very interesting events. In quick succession, we are to see such standard plays as "Ours," "Moths," "Lady Clancarty" and "Alabama," while, in the line of newer material, Mr. Proctor is to put forward "A Rose o' Plymouth Town," etc. In speaking of "Ours" the other day, Mr. Proctor said: "Strange, is it not, that this charming play has never been revived by any modern stock company? Yet it is in my judgment, the very best of all Tom Robertson's plays. It is wonderfully simple in its story, but it enchains the auditor's attention from its first scene to the final fall of the curtain. No more charming love scenes were ever portrayed on the stage than the episode of the bashful lovers underneath the elm tree in the rain storm, or the cook tent scene in the snow clad hut in the Crimea. These scenes are masterpieces of delicious humor and humanly sentiment." A military band and a large force of soldiers will be used in "Ours," by the way.

STATE PAPERS ON NEW LAW

The New Primary Laws as Viewed by Many New Jersey Editors.

"The Stokes-Record primary law gave the hardest jar to the independent voter. The politicians got along all right with it, for they made the nominations and voted for them. But the man who did not care to reveal how he had voted at the previous election, was shut out of the ballot boxes."—Trenton True American.

"There was some slipping of the cogs in the operation of the New Jersey law relating to primary elections, but the general result was satisfactory. It is a means of getting nearer the popular desire in the naming of party candidates and of preventing corrupt deals among professional political promoters. The defects of the law can be cured by later legislation; its obvious advantages will be likely to secure for it popular endorsement."—Philadelphia Record.

"If the candidates of the various political parties are now objectionable to the voters under the new primary law it certainly is the fault of those having the right of suffrage. Everybody knows just when and where the tickets are made up and snap conventions under the dictation of so-called political bosses are a thing of the past. It is the duty of every citizen to take part in the primaries, but the results, so far as the number of votes polled last Tuesday is concerned, shows that the power of the leaders has not been diminished one iota and that the new order of things is as objectionable to the citizens as the old."—Dunellen Call.

"The primary election as an expression of party sentiment was hardly a success. But it was not proven impractical and remains theoretically an ideal form of primary. Cumbersome, the new method undoubtedly is, and future legislatures must be depended upon to trim off the red tape. The new law makes it possible for every voter to register his preference and if he fails to do so, it is his own fault, now, not the fault of the law."—New Brunswick Home News.

"The new primary law worked pretty well, but it did not have the effect that its promoters fondly hoped. It removed the primary from the control of the ward organizations and heelers, but it did not remove the prejudice against voting at primaries felt by most staid and respectable citizens."—Paterson Evening News.

"There was, as might have been expected, considerable perplexity and confusion in the working of the new primary law, but most of this will doubtless be eliminated on another trial. We judge that, on the whole, the new system gives promise of excellent results."—Paterson Press.

"The primary elections in this city and throughout the State generally yesterday were orderly and the new law seemed to work satisfactorily. It is at least an improvement over the former primary methods. While showing need of revision, its main features are likely to be retained for future primaries. The Republican party has gained rather than lost strength through the new primary act."—Camden Post-Telegram.

New Jersey Roads.

The *State Gazette* says that the demand for improved highways in the State of New Jersey has been greater during 1902 than ever before. The benefits to be derived from good, level roads are being realized by the dwellers in the country and the counties of the State are taking advantage of the provisions of the State aid law which permits each county to spend an amount for improving its roads equal to one-fourth of one per cent. of the ratable property of such county for the last preceding year. The figures in the report of State Engineer Henry I. Budd for 1902 show how the number of miles of good roads has grown since the passage of the law in 1903. In 1893 and 1894 four counties built a total of 74.84 miles of road. In 1899 the number of counties building under the State law had risen to thirteen and the number of miles to 114.72. During the last year seventeen counties built their quota of roads with a total mileage of 155.305.

As there are only twenty-one counties in the State it will be seen that a large majority of the counties added in the improvements of the roads. Some of the counties have already improved nearly all their main roads, and do not need to spend the amount that is necessary to bring the highways of other counties up to their standard. Since the passage of the State aid law 706.791 miles of road have been built by nineteen counties and the total amount expended on this work

(Continued on Last Page.)

Pennington Seminary Will Open Monday.

Pennington Seminary will re-open the first term next Monday. There is a good prospect for a large school, the number already registered exceeding last year.

During the vacation the buildings have been renovated and everything is about in readiness for the reception of students.

Washington at Morristown.

Ford's old tavern, at Morristown, which at one time during the war of the Revolution was Gen. Washington's headquarters, will be reproduced at the World's Fair, St. Louis, as New Jersey's State building.

The historic structure, which will be reproduced with fidelity, will cost $20,000. New Jersey has already appropriated $100,000, and is arranging for a liberal increase. Her industrial and educational exhibits will be as interesting in their way as the old Ford's tavern is in the State's history.

The famous men of early days who were sheltered by the old tavern when the colonies were engaged in the memorable struggle for freedom, includes Alexander Hamilton, Lafayette, Kosciusko, Israel Putnam, Philip Schuyler and others.

The dimensions of the structure are sixty-three by eighty three feet. At the exposition it will stand upon a conspicuous site, and will be one of the first buildings to greet the visitor's eye when he enters the exposition grounds at the southeast corner, at Oklond Avenue and Clayton Road.

The style of architecture is, of course, colonial. Across the front is a broad veranda, supported by Doric columns, with double columns marking the entrance, above which is the coat of arms of New Jersey. The small window panes, dormer windows, outside stone chimneys, weather boarding, blinds and shingle roof will contribute to the quaintness of the structure.

The minor details in the interior are to be as faithfully reproduced as are those of the exterior. Wall paper of colonial patterns, and antique furniture in vogue in those early days, are to be specially designed for the several apartments. A feature of the main hall, the floor of which may be covered with a rag carpet, is the old-fashioned fireplace, and the interesting collection of relics of historic value.

A spacious reception room is provided on the main floor, and from it a stairway will lead to the parlors on the floor above. On this floor will be reproduced the room which was used by Washington as a bed chamber. There is also to be the dinning room, with wine buffet and cut glassware of the colonial days.

The third floor is to be devoted entirely to the use of the persons employed as care-takers.

The mineral resources, such as building stones, raw material for Portland cement, glass sand, mica, graphite, minerals for road construction, etc., will be shown. There will also be a complete set of mineral specimens, and also specimens of all New Jersey woods.

"Drink" at the Academy

One of the most important productions of melodrama ever brought to this country from the London theatres will be presented by Messrs Rich & Harris on the stage of the Academy of Music, N. Y next Monday evening when the distinguished English actor, Mr. Charles Warner will make his first American appearance in Charles Reade's famous dramatic version of Zola's "L'Assommoir" entitled "Drink." Mr. Warner has appeared over 4000 times in Great Britain and Australia in the role of Coupeau, the part which from its first presentation gave him immediate and unquestioned rank among the really great actors of the British stage.

The story of "Drink" is a simple but powerful romance of a Paris workman, noble in nature, a leader among his fellows and a figure of the most appealing type in the purity of his love and the beauty of his home life. He makes enemies, but conquers all save one and the theme of the entire play is a story of this combat between a lofty nature and the curse of drink.

Horse Show at Bernardsville.

The second annual horse show of Bernardsville opened on the grounds of the Somerset Polo Club yesterday and will continue today.

An attractive place of business is the piano and organ rooms of Joseph Sattels, 108 North Avenue. Mr. Sattels has placed a very brilliant light in his show window, which greatly adds to the attractiveness of the store.

Darkness and Daylight

comes to Elizabeth on Sept. 15th and will delight those who bestow their patronage upon it with one of the most enjoyable stories of home life in the South. It is a dramatization of Mary J. Holmes' story of that name, a book that has been read all over the world.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

Potato rot is seriously threatening the potato crop in many sections of the State. Belvidere, threw away the other day 300 bushels of potatoes that had been attacked by the rot.

Bedminister township, Somerset county, has appropriated a large sum of money to repair the lake in Hub hollow, near Peapack, and several of the New York millionaires residing in that section have added materially to that sum.

While playing in the old lumber yard in South Broad street, Trenton, near the canal bridge, last week, four boys found a pocketbook containing $40. The money was concealed under a rock, and from the appearance of the pocketbook it must have been there several years. The boys divided their find.

Persons around Dividing Creek are wondering if summer has come again, as there is a profusion of blooms of magnolias, strawberries and dandelions, and Captain Charles Ingersoll has been feasting for some days on a second crop of peas. There are many flower plants with a second crop of blossoms, and if the frost keeps off the "Good Old Summer Time" tune will become popular again.

Rutland Applegate, a lad of ten years, was leading an unusually fat cow along the street of Freehold last week, when it became frightened by an automobile and began turning around rapidly. The rope on the cow's neck wound about the boy's neck, more tightly at each turn. The boy fell down and the cow toppled on him. Rutland was badly choked and frightened before being rescued, but escaped any serious injuries.

Another house has come to light in Peapack that shelters the representatives of four generations. The home of W. C. Horton is the one and in it dwells Mrs. Eliza Smith (widow of Willian Smith), now over 90 years old. She is hale and hearty and is the last living member conected with the third generation of the great Smith family, which held its reunion recently. The others are her daughter, Mrs. Anna Peterson, Mrs. Peterson's daughter, Mrs. W. C. Horton, and Mrs. Horton's son, Harold, who is 6 years old.

The directors of the First National Bank of Jamesburg have elected as cashier Rev. Benjamin S. Everitt, former pastor of Jamesburg Presbyterian Church. The former cashier, I. S. Chamberlain, recently resigned to become a State bank examiner. Mr. Everitt is upward of sixty years of age, and has three sons in the Presbyterian ministry. He resigned as pastor of the Jamesburg church about five years ago, having lost his voice by an operation. Later he recovered his speech in a measure and began preaching in another church. About two years ago he returned to Jamesburg and was married for the second time.

Captain Peter Campbell, a veteran oysterman, of Newport, some months ago made this prophecy: "If we have a cool, wet summer, the streams that have an abundance of fresh water at their heads will be practically devoid of any young growth." The absolute failure of any spat or spawn to adhere on the beach beds and Cedar and Nantuxet creeks brings this prophecy to the minds of oystermen around there, and proves that Mr. Campbell's prediction was not a mere imagination, as at those points there is practically no growth of young oysters. But over in Beck Creek and on the Cape Shore, where the water is more dense with salt, there is a prolific catch of spawn.

Readington township, Hunterdon county, boasts of two boy farmers, who, considering their age and what they have accomplisheed this season, are hard lads to beat in agricultural pursuits. These lads are Abram I. Divis, sixteen years old, and William S. Divis fourteen, grandsons of Mrs. Rebecca Davis, of Whitehouse, and since the death of their father over a year ago, their mother has depended on their managing the work on a flourishing and productive farm of 130 acres. This summer they have done all the work on the farm themselves. They have planted and cultivated twenty-nine acres of corn, cut and housed 16,000 sheaves of wheat and cut and gathered forty-six tons of hay. Besides this they have cared for six head of horses, milked fifteen cows and taken the milk to a

[Continued on Last Page.]

BLOOD SPILLED IN BEIRUT

Lives and Property of Americans in Danger of Destruction.

TURKS BLAMED FOR OUTBREAK

Minister Leishman, at Constantinople, Instructed to Require Absolute Protection For Our Citizens—Squadron to Be Kept at Beirut Indefinitely—Sanguinary Fighting in the Syrian City.

Paris, France.—A dispatch to the Temps from Constantinople, giving additional details of the outbreak at Beirut, says that when the soldiers and police sought to stop the encounter between the Mussulmans and Christians, which occurred near the Orthodox Church, the fighting became general, and resulted in thirty persons being killed or wounded. The soldiers lost one man killed and had three men wounded.

Washington, D. C.—The riot at Beirut will have the effect of keeping the American warships, Brooklyn and San Francisco, at that port until conditions change or more important events require their presence nearer Constantinople.

Two telegraphic reports about the Beirut outbreak were received here. One of them, very brief, was from United States Minister Leishman, and the other was from Admiral Cotton, who sent a much fuller statement. Mr. Leishman's dispatch follows:

"Constantinople.—A riot yesterday at Beirut. Seven Christians killed, several wounded. Two houses Christians pillaged by soldiers. Officer and signalman from Admiral's ship now in consulate. Investigation of conditions in Beirut by flag lieutenant and other officers. Origin of riot not distinct. Sublime Porte claims Beirut now quiet and government force sufficient to insure order. LEISHMAN."

Admiral Cotton's message was in cipher and became badly mixed in transmission that it could not be fully translated. He says that the trouble was due to religious animosities, and the failure, apparently on the part of the authorities, to prevent crimes. In Admiral Cotton's opinion there are enough Turkish soldiers now at Beirut to control the situation "if properly disposed of."

Copies of messages were telegraphed to President Roosevelt at Oyster Bay. Whatever action is taken by the Government in the situation in Turkey will be by his direction. The sole purpose of the Administration in sending American warships to Beirut was to give better protection to American interests. It will take no part in the political aspects of the situation.

That the Government does not regard conditions in Turkey as seriously affecting the United States was indicated by the departure of Secretary Hay from Washington for his summer home on Lake Sunapee, N. H.

50,000 KILLED BY TURKS.

Appalling Reports of Bloodshed in Valayet of Monastir.

Sofia, Bulgaria.—All reports from the Vilayet of Monastir agree in describing the situation as appalling. Between 30,000 and 50,000 Bulgarian inhabitants are believed to have been massacred by the Turks, and every Bulgarian village in the valayet has been destroyed. At present it is impossible to obtain precise figures. The revolutionary headquarters estimate that 30,000 Bulgarian men, women and children have been killed while at least the same number of refugees are slowly perishing of hunger.

In official circles these figures are regarded as an underestimate, and officials incline to the belief that the number of the massacred exceeds 50,000. The Turks are apparently determined to exterminate the entire Bulgarian population of the valayet.

The Macedonian Relief Organization estimates that 120,000 women, children and old men are living in the forests of Macedonia. These refugees are said to be dying of starvation by the thousands.

MACEDONIANS GIVE WARNING

Revolutionists Claim Situation is Desperate and Turks Are Furious.

London.—If dispatches sent from Sofia and other pro-Macedonian centres to London newspapers are reliable, the struggle in the Balkans is being carried on with Oriental ruthlessness, and the situation of affairs is becoming more and more serious.

The Macedonian Revolutionary Committee decided to send a circular to the Powers warning them that they are contemplating reprisals. In justification they claim that the Turks have made homeless 60,000 persons.

BLEW UP SHIP FOR PRACTICE.

American Invention for Protecting Battleships Given a Costly Test.

Portsmouth, England. The old battleship Belle Isle was torpedoed here and sank at her moorings. For the purposes of the experiment a section had been constructed on the port side of the Belle Isle representing the side of a modern battle-ship. This was filled with an American invention which it was claimed would prevent a ship from sinking when the hull is penetrated below the water line.

When the vessel was struck a huge column of water enveloped her, she rolled heavily and then settled down with a list to port. The Belle Isle will be raised for further experiments. It is stated the damage done to the ship's bottom is extensive.

Alarm Over Vesuvius Passes.

There has been such a notable diminution in the eruption of Vesuvius that the electric railroad from Naples to connect with the old funicular tramway will be opened in a few days. The funicular line may be extended up the side of the crater.

Three Killed at Camp Meeting.

Three men were killed and several wounded in a camp meeting fight at Mount Victory, Ky., trouble being caused by a constable trying to make an arrest.

WEDDING FOR TITLES

Mrs. Russell Sage Declares It a Blow at National Pride.

Denounces Foreign Marriages Because American Girls Are Led to Forget Their Own Land.

New York City.—"The danger of international marriages—the wedding of our young American girls to titled foreigners—lies not in the possibility of the loveless alliance dictated by ambition nor in the diverting of American wealth, but in the belittling of American traditions," said Mrs. Russell Sage.

"The real danger of the international marriage is in the fact that the bride in her allegiance to another—her husband's country—may forget her own. It is not only a pity, but a reproach, that the children of the men who have done so much to make this country what it is should grow to think more of another land. If an American woman marries a foreigner, English or any other, to be transplanted to his country, to forget her own or to believe that the older civilization, with its many traditions, is deserving of greater pride and affections than her own, she is casting a slur upon us, and if she fails to make her children honor America, to make them love the story of its beginnings, its flag and its national hymns, she is at heart a renegade."

HARD COAL SECRETS HELD UP.

Anthracite Railroads Fail to Report to Secretary Cortelyou.

Washington, D. C.—Officials of the Department of Commerce and Labor and of the Census Office are much concerned over the failure of the anthracite coal-carrying railroads to furnish the detailed report of their operations as provided by the law authorizing the census of 1900. The law stipulated that a statement of the workings of the anthracite and bituminous coal companies should be completed and printed.

The bituminous concerns came to the front with their information without delay, but the anthracite people have remained silent.

Officials are said to be seriously considering the question of proceeding legally against the anthracite companies. The latter are understood to be anxious to take the matter into the courts, to test the publicity feature of the law establishing the Department of Commerce and Labor.

POPE PIUS SEES HIS SISTERS.

Touching Reunion of the Pontiff and Three Relatives.

Rome.—The three sisters of Pius X arrived in Rome after a separation of about six weeks. They were received immediately by Pius, and the reunion was most touching. The sisters tried to kneel, but were prevented from doing so by their brother, who took them in his arms and embraced them. One sister, in a tone of disappointment, said:

"How well you look, brother. You have not needed us, after all."

"I am always your Beppi, but I am doing very well here," the Pontiff replied.

The three sisters are now staying in a convent until an apartment, which is being arranged for them at the San Angelo Bridge, is ready.

THREE ORPHAN GIRLS DROWNED.

Young Women at an Albany Industrial School Tried to Cruise on a Raft.

Albany, N. Y.—Three young women from the St. Joseph Industrial School of this city were drowned in a small pond in St. Agnes's Cemetery.

The girls, four in number, were having an outing. They found some planks and made a raft. The frail thing sank with them in deep water. One girl, Eva Latin, of this city, was rescued. Those drowned were Mary O'Brien, aged nineteen, of Canada; Grace Burns, aged eighteen, of Boston, and Mamie Green, aged eighteen, of this city.

The institution is a foundling and orphan school.

JUDGES FACE 2355 INDICTMENTS.

Enormous Amount of Work Piled Up for Chicago Courts.

Chicago, Ill.—When the several branches of the Criminal Court reconvened for the year, the judges faced a docket of 2355 indictments.

One mathematically-inclined assistant to the State's Attorney computed that with five Courts in session, which is one more than may be expected from precedents, each disposing of five cases daily, it will take nineteen weeks of five days each to clean up the docket. Meanwhile, five Grand Juries would have met and added an aggregate of 1000 to 1500 cases.

Fully one-half the criminals of Chicago succeed in escaping or evading the law.

DANVILLE RIOTORS CONVICTED.

Twelve of Them to Go to the Penitentiary—Two Acquitted.

Danville, Ill.—The jury in the principal jail riot case brought a verdict of guilty against twelve of the defendants.

They are: Winkfield Baker, William Belwine, Horace Murphy, Isaac Newton Slade, Thomas Bell, John Isom, John Walton, John Robertson, Adam Merry, Clement Mobaker, Ol Meuesse and Bessie Armstrong.

Two were acquitted, John Kress and Richard Roberts, who turned State's evidence.

The punishment is an indeterminate imprisonment in the penitentiary.

FIRST AMISH SUICIDE.

Illinois Farmer, Member of a Peculiar Sect, Hangs Himself.

Arcola, Ill.—S. J. Shrock, a young farmer, twenty-two years of age, committed suicide by hanging himself. He was a member of the Amish sect commonly known as the Hook and Eye Dutch for the reason that they wear hooks and eyes in preference to buttons on their clothes. No motive for the deed is known, as he was wealthy and popular.

The entire Amish neighborhood is worked up over the affair.

NEW DASH FOR NORTH POLE

Naval Commander Peary Granted a Three Years' Leave.

HAS THE PRESIDENT'S APPROVAL

Scientists and Government Officials Who Have Seen the Famous Arctic Explorer's Plans Believe He Will Succeed—Cost of the Expedition to Be Borne by the Peary Society.

Washington, D. C.—Commander Robert E. Peary, United States Navy, has been given permission by President Roosevelt and the Navy Department to make another dash for the North Pole.

Naval officers and scientists who have seen the famous Arctic explorer's plans believe that he will succeed in attaining the pole, and that as a result American courage, fortitude and energy will have conquered the last obstacle in making the map of the world.

Three years' time is all that Commander Peary has asked, and all that has been granted. On April 1 next he will leave the United States in command of an expedition yet to be organized for Cape York, in Baffin Bay, on the extreme southwestern point of Greenland, at the entrance to Kennedy Channel. Here he proposes to take aboard his American ship the entire colony of the Whale Sound Eskimos living in that section, and who are devoted heart and soul to him, and sail through Kennedy Channel and Robeson Channel to the extreme northern end of Grant Land, where, at Cape Colombia, about 490 miles from the North Pole, he will establish a permanent basis for supplies and strike overland with men and dogs for the thus far unattainable North Pole.

The long experience of Commander Peary in Arctic exploration and the apparent feasibility of his present plan causes the authorities of the United States Government, and especially the President and Acting Secretary of the Navy Darling, to believe that the expedition will meet with that success which none has yet ever attained. Commander Peary himself is enthusiastic and does not hesitate to say that he believes, as he has never believed before, that he will this time reach the North Pole and safely return. For years he has been laying the foundations along the lines now decided upon.

"I believe that I will reach the North Pole," Commander Peary said. "The Eskimos, upon whom I am depending largely, are my friends, and would accompany me even if they believed that certain death would be the result. However, we do not look for any such outcome to the trip.

"After reaching Cape Colombia, in the extreme north of Grant Land, the travel will be exceedingly rough for some distance. It is my theory that the further one gets across the ice and away from the land the smoother the ice will be, and that finally the travel will be comparatively easy. It stands to reason that the ice striking against the land on all sides of the pole causes a crush near the shore, which, as one gets further and further away from the land and nearer the pole, will disappear."

Acting Secretary of the Navy Darling has done much, Commander Peary says, to make it possible for him to make the undertaking. He hopes to start with his expedition about the first of April next.

In his letter of application to Acting Secretary of the Navy Darling for leave of absence Commander Peary says:

"I should expect to accomplish the distance to the Pole and return in about 100 days or a little more, an average travel of about ten miles a day. Returning, I should break the ship out late in the season and return home.

"If ice conditions the first year were such as to prevent reaching the northern shore of Grant Land, I should winter as far north as practicable, and force the ship to the desired location the following year. In this event the expedition would be gone two years."

Acting Secretary of the Navy Darling, a close student of Arctic work, says in his letter to Commander Peary granting him three years' leave of absence from April 1 next, that he thinks he is better equipped than any other person in the country to undertake this work.

The Peary Arctic Club, of New York, of which Morris K. Jesup is president, will finance the Peary expedition to the extent of $150,000, which is $50,000 more than the cost of the last trip which occupied four years.

PRESIDENT AT SYRACUSE.

He Reviews a Labor Parade and Speaks to 30,000 Persons.

Syracuse, N. Y.—Thirty thousand people from Central New York and all the inhabitants of Syracuse suffered the excitement and perplexities of a four-ringed circus Labor Day. They had a big labor parade to see, with the President at the United States reviewing it. Then they had to rush to the Fair Grounds to hear the President speak and to see the Fair, and after that to hustle back to the city to see the Parade of the National Association of Letter Carriers, which the President also reviewed.

Following are some of the striking sentences from the President's speech:

"There is no worse enemy of the wage-worker than the man who condones mob violence in any shape or who preaches class hatred.

"The wage-worker is only well off when the rest of the country is well off; and he can best contribute to this general well-being by showing sanity and a firm purpose to do justice to others.

"In his turn the capitalist who is really a conservative, the man who has forethought as well as patriotism, should heartily welcome every effort which has for its object to secure fair dealing by capital, corporate or individual, toward the public and toward the employe.

"The man who as breadwinner and home-maker has done all that he can do, patiently and uncomplainingly, is to be honored; and is to be envied by all those who have never had the good fortune to feel the need and duty of doing such work."

SERVIAN ARMY PLOTTING

A Conspiracy to Avenge King Alexander Uncovered.

Leaders of the Movement Under Arrest—Seven Hundred Officers Said to Be Implicated.

Belgrade, Servia.—About fifty officers of the Servian Army have been arrested at Nisch on charges of being in a conspiracy to kill every one who was concerned in the murder of King Alexander, Queen Draga and the members of the Servian Cabinet, when the military plotters overthrew the Government some months ago.

Among those arrested are the leaders of the new conspiracy, Captains Peschitch and Zalovitch. The latter was the orderly of King Alexander and Captain Peschitch is a nephew of Minister Todoroviten, who was wounded on the night of the assassinations.

It is stated that more than 700 officers throughout the country are implicated, having signed a petition to King Peter in which they declared that they were unable to serve in the army under murderers. They also demanded the punishment of the assassins and stated that if their demands were not complied with they would take the affair into their own hands. Colonel Popovitch and other officers of King Peter's suite were especially denounced in the petition.

King Peter and his principal Ministers are now at Nisch. It is stated that M. Kaljevitch, the Minister of Foreign Affairs, opposed the action of the Government in ordering the arrest of the officers, and will resign from the Cabinet.

There is much excitement at Nisch and Belgrade over the situation, and the question of King Peter's position is being discussed very seriously. It is not known what proportion of the Servian Army will support the officers who have been arrested.

BOY'S MILLINERY PRIZE.

Award at Convention in Chicago Causes Row Among Disgruntled Women.

Chicago.—The convention of milliners closed in a row. Professional hatmakers were arrayed against the officers of the association because of the award of first prize to Earl E. Hodge, a nineteen-year-old boy. They say that the fact that Hodge was the only boy competitor, and not the charms of his millinery creation, influenced the decision of the judges.

"I thought this was to be an exhibition of the work of milliners, and not of boys," declared one of the disgruntled local exhibitors. "The next time I am invited to make a display of hats I'll decline in language which cannot be mistaken."

Hodge said the reason he had won the prize was because he was a sort of hat-making genius or prodigy. "When I was a little boy," he said, "I used to trim [illegible] my life I have had the am[illegible] a milliner. I always have made my sister's hats, and have been complimented about them often."

FUGUTIVE NEGRO DROWNS.

Chased by a Mob, He Jumps Into the Kansas River.

Kansas City, Mo. — A negro was caught choking and seeking to rob Mrs. Margaret Gerahn, a white woman, in her home at Armourdale, Kan., a suburb.

He fled, chased by a crowd, and when he realized that escape was impossible, drowned himself in the Kansas River, jumping overboard from a rowboat in which he was trying to gain the Missouri side.

The negro had been in Mrs. Gerahn's house for three hours and had repeatedly choked her to make the woman give up her money. She will probably recover.

Make Patrons Pay For Strike.

The laundry owners of Chicago have raised prices on collars, cuffs and flat work, in the hope that they will be able to recover the amount lost during the recent strike. The laundry business of Chicago has fallen off thirty per cent. The new price list is expected to add $2,500,000 a year in receipts.

Temperance Hospital Plans.

Directors of the Frances E. Willard National Temperance Hospital have decided to erect a $75,000 hospital in Chicago for the treatment of disease without using alcohol. The building will be the result of nineteen years' work. Three schools of medicine will be represented.

Suicide After Strike Failed.

Because he lost his job by striking Jacob B. Smith threw himself from the fourth story window of his home in Chicago. He struck the sidewalk and was killed. Smith was President of the Cooks' Union and chef of a downtown restaurant. The strike failed.

"Strangler" Knapp Still Hopes.

Alfred A. Knapp, the "strangler," was taken from Hamilton to Columbus, Ohio, to await execution in the electric chair on December 12. Knapp expressed the hope that he would soon be back in Hamilton.

Germany Bars Hypnotic Displays.

The Minister of the Interior at Berlin, Germany, has reissued the old decree forbidding public exhibitions of hypnotism, on the ground that such proceedings are injurious to the subjects hypnotized.

Pacing Mare Makes World's Record.

Edith W. broke the track, State and world's records for pacing mares on a half-mile track at Anderson, Ind., in the free-for-all mile pace. Her time was 0.33¼, 1.03½, 1.36, 2.07.

Made Citizens by Fraud.

Italians have been getting fraudulent naturalization papers at Steubenville, Ohio, in great numbers. The recent arrests have caused consternation, and many have suddenly left for Italy. It is estimated that 200 fraudulent papers have been issued.

English Sympathy For Lipton.

The opinion was expressed by English yachtsmen that no further attempt would be made to send a challenger after the America's Cup. Sympathy was shown for Sir Thomas Lipton.

TRADE WITH NEW ISLANDS

Uncle Sam Did Round $100,000,000 Worth of Business.

First Opportunity Offered For Accurate Estimate of This Commerce—$5,000,000 in Gold From Alaska.

Washington, D. C.—Commerce between the United States and its non-contiguous territory amounted to over $100,000,000 in the fiscal year just ended. This figure includes about $5,000,000 worth of gold bullion produced in Alaska and brought into the United States. Even excluding this, however, and including only merchandise in the calculation the total amounts to $95,518,000.

This is the first opportunity which has been offered for an accurate measurement and analysis of the commerce between the United States and its non-contiguous territory since the annexation of the Hawaiian Islands and Porto Rico. As there was no law providing for the gathering of statistics from the new customs districts a special law was enacted which applied to the case, and the result of the fiscal year's operation is just available. The law, when enacted, was made broad enough to include the statistics of the commerce between Alaska and the ports of the United States, as well as that of Hawaii, Porto Rico, the Philippines, Guam, the Samoan Islands, etc. The result is indicated by the Department of Commerce and Labor, through its Bureau of Statistics, as follows:

Shipments from the United State to its non-contiguous territory, 1903	$36,722,941
Receipts of merchandise from non-contiguous territory, 1903	58,894,717
Gold bullion received from Alaska (domestic production)	4,719,579
Total	$100,337,237

While these annual figures are the first of any official nature which the country has had of the commerce with Porto Rico and the Hawaiian Islands since their annexation, it is practicable to compare these with the figures of the commerce with these islands in any year prior to annexation, because of the fact that commerce with them was always measured and reported when they were foreign territory. This is true also with the Philippines. In regard to Alaska no accurate statistics of the commerce were gathered prior to the last year, but estimates were made for former years, which give a fair basis for comparison. It is practicable, then, to compare the commerce of 1903 with that of 1893, for all of this territory which now has become a part of the United States.

TRICHINOSIS GRIPS HOMBURG.

Two Hundred Peasant Have Become Victims of the Epidemic.

Berlin, Germany.—In Homburg and its vicinity 200 persons are suffering from trichinosis.

Trichinosis is a flesh-worm disease, due to a morbid condition, produced by the indigestion of food containing "trichina spiralis" in large quantity. Most of the recorded epidemics in this disease have occurred in Germany. This is attributed to the fact that many Germans eat their meat raw or only partially cooked. The most serious outbreak of the disease, so far as known, occurred in Hettstadt, in 1863, during which 158 persons were affected, of whom twenty-eight died. A slight outbreak occurred in this city in 1864. Homburg is a town of Prussia, in Hesse-Nassau, and is nine miles from Frankfort-on-the-Main. It has a population of about 8300 persons.

NEGRO LAD CONFESSES MURDER.

Baltimore Police Clear Recent Mystery by the Arrest of Boy.

Baltimore, Md.—Charles Jones, a negro boy, twelve years old, confessed to the police that he murdered Miss Caroline Link. Miss Link was found in a dying condition in the candy store of her employer early on the morning of August 28. A bloody club was found near her.

The boy said he entered the store to steal taffy, and, finding Miss Link there, struck her twice on the head with a club and ran away.

Prussian Soldiers Robbed in Camp.

The chest containing the silverware of the Thirteenth Regiment of Uhlans, in garrison at Hanover, Prussia, has been robbed of 400 pieces of silver, among them being massive cups, which were gifts of Emperor William. No trace of the burglars has been found.

Killed Son to Save Death Agony.

At Shurz, Nev., an aged Indian named George Sam, unable to witness the sufferings of his young son, who was sick, killed the lad with a shotgun, and then, placing the muzzle of the gun to his own head, discharged the remaining barrel.

Lipton May Challenge Again.

Sir Thomas Lipton, at a dinner given to him in New York City, expressed a determination to challenge again for the America's Cup if a yacht fast enough to beat the Reliance could be built.

Filipino Mob Murders a Lieutenant.

Lieutenant Sutton, of the Philippines constabulary, was murdered by a mob of native policemen, at Cabegao, P. I., a few days ago, while attempting to arrest a policeman for disobedience. His assailants were arrested.

Lightning Printed Fern on Man.

Coroner O'Gorman's autopsy on the body of Percy T. W. Barrows, of the Bronx, killed by lightning in Crotona Park, New York City, disclosed a perfect maiden-hair fern outlined on the boy's body, evidently imprinted by the stroke of lightning.

Arrested For Insult to Kaiser.

Three men and two women have been arrested at Halle, Prussia, charged with insulting Emperor William. The precise nature of their offense has not been disclosed.

KILLED FRIEND'S WIFE

Former Mayor's Son, Forger and Thief, a Suicide Also.

Terrible Tragedy Enacted in the Presence of His Own Wife—Slain Woman Had Refused to Elope.

New York City.—Spurned by a woman who was his wife's dearest friend, and with whom he was infatuated, and threatened with exposure for the alleged embezzling of church funds, Henry Townsend Edson, son of former Mayor Franklin Edson and brother of Dr. Cyrus Edson, the distinguished physician, shot and killed Mrs. Fannie Pullen and then blew his brains out in his apartment on West Ninety-second street.

Edson's wife and his brother, Dr. David D. Edson, were in the room when he pleaded with Mrs. Pullen to elope with him. Mrs. Pullen, weeping hysterically, made a scornful refusal. Instantly Edson whipped a pistol from his pocket and fired. The weapon was so close to the woman's face that the powder scorched her cheek. He fired a second time as she fell. Dr. Edson leaped toward his brother to strike up the weapon, but the murderer placed the barrel of the pistol in his mouth and fired twice, the first bullet shattering his teeth and the second entering the brain.

In addition to the disclosures made by Edson a few moments before the tragedy, confirmation of his motives was found a short time later in letters addressed to Mrs. Pullen in endearing terms.

Edson was controller of St. Michael's Episcopal Parish Church, at Amsterdam avenue and West Ninety-ninth street, of which the Rev. Dr. John C. Peters is pastor. Edson was also chairman of the Board of Trustees and one of the most active workers in the church, of which Mrs. Pullen was also a member. Letters were found which showed that Edson had been ruined in Wall Street. Exposure and disgrace faced him, and he had appealed to his father, the former Mayor of New York City, to come to his apartment and aid him.

Traston Pullen, sixteen-year-old son of the murdered woman, was told of her death, and hurried to his home from the Columbia Grammar School. He answered a ring at the door bell, and immediately asked: "Is Mr. Edson dead? I am not sure about it, and if he is not, I'll kill him. I have a revolver here."

The boy drew a pistol from his pocket and he appeared determined to start on a hunt for his mother's slayer until assured that Edson was dead.

The Pullens live on West End avenue. John Pullen is chief clerk of the New York Central Railroad. His wife was a schoolmate and an intimate friend of Mrs. Edson. Edson told his wife several days before of his infatuation for Mrs. Pullen. Mrs. Edson did not believe all the disclosures in her husband's confession.

Coroner Jackson took possession of several letters in the apartment, which he said, showed not only that Edson was infatuated with Mrs. Pullen, but also that he was financially ruined.

Edson was found to have been a forger as well as an embezzler from St. Michael's Protestant Episcopal Church, of which he was parish clerk. The Corn Exchange Bank was a loser by his forgeries, it was learned. It was also said that Edson's indebtedness to St. Michael's Parish is known to be more than $5000.

There is nothing wh[illegible] dence gathered since the shooting to show anything except that Edson was a madman. All of the persons intimately acquainted with the Edson and Pullen families unite in declaring that the murderer's passion for Mrs. Pullen, which he expressed a moment before the shooting, was a surprise to Mrs. Pullen as well as to Mrs. Edson. It is feared that as a result of the tragedy Mrs. Edson may permanently lose her reason.

REDCOATS GREET YANKEE TROOPS

Fusiliers and Guardsmen Mingle on Canadian Soil.

Amherstburg, Ont.—A unique international tinge was given to the camp of the Windsor Battalion of the Twenty-first Essex Fusiliers here by a visit from the Detroit division of the Michigan Naval Reserve and Company C of the First Regiment, Michigan National Guard.

The Canadian militiamen invited the Yankee soldiers over to spend the day, and on their arrival at Amherstburg they were welcomed by the redcoats standing at attention at the dock while their band played the "Star-Spangled Banner." The troops then paraded together to the camp grounds.

Negro Lived 117 Years.

"Old Uncle Andy" Montgomery, 117 years old, the only negro ever owned by the State of Georgia, died in Atlanta, Ga. He is said to have been born in South Carolina in 1786. There are many evidences to establish his great age. He had ventured frequently in the North and East. His oldest son, eighty years of age, and his youngest, seventy-six years of age, were with him when he died.

Cost of Navy Yard Improvements.

Estimates for improvements and expenditures at the navy yards named have been submitted to the Chief of the Bureau of Yards and Docks at Washington: Boston, $1,080,000; Portsmouth, N. H., $3,560,000; Norfolk, Va., $2,518,000; Washington, D. C., $2,316,197; League Island, Pa., $3,794,347; San Juan, P. R., $2,617,180; Mare Island, Cal., $1,039,300.

Shot at Crow; Killed Daughter.

Seeing the stalks moving, and thinking crows were in his cornfield, Duncan Swan, a prominent farmer at Otsego, Mich., fired into the moving corn. He heard a scream, and running into the field found that he had shot his daughter. Swan is almost bereft of his reason.

Mexican Desperado Slain.

Accused of six murders and wanted dead or alive, Fernando Valenzuela was killed by Mexican rurales at Santa Cruz, Sonora.

HYGIENIC BEDROOM HINTS.

Every bedroom should be provided with the essentials for healthful sleep and the daily sponge bath.

As nearly as possible the roo should be keep free from anyth that would tend to contaminate air.

It should be as large as one c ford, and the windows so a that they may be opened at and bottom.

If possible the floors shou and the rugs so small that be taken out of doors with cleaning and airing.

Everything about the ro be washable.

The bed should be light with strong castors, so tha be readily moved.

Many people prefer a cheap, mattress next the spring, and a lig one of hair on this, but any kind of a mattress is better than one that is too soft.

Above all, do not overfurnish the bedroom.—Pittsburg Dispatch.

CONCERNING FLIES.

The common house fly is, above all things else, a scavanger. No doubt the flies were intended to serve a good purpose by destroying filth and waste, but in their work they are liable to do serious harm, to say nothing of the constant annoyance which they cause. It is believed that flies are effective disseminators of disease germs. Coming, we will suppose, from a heap of offal which contains the germs of typhoid fever, they enter the dwelling house and light upon some article of food. Is it not reasonable to suppose that they may bring with them some of the minute organisms which develop this destructive disease? If the fly could be confined to his proper place, which, as I said in the beginning, is that of a scavenger, he would serve a valuable purpose; but, like some human beings, he may cause much trouble when he goes outside his appointed sphere. The flies should be kept outside of the house as completely as possible by closely screening doors and windows. For destroying flies after they once enter the house I recommend the common wir "spatter," which may be bought for a nickel, as safer than placing poison or even fly paper in the room.—Philadelphia Record.

TO DO UP LACE CURTAINS.

To do up lace curtains satisfactorily says the Country Gentleman [illegible] tacken down pin them to [illegible] a few minutes, so that the [illegible] blow out the dust. [illegible] dust has been shak[illegible] soak (if very [illegible] suds for one [illegible] by hand [illegible] suds made from good soap. Rinse up and down by hand until all soil is [illegible] Run them through a slack [illegible] wringer and place them in a [illegible] of clear warm water. If they are to be pure white, they are now ready for the bluing, but those who wish them cream color may add clear filtered coffee. Instead of using starch to stiffen them they will look more like new ones if gum arabic is used. Upon a teaspoonful of gum broken into little bits pour a cupful of warm water and stir until dissolved. To every quart of water add two teaspoonfuls of the mixture. Wring out carefully through a loose clothes wringer. In a sunny spot in the yard have the quilting frames extended, and a clean sheet pinned taut over them.

In order to work to advantage it is better for two to shake and spread one curtain at a time. They should be gently stretched both ways and pinned in each scallop. Allow each curtain to remain until perfectly dry. As fast as dry spread out flat on a sheet on the floor over night in a perfectly dry atmosphere.

Rhubarb Sherbert—Wash one bunch of rhubarb. Cut it in pieces, put in a saucepan over the fire with one quart of water and cook slowly until tender, add the grated rind of one lemon and one cup of sugar. Cover and stand on ice two hours. Strain and add more sugar if needed. Serve with crushed ice in glasses.

Spiced Cherries—Select fine large cherries. Wash and drain five pounds. Boil one quart of vinegar with two pounds of sugar, two ounces of cloves and the rind of one lemon peeled thinly. Tie the spice in a bit of cheesecloth. Simmer for twenty minutes. When boiling pour over the cherries, cover closely and let stand until the next day, then drain off the juice and boil again; repeat this twice and seal. These are delicious, well flavored and may be served with cold meat.

Plain Milk Soup—Put two quarts of milk over the fire, with one teaspoon of sugar and add one teaspoon of salt; rub half a cup of sifted flour in cold milk; when smooth stir it into the scalding milk and stir until boiling and thickened; add a dish or two of nutmeg and a little pepper; beat the yolks of two eggs; add a little of the hot soup to them; then return all to the fire and stir one minute; do not let boil; if liked, a slice of onion may be cooked in the milk, then removed; serve with wafers.

The Influence of American Wealth on Divorce.

By the Editor of Harper's Weekly.

MANY a typical "intelligent foreigner" visiting in Washington has something to say upon the effect of great fortunes on politics, and the effect of "combines" upon great fortunes. And if he were to visit Newport (supposing that resort still to lie in the way of the intelligent foreigner) he might well have something to say upon the effect of great fortunes upon marital felicity, and, incidentally, upon divorce.

Mr. Godkin, in one of his essays, pointed out the demoralizing effect of the coupon—that is, of portable wealth without property responsibility—upon morals; though the thought would perhaps have been traced back to Dr. Watts, had he written his lines "Satan finds some mischief still for idle hearts to do." But it has only been very recently that great fortunes, huge incomes, have generally existed without the sobering influences of the duties and cares of a landed proprietor, or the skill and training to character that result from the direct management of the toiling masses that create the wealth enjoyed. Hence, on the one side, ridiculous expenditure; on the other, the growls—increasingly audible—of a socialist proletariat. Even the absentee landlord—whose sins, of commission and omission, have been proverbial—had at least his roots in the soil, somewhere. But the absentee stockholder, his (or her) very coupons cut for him by some patient attorney, flaunts like an orchid, rootless and fruitless, above the golden air of Wall Street.

Nor is it only that our millionaires, their millions once acquired (be it from a mighty iron-master, cotton-spinner, sugar-baker, a lucky prospector, or a speculative parent), and duly funded, have now no care to make their wealth, no care in keeping it, no care for those who earn the income on it. They have no touch with humanity. Our intelligent foreigner in Newport cannot have failed to note how curiously exotic are many of the persons, the younger persons, born and bred there. American young ladies of the Middle West are said to look to our "smart" set, as copiously reported in the Sunday newspapers, for their model—we remember even a young gentleman, of Mr. Richard Harding Davis's, who carried the portrait of one such well-advertised young lady, quite unknown to him, within his watchcase—but the members of that set never look at America. Its women, most of them, have quite as little knowledge of the people as any young French marquise of 1789. Society is not humanity. Its world—particularly in America, where it *is* have no political position—is not a real world. To all but the silliest of the vain, it soon fails to interest. It is unsufferably dull.

And that is not all. The bulk of those who spend (not necessarily who make) huge incomes here have but a shallow emotional soil to work upon. Their souls seem undeveloped, their minds are incredibly uncultivated. A real "intelligent foreigner"—it may have been Mr. James Bryce, or it may have been Matthew Arnold—after a round of fashionable house-parties, once threw himself into an easy-chair with a sigh of relief, and delivered himself of what our Whitman would have termed a yawp—though a cultivated one. He had been from palace to palace—from Trianons to Georgian residences, from copies of Chenonceaux to imitations of the Hermitage—and he swore (he did swear) that in all that time he had not seen the outside of a book or met any one who talked shop if he had seen the inside of one. Wonderful tapestries there were, and great pictures, and even beautiful gardens, and bronzes and ormolus and jades—and the women wore exquisite frocks. But, even the men who create our fortunes seem occasionally to have sunk the higher powers of their mind in a fixed capital with the other assets of the trust—they have no mind left for circulation in society. And it is easier to be a connoisseur in bric-a-brac and pictures, or understand the points of horses, than to buy and understand good books.

Hence their minds are shallow. And, to our mind, this shallowness of their sinning is the cheapest sin. Humanity—though it may not dare proclaim it—has some respect for an eternal emotion, though illicit; for even an ungovernable passion, though wrecking lives. But for adultery, ever-careful of the forces of law, a Francesca who turns up smiling with her Paul at the next dinner party, a Lovelace who waits for the last husband's settlements, a Helen who goes to Paris with her husband—it has nothing but contempt. Passions which do not wreck lives are simply nasty.

That is why, as it seems to us, the spending of great fortunes, without responsibility and without intelligence, by persons without a mind for the higher enjoyments of life, is in great part a cause of our numerous divorces. The newly rich, the idle spenders, are like a shallow soil too thickly fertilized, too suddenly exposed in the forcing-house of prosperity. Shallowness of nature matters (runs) of life. And that it why (as we hold) our public opinion—and the best serious opinion—should have even less patience with a world that sins this and sh[ame] more than with those who sin in truth.

warrant anythin[g]

Fighting the Mississippi.

By J. A. Seddon, C. E.

WITHOUT doubt the power in the lower Mississippi flood is more than ten times the power of Niagara; and it may be assumed that it will take its own course down its alluvial valley. Turned and looped on the incline, the river has worked out a course about a thousand miles long and a mile wide, and in this it rises and falls about fifty feet between its low and high waters. The whole course is an area of drifting sands and caving banks that shift with the changing flow continually.

There is but one known way to fix all this, and that is to regulate the flow, for a fixed flow will work out for itself a fixed channel in any alluvial valley. Other improvements may be possible, but their works will have more than 50,000,000 horse-power to reckon with, and so far the millions put into improving the river have had no real effect on it. The reservoir system would weaken the stupendous power of the river from above; and this is just what is needed.

Nothing seems more absurd than to try to fight the river only near its mouth, where its whole strength must be encountered. The force of the river has to be broken by attacking it further up. Reservoirs at several points would hold enough water in captivity to render the lower levees superfluous.—The World To-Day.

Russia's Central System.

The Forces That Are at Work in That Great Country in Modern Times.

By Edwin A. Stuart.

AT the present time the Russian central administrative system is embodied in four councils—the council of the empire, made up of the ministers and a considerable body (now ninety-three) of members appointed by the Czar, having a purely consultative and advisory function with reference to measures proposed by the ministry; the Senate, a judicial and executive body, which comprises the higher courts of the empire, its members being of high rank, and the six sections into which it is divided being presided over by jurists who are the personal representatives of the Czar; the Holy Synod, made up of the metropolitans, archbishops and certain bishops, and having jurisdiction in religious affairs; and the committee of ministers, which comprises the actual heads of different administrative departments, thirteen in number, together with some other functionaries.

These councils, with the organization of which they are the head, form a large, strong and inevitably influential official class, within which there is room for a decided difference of opinion upon questions of public policy. As a matter of fact, this official class is the most powerful political force in Russia, and one that reaches out into the hundred provinces in each of which the local government is a political centre in close connection with St. Petersburg.

Besides this, there is a considerable body of educated, intelligent Russians, in touch with the world, whose opinions cannot be repressed, even by administrative process. How effective a force this educated public opinion may be in guiding the course of the Czar perhaps he alone can tell, but in this age that force is one that cannot be neglected. There is then a certain kind of party life possible, even in Russia; not at all such as we know in constitutional and parliamentary countries, but something that is not to be neglected as a political force in relation to the Czar.

But there is another serious limitation upon the power of the Czar to accomplish even his most beneficent and enlightened will. He has for an instrument not a progressive and enlightened people, trained in self-management. The great mass of the Russian people, as a result of the climate and physiography of their country and of the course of their history, are a dull peasantry who have not yet learned to bear themselves as men. It is this inert mass that constitutes the great internal problem of Russia, holds the country in check, and deceives many calculations that are based upon the brilliant diplomacy and statesmanship of the men who serve the Czar as counselors.—Chautauquan.

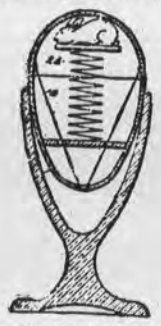
TENDER-HEARTED SAMMY.

—Pittsburg Dispatch.

AN AMUSING TOY.

The toy shown in the accompanying picture ought to be hailed with delight by children, since an animal plays the most important role in it; indeed, without the animal it would be an uninteresting and lifeless affair.

The toy is egg-shaped, and in the upper part is an animal, which can be covered if desired. The animal is held in position by a spring, and another spring comes into play when the cover is to be removed. It is evident, therefore, that the toy in its normal condition looks like an ordinary egg, and that the child who receives it as a gift



does not realize what a treasure it has obtained until the cover slowly disappears and the suning little animal shows itself.—New York World.

FISH THAT ARE WELL ARMED.

Two of the fish at the Aquarium wear armor and carry concealed weapons. As the police seldom visit the Aquarium and no complaints have been filed, the fish have not been disturbed in the possession of their armaments. They are the orange filefish, which are coated with a skin that resembles sandpaper in the latter's most striking characteristic, and in a hollow on the top of the back they carry sharp three-cornered files. When a grudge is to be settled the filefish literally gets his back up and viciously tickles the object of his hatred in the ribs.

The two specimens at the Aquarium were secured a short time ago in Gravesend Bay. The fishermen in the neighborhood of the bay have other names for them. "Old sow," "old maid" and "foolfish" are some of the designations which they apply to them when they sit over the fire and spin yarns. The shape of the head and mouth is responsible for these names. The mouth opens upward, the lower jaw protruding beyond the upper. Crustaceans are the diet of this fish, and the shape of the mouth and the sharp teeth within are for catching and destroying this kind of food. One would say, judging from their appearance, that their diet was not well suited to their needs, for they have a starved look. The other day a party of sightseers observed this look.

"Here's a fish trying the starvation cure," remarked one, turning to his companions. "There's something the matter with him. Don't you see how thin he is?"—New York Tribune.

THE HOUSE IN THE GARDEN.

Johnny never would have known anything about it if he had not been digging dandelions out of the lawn, when with his weeding fork he opened such a queer little house.

At first it seemed to be nothing but a long passage. Johnny pulled out his knife and cut open the roof. The floor was smooth and clean, although it was made of earth and the ceiling was prettily arched.

"Where does it all go to, anyway?" said Johnny, quite excited. He dug on and on, but there seemed to be no end. Here and there were other little passages opening into the long one. Last of all he came to a little room with an arched roof. Maybe that was where the little miner lived.

"I wish I knew what sort of a fellow made it," said Johnny musingly.

While he was wondering the ground began to move and rise. You see the master of the house was not a bit discouraged. When he found his home in ruins he began at once to dig out another.

"Now, if I can only catch him," whispered Johnny to himself. He put in his knife carefully, not to hurt the busy little miner, and tumbled him out into the sunshine.

What a funny fellow he was. He was dressed from head to foot in the softest, silkiest fur you ever saw; and his rosy-colored hands were not a bit like the grimy fists of the coal miners that Johnny saw once. He was almost blind. Indeed, Johnny thought he had no eyes at all, but he was strong and sturdy for all that.

Johnny carried him home for a pet. Mr. Mole, however, did not enjoy life above ground, so he was taken back to the garden, where he could enjoy his digging and delving.—Washington Star.

An Odd Labor Exchange.

There is in Melbourne, Australia, an odd labor exchange, which is described in the Scientific Australian. It is intended primarily for the unemployed, and includes as members accountants, architects, bakers, dentists, engineers, printers, authors, artists, journalists, geologists and piano tuners.

Any member in need goes right along at work at his trade. If he is a shoemaker, for instance, he takes a pair of boots to the exchange and receives a certificate equivalent to their estimated value. This he can offer at any time in return for its value in such other goods as may be deposited at the exchange by other members, and thus actual cash is rendered largely unnecessary—though how the accountants and piano tuners can serve the others on the barter principle is not so plain.

Alligator Far From Home.

Charles Laing has shot a nine-foot alligator in the Mississippi River. It is supposed to be the one seen near Clinton, Iowa, twice before during the summer. It is the first alligator ever seen in these waters.—Chicago Tribune.

Mother Goose Puzzle.

Even the pig, to say nothing of the two little rabbits, would be more fit pets for these children. Find the animals named.

A FAMOUS OLD HUNTER DEAD.

Parmly Killed 3000 Deer, 400 Bears and Much Other Game in His Long Career.

Isaac Parmly, the last of a group of famous hunters, trappers and woodsmen of Northern Pennsylvania who settled in that region while it was yet an unbroken wilderness, died at Grassy Island recently aged ninety. He was a hunter while elk, wolves and panthers were yet plentiful in the Pennsylvania forests. In a statement made by him a few years ago he said he had killed forty-seven elk, thirty-two panthers, more wolves than he could remember, 400 bears and more than 3000 deer, all on the watersheds of the Allegheny and Susquehanna.

Among the adventures in the woods that he was fond of relating was a regular Israel Putnam experience with wolves. He surprised two wolves one day devouring a deer he had killed, pursued them into a cave, shot one and killed the other with a knife after a desperate fight.

At one period in the early career of Parmly as a hunter wolves were such a pest to the settlements that the Commissioners of McKean County, Pa., placed a bounty of $25 a scalp on them. Parmly, the Nelsons, Zenos Cowley, the Parkers, George Rae and others of the pioneer hunters and trappers returned so many wolf scalps to the treasury in the first year that payments on them exhausted the funds, and the next year the county had to issue scrip to meet the demands of the wolf slayers. The bounty was then reduced to $8 to save the county's credit, and for years wolf scrip was part of the recognized currency of that region of the State.

Parmly was in at the death, forty years ago, of the last elk in Pennsylvania, which was followed from Flag Swamp, in Elk County, to the head waters of the Clarion River, and killed there by Parmly, Indian Jim Jacobs, Seth Nelson and George Parker.

Parmly leaves many descendants in Steuben and other southern tier counties.—New York Sun.

WISE WORDS.

While we gladly accord honor to the courage of active heroism, let us not forget also to reverence the courage of patient endurance, the courage of absolute sincerity, the courage of devotion to principle. He who possesses these is indeed a brave man, though no one may recognize it and he himself be unconscious of it.

The hope that inspires effort is always a blessing. Not only does it strengthen the human faculties and improve the character; it also makes rapid advancement in its own line, even when failing to reach its far-off goal.

The heart is always hungry. No man lives happily alone. The wisest and the best is wiser and better for the friends he has.

Generosity, to deserve the name, comprises the desire and the effort to benefit others, without reference to self.

It is a maxim that those to whom everybody allows the second place have an undoubted right to the first.

It is poor policy to take advantage of other people because you have never had any advantage of your own.

What men want is not talent; it is purpose; in other words, not the power to achieve, but the will to labor.

The world's greatest men and best reformers were light weight when weighed in the scales of bigotry.

The doorstep to the temple of wisdom is a knowledge of our own ignorance.

Reading should teach us how to seek for truth, meditation how to find it.

Fixed to no spot is happiness; 'tis nowhere to be found, or everywhere.

Tales That Will Tell.

The marine reporter, contributing to a publication in Gloucester, Mass., reports that a swordfish attacked a fishing schooner, rammed the vessel, and, in its wriggling effort to escape, sawed a hole in the bottom. He added that, half the crew bailing and the other half managing the sails, the boat reached harbor at the point of sinking. It was stated in a contemporary of this city that a customer in a restaurant, being served with a tough steak, seized the latter and beat the waiter insensible. Many are the contributions to the gayety of the wise and the gullibility of the credulous. These tales will adorn more than one serious fireside argument. And they will do as well as some other tales.—St. Louis Republic.

Free Suet, Free Ice.

"Free Suet. Free Ice." This is one of the newest trade signs in bizarre New York, and it's about as strange as any of them. It extends across the top of the second story of a butcher shop on Third avenue, up in the eighties.

Underneath the first section of the sign is an explanation that with every purchase of fresh meat a lump of suet will be thrown in free. Such an offer is a real boon to the housewives of the neighborhood, who usually have to cajole the butcher into tossing in a lump of suet, even when they are old customers of his. As to the ice, the sign states, without mentioning the quantity, that it is given out free on Saturday nights.—New York Mail and Express.

Use For Old Lumber Camps.

The success of the open-air treatment of tuberculosis in Pennsylvania has given rise to the suggestion that all the old lumber camps in Northern Wisconsin be utilized for that purpose. A small amount of money would put them in suitable condition, and there are so many of them that scores of patients might be treated. So far as location and climatic condition are concerned, they could hardly be better.

SCIENTIFIC & INDUSTRIAL

The curious habit of carrying a live sea anemone in each of its two claws is ascribed to the Melia, a genus of small crabs of the Maldive Archipelago. M. Borradaile states that the crab's claws are too frail for use in defense, and it is not clear whether the anemones are held as a means of protection or as a trap for food.

Work on the Trans-Andes railway is being carried on at a high speed. When the great tunnel piercing the Andes will be completed direct railroad connection will be established between Valparaiso and Buenos Ayres. At the present time goods can be transported by means of mule caravans from the Argentine terminus to the Chilean terminus in about twenty hours.

An interesting and rare case of infection of the mouth and subcutaneous tissues by a parasite nematode worm is recorded by Mr. Whittles in the Lancet. The patient had never been out of England, and the source of infection was surmised to be a pet Pomeranian dog. In a tropical disease affecting the skin, known as "craw-craw," a nematode has been described as the cause of the growths.

Some time ago B. Walter showed that an electric spark feels its way from the positive pole to the negative in a rapid succession of preliminary sparks of increasing length. By some excellent photographs with a moving camera, he has now proved that lightning similarly establishes a conducting path through the air by a series of minor flashes, and that, as a rule, the lightning passes from the cloud to the earth as a series of continuous discharges.

An interesting and exhaustive report has been issued by the Worcestershire (England) County Council upon the bacterial treatment of sewage by different methods, the analytical details being supplied by the county analyst, Cecil Duncan. The conclusion arrived at is that the best method for the treatment of domestic sewage is a closed septic tank with bacterial beds filled with coke, which was found to be better than coal, brick or stone, two bacterial beds being provided to be used alternately to avoid ponding.

If the remarkable specimen of Australian opal, which has been brought to light, turns out as well in the cutting as is hoped, the result will be a solid mass of beautiful stone fully eight inches long by five inches wide, and will probably be the largest piece of opal known in the world. At present the biggest gem is that in possession of the King of the Belgians, and is included in the crown jewels. It is valued at something over $250,000 and weighs close upon sixteen ounces. The new specimen from the White Cliff fields has been christened "Big Ben." It is said that the purchaser of the specimen bought it for a trifling sum.

Cinderella Revised.

With some petulance Cinderella notices that the pumpkin has been transferred into a golden carriage.

"Does it not delight you?" asks the fairy godmother.

"Oh, of course, it is very pretty and all that," concedes Cinderella; "but surely, you do not expect me to go to the ball in such plebeian style?"

"Plebeian?" asks the fairy godmother. "Why, that's the finest transforming act I ever did in all my career."

"Yes; but the automobile is the thing now."

"All right," grumbles the fairy godmother. She gives her wand another sweep, and the golden carriage becomes a huge tonneau, puffing and panting and ready for the spin.

"How sweet!" chirps Cinderella. "But are you not going along?" she exclaims as the fairy godmother begins to vanish.

"Not much!" declares the fairy godmother. "No automobiles for me. Even a fairy has to adopt some measures of self-protection."—Judge.

The Vernacular.

This was the conversation between the girl with the gum in her mouth and the other girl with the gum in her mouth:

"Aineha hungry?"

"Yeh."

"So my. Less go neet."

"Where?"

"Sleev go one places nuther."

"So dy. Ika neet mo stenny's are Canchoo?"

"Yeh. Gotcher money?"

"Yeh."

"So vy. Gotcher aptite?"

"Yeh. Gotchoors?"

"Yeh. Howabout place crossstreet?"

"Nothin' teet there. Lessgurround corner."

"Thatlleloozwellzennyware. Migbta thoughta 'first. Getcher hat."

"Ima gettinit. Gotcher money?"

"Yeh. Didn'cheer me say I had it Already?"

"Yeh."

"K'nen."—Chicago Tribune.

Wattle Bark.

Wattle bark, a most valuable tanning medium, is now largely exported from South Africa and Australia. Last year Natal alone exported over $250,000 worth of this fibre. South Australia's export of wattle bark was valued last year at over $350,000, and that of Victoria at nearly $100,000. These trees will now be systematically cultivated on a large scale in South Africa, as well as in several points of Australasia.

North Plainfield Weekly Review.

Founded March 24, 1900.

An Independent Republican Newspaper published every Saturday at 33 Somerset Street, North Plainfield, N. J.

HARRY H. WEBB, Editor and Proprietor.

TERMS OF SUBSCRIPTION:

If paid in advance $1 per year; if not paid in advance $1.25 per year. The REVIEW is delivered by carrier in Plainfield and North Plainfield, and is on sale at news stands

Long distance and local telephone 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, SEPTEMBER 12, 1903.

TO ADVERTISERS.

Frequent changes of advertisement is one of the main requisites for a successful result; we therefore urge our advertisers to change their ads at least once a month. Try and get such changes to us as early in the week as possible; never later than Thursday noon.

The REVIEW *is on sale at the Union News Stand, east bound railroad station, and at E. M. Laing's, 130 W. Front St.*

INITIATION OF THE NEW LAW

THE new primary law, which had its first inning last Tuesday, demonstrated the fact that those good and conscientious citizens who are interested in uplifting politics, but who are in the habit of remaining away from the primaries and making their howl after it is all over, are not all dead yet.

The opportunity of a life-time was given the political reformers last Tuesday to get in their work. It was an opportunity such as they had never dreamed would happen in their day and generation.

Politicians were amazed when they first viewed the new primary laws. Gloom pervaded their camps for they know, if the reformers do not, that the primaries are the foundation of our government and at these is settled who shall fill the municipal, the county, the state and national offices, and where under the old law they had everything their own way, now under the new law they would have no more power than would their opponents, the reformers, for every citizen is given the opportunity of freely expressing himself, knowing that no cut and dried methods can prevail, but that just as much care is taken as for a presidential election.

But since the election last Tuesday, the politicians' faces are more than smiling, for, owing to the indifference of the reformers as manifested by their failure to be present and cast their votes at the primary, the politicians again had their way.

Some voters refused to vote Tuesday because they preferred not to declare what party they wished to affiliate with. There is no argument that will reach this class. They are just as patriotic, just as honest in their belief, as any other class. But in the belief that such a declaration involves their personal rights, they refused to vote. They are not ashamed of their party, nor were they ashamed to be seen at the old party primary where by their presence they acknowledged the party to which they belonged. When a canvas of the voters was made they had no hesitancy in stating to which party they belonged, but under the new law the voter must publicly declare his party to the election board, by answering the simple question, "What ticket do you wish?" That is all there is to it, and as foolish as it may appear to the average citizen, many voters on being asked this question, turned on their heel and left the polls without voting. We think after the sharp edge of the new law has worn away that they will recognize their inconsistency, or at least become reconciled to it.

It is asserted by many that this feature will be the one thing to bring about the reform for which the law is intended.

The simplicity of the operation of the new law was a surprise to most of the voters, because the professional politician had taken pains to promote the idea that it was unwieldy, complicated and hard to understand. On the contrary, however, it was simplicity itself. On entering the polling place the voter was asked what ticket he wished to vote. On replying, a ballot was handed him which contained the names of the delegates of his party. Taking the ballot with him to the booth, he simply erased those names which he did not wish to vote for, and returning handed the prepared ballot to the clerk in charge of the ballot box for that party, who deposited it in the box. The only difference between a primary election and a general election is stating what party ticket is desired instead of giving the voter tickets for each party.

In the borough a very light vote was polled. Out of a total registration of over twelve hundred, only 318 ballots were cast, and a glance at the returns in another column will show who did the voting.

In conclusion we wish to urge all good citizens to awake to the importance of doing their full duty hereafter at the primaries, and thus show their full duty hereafter at the pri- their earnestness in this new reform law which was enacted solely for the benefit of this class of voters.

GRIGGS ON AMENDMENTS.

John W. Griggs, in a letter to former Senator Johnson, of Bergen county, expressed himself as follows:

"I sincerely hope the amendments will be adopted. They are essential for the improvement of our antiquated judicial system, which was formulated sixty years ago. We must provide court facilities equal to the public requirements, which have enormously increased in New Jersey as they have elsewhere.

"I suppose that the increase in the the number of cases to be heard and decided yearly, in the court of errors and appeals now over the annual number heard forty years ago is more than thirty fold; and in importance and amount involved the same proportion of increase will hold.

"It is imperative that a court of appeals be provided to give all their time to the hearing of cases on appeal. That is the main effect of these amendments.

"The right administration of justice, which is the highest function of government, requires this reform."

Mr. Griggs is one of the leading lawyers of the State and his opinion will carry great weight with those laymen who must depend upon others more capable of deciding such matters.

STATE POLITICS

The result of the primary election Tuesday does not appear to have changed the political situation any regarding the United States Senatorial contest. Senator John Kean, the present incumbent, has come out ppenly as a candidate for re-election and claims that his chances have been strengthened by the victory of Major Carl Leutz, of Essex county.

Against Mr. Kean it is reported, are John W. Griggs, Governor Murphy, John W. Gardner, Charles N. Fowler, E. C. Stokes, and David Baird, any one of whom would fill the office with honor to themselves and the State.

SOMERSET COUNTY CLERK.

From all that we are able to learn, it would appear that Alexander G. Anderson will succeed Frank W. Somers as Clerk of Somerset County.

Mr. Anderson is well-fitted for the office, and, as the Unionist-Gazette says, "He has been one of those Republicans who have been loyal to the ticket and cause in season and out."

If there is any one thing Somerset county Republicans need it is loyalty, therefore the REVIEW supports Mr. Anderson.

SECRETARY of Treasury Shawan an address at Merchants' and Travelers' Association banquet declared prosperity will continue while United States consumes 95 per cent of all it produces, as at present.

JAMES WILSON, secretary of agriculture, says there will be a timber famine in the United States within 40 years.

IT is expected that the President will call an extra session of Congress for November 9, to consider the Cuban treaty and some sort of financial legislation. The impression seems general that there is not much hope of an agreement on any financial scheme.

EVIDENTLY the German Emperor takes a practical view of life, for it is reported that he said: "My daughter must be a model German housewife. She must understand how to fry a sausage, roast a joint, bake a cake. She must be a womanly woman of the good old-fashioned sort."

THE trial last week of the Newark millionaires resulted, as was expected, in their acquittal. They have promised, however, to put safety derailing switches on all grade crossings of trolley tracks and the Lackawanna railroad, showing that there is a feeling of moral responsibility even though the jury found them not criminally at fault.

AGUINALDO has written a letter advising his countrymen to stop gambling, improve methods of farming and patronize the new schools established by the government. Such advice is good for any people. As the Filipinos are not drunkards it was not necessary to warn against intoxication. That great evil is left to the more highly civilized countries of the world.

FROM the New Brunswick *Home News*:

"Here is a really brilliant suggestion to solve that Plainfield-North Plainfield muddle: Instead of taking North Plainfield from Somerset county, take Plainfield from Union. Union wouldn't care. Probably she'd never miss the loss. And Plainfield would be satisfied and Somerset would be happy because the annexation had been effected without the loss of either Sam Swackhamer or Charlie Reed."

The *Home News* may or may not have intended to be facetious in the above article, but in "happening" on to the old plan first recommended by the REVIEW, it struck a chord of unison which will vibrate stronger among North Plainfield people than any plan contemplating robbing Somerset county.

DIPLOMACY AND THE LADY

It is generally considered a perfectly safe and profitable thing to conceive a platonic admiration for the wife of your chief. The lady likes it and when she wants a little variety, having heard all your best speeches twice over, she generally goes to her husband and suggests that he gets you a better appointment, and you both start your round again with fresh partners. Your chief likes it; he is relieved from the arena of tea cups and owed to play the big game in his fashion. I made a successful and might have been a mighty among Anglo-Indians only I big mistake: I fell in love. Hampton was adorably pretty, rs younger than Sir George, earth induced him when on e to marry a child of eighbring her to Simla fresh schoolroom was a question by all his friends; but Sir knew his wife better than we was young in those days, and may add good looking.

Violet informed me one morning that she was a wicked woman—and in the same breath that I must love her eternally; also adding that I must always remember that she was Sir George's wife and that she must respect his name.

A few days after I received the offer of a much better appointment—the first step, really, on the big ladder of Civil Service promotion, a lucky plum to fall into a youngster's mouth.

When I told Violet she burst into passionate tears, and asked me if I could be cruel enough to accept it and leave her. She sobbed in heartbroken fashion.

I looked at Violet; she was trembling with grief and passion. She wore some white muslin gown, and looked pitifully girlish, and oh, so awfully pretty. Tears suited her. I did love her. I was only a boy in years as she a girl. I took her little sobbing figure in my arms and promised as she clung to me that I would refuse the appointment and stay on, her husband's humble secretary. Violet whispered brokenly that she would love me forever, and that I was the dearest boy in the world.

It was very nice to feel her soft, warm kisses on my mouth, and her little fingers ruffling my hair; nicer than fame, position, riches, dreams of power.

I kissed Violet Hampton that languid, lazy afternoon, and I sold my birthright for a mess of pottage.

Sir George gave me a keen glance under his bushy eye-brows when I told him I had declined the excellent appointment offered me. "Of course, you know your own affairs best," he said, slowly; "and for my part I should have been very sorry to loose the best secretary it as ever pleased the fates to send me; but in declining this one you are acting like a fool and singing your diplomatic death-warrant. Are you wise, boy? Is anything worth it"

Time passed. I watched my juniors climb on and pass me. Men, my inferiors in brains and class, began to patronize me. I was talked of as the man who had mulled his chance; missed his opportunity. I attained the dignity of the pointed-out moral; I was considered an excellent example of a fool.

And Violet, she loved me after her fashion, and at all events never replaced me by a rival; but little by little school-girl Violet blossomed out into a great lady and a woman of ambition.

Violet was ruled by her head, not by her heart. I had the the fresh early fragrance of her heart certainly, but by degrees Violet realized that hearts are inconvenient luxuries, and really not worth cultivating.

She was always sweetly gracious to her husband's secretary, and sometimes more than gracious. Of course it was an understood thing that we should marry when it pleased Sir George Hampton to close his eyes on this weary world. Apropos of our marriage, a remark Violet made on the subject will explain how far our devotion went, and show how much I had got for my youth.

"How foolish it is for women to tire men of them before they marry them! You would be sick to death of me by now, Jack, if I had not discovered that morality pays better than vice. As it is, you anticipate our marriage. Yes, you actually look forward to some unknown day of happiness. Thank me, Jack, for being so wise."

Sir George died, died as he would have chosen, suddenly and in harness.

Violet broke down absolutely, and mourned him bitterly.

"I never pretended to love him," she cried, turning savagely on me.

"We will work up a position together," I said.

"You!" she shot a half-contemptuous glance at me. "Oh, you're no good ;you lost your chance years ago."

I looked at her. She had the grace to flush and begin somehalf-sentence of apology, but I took myself out of her life from that hour.

When Lady Hampton's year of widowhood came to an end she astonished Anglo-India by marrying one of its greatest men. She took up the position of "First Lady" as to the manner born. She is a past mistress of diplomacy, and a great social leader. I may also add she is getting stout.

For myself, I have just had a small rise. I am one of the crowd. I listen when the big lions speak, and bow my head, as becomes one not in authority.

There is an old maid probate judge in Kansas. She says she has the drop on the men now. If any of 'em come in at all they must come in to court.

The slang name for dollars is cases. No wonder money talks—there is a woman in the case.

The hoe-down dancer always seems to enjoy himself though kicking on the situation.

Horses actually come out at the end of a race won by one.

New York City.—Long coats make a feature of the latest styles and can be relied upon as correct both for the present and for the future. This one,

WOMAN'S COAT.

designed by May Manton, is essentially smart and is shaped to take the outlines of the figure without being over snug. As shown it is made of Rhone blue cheviot stitched with corticelli silk, and makes part of a costume, but the design is equally appropriate for the separate coat and for all suiting and coat materials.

The coat is made with fronts that are cut in three sections, back, side backs and under-arm gores, and so allows of the many seams that mean perfect fit as well as vertical lines and apparent slenderness of figure. The neck is finished in regulation coat style and the fronts lap over to be buttoned in double-breasted fashion. The sleeves are the accepted ones that are without fullness above the elbows, but form puffs at the wrists and are finished with flare cuffs.

The quantity of material required for the medium size is six and a quarter yards twenty-seven inches wide, three and a half yards forty-four inches wide or three and a half yards fifty-two inches wide.

Little bow-knots of pretty straw are spaced down the narrow front panel of the skirt and a large bow knot design is appliqued on the blouse front. Small straw bows decorate the elbow puff of the sleeve.

Styles in Winter Millinery.

Lovely petunia and fuchsia mauves and magentas are promised in winter millinery. These tints are beautiful and highly decorative, but not every one can wear them. The decided blonde, alike with the decided brunette, has difficulty in assimilating them, and they seem to be especially planned for the accommodation of the natural-toned woman. She of the medium dark brown hair, medium skin and unobtrusive brown eyes generally carries them off successfully; therefore, as this style of woman is in the majority, one may look for a fuchsia and petunia cult.

The Shoulder Ruche.

In order to give the fair maid the proper width across the shoulders (which is intended to set off her slimness below the waist), sleeve trimmings droop lower and lower on the shoulder, and medallions of lace and pinched-out ruchings of taffeta or louisine silk are frequently placed as a shoulder decoration.

A Full Gilling Costume.

An ultra-smart outing costume for the fall is of navy serge, the fine but rough quality of goods being chosen in preference to the smoother finish. The skirt is perfectly plain in front, fits exquisitely over the hips, and falls in an inverted box pleat behind. The jacket is tight-fitting, the front turning back in small revers faced with white watered silk. Silver fall buttons, seven on each side, are placed on the front of the garment, to emphasize the lines of the revers. The distinctive note in the suit is sounded by the strappings of fuchsia mauve velvet, piped with the white silk, which come over the shoulders and curve from the centre seam of the back as far as the darts in front.

MISSES' WAIST WITH BERTHA.

Misses' Waist.

Bertha waists are apt to be exceedingly becoming to young girls, and are in the height of present styles. The very attractive one illustrated in the large drawing, is shown in white India silk, with trimming of Valenciennes lace and is stitched with corticelli silk, but the design is equally well suited to cotton, linen and woolen materials, and can be made either with or without the fitted lining.

The waist consists of the front and back of the fitted foundation, which can be faced to form the yoke or from which the yoke can be cut, the front and backs of the waist and the bertha. The front is bloused slightly but the backs are drawn down snugly on the waist line. The trimming is applied on indicated lines and gives the fashionable pointed effect while the tucked bertha outlines the yoke. The sleeves are the pointed ones of the season, tucked to be snug above the elbows and full below.

The quantity of material required for the medium size is four yards twenty-one inches wide, three and three-quarter yards twenty-seven inches wide, three yards thirty-two inches wide, or two and a quarter yards forty-four inches wide, with three-eighth yard of tucking for yoke and five and three-quarter yards of insertion to trim as illustrated.

Bow Knots of Straw.

A walking dress of bamboo-colored louisine is very smartly trimmed with the new decoration bands of straw. The straw is exceedingly glossy and the braid so fine, the band so slender that all stiffness is avoided. In fact, you would scarcely realize what is the trimming unless you see the gown very close. Satin-finished bands of pale yellow straw are an excellent match for the bamboo-colored silk. It looks not unlike a fine-woven braid trimming, with plenty of "body" to it.

Woman's Blouse Waist.

Blouse waists continue to hold the world of fashion and will be greatly worn during the coming season both as separate bodices and parts of entire costumes. This one, designed by May Manton, is adapted to both purposes and to all the soft and pliable materials so much in vogue, but is shown in white louisine silk with trimming of antique insertion.

The waist is made over a fitted foundation, which can be used or omitted as may be preferred, and closes invisibly beneath the centre group of tucks. The backs are tucked from the shoulders to the waist line and are drawn down snugly, so giving a tapering effect to the figure. The front is laid in three groups of tucks which extend full length, with two that are left free of yoke depth, and is pouched over the belt. The sleeves are backed above the elbows but left plain and full below.

The quantity of material required for the medium size is four and a half yards twenty-one inches wide, four yards twenty-seven inches wide or two and a quarter yards forty-four inches wide, with five and a quarter yards of insertion to trim as illustrated.

BLOUSE WAIST.

The Zebrule---
A Coming Mule.

Professor Cossar Ewart, of Penycuik, has been experimenting for the last eight years to see if superior animals for military purposes could be got by zebra-horse hybrids. His efforts have now gone beyond the experimental stage, and he has succeeded in producing an animal which is stronger, more vigorous and more intelligent than the ordinary mule. The Indian Government has lately bought two of his fine "zebrules," as he calls them, which are now at Quetta being tested as to their suitability for mountain battery work. The authorities have for some years met with considerable difficulty in obtaining good jacks for their mule breeding stations in India. The pick of the Spanish jacks have been bought up by the Americans, who have bred from them more carefully and scientifically than the Spaniards themselves. India is also now trying experiments on its own account with zebras which have been obtained from the East Africa Protectorate. Herds of these beautiful creatures are frequently to be seen on the Tana River, and drives are organized for the capture of the young zebra stallions for export to India, Jamaica and elsewhere. Baron de Parana, of Brazil, where he has bred and trained several, says the zebrule will be the mule of the twentieth century.—The King.

A ZEBRULE—HALF HORSE, HALF ZEBRA.

THE TREE THAT OWNS ITSELF

There is a grand old oak in Athens, Ga., that owns itself. Many years ago Chief Justice W. H. Jackson, of the Supreme Court of Georgia (father of the late Chief Justice) gave the following deed:

"I, W. H. Jackson, of the County of Clarke, of the one part, and the oak tree" (here defining location) "of the County of Clarke, of the other part: Witnesseth, that the said W. H. Jackson, for and in consideration of the great affection which he bears said tree, and his great desire to see it protected, has conveyed, and by these presents doth convey, unto the said oak tree entire possession of itself and of all lands within eight feet of it on all sides."

The important question now arises, Is this deed valid? On this point we are glad to quote the opinion of one of the present associate Justices of the Supreme Court of Georgia, as given in an informal and unofficial letter:

"By common consent the ground supposed to have been conveyed to the tree has been treated as not belonging to any one; and if a tree could acquire a title to supporting earth by prescription, this tree would have long since become the owner of the little piece of surrounding ground that is not claimed by any one else. If such a paper is in existence, of course as a conveyance it would have no legal effect, but as a declaration of intention on the part of Mr. Jackson that title to the land around this tree should not pass to his heirs, and the land around the tree being given to itself, as it were, and in that way to the public, the paper might be a circumstance indicating an intention to dedicate the land to public uses, the land embraced in the deed being adjacent to a public street; and the heirs having acquiesced in this, the dedication may now be complete. If the title to the land is not now in the heirs of Mr. Jackson it may be vested in the public under the theory above referred to."

It is obvious that the simple method of deeding the land directly to the people is safer and more practical than the above plan. However, the peculiar conditions have endeared the tree to the hearts of the people, and I believe

the "Tree that Owns Itself" is perfectly safe.—L. B. E., in Country Life in America.

Prevention Better Than Cure.

It is coming generally to be admitted, even in Germany, which invented the sanatorium, that its main role in the treatment of tuberculosis is educative. Curative it may be, but it is far more valuable as a means of imparting knowledge about prevention. Until an anti-tuberculous serum is discovered prevention remains the only efficient means of dealing with this malady, and it is almost a pity that its importance should have been obscured by the "fresh air" cure. Of "fresh air" prevention we cannot hear too much. With open windows, especially in the purer air of night, and sufficient food, one may defy tubercle bacilli. When the responsible members of the Government follow the advice of every living hygeist, rather than their own ignorance, and prohibit public expectoration, there will soon remain no tubercle bacilli to defy. Meanwhile a tuberculous patient dies about every seven minutes in this country.—London Chronicle.

In Southwark, the smallest London borough, there were more lunatics last year than in any other metropolitan borough.

Prominent in the Public Eye.

POPE PIUS X.

The Funny Side of Life.

THE RETORT COURTEOUS.

All repartee, I take it, is the pretty little knack
Of making witty boomerangs go lightly skimming back;
We taste chagrin and like it not, so, with a graceful flip,
'Tis tossed in air, and flies to touch its author on the lip.
—Detroit Free Press.

ON SOME OCCASIONS.

"Is kissing dangerous?"

"Well, I wouldn't try it on an athletic girl without her consent."—Chicago Post.

SAUNTERED INTO IT.

Nell—"He invited me to take a stroll, and before we had gone half a mile I had him proposing."

Belle—"Won in a walk, eh?"—Philadelphia Record.

VERSATILE.

Hobson—"How is your brother doing at college?"

Dobson—"Fine. He's singing first tenor and playing second base."—Indianapolis Journal.

THEIR MUTUAL FERVENT WISH.

She—"I trust, Jack, our marriage will not be against your father's will."

Jack—"I'm sure, I hope not; it would be mighty hard for us if he should change it."—Town and Country.

HIS ONLY AUTOMOBILE RACE.

"Did you ever engage in an automobile race?"

"Yes, once."

"How did you come out?"

"On crutches, two months later."—Philadelphia Public Ledger.

THE END OF IT.

"The artist who painted that picture gave the dog a very expressive tail."

"He must be a logician as well as an artist."

"How's that?"

"He knows how to draw a conclusion."—Detroit Free Press.

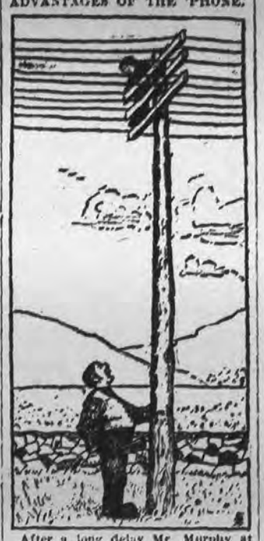
AN EQUINE PUZZLE SOLVED.

"Papa," said small Elmer, "I know why some pistols are called horse pistols."

"Well, my boy, why are they so called?" asked his father.

"Because they kick," replied the little philosopher.—St. Louis Post-Dispatch.

ADVANTAGES OF THE 'PHONE.



After a long delay Mr. Murphy at last got his son on the wire. "How do you like your new place?" he asked. "Oh, pretty well," was the reply; "I'm about as high as I can go, but I'm expecting a raise soon. By the way, I'd like to speak to mother—I'll hold the wire."—New York Times.

FULL STOCK.

"You say your brother began business from an incident that occurred on a railroad train?"

"Yes, he collected all the stuff the train boy put on his seat, jumped off and started a fruit store and news stand."—Chicago News.

USEFUL.

"Why don't you try to be of some use in society?"

"Mister," answered Meandering Mike, "I'm useful. I'm here for philanthropists dat hasn't quite worked up to givin' away libraries to practice on."—Washington Star.

NOT THE KIND HE WANTED.

"If you're so hard up," said the easy mark, who was temporarily unable to extend the accommodation asked, "why don't you borrow some money from Tiffles?"

"Heavens, no!" exclaimed the other. "Why, he always expects to be paid back."—Chicago Post.

THWARTED HER.

"If Mrs. Bounderly was so delightfully situated why did she leave home?"

"She left home for the same reason that so many other women leave home during the summer time."

"For rest and recreation?"

"No, indeed. To visit some women who would otherwise visit her."—Cleveland Plain Dealer.

Small Chameleons.

Four "dwarf chameleons" have just been presented to the Zoo, where they will be popular on account of the ease with which they can be kept, and their bright colors. "Green with a black-red patch upon the sides is the general pattern of their hues, which is only varied to duller tints when the animal is vexed in any way. This smallest among the tribe, called by Mr. Grant Allen the "Reptilian Vicar of Bray," is only five inches long, including its relatively long and prehensile tail. The little creature has a grim look when seen full face, by reason of the serrated fold under the throat, which suggests a fiercely untrimmed "Newgate fringe." There are very many kinds of chameleons; but all of them, like the present species, have an inordinate desire for mealworms, a slow and meditative gait, and eyes which move languidly up and down in a manner reminiscent of "ducks that die in tempests"—Westminster Gazette.

Traveling in Thibet.

Two Englishmen have been massacred for endeavoring to cross the Thibetan frontier. They applied first for permission to explore Sikkim, and were refused by the political agents. They appealed to the Lieutenant-Governor and were snubbed. Then they applied to the Viceroy, and, on being refused, they took the matter into their own hands and crossed the frontier. On the following day they were murdered by natives.

Thoroughly Married.

James Brazil and Mrs. Aggie Turner, of Cashion, Okla., have created a record by being married three times in one day. They first sought the probate judge at Kingfisher, Okla., and as there was a contest over the office they got both candidates to marry them. Not feeling satisfied as to the legality of the ceremony, they returned to Cashion and were married again by a minister.—New York Commercial Advertiser.

Teachers Get a Year Off.

Successful teachers of Chicago schools who wish to continue their studies in colleges, universities, etc., now may be granted leave of absence for the period of one year, under the authority of the superintendent of the schools.—New York Commercial Advertiser.

Pointed Paragraphs.

Sometimes a man's shady character keeps him in hot water.

What a pity it is that popular theories are not always practical.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c. per bottle. Sold by all Druggists.

Hall's Family Pills are the best.

Largest Bottle in the World.

The largest glass bottle ever blown has recently been made for exhibition at the St. Louis Exposition. It held forty-five gallons, and required forty pounds of molten glass, drawn from the furnace and shaped on the end of a huge blowing pipe.

Home Duties

The real heroines of every day are in our homes. Frequently, however, it is a mistaken and useless heroism.

Women seem to listen to every call of duty except the supreme one that tells them to guard their health. How much harder the daily tasks become when some derangement of the female organs makes every movement painful and keeps the nervous system unstrung? Irritability takes the place of happiness and amiability; and weakness and suffering takes the place of health and strength. As long as they can drag themselves around, women continue to work and perform their household duties. They have been led to believe that suffering is necessary because they are women. What a mistake!

The use of Lydia E. Pinkham's Vegetable Compound will banish pain and restore happiness. Don't resort to strong stimulants or narcotics when this great strengthening, healing remedy for women is always within reach.

FREE MEDICAL ADVICE TO WOMEN.

If there is anything in your case about which you would like special advice, write freely to Mrs. Pinkham. No man will see your letter. She can surely help you, for no person in America has such a wide experience in treating female ills as she has had. She has helped hundreds of thousands of women back to health. Her address is Lynn, Mass., and her advice is free. You are very foolish if you do not accept her kind invitation.

For proof read the symptoms, suffering and cure recited in the following letters:

"DEAR MRS. PINKHAM:—I wish to express to you the great benefit I have derived from your advice and the use of Lydia E. Pinkham's Vegetable Compound. My trouble was female weakness in its worst form and I was in a very bad condition. I could not perform my household duties, my back ached, I was extremely nervous, and I could not eat or sleep, and the bearing-down pains were terrible. My husband spent hundreds of dollars to get me well, and all the medicine that the doctors prescribed failed to do me any good; I resorted to an operation which the physician said was necessary to restore me to health, but I suffered more after it than I did before; I had hemorrhages of the womb that nothing could seem to stop.

"I noticed one of your advertisements and wrote you for advice. I received your reply and carefully followed all instructions. I immediately began to get stronger, and in two weeks was about the house. I took eight bottles of Lydia E. Pinkham's Vegetable Compound and continued following your advice, and to-day I am a well woman. Your remedies and help are a Godsend to suffering women, and I cannot find words to thank you for what you have done for me."—MRS. LOTTIE V. NAYLOR, 1329 N. J. Ave., N.W., Washington, D. C.

"DEAR MRS. PINKHAM:—I write to tell you what Lydia E. Pinkham's Vegetable Compound has done for me.

"I was suffering with falling of the womb and could hardly drag about, but after taking five bottles of Lydia E. Pinkham's Vegetable Compound I was completely cured. I am now a well woman and able to do all my work.

"I think your medicine one of the best remedies in the world."—MRS. J. M. LEE, 141 Lyndal St., Newcastle, Pa.

"DEAR MRS. PINKHAM:—Lydia E. Pinkham's Vegetable Compound has done a great deal for me. I suffered so much from falling of the womb and all the troubles connected with it. I doctored for years with doctors and other remedies but received only temporary relief.

"I began taking your medicine, and had not taken it long before I was feeling better. My husband said that I should keep right on taking it as long as it gave me relief from my suffering, as I could not expect to be cured by one or two bottles. I did so and am now able to be on my feet and work hard all day, and go to bed and rest at night. Thanks to your Vegetable Compound I am certainly grateful for the relief it gave me. It is the mother's great friend. I would not be without it in my house, for when I feel tired or out of sorts I take a few doses and feel all right.

"I would recommend your medicine to all tired mothers, and especially to those suffering as I was."—MRS. R. F. CHAMBERS, Bennet, Neb.

Lydia E. Pinkham Medicine Co., Lynn, Mass.

COB RIIS

EPORTER —and— 'EFORMER

any rich man could mark city with as many good orks as Jacob A. Riis has nat upon New York. Lincoln Steffens, his would be called good no matter how he man would be a a reporter. The discovered as a wrong men's the reporter d indifferent reforms he nsider these exposed the city's water ; about the otun water- ered the de- ts, and thus arkness and ne poor. It was his nagging that ery Bend, the worst in the city, and had rned into a park. Riis word that incited Commis- oosevelt to abolish police sta- ing houses. Riis fought for ed a truant school, where play hooky are punished— d to be imprisoned with ju- ninials. Riis did the work small parks for bad spots in he labored years for enough e drove bake shops with their out of tenement basements; ed light for dark tenement got it, and thus opened one es of vice, crime, and filth. ed for the abolition of child hen a law was enacted. enforcement. Play- schools and the opening s to boys' and girls' clubs work. And he raised the s for the healthy as well ce.

He did not do all these handed, and he did not out of his own pocket. in pocket, but he was

ings found no expression in art, they went off, not as with most men of his temperament, in weird dissipations or lay sermons, but in action.

Now how did Riis win these victories? An effective reformer is so rare that he should be accounted for; a bold exposition of the methods by which an obscure reporter wrought so many reforms might make useful some of the well-meaning meddlers who never get anywhere. I fear not, however. Riis was simply a good citizen; the big, jolly, sentimental Dane took his adopted citizenship literally, and literally "worked for the public good"—"worked" like a political rascal. His methods were much like those of a boss. In the first place he kept himself in the background, sought no office, indulged no vanity and no self-glorification. In the second place he worked all the time. "The churches may close, the saloons and the shows are open all day and all night, all the year round," he said once to me. In the third place, he played upon men, used men, and women, too, and while he preached he pulled wires. In the fourth place, he waited to strike when the right iron turned up hot.

Gardening in India.

Gardening in India, except for planters or retired officers who have settled down in a pretty little estate on the hills, and can lay out their gardens with an eye to permanent effect in the course of a few years, is by no means an unalloyed pleasure. It is a proverb among Indian officials that if you want to make sure of being transferred to a distant place you have only to set about laying out a nice vegetable garden. By the time the produce is ready the inner man of the luckless designer of that garden will be languishing on native-grown vegetables several hundred miles away, and strangers will be enjoying the fruits of his labor. Yet, fortunately, things grow so fast during the six months of the rainy season, from July to December, that one is encouraged to do one's best in the way of gardening.—The London Garden.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "DUAL MINDEDNESS OF CHRIST."

The Rev. C. J. Greenwood Makes a Deep Impression With a Message Suggested by the Eighth Chapter of Romans—Mind of Flesh and Mind of Spirit.

WESTFIELD, N. J.—The Rev. C. J. Greenwood, pastor of the First Baptist Church here, who recently came from Meriden, Conn., and is making a deep impression, preached Sunday morning on "The Dual-Mindedness of Man." The text was chosen from Romans, viii: 6: "For the mind of the flesh is death; but the mind of the spirit is life and peace." Mr. Greenwood said:

The eighth chapter of Romans is full of startling statements and convincing climaxes. It is the great assurance chapter, beginning with "No condemnation" and ending with "No separation." It is a reliable thermometer with which to take one's spiritual temperature. It is a splendid exultant and tonic for spiritual heart failure. If taken in sufficient doses at frequent intervals, it will relieve that tired feeling which comes over so many of us during the summer months, when the hour for the Sunday service arrives. We especially recommend it as a vade mecum for the Christian on his annual outing. It is a wholesale message to proclaim in these days when so much is being said about the atrophy of the spiritual nerve and the decline of religious conviction.

Robert Louis Stevenson's great story of "Dr. Jekyll and Mr. Hyde" is, after all, but an elaborate working out of the statement made by Paul in the text. A strange book is this story of Stevenson's, and stranger still the two minds that struggle for the control of the man. Mr. Henry Hyde represents the mind of the flesh. He is a sinister, selfish, sensuous, murderous character, more demon than human. Dr. Henry Jekyll represents the mind of the spirit. He is a generous, gentlemanly, kind, considerate man. The two minds of one individual have nothing in common. A bitter hatred exists between them, and a fierce war that wages hotter and hotter to the end goes on in the battlefield of the soul. Gradually Dr. Jekyll becomes dependent, sickens, and the inhuman Hyde, that "insurgent horror caged in flesh" prevails over him and crushes out his life.

In the "Redemption of David Corson" we have the same contest between the two gladiators—the mind of the flesh and the mind of the spirit, with the result reversed. In the person of the hero, Corson, Hyde and Jekyll find a field for conflict. In this story the mind of the flesh triumphs over the mind of the spirit, but the victory is not decisive. Jekyll is sorely wounded, but not slain. From the crimson field, with uniform soiled and tattered, he rises, like David from wrestling with the angel, to find Hyde mortally wounded and himself the chastened and changed victor. The same truth has been illustrated in the scientific world by grafting the papa of a spider upon the papa of a fly. The result of the vivisector's skill is a monster within whose violated organism struggle two irreconcilable impulses. The one is a savage of the jungle with an abnormal appetite for blood; the other is an innocent creature with a passion for the sunshine.

To the ordinary mortal death is repulsive and life is pleasing. We adopt the grim skull and cross bones as the symbol of our loathing for the former, and show our love for the latter by filling the niches of our art temples with Venus de Milos and Apollo Belvideres. There is nothing particularly fascinating about the dead stump tree or the verdureless sands of a [illegible] No one but the grave robber or student is supposed to be in [illegible] corpses. A morgue is the last [illegible] would visit unless compelled by [illegible] On the other hand there is [illegible] that will awaken greater interest than life. To the Alpine traveler, the blue gentian is a welcome sight, as it opens its petals in the realm of perpetual snows. Sweet is the oasis with its shady palms and solitary fountain to the caravan creeping across the hot wastes of sand. Beautiful to the eye of the child is the butterfly as it spreads its wings of gauze and voyages through the empyrean blue. The fisherman delights to watch the speckled trout as he rushes for cover, or the grayling as he leaps from the swirling pool. One cannot watch the antlered deer bound through the forest glades and climb the rocky steep; or follow the flight of the eagle as he circles toward the sun, without feeling his nerves tingle and the blood rush through the arteries. While reading "The Crime of the Cachalot," I became so interested that I wanted to join in the exciting chase of the great sperm whale as he charged through the waters in his rapid flight. Life is the thing that fascinates us. Stir, snap, speech are the things that catch the eye. That is why the cry is for speedier autos and swifter Shamrocks.

But the common conception of life is false. The vast majority of people are laboring under a delusion. You stand where the tides of humanity roll swift and strong—you see men accumulating colossal fortunes at a bound and living in dazzling splendor; you notice the sleek, fat and pleasure-loving epicureans at the club houses; the costly unctuous Falstaffs at the social functions; the Cleopatras, the Salomes and society queens whose studied grace and wine flushed cheeks entrance but to destroy and, and you say "This is life—life at high noon and high midnight of the twentieth century."

Christianity comes to us and says: "This is not life. This is death." And a recent utterance of Dr. Hillis furnishes a splendid ritual for the committal service of the modern preacher: "Here we commit his body to the dust, his stomach to stalled ox, his palate to spiced wines, dust to dust, tongue to terrapin, while the spirit returns to the animal and the beasts that fed with it." Because a thing is dressed in a tailor-made suit and moves about, it is not necessarily alive. Thunder and smoke are not always indications of life. The meteor that comes plunging down the sky with a roar and a trail of light is dead. The heavenly bodies rise it for a football and toss it through space. Because a man walks about on two legs, winks with two eyes, listens with two ears and wags his tongue, he may not be alive according the Paul's theology. Let me illustrate. Here is a man whose occupation is such that the world derives no benefit from it. Rather, his business exerts a baleful and blighting influence upon his fellows. The business snatches character, destroys body and soul, and the outcome is a wreck cast upon the sands of life's great ocean to bleach and rot. He conducts a physical, intellectual and moral slaughter house for a monetary consideration. He knows that his business is damnable in the sight of God and demoralizing to society. He is fattening swine or flooding the social organism with lepers. There are no extenuating circumstances. There are no beneficial compensations. The results of his business are evil and evil only. Yet he continues to curse men. I say such a being, whatever his occupation or social standing, however great his wealth, is dead just as dead in the sight of heaven as though his body were rotting in the shrouds. He is dead to God, dead to all moral obligations, dead to all the higher promptings and pleadings of the soul that is within him. His moral nature is atrophied. All his thoughts, his impulses, his acts are carnal. He lives to the flesh, and of the flesh reaps corruption. Every sheaf that he binds for time or eternity is a bundle of corruption. The smiles and smirks of an evil person are not signs of life, but danger signals that warn us against falling into an open sepulchre.

You remember Valjean in Victor Hugo's "Les Miserables." He sleeps, and in his sleep he beholds the death of sin. As he comes to the house of revelry, the flowers, the trees and the very sky are all the color of ashes. Valjean wanders on through vacant rooms, courts and gardens. By the fountains, by the pavilions, everywhere, walk silent men who have no answer to his questions. Suddenly he finds all the inhabitants of the lifeless town clustering about him, and they cry, "Do you not know that you have been dead for a long time?" With a cry, Valjean awakes and feels his sin. Do you not know that all about us walk dead people? People who have no object in life but to amuse themselves and feed and fatten the animal? Ghosts that stalk about in shrouds and dwell in haunted chambers? No generous impulses stir the soul, no noble aspirations thrill the depths of the nature, no responsive chords of the being yield to the wave of the spirit that calls to sacrifice and service.

The mind of the flesh, like the crane in the old fable, is content with snails. A beautiful swan alighted by the banks of a stream in which a crane was wading about seeking snails. For a few moments the crane viewed the swan in stupid wonder, and then inquired, "Where do you come from?" "I came from heaven," replied the swan. "And where is heaven?" "Heaven," said the swan, "have you never heard of heaven?" And then the beautiful bird went on to describe the grandeur of the eternal city. She told of streets of gold, of gates of pearl and walls of jasper, and the river of life, "clear as crystal." In eloquent language the swan sought to portray the hosts who live in the heavenly world, but without arousing the slightest interest. Finally the crane asked, "Are there any snails there?" "Snails!" repeated the swan; "no! of course not." "Then," said the crane, as it continued its search along the slimy margin of the pool, "you can have your heaven. I want snails." There are thousands of people today who are meeting the appeals of the church of Jesus Christ, if not with the snail's answer, at least with the snail's attitude. "You can have your heaven. I want snails." And why? Because they have yielded to the mind of the flesh and allowed the lusts of the flesh to atrophize the spiritual nature. "Be not deceived; God is not mocked; for whatsoever a man soweth that shall he also reap. For he that soweth to his flesh shall of the flesh reap corruption." "Fancy may figure the wicked as borne aloft in chariots of the sun," says the Rev. W. L. Watkinson, "but a ray of daylight reduces the pretentious things to the monstrous forks of the policeman's stretcher, the workhouse ambulance, the prison van, the hearse that bears men to the grave ere they have lived out half their days."

On the other hand, "the mind of the spirit is life and peace." Christianity comes to men telling them of a divine Saviour in whom is life and Who came that we might have life and have it more abundantly. The Bible tells us of "the spirit of life," which exerts its power among men. Jehovah is spoken of as "the living God," and the Holy Spirit as His living agent. "By the spirit God hath garnished the heavens." "Thou sendest forth thy spirit; they are created. In so far as testimony and observation go life springs from life. The Spirit of God is manifest in all His methods and works. The same spirit, whose activity is exerted in creation and the sustaining of life, is also the spirit of truth, of holiness, of wisdom and grace. The Spirit of God "renews the face of the earth," turning winter into spring, calling forth life, beauty, fragrance and song. The same Spirit transforms the human soul. The Spirit of God touches our hearts; the great transaction is done. Behold a new creature in Christ Jesus. We pass from death unto life. We are alive unto God through Jesus Christ our Lord, and the things which are all in all to the sensuous worlding are of value to us only as they are connected with and minister to the kingdom of Jesus Christ, of which we are citizens.

If you have passed from death unto life you are not a piece of moral tinkering and ethical cobbling. Regeneration is a live wire. It is a permanent miracle. You are not only a new man, but a live man. The dictionary defines a top as a "gyroscope." A gyroscope may be made to spin. But it is a dead thing, nevertheless. It won't go without a string or a spring attached to it and manipulated by the hand of the spinner. If you have been regenerated you are more than a gyroscope. You will not "run down" like a top. You will not be subject to moods and modes. You will run without having a spring or string attached to you. The love of the Christ will "constrain you" and "restrain you." In the workshop, in the store, behind the counter and in the office your associates will know that you have been with Jesus and received life. "The mind of the flesh" has been buried, and no flowers were laid on his casket. "The mind of the spirit" lives and speaks through the kindling eye, the quivering lip and the softened and sanctified heart. The grazing grounds of the fleshly minded are the lotus meadows of pleasure and ease. The grazing grounds of the spiritually minded are the "green pastures" beside the "still waters," led and fed and satisfied by the Shepherd of Life. The difference between the carnally minded and the spiritually minded is the difference between the stall fed ox complacently chewing his cud and the creature created in the image of God agonizing to be worthy of wearing the white stone and bearing the new name.

With life comes also the gift of peace. "Peace be unto you," said the Saviour to the disciples. "My peace I leave with you; My peace I give unto you; not as the world giveth, give I unto you." What is it you are longing for this morning? Home? You have that. Business? You have more than you can attend to. Already you are worried nearly to death over business. To-morrow morning's mail will bring you a large bundle of letters. Perhaps some of them will read, "Please remit." Head over heels in business. Pleasure? Aren't you surfeited with pleasure? Aren't you at it every afternoon and evening, by the seashore, in the mountains, at the club? One continuous round of pleasure. Society? Don't you go in for it? Don't you have your teas, your card parties, your games and chit chats? What you want is peace—peace of mind and peace of conscience. And you will never get it until you get life—the life that throttles and lands and sets its heel upon this miserable carnal creature that whines and frets and burns with an abnormal thirst that nothing can satisfy? And why do you get peace when you get eternal life? Because you have anchored to do something within the vale, and wind and wave and tempest shock cannot disturb the calm and constant peace of the mind and heart that wait upon the Lord. You get peace because under the strenuous uplift of this new life you live a simple life nobly, which is the grandest thing any of us can do. He who follows "the mind of the spirit" will find the deepest satisfaction, for he has "in him a well of water springing up into everlasting life."

The other night George Primrose, the minstrel, was amusing an audience at the Masonic Temple Roof Garden in Chicago. In response to an encore he came out and sang "My Watermelon Queen." When he came to the line in the chorus, "She's all the world to me," he broke down, turned and walked into the wings, to the surprise of the audience. Just before he walked to the footlights he received a telegram saying that his wife was dead in their home in Buffalo. And when he came to that line which touched the deepest chord in his soul, footlights and faces, all save one, were forgotten. Love yearned to clasp love. The supreme grace that was born in heaven and which finds "its wavering image here," swayed the heart of the great comedian. The sorrow in the soul stilled the song on the lips. So it is when the mind of the spirit dismasters the mind of the flesh. The stagey mannerisms of society, the baubles, the trinkets, the Bacchanalian banquets, are forgotten, or they cease to allure. The soul turns away from the hollow handicapping and the vulgar throng into the wings to live with Him who "is all the world to me."

New Head of the Army.

Major General S. B. M. Young has succeeded General Miles as Lieutenant General Chief of Staff and head of

GENERAL SAMUEL B. M. YOUNG.

the Army. General Young is to retire from the active Army next January, and it is well understood that General Chaffee is to take his place at the head of the Army. He, in turn, will retire in about two years.

Detecting Food Adulteration.

The photo-microscopic camera for taking the pictures of food adulterants and disease bacteria, and the microtome for cutting articles of food into infinitesimal pieces have lately been used with great success by the Agricultural Department. Imported foods are now tested by the department in a microscopic laboratory established for the purpose. Many astonishing revelations have been made under the new regulations adopted by Congress.—Philadelphia Record

Rare Coins For Philadelphia.

Philadelphia will soon possess two of the rarest coins known to exist. They are the famous silver dollars of 1794. One is at present in the Philadelphia Mint, and the other was purchased by Henry Chapman, Jr., numismatist.

The latter coin was bought by Mr. Chapman at the sale of the Murdock collection of coins and tokens in London last week. The dollar purchased by Mr. Chapman surpasses the similar coin at the Mint in perfection and fineness.

Mr. Chapman wrote to the auctioneers in advance that he was willing to pay as high as $500 for the coin. It was knocked down to him for 148, or $240. The 1794 dollar is similar in face appearance to the dollars now in circulation, having the medallion face on the front encircled with stars and the date. On the reverse is the spread eagle seated on the wreath.—Philadelphia North American.

Stuffed a Monkey With Money.

What probably is the queerest of places for hiding money has just been revealed by the death in Paris of Louis Kerki, a supposed pauper, who for years had received relief from the authorities. The other evening he was found dead in his room, with a stuffed monkey clasped fondly in his arms.

The gendarme who was summoned noticed that there was a slit in the monkey's skin, and out of curiosity he thrust a pencil into the aperture. This led to the discovery that the monkey was filled with papers. The gendarme drew out a letter which stated that the writer, in fear of burglars, had placed his savings in the monkey, and he then tore open the animal's body. It was found to contain $1000 in bank notes and securities to the value of £5000.—New York Press.

Careless Letter Writers.

A correspondent writes to suggest that the Postoffice would save itself much trouble if it would place a warning over its letter-boxes. Every year thousands of people throw their communications into the official slit without any address on the cover, and keep a large number of detectives busy in the Returned Letter Office, which does its best to remedy individual folly. America leads the way in arresting announcements—such as "Please do not fall down the shaft!" We propose that over every postal-box should be painted something like this: "Hi! Stop! Have you addressed it?"—London Chronicle.

Don't kick about the quality of what you get for nothing. N. Y.—37

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free. Dr. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa.

GRATEFUL, HAPPY WOMEN

Miss Muriel Armitage.

Thank Pe-ru-na for Their Recovery After Years of Suffering.

Miss Muriel Armitage, 36 Greenwood Ave., Detroit, Mich., District Organizer of the Royal Templars of Temperance, in a recent letter, says:

"I think that a woman naturally shrinks from making her troubles public, but restored health has meant so much to me that I feel for the sake of other suffering women it is my duty to tell what Peruna has done for me.

"I suffered for five years with uterine irregularities, which brought on hysteria and made me a physical wreck. I tried doctors from the different schools of medicine, but without any perceptible change in my condition. In my despair I called on an old nurse, who advised me to try Peruna, and promised good results if I would persist and take it regularly. I thought this was the least I could do, and procured a bottle. I knew as soon as I began taking it that it was affecting me differently from anything I had used before, and so I kept on taking it. I kept this up for six months, and steadily gained strength and health, and when I had used fifteen bottles I considered myself entirely cured. I am a grateful, happy woman to-day."—Miss Muriel Armitage.

Peruna cures catarrh of the pelvic organs with the same surety as it cures catarrh of the head. Peruna has become renowned as a positive cure for female ailments, simply because the ailments are mostly due to catarrh. Catarrh is the cause of the trouble. Peruna cures the catarrh. The symptoms disappear.

Female Weakness is Pelvic Catarrh.

A'ways Half Sick Are the Women Who Have Pelvic Catarrh.

Catarrh of any organ, if allowed to progress, will affect the whole body. Catarrh without nervousness is very rare, but pelvic catarrh and nervousness go hand in hand.

What is so distressing a sight as a poor, half sick, nervous woman, suffering from the many almost unbearable symptoms of pelvic catarrh? She does not consider herself ill enough to go to bed, but she is far from being able to do her work without the greatest exhaustion. This is a very common sight, and is almost always due to pelvic catarrh.

It is worse than foolish for so many women to suffer year after year with a disease that can be permanently cured.

Peruna cures catarrh permanently. It cures old chronic cases as well as a slight attack, the only difference being in the length of time that it should be taken to effect a cure.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

BEST FOR THE BOWELS
Cascarets
CANDY CATHARTIC

GUARANTEED CURE for all bowel troubles, appendicitis, biliousness, bad breath, bad blood, wind on the stomach, bloated bowels, foul mouth, headache, indigestion, pimples, pains after eating, liver trouble, sallow skin and dirziness. HAPPENINGS IN NEW JERSEY.

Concluded from Page 1.

creamery a mile or more away and fed and looked after 200 chickens. They delight in reading agricultural papers and and books and always advise with their mother in regard to the best mode of conducting the farm.

The American Telephone and Telegraph Company, of New Jersey, the New York and Philadelphia Telephone and Telegraph Company and the Midland Telephone and Telegraph Company filed in the office of the Secretary of State at Trenton last week, an agreement of consolidation into the American Telephone and Telegraph Company of New Jersey, entered into May 25, 1903. The principal office of the concern is at No. 8 Erie street, Jersey City. Its capital stock is $30,000, divided into 300 shares at $100 each. The officers are: President, Edward J. Holl, Morris township; vice president, Edward P. Meaney, Newark; secretary, Melville Egleston, Elizabeth, and James C. Vail, New York.

There is a rivalry between the Pennsylvania and Raritan River railroad companies for the freight business in certain parts of New Brunswick, both of the freight depots now being located about equally distance from the center part of the city. The Pennsylvania railroad paved the streets within a radius of some distance from the new station with stone block paving and soon after the Raritan River railroad announced that they would also do some paving on Sandford street about their freight yard. The Pennsylvania railroad then followed with the announcement that they would pave the streets leading to the main thoroughfares from its station so that they would be suitable for trucking, and the Raritan River R. R. is following with the statement that they will also pave on the same line on Sandford street. The people in that section are greatly pleased over the rivalry as the city little by little is being well paved where before there was nothing but muddy streets

New Jersey Roads.

Continued from Page 1.

was $1,295,168.55. Burlington county is in the lead, in mileage, having built two-fifths more miles than the next lowest county. Provided the State appropriation is liberal enough to meet the amount that can be expected by each county, according to the percentage allowed, it is estimated that within a few years all the leading roads could be covered with gravel and stone. At the present time the total amount of work petitioned for, in all the counties, amounts to 550.72 miles, at an estimate cost of $2,404,851.

The last Legislature of the State increased the appropriation from $150,000 to $250,000 and the counties promptly met this increased amount with their own appropriations. The numerous petitions for roads, however, greatly exceeded even this large amount. According to Mr. Budd work on many roads has been much delayed for two reasons. In many counties the freeholders consider they have no authority to advertise for bids until after they make their appropriation at the annual meeting in May. This delays the commencing of road building, and, by the time the surveys, advertising of bids, etc., is completed, little time remains for the actual building before the cold weather sets in. Four of the best road building months in the year, March, April, May and June are lost and the work has to be done in months when the teams and the men are engaged in the harvest fields. The law, therefore, should be amended so that freeholders can make appropriations at any time after the first of November preceding their annual meeting. All the preliminaries could be completed during the winter months and the work started as soon as the spring arrives.

During the years that the State aid law has been in effect the experience gained in working under its provisions has indicated several places in it that should be improved. In several instances the authorities in different counties interpreted the law in various ways, thus causing confusion and preventing uniformity in action. To obviate this trouble some amendments have been suggested as follows:

The desire of some of the counties to improve their roads more rapidly than the present law permits has become so great that the tax of one-fourth of one per cent. upon the ratables is not sufficient. On this account it is considered a wise plan to permit the freeholders to form contracts for at least one-half of one per cent. If, at any time this becomes too burdensome, they should be allowed to issue low rate bonds to meet the needs of the work. It is claimed that those who build the roads should also have the enjoyment of them. They are permanent improvements and it is only right that, as the succeeding generations are to benefit by them, they should should pay their share towards their construction. Thus the issuing of long term bonds at low rates of interest would carry the cost of road building over many years and take away from the present generation some of the burden of the cost of construction.

Many of the counties have asked that the present law be amended so that the first payment on the bonds would not have to be made until the first six years have expired. By this arrangement they could borrow more advantageously as investors would allow a lower interest rates if the payment on the principal did not begin for several years.

WANTED-FAITHFUL PERSON TO TRAVEL and supervise force of salespeople and make collections for manufacturing house. Straight salary $20.00 a week and expenses. Salary paid weekly and expense money advanced. Previous experience unnecessary. Local territory. Business succesful. Position Permanant. Enclose self addressed envelope. Superintendent, 324 Dearborn street, Chicago.

LEGAL NOTICES

SPECIAL ELECTION

—ON—

Constitutional Amendments.

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or voting Precinct in the County of Somerset, must meet on

TUESDAY, SEPT. 15, 1903,

from one to nine o'clock p. m., at such places as may be designated by the Township Clerks of the respective townships of said county, for the purpose of making, altering and revising, as the case may require, the registry of voters entitled to vote in their several districts or voting precincts for use at the special election to be held on Tuesday, September 22, 1903, as required by an act entitled, "An act to provide for submitting proposed amendments to the Constitution of this State to the people thereof," approved April 8, 1903.

Special Election
SEPTEMBER 22, 1903.

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHURTS,
CHARLES H. BATEMAN.

Election Notice!

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the County of Somerset will hold their first meeting on

TUESDAY, SEPT. 1, 1903.

At 10 o'clock in the morning, at such places as may be designated by the Township Clerks of the respective townships of said county. Such boards shall organize according to law and then proceed to ascertain the names and residences of all the legal voters in their respective districts, by making actual inquiry at every dwelling house or habitation, or of the head of ever, family residing therein, and shall continue such enumeration of voters from day to day, on successive days, completing same on or before Friday, Sept. 4. (See 23 Election law.)

SECOND MEETING

AND PRIMARY ELECTION

Said Boards of Registry and Election will also meet on

TUESDAY, SEPT. 8, 1903,

At the same places from 1 until 9 p. m., for the purpose of transcribing and making up from its canvass books two lists of all persons entitled to vote in its election District, who shall personally appear before the board for that purpose, or be shown to its satisfaction by the affidavit in writing of some voter in the election district to be a legal voter therein.

On the same day between 1 and 9 o'clock p.m., the Primary Election shall be held in every election district in the County of Somerset.

THIRD and FINAL MEETING.

Said Boards of Registry and Election will also meet on

TUESDAY, OCT. 27, 1903,

At the same places, and between the hours of 1 p. m. and 9 p. m. for the purpose of revising and correcting the Original Registers, and for adding thereto the names of all persons entitled to the right of suffrage in such Election District at the next election.

Notice is hereby given to all Boards of Registry and Election in the County of Somerset that they are required to strictly observe Sections 24 and 32 of "An Act to Regulate Elections (Revision of 1898)," approved April 4, 1898, and that the County Board of Elections will be in session in Somerville on

Wednesday, Oct. 28, 1903,

For the purpose of receiving the registers and receipting for affidavits, etc.

General Election Nov. 3, 1903

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHURTS,
CHARLES H. BATEMAN.

PROPOSED AMENDMENTS

TO THE

CONSTITUTION

STATE OF NEW JERSEY
DEPARTMENT OF STATE

As required by an act entitled "An act to provide for submitting proposed amendments to the Constitution of this State, to the people thereof," approved April 8, 1903, notice is hereby given that on Tuesday, the twenty-second day of September, 1903, a

SPECIAL ELECTION

will be held in the several election districts of precincts of this State, at such places as the clerks of the several townships, cities, and municipalities of the State shall provide, to enable the electors qualified to vote for members of the Legislature to vote for or against each of the following proposed amendments to the Constitution.

S. D. DICKINSON,
Secretary of State.

ARTICLE V.

EXECUTIVE.

1. Insert in lieu of paragraph 10 a new paragraph, as follows:

10. The governor, or person administering the government, the chancellor and the attorney-general, or two of them, of whom the governor, or person administering the government, shall be one, may remit fines and forfeitures and grant pardons, after conviction in all cases except impeachment.

RTICLE VI.

JUDICIARY.

1. Insert in lieu of Section II a new section, as follows:

1. The court of errors and appeals shall consist of a chief judge and four associate judges or any four of them.

2. In case any judge of said court shall be disqualified to sit in any cause, or shall be unable for the time being to discharge the duties of his office, whereby the whole number of judges capable of sitting shall be reduced below four, the governor shall designate a justice of the supreme court, the chancellor or a vice-chancellor, to discharge such duties until the disqualification or inability shall cease.

3. The secretary of state shall be the clerk of this court.

4. When a writ of error shall be brought, any judicial opinion in the cause, in favor of or against any error complained of, shall be assigned to the court in writing; when an appeal shall be taken from an order or decree of the court of chancery, the chancellor or vice-chancellor making such decree or order shall inform the court in writing of his reasons therefor.

5. The jurisdiction heretofore exercised by the supreme court by writ of error shall be exclusively vested in the court of errors and appeals; but any writ of error pending in the supreme court at the time of the adoption of this amendment shall be proceeded upon as if no change had taken place.

Section IV.

1. Insert in lieu of paragraph 1 a new paragraph as follows:

1. The court of chancery shall consist of a chancellor and such number of vice-chancellors as shall be provided by law, each of whom may exercise the jurisdiction of the court; the court shall make rules governing the hearing of causes and the practice of the court where the same is not regulated by statute.

Section V.

1. At the end of paragraph 1 add the following:

The court may sit in divisions at the same or different times and places.

Strike out paragraph 3.

Section VI.

1. Insert in lieu of paragraphs 1 and 2 the following:

The court of common pleas shall be constituted and held in each county in such manner as may be provided by law.

ARTICLE VII.

CIVIL OFFICERS.

Section II.

1. Insert in lieu of paragraph 1 a new paragraph, as follows:

1. Judges of the court of errors and appeals, justices of the supreme court, the chancellor, the vice-chancellors, and the judges of the circuit court and the court of common pleas shall be nominated by the governor and appointed by him with the advice and consent of the Senate; all persons now holding any office in this paragraph named, except the judges of the court of errors and appeals as heretofore existing, shall continue in the exercise of the duties of their respective offices according to their respective commissions or appointments; the judges of the court of errors and appeals, except those first appointed, the justices of the supreme court, the chancellor, and the vice-chancellors shall hold their offices for the term of seven years, and shall, at stated times, receive for their services a compensation which shall not be diminished during the term of their appointment; and they shall hold no other office under the government of this State or the United States; the judges of the court of errors and appeals first appointed shall be appointed one for three years, two for five years and two for seven years; judges of the court of common pleas shall hold their offices for the term of five years.

Strike out paragraph 2.

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address.

North Plainfield Weekly Review.

VOL. 1—NO. 26 NORTH PLAINFIELD, N. J., SATURDAY, SEPTEMBER 19, 1903. PRICE 3 CENTS

MATTERS OF LOCAL INTEREST.

Live Local Paragraphs Occurring in North Plainfield and Plainfield.

J. Herbert Case and family of Duer street, have returned from their vacation.

George Hummer has traded his house Stone street for a house on Coddington avenue.

Members of Company K are in receipt of their equipment of rifles from the State Arsenal.

Mrs. J. L. Bennett, of Watchung avenue, who has been ill with rheumatism is improving.

Mr. and Mrs. F. A. Grant of Westervelt Avenue has returned from visiting friuds in Toronto.

Attorney N. W. Nash, Jr., has been admitted to the United States District Court as attorney and proctor.

Hugo Maul, who purchased the hotel in the Notch from Fred Nelson, took possession Wednesday.

J. Herbert Case, secretary and treasurer of the Plainfield Trust Company has been elected a director by the Board of Directors.

The funeral of Redford Sutton, who died at his home on Elm place Sunday evening, was held Wednesday afternoon. Mr. Sutton is survived by three brothers.

The thirteenth annual reunion of the regiment New Jersey Veteran Volunteer Association will be held in Somerville, N. J. on Wednesday, Oct. 14.

The Somerset County Board of Elections will be in session today (Saturday) for the purpose of registering voters for the special election to be held next Tuesday.

A tug that had Anderson, of Sow the surf boat ? the last Counties compelled to cast loose a fourth of a mile away. But the crew seized their oars, determined to do or die. With splendid strokes they sent their boat into the swirling surf and [illegible] beat [illegible] the

[illegible] March.

[illegible] only [illegible] line about [illegible] into the Monday evening that it had no authority to issue a permit to Charles P. Sebring to remove the Wolfe house on West Front street, Plainfield, to Prospect place, this borough.

Objections were made by people living near where Mr. Sebring wished to locate the house, on the grounds that the house instead of improving the location would be detrimental, in appearance, to all near-by property.

Mr. Sebring is claimed to have said that there was no law against moving the building there bodily in trucks and carts.

[illegible] House.

Miss Augusta Klinsman, this borough and J. W. Waters, of Plainfield, which will take place at the home of the bride, Tuesday, September 22.

Miss Lucy Smith and John B. Judson, both of Plainfield were married at noon, Wednesday at the home of the bride's father, Chas. H. Smith, by Rev. Dr. Cornelius Schenck, pastor of Trinity Church.

The Building and Grounds Committee, Dr. J. H. Cooley, E. A. Overton and Murray Burtis, of the North Plainfield Board of Education, have been authorized to find a suitable site upon which to erect a modern school house.

The funeral services of W. H. Smith, of Watchung took place from his late home last Monday. Rev. G. O. Bowers officiated. Interment was made in the North Plainfield Cemetery.

Mrs. Carmen Parse, president of the Women's Christian Temperance Union addressed a meeting of the Christian Endeavor Society at Trinity Reformed Church last Monday evening.

Harry J. Northrop of Plainefild, will wed Miss Reba, daughter of Mr. and Mrs. George Washington Arnett, Wednesday evening, October 7th, at the Methodist Church, Lambertville, N. J.

Mrs. A. E. Willard is rehearsing a class of one hundred and fifty people who are to appear in the spectacular representation of the Last Days of Pompeii, to be given under the auspices of Mizpah Lodge, in the near future.

Thomas M. McDonald, of Jackson Avenue, a veteran of the Third New Jersey Regiment, Company I, is at Antietam attending the cermonies of the unveiling of the mounument erected there to the New Jersey soldiers.

At a meeting of the North Plainfield Athletic Association, Monday, the following officers for the ensuing year were elected: President, Wesley Messersmith; vice president, Leslie Becker; secretary, Ernest Powlison; treasurer, Carl Steiner.

Codington & Swackhamer have filed with the Secretary of State articles of incorporation for a concern to be known as the Plainfield Tool Equipment Company. The incorporators are J. B. Loughead, R. H. Snider, R. W. Barwood and P. J. McDonald.

Miss Mabel Kenney, of East Fifth street, Plainfield and George B. Zimmer, of this borough, were united in marriage Wednesday afternoon at the home of the bride's parents, by Rev. J. O. McKelvey, pastor of Warren Chapel. After the reception and wedding supper, the bride and groom left for a week at Niagara Falls. Upon their return they will make their home here in the borough.

Fire on Borough-City Line.

Fire in a small, frame store building, located at 41 and 43 Somerset street, on the borough-city line, owned by W. B. Heideloff, early Wednesday morning burned out the fruit store owned by Nicholas Martone, and badly damaged Frank Hand's blacksmith shop adjoining.

The cause of the fire is unknown, but it is generally supposed that cigarette stubs are responsible for it. Martone was in the building until about eleven o'clock Tuesday evening, and the fire was noticed about three o'clock Wednesday morning.

The walls and floors of the building are but little damaged and will be rebuilt as soon as the insurance adjusters have passed on it.

Wednesday's Storm.

One of the worst storms this vicinity has witnessed for many years occurred last Wednesday.

Great damage was done to the shade trees in the borough and city. The streets were covered with large limbs and in many instances whole trees were blown down and completely blocked the streets.

While no fatalities occurred in this vicinity, there were several very narrow escapes from flying debris.

Throughout the near-by counties of Union, Somerset and Middlesex much damage was done by the wind and heavy rains to growing crops.

Precautionary Measures.

The Borough Board of Health has been making tests of several wells of water on Chatham and Warren streets for the purpose of ascertaining whether such wells are responsible for the two recent cases of typhoid fever. Preliminary tests of these wells showed traces of nitrates sufficient to justify a thorough examination of the water, which is now being done.

The wells are old ones and it is feared that the water has been contaminated by cesspools nearby.

The Board has prohibited the use of the [illegible] fought it out with [illegible] the result of [illegible] and at the end of an hour [illegible] known, enough to throw the line to the fellow, who was piteously crying for help.

Whitfield N. Brown Passes Away.

Whitfield N. Brown, son, of John B. Brown, of Park avenue, Plainfeln, passed away at his father's home Wednesday night. Mr. Brown had been ill for some time.

The funeral services will be private, will be held from his late home this afternoon at 2:30 o'clock.

Death of Mrs. MacDonald.

The funeral services of Mrs. Richard MacDonald, who passed away Sunday, were held from her late home on Watchung avenue. Rev. E. L. Earp, pastor of the Grace M. E. Church, this borough, officiated. Interment was made in the Methodist Cemetery.

Golden Wedding Celebrated.

In honor of the fiftieth anniversary of their wedding, Mr. and Mrs. George L. Vanembergh, of East Second Street, Plainfield, tendered a reception at their home last Tuesday afternoon and evening at which over two hundred friends from this city, New York, Newark and Brooklyn were present.

The celebrants received a great many handsome presents. Mr. and Mrs. Vanembergh were married in Newark, September 15, 1853.

MacKillop—Blessington.

Announcement is made of the wedding of Miss Lelia Blessington, of Delaware Water Gap, to William A. MacKillop, of this borough, the ceremony having taken place on Saturday, September 5, at the Little Church Around the Corner, New York City. The groom is a son of Mr. and Mrs. Charles MacKillop, of Somerset street. Mr. and Mrs. MacKillop will reside in Easton, Pa.

Gassner Out on Bail.

William Gassner, of Plainfield, who is charged with having committed an atrocious assault on his brother-in-law, Herbert Chamberlain, on the night of August 30, was released Monday afternoon from jail on bail, under bonds of $2,000.

Where Voting Machines Will Be Placed.

Secretary of State Dickinson has prepared a schedule showing where the eighty-one voting machines purchased by the state are to be placed. Those to be sent to Camden, Passaic, Cape May and Morris have not as yet been assigned but will be placed after they are shipped.

Following is the list:

Atlantic county—Third ward, Hammonton.

Bergen—First ward, Hackensack; First district, Rutherford; Third ward, Englewood.

Burlington—First ward, Mt. Holly; Palymyra township; Fourth ward, Burlington.

Camden—Entitled to 4.

Cape May—Ocean City, 2.

Cumberland—First ward, Bridgeton; First precinct, Vineland; Second ward, Millville.

Essex—Newark—First district, Second ward; Fourth district, Third ward; Second district, Fifth ward; Sixth district, Sixth ward; Seventh district, Ninth ward; Sixth district, Tenth ward; Sixth district, Eleventh ward; Third district, Thirteenth ward; Orange, Second district, Third ward; East Orange, First district, Fourth ward; West Orange, Third district.

Gloucester—First precinct, Glassboro township; Second ward, Woodbury.

Hudson—Town of Union; Second district, West Hoboken; Third district, First ward; Third district, Third ward; Hoboken, First district, First ward; Second district, Third ward; Second district, Fifth ward; Bayonne, Second district, First ward; First district, Second ward; Second district, Second ward; Third district, Second ward; Third district, Second ward; First district, Fourth ward; First district, Fifth ward; West New York, Third ward.

Hunterdon—Western district, Raritan township; Third ward, Lambertville.

Mercer—Trenton, First precinct, First ward; First precinct, Fifth ward; Princeton, First district; Southern district, Hamilton township.

Middlesex—First district, Third ward; New Brunswick, Second district, Woodbridge, Third district, South Amboy; Fifth ward, Perth Amboy.

Monmouth—First ward, Asbury Park; Fifth district, Long Branch; Second district, Long Branch; Second district, Long Branch; Second district, Long Branch; Middle district, Red Bank.

Morris—Entitled to 3.

Ocean—Plumstead township, New Egypt; Lakewood.

Passaic—Entitled to 6.

Salem—Borough of Woodstown; Court House district, Salem.

Somerset—First district, North Plainfield; First district, Bridgewater township.

Sussex—Township of Bergen; Borough of Sussex.

Union—Elizabeth, First district, First ward; Second district, First ward; First district, Twelfth ward; Plainfield, First district, Fourth ward.

Warren—First district, Phillipsburg; Western district, Washington.

Railroad for North Plainfield?

A report is current that the Delaware, Lackawana and Western railroad will build a branch from Springfield, via Scotch Plains and Plainfield, to Hampton junction. It is only a matter of time until some railroad to New York will be built along the foot of Watchung mountains through the Borough, and when that time comes, the last argument of the annexationists will be erased.

SUBURBAN NOTES.

LIBERTY CORNER.

Mrs. Fink, Mrs. Stanton and daughter, of West Brighton, S. I., are stopping at Mrs. Froehlings.

August Frochling, of Newark, spent last Sunday with his parents, Mr. and Mrs. Froehling.

Miss Louise Sylvester, of Denver, Colorado, and Miss Annie K. Miller, of La Grande avenue, Plainfield made a flying visit to this place last Monday.

Miss Jessie Monroe, of New York City, has returned to her home after two weeks' visit at C. M. Conkling.

Mr. and Mrs. E. B. Runyon, of New Brunswick, spent Sunday with W. G. Hayes.

* * *

WARRENVILLE.

Joseph Shelden, the champion corn husker, of Warren township, anticipates getting married this fall and going to California on his wedding trip.

The Board of Education are going to enforce the truant law and judging from the absence of children from school, they can't begin too soon.

A stray carrier pigeon with the initials P. F. came to Charles H. Mundy's place last week. Owner can have same by proving property.

Clark Mundy and family of North Plainfield called on his mother, Mrs. Nancy Mundy, last Sunday.

LETTER FROM "WALLED CITY."

Another Interesting Letter from a Former Boroughite, E. A. Embury.

Two weeks ago the editor of the REVIEW received an interesting letter from Edward A. Embury, a former resident of this borough, but who has for sometime been "sight-seeing" in different parts of Europe. Knowing how many friends Mr. Embury has here, the letter was published in these columns that they too might enjoy his impressions of old Edinbugh, Scotland. This week another letter, written from Chester, England, has been received and this also the REVIEW is pleased to share with its readers.

Chester, England.
Sept. 4, 1903.

You know what close friends Idleness and Mischief sometimes become; so, if to keep myself out such company, I occupy myself with writing you another letter, you will perhaps bear the affliction with patience. And to be busy indoors under a good roof is better than wandering about outside in wet and cold, for today, like nearly all days for weeks past in England, the clouds drop down their rain, and the farmers live in anxiety because their crops are harvested—some not even ready for harvest because of the unseasonable cold; and the fruits were blighted by the Spring frosts.

And yet England is prospering wonderfully, although some discontented ones wish for further advance and advocate a protection tariff as the means thereto.

The press abounds in conflicting opinions about a problem as hard as some of their native oaks.

But here in Chester a stranger may more wisely find great entertainment in plenty of things easier to comprehend, rather than mire himself in matters too deep.

No town in England or Europe has so well preserved its ancient city wall. Here in A. D. 61 was stationed the 20th legion, [illegible] Roman Castra and thence derives its name.

At that time its first wall was built, and probably the greater part was of earth. But in course of time and fates of war this being broken or destroyed, the city at a later period was encircled with walls of stone. Now it has come to pass that what once served as a defence is sacredly protected from decay as a relic of ages gone, and upon its top may be had a pleasant stroll around about the city—a circuit of nearly two miles. However, in doing this one goes not so much round as through the town; for in its old age the place has grown corpulent and overspreads its ancient bounds.

Far extending without the walls are churches and business buildings as well as private homes beautifully situated near the banks of the little river Dee, and lovely in their gardens of flowers now profuse in bloom.

The antiquarian finds great attractions in Chester, but its Norman churches and splendid cathedral have charms for all. The church of St. John, just outside the city wall, and dating in foundation from the year 689, has experienced at various times much misfortune in the falling of its three great towers completely demolishing much of the building; and yet the mere fragment now remaining and restored would be an ornament and glory to our Plainfield.

The fine cathedral within the city wall is altogether greater, although here too the hand of time has worked much ruin, and only recent extensive restorations have brought back most of its former features and noble appearance.

The daily morning and evening services are extremely devout and frequently attended by large congregations. It would seem as if all but hearts of stone must be touched by such reverence and the loveliness of the music in a place so full of venerable memories.

The building is of the Norman period and displays an interesting study in the development of that dignified style of architecture.

The organ is worthy of the building, and contains fine specimens of the full-toned diapasons so unlike the blaring stops with which we are usually afflicted in our noisy instruments.

Chester is nearly divided into four quarters by its two main streets which intersect at right angles and pass out under the four gateways of the city wall. Their pavements are in perfect condition, and well they are; for lack of sufficient sidewalk compels man and best to use the roadways equally.

The buildings along the sides placed regardless of regularity, are famous for their half timber work and various designs. No man seems to deign to copy his neighbor.

The river Dee, no great stream to us, being here perhaps only two or three hundred feet wide, yet affords a delightful sail of a few miles in one of the little steam yachts to Eaton Hall, the palatial mansion of the Duke of Westminster.

Somewhat further, and just within the limits of Wales, is the home and much-loved church of the great Gladstone. It is a spot of rustic beauty and a retreat for repose and rest after great activities.

And almost beside the Dee, Chester has its little park of twenty acres—a genuine Eden of flowers, hawthorn, laurel, and holly.

England may well be proud of Chester and happy the traveler who finds his way hither and puts up, as he may do, if he remains a week or more, in bed and board good enough for a king, at the price of but twenty-five shillings a week, and yet with all, one sighs for home and longs for the familiar faces of friends along his native streets. These could never be replaced by any here, however grateful the American must feel for the kind and generous treatment he receives.

The failure to win the cup seems but to excite expressions of goodwill and friendly admiration. During the races only the newsboys disturbed the peace and quiet of the little town with their screaming "extras."

The English press quite lacks such a sensation as the New York Journal and World.

England seems to be a place of everlasting rains and I have scarcely been warm for two days together all summer. I am looking forward eagerly to soon seeing the warm suns of (North) Plainfield, for I sail on September 16th.

Most sincerely yours,
EDMUND A. EMBURY.

The Plainfield Political Muddle.

"In county politics", says the Elizabeth *Journal*, "the bolt from convention, made by the contesting Plainfield delegates, who championed James T. Buckle's nomination, has caused a good deal of talk, but among the Plainfield supporters of William T. Kirk's candidacy it is not taken to mean anything serious. One of the latter in speaking of the matter today said:

"No serious importance can be attached to the action of the Plainfield delegates who left the convention. It may cause the loss of some votes to Mr. Kirk, but not enough to jeopardize his campaign. The fact is this: The Plainfield Republicans have control of the Common Council, every one of the eleven members comprising that body being a Republican, but there are seven of the eleven to go out this fall. The Democrats will make an effort to land their candidates for some of the councilmanic honors, and will take advantage of any disaffection there may be in the Republican ranks. It does not look to me that the Plainfield Republicans are going to do anything so unwise as to keep the breach open for the Democrats to move in. They are not generally given to that sort of thing, but to keep open the breach until election day would menace their strong hold on council. Least of all do I think the Republicans of Plainfield will depart from their allegiance and vote for a Democratic assemblyman to defeat Mr. Kirk. They will think twice before they resort to any such action. Besides, there is not only the councilmen to consider, but there is a tax collector to choose. The term of the present incumbent, expires this fall, and he is a candidate for the place again on the Republican ticket.

"There is so much, locally, at stake that it hardly seems probable that the dissenting faction will do anything to menace the chances of Republican control of Plainfield. The most they seem likely to do is to relax interest in the campaign, and they may scratch the ticket, but they know well enough the results of carrying their petty spite to the polls, because it has in times past let an occasional Democrat in for councilman.

"It is a question whether the action of the bolting delegates will be countenanced by their constituents after time is given for calmer deliberation."

Boy Has Four Great Grandmothers.

The Dunellen *Call* says that Willie Vail, of that borough, the eight year old son of Mr. and Mrs. Arthur F. Vail, claims the proud distinction of having four great-grandmothers and one great grandfather living. They are Jane D. Vail, of Quakertown, aged 78; Mary Curl, of Rockport, 81; Amanda M. Apgar, of High Bridge, 79; Mary J. Walters, of High Bridge, 76, and John Curl, of Rockport, 84.

When Willie was 2 years and 7 months old all four great-grandmothers and great-grandfathers were alive, but since which time three of them have died as follows: Abram R. Vail, died in 1898 at the age of 76; Matthias A. Apgar, in the same year aged 74, and George Walters, a few months ago, aged 84.

This probably breaks the record, but this county is hard to beat and before acknowledging defeat, old Somerset ought to be heard from.

Ex-Marshal Fahn Explains.

NORTH PLAINFIELD, Sept. 18, 1903.

EDITOR REVIEW:

Will you please allow me space in your paper to correct a statement which appeared in the Plainfield *Daily Press* Thursday to the effect that I was suspended as Borough Marshal for being intoxicated while on duty.

It is not true that I was drunk as sworn to by Recorder Doud and Chief Marshal Campbell.

I had over thirty witnesses on hand to prove that I had not been drinking, but was not allowed to offer any of them, and for that reason I handed in my resignation as Marshal. As I always deal openly and honestly in all things I want the public to know the facts.

If the authorities are in earnest in this matter let them go higher. I can furnish proof, that a higher officer than I was is mostly found when on duty at a certain pool room, or in the back room of a barber shop where he is playing cards much of the time, or drinking beer in a wholesale bottling establishment, and is always out of sight when there is "anything doing." I made three arrests myself during the last month and a half, but was not credited with them, but the credit went to a higher officer. During this time I was the only officer on night duty in the borough. [For about three weeks in addition to myself, there was a special marshal on duty up to midnight.

The public ought to know these things and that is my only reason for this letter.

LAWRENCE FAHN.

Praise For West End Company.

The West End Hose Company, of this borough, who took part in the Firemen's parade at Boonton, Labor Day, are very enthusiastic in their praise of the entertainment furnished them by the Boontou laddies. The Boonton Weekly Bulletin says:

"The West End Hose Company were given the freedom of the town and they made the most of the little time at their individual use in looking at and enjoying our beautiful mountains, valleys, lake and the picturesque Boonton Falls, where over the rocks to the beautiful Pass. They were a fine company, numbering about [illegible] men, their gentlemanly demeanor and conduct being a credit to the beautiful city from whence they came."

Weather and Crop Bulletins.

Central Office U. S. Weather Bureau,
ATLANTIC CITY, N. J., Sep. 16, 1903.

The prevailing weather conditions during the week have been maturing crops. The temperature has averaged from 5 to 12 degrees above the daily normal, and the nights were much warmer. The rainfall was generly deficient, only light showers occurring on the 8th. and 9th. The cutting of early field corn has begun in the southern section; fall plowing is progressing, but in some sections it is retarded by wet grounds. The outlook for winter apples in some places is excellent, and the fruit is developing rapidly. Cranberry picking has commenced, and the prospects are for a larger yield than that of last year.

Locally John Neagle reports: oats, buckwheat, millet, and hay good crops; peaches scarce; corn poor.

Two Engines Wrecked at Elizabeth.

The Somerville express on the Central Railroad of New Jersey, which left Somerville, Wednesday at 11:45a. m., crashed into a freight train which had just left the transfer yard at Elizabeth and was crossing the main line. A. P. Mink, of Bayonne, a brakeman was instantly killed. John Van Fleet, the engineer, and Frederick Haelig, the fireman of the passenger train, residents of Somerville, were severely injured, as was also the engineer, Henry Hummell, of the freight train. The cause of the accident is being investigated.

Sunday Excursion to Mauch Chunk.

The New Jersey Central will run an excursion to Mauch Chunk on Sunday Sept. 20, 1903. Round trip 1.50, children 75 cts. from Plainfield at 9:22 a. m. Mauch Chunk is one of the most charming mountain resorts in this section. The trip over the gravity railroad to Summit and Mt. Pisgah is one of scenic grandeur and a trip that will never be forgotten. After the trip over the Switch-back you should go to Glen Onoko where you will find beautiful little cascades, caverns and like attractions.

Far Hills Post Office Robbed.

The post office at Far Hills was entered by thieves Saturday night who blew open the safe and secured over $200 in stamps and stole valuable mail matter. The thieves cut all the telephone wires running out of Far Hills, so as to ensure their safety. They stole a horse and wagon from the stable of a citizen and left town. The rig was found abandoned on the road. It is believed they escaped on a passing freight train on the Jersey Central road.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

The work of packing the pickle crop in South Jersey is about completed. The crop was only about one-fourth as large as last year.

A blight has struck the growing corn in many parts of South Jersey, killing the blades and giving the appearance of having been nipped by the frost.

Many farmers who have been depending on their lima bean crop to help swell their bank accounts find that they reckoned without the cost, as the crop at Salem has turned out a miserable failure, caused by a blight of the beans.

A tarantula with legs spanning five inches was killed in Gloucester Sunday by William H. Sink in his bedroom. The insect was discovered Saturday night, but managed to escape. Sink was formerly in the fruit business.

Mrs. Sarah A. Steepy, of Bridge street, Trenton brought suit in the Court of Chancery to compel the Public Service Corporation to remove an electric light pole which has been erected in front of her home without her consent. She says the light attracts mosquitoes.

Aaron I. Hildebrant brought to Belvidere a few days ago a potato of the Mayflower variety that weighed two and one-half pounds. Mr. Hildebrant says he has this season gathered from two and one-third acres of ground 465 bushels of Mayflower tubers.

The exceedingly warm weather of the past few days has ruined hundreds of dollars' worth of oysters that were "fattening" upon the floats at Morris River. All of the growers [illegible] tied up their boat and no more oysters will be caught until [illegible] change in the weather.

Many owners of horses in Tuckerton are suffering the loss of their animals from a strange disease which has been prevailing in that section for the past few weeks. There appears to be no cure when the animal is once attacked by the malady. A dozen or more deaths have occurred and two or three cases are reported daily.

The annual reunion of the Fourteenth regiment, New Jersey Volunteers, will take place at Point Pleasant, Ocean county, today, and will be attended by veterans from various sections of the State. This regiment was one of the best that left the State for the front, and was in command of Colonel William Truex, who also saw service in the war with Mexico.

The Central New Jersey Telephone Company, organized to compete with the Bell system in Union, Morris, Hunterdon and Middlesex counties, has applied for a franchise in Springfield. Service was promised at half the rates of the old company. The company is pushing its lines through from Elizabeth to Plainfield and New Brunswick, and it is desirous of constructing a line through from Elizabeth to Springfield, Summit and Morristown.

The State's new labor law, putting the age limit of factory workers at fourteen years, is causing trouble to the glass works. The plant of the Cumberland Glass Manufacturing Company at Bridgeton is running at only about one-half its capacity on account of the lack of boys. They have sent out over the State and even into Delaware, Maryland and Virginia trying to get boys to come there and work, but cannot fill the vacancies. Blowers cannot work without the boys and many of them are going to other States to work.

The marl industry named the town of Marlboro. Years ago men "struck it rich" there and an extensive industry began and flourished for years. The marl was mined and the farmers kept their hired men carting marl to their farms all winter. So valuable was the marl for fertilizing that farmers would often convey it a day's journey. Mother Earth is still rich in such resources, but man has manufactured a variety of artificial fertilizers, and their condensed form caught the farmers' approval for economy of time. After years of use the strong chemicals in patent fertilizers are wearing the land out, and many farmers are glad to resort to the old marl beds. Lewis Shoemaker, of Marlboro, has opened his marl bed and is operating the industry with the aid of a white mule. He finds ready sale for all the marl put out.

Why Nations Fail.

Historians Neglect the Scientific Explanation.

By Frederick Breithut.

ANCIENT Greece was the leader of the world. Her philosophers were of the greatest. Her sculptors and architects are still unsurpassed. The genius of her pre-Christian sons shines forth as strong to-day as when they lived. The whole atmosphere of old Greece was one of truth and beauty. Her temples, works of art, drama, philosophical conceptions were all the greatest which the world has yet produced.

Now all is changed.

Greece is one of the weakest and most unprogressive of the nations. She has no philosophers, no makers of art. Her leadership is gone, and forever.

Why this change?

Because the rich young blood of Greece was poured out upon the brown soil in warfare.

Old Greece, with its art and philosophy, its creators of beauty and searchers for truth, was robbed of its strength and depopulated by warfare. The best of her sons were sent forth to shed their precious gore on the fields of battle. Those young minds, killed off in the full flush of youth—what if they had gone in the paths of their fathers, following the gleams of beauty and of truth?

Where is Greece to-day? Sapped of all her virile manhood, with none but the descendants of the weak stay-at-homes for her survivors, desolate, she stands, never again capable of resuming her former place among the nations of the earth.

So much for Greece.

And what shall we say of Rome?

Rome was the ruler of all the world. Her empire stretched from sea to sea. The Romans were a practical lot. They had no art; philosophers were few. The Greeks built temples; the Romans built aqueducts. The Greeks wrote philosophy; the Romans wrote laws.

Where are those Romans who swayed the world? Whence has gone their strength? What has dissipated their power?

Rome went down for the same reason that Greece did.

Generation after generation, the young men who were the representatives of her strength, courage and endurance were sent forth to die. Her weakest thrived while her best went out to paint the soil with their red blood.

These suicidal wars worked their inevitable result. "The Roman Empire," says Seeley, "perished for want of men."

Spain's history shows a repetition of the experience of Greece and Rome.

"This is Castile," said a Spanish knight; "she makes men and wastes them." There you have it! Precious life, in a world where the best is none too good, ruthlessly cast away.

Is there any wonder that our young, strong, bloodful America should have so handily disposed of poor, weak, bloodless Spain? Her real blood is gone; she no longer breeds the Spaniards that lived of old. Spain's wars were her doom. Blood which is spilled can never be replaced.—New York American.

The Value of an Independent Man.

By Herbert N. Casson.

HOW it may be in the other nations of the world I do not know, but it certainly is a fact that there is nothing more lacking in the United States than independence.

In spite of the Declaration of Independence, which is becoming mythical, the average American has become an entirely dependent and sycophantic creature, who not only conforms in every respect to the opinions of the stupid majority, but deliberately tries to make himself the chattel of his neighbors.

There are seven political parties in France and a dozen in Germany, but in this country there is practically no difference of opinion on political questions. There are two parties, it is true, but the only difference between them is that while the one is in power the other is out.

There are many religious sects in the United States, but no one hears of controversies between them on matters of belief. The only struggle in which they take any interest is that for more members, more money and more property.

There are many colleges, but not one has ever dared to hold an exhibition of its finished products. At all the large colleges it is the independent professor who is in danger of being discharged. It is the timid and non-committal professor who has a life job. The ideal of all our universities is not the development of a nobler brand of men and women, but the manufacture of a greater number of the present inferior sort.

In fact, in this Mutual Slavery Association which we call society, if a man appears who is truly independent, who swings on his own pivot and cares nothing for the crowd, every one at once believes that his course of action is a scheme out of which more money can be made than by conformity.

It is becoming my strongest conviction that all the plans of social reform, all the co-operation of world-menders, would do less to establish industrial justice and to promote moral and intellectual improvement than would a few score of independent and fearless men or women who would stand out like giants amid the 80,000,000 human grasshoppers that populate this country.—New York Evening Journal.

The Artistic Temperament in Medicine.

By George Harvey.

SOMEBODY has recently raised the question as to whether the old-style doctor, with his queer, curt, stern manner, has really disappeared, or is merely superseded by a spirit of the same type who has learned to be politic among those of his patients from whom he may expect a good consideration for his services. Without going too deeply into particularities, it seems to us that the ethics of the profession have not merely improved, but have been actually regenerated. The artistic temperament can belong to a man of genius, but this is exceptionally the case, and nowhere more so than in the medical profession.

Of true geniuses in medicine there have been not a few, and by no means have all of these attained the distinction and received the honor of a Harvey or a Jenner, however worthy; but, like great men everywhere, they were characterized by that unobtrusiveness, that altruism, that lack of pretense, which demands no praise and has need of none. Such, by their modesty and sympathy for the weaknesses of mankind, have made the world a more habitable place and have set aloft noble ideals for future generations.

False geniuses, like false prophets in general, have ever been plentiful among doctors, but it is needless to say that the profession, as a whole, has decried them and refused them recognition. Of such are the obstreperous and pretentious quacks who demand for themselves undeserved encomiums, and in matters involving standards of taste are absolutely incompetent. "Art for art's sake" forms no part of their creed, while selfishness and avarice produce the inevitable result—viz., a perfect lack of sympathy for the foibles of humanity and that disobedience to every mandate of conscience which only the absolutely bigoted and unscrupulous can show.

The eccentric may be defined as an individual of average ability who derives his chief inspiration from his own self-glory. Consequently, he is entirely a self-centred person whose love of the conspicuous is manifest in long, shaggy hair and English trousers of the greatest possible width and most impossible pattern. Whether there be such who practice the healing art or not we do not know, but, in any case, the delusion as to his greatness is harmless enough, and so easily diagnosticated as to be unworthy of serious attention.

The Old School seldom produced the scholar, and almost never produced the refined gentleman, and in this lies its chief distinction from that of to-day. Its disciples were brusque, sometimes boorish, and often abrupt to the point of insult, yet beneath it all lay the kindly spirit and the generosity begot by a life spent in the service of mankind. Some of us can remember the country doctor of long ago who, summoned at midnight to a severe case of pneumonia, let us say, would ride a dozen miles through mud and slush, upbraid his patient most unceremoniously, and then proceed to give the minutest directions to the attendants, with a parting word to "send for me again if he gets worse." But times have changed. The New School demands the gentleman liberally educated in our universities, who can combine absolute firmness with unequivocal politeness. The polished gentleman is coming into the ranks, and there is less occasion for the artistic temperament in medicine to-day than ever before. The entire question is one of encouragement, in idiosyncrasy and of ignorance in matters of taste.—Harper's Weekly.

BALFOUR ON FISCAL REFORM

The Premier's Plea For a Change in the British Policy.

GUVERNMENT WILL NOT DISSOLVE

Publication of a Pamphlet on the Subject of "Insular Free Trade" Said to Mean That Balfour and Chamberlain Will Work Together For the Proposed Fiscal Changes—Views of the Premier.

London.—Premier Balfour has issued the advance sheets of a pamphlet on the subject of "Insular Free Trade," in which he presents at length arguments in favor of a change in Great Britain's fiscal policy. In introducing the pamphlet Mr. Balfour says his purpose in issuing it is that it would be impossible to put all the important points of this question within the limits of a single speech.

The Premier points out that as a result of England's policy of retaining a fiscal policy made for a free trade country in a world of free traders, not for a free trade country in a world of protectionists, the rate of her export trade has not increased, and in fact has seriously diminished. Compared with past years some departments show no increase, while others show symptoms of decay.

The Premier asserts that there is no reason to expect an improvement. Meanwhile Germany, America, France, Russia and even Great Britain's self-governing colonies continue to build up a protective interest within their borders.

Mr. Balfour says the mistakes made by the free traders half a century ago have left Great Britain bearing all the burdens and enjoying only half the advantages which should attach to the Empire. He devotes considerable space to the effect of protection upon combinations in countries in which protection exists.

Thus, the Premier points out, is to the disadvantage of the British manufacturer, who is unable to compete with the manufacturer who is able to sell abroad at a lower price than he charges for the same article at home. He gives an instance of German steel in this particular, saying that it is selling cheaper in England than the English manufacturer can possibly produce it.

Mr. Balfour declares that the optimists who advocate a continuance of the free trade policy in place of the injury worked by protection on Great Britain's interests are foolish and their arguments little short of reckless. He concludes:

"It cannot be right for a country with free trade ideals to enter into competition with protectionist rivals self-deprived of the only instrument whereby their policy can conceivably be modified. The most essential object of our national efforts should be to get rid of the bonds in which we have gratuitously entangled ourselves. The precise manner in which we should use our regained liberty is important, yet after all, only a secondary issue."

The publication of the pamphlet after the Cabinet had failed to agree on the proposed fiscal policy is taken to mean that the Government will stand, that the Colonial Secretary will not resign, and that the Premier will retain the leadership of the modified tariff cause, for which the way may be opened by the appointment of a royal commission.

AIRSHIP ONLY A MODEL.

Paper-Covered Affair is What Irvington, Ind., Saw.

Indianapolis, Ind.—The announcement by many prominent citizens of Irvington that they had seen an airship a few days ago caused great excitement here. A number of well-known business men offered to make affidvits that they had seen two men in it; one said he had called to them.

At noon the following day, in a field several miles from Irvington, some boys found a large, torpedo-shaped, paper-covered affair, with a canopy and two dummy figures in it. It is thirty feet long and is believed to have been a model of an airship upon which some local mechanics were working.

SUICIDE DUE TO SHAME.

Military Attache of Chinese Legation Kills Himself in San Francisco.

San Francisco, Cal.—The suicide of Tom King Yung, Military Attache of the Chinese Legation at Washington and secretary of the acting Chinese Consul-General here, has greatly excited the prominent Chinese of San Francisco. He left letters saying he could not stand the shame of a threatened trial in the police court for an offense with which he was charged.

Yung was arrested Friday in the street. He resisted arrest, as he held that his consular post exempted him from this, and he was roughly handled.

He turned on the gas in his rooms and was found dead.

NO FEAR FOR MISSIONARIES.

Up to Date They Have Fared Well in Turkey, Bulgaria and Macedonia.

Boston, Mass.—The American Board of Commissioners for Foreign Missions does not feel any uneasiness as yet about any of its people in Turkey, Bulgaria and Macedonia.

Dr. E. E. Strong, speaking of the situation, said that the board had property worth $30,000 in Macedonia, at Monastir and Salonika, but so far everything had gone well with the missionaries at those places. At Beirut the missionaries, all Presbyterians, are not under the jurisdiction of the American Board.

Killed in an Automobile Race.

Frank Day, of Detroit, Mich., was killed in an automobile accident at the State Fair Park, at Milwaukee, Wis., while riding in "Barney" Oldfield's automobile. The machine was in the fourth mile of a five-mile race when it ran into a fence, killing Day and damaging the machine.

Britain Backs Up Japan.

Great Britain will also protest to China against the Russian terms of evacuation, and Japan is determined not to accept a postponement.

GALE SWEEPS LAND AND SEA

New York and New Jersey Coast Strewn With Wreckage.

PRESIDENT ON YACHT IN PERIL

The Sylph Forced to Put Into the Brooklyn Navy Yard—Many Vessels Sunk—New York City Tied Up by High Winds—Immense Property Damage—The Loss of Life—Buildings Unroofed.

New York City.—In the worst storm which has visited New York since August, 1889, shores about New York were strewn with wreckage, in the city itself several church steeples were leveled with the roofs, windows innumerable broken in, signs twisted off and further damage done which may reach millions.

The wind registered sixty-seven miles an hour on the Central Park Arsenal aremometer. It apparently had no connection with the Florida hurricane, but struck the Jersey coast first.

The steamboat S. E. Spring, a 200-foot sidewheeler, was driven on the rocks near New Rochelle and beaten to pieces. The steam yacht Fulcomis slipped her anchor off the Larchmont Club house and was driven on Umbrella Point. At City Island $100,000 damage was done to yachts alone. The yacht Columbia was saved only by taking the schooner yacht Hildergrade out into the basin and scuttling her in twenty feet of water. The sloop Polly and the schooner Aoulia were driven on the rocks. The City Island police boat was driven on Flynn's Beach. Seventeen yachts were wrecked about the island. The pilot boat Hermit dragged her anchors off Stapleton and crashed down into the wharf of the Staten Island Yacht Club. She was badly damaged. More than a score of small boats were reported wrecked on Staten Island. The tug James Key was blown ashore on a Hell Gate reef known as Hog's Back.

The damage was great all along the Coney Island shore. The old iron pier began to break up early in the afternoon, and soon the giant breakers had torn away 200 feet. The entire roof of the pier was blown off. The tide rose to a great height, rolling in over Surf avenue. The foundations of the Edgemere Hotel were undermined by the water and the wind tumbled it over on its side.

At Rockaway Beach the Central Hotel and pavilion and the big merry-go-round were wrecked.

The roof of the Manhattan Flats, at Eighty-sixth street and Second avenue, was blown off. The spire of St. Bartholomew's Church, at Forty-fourth street and Madison avenue, was loosened and threatened to fall into the street. Police reserves kept every one out of danger.

Part of one Brooklyn church steeple was blown down. Another steeple was weakened and residents of the neighborhood have been made to move out by the police.

The steeple of the Church of the Holy Apostles, Twenty-eighth street and Ninth avenue, was stripped of its sheathing. A section about fifteen feet wide and seventy feet long was carried across the street, narrowly missing a Ninth Avenue L train.

In Wall Street nearly all the private wires running from the stock brokers' offices to Chicago and Philadelphia, were blown down.

The death record of the storm was remarkably small. In addition to the reports of death in shipwreck, there was but one death due to the storm in Greater New York and two in the New Jersey area visited.

PRESIDENT IN THE GALE.

Yacht Sylph Had a Hard Time in the Long Island Sound.

New York City.—President Roosevelt had an exciting day, full of peril and adventure, a day to bring terror to the hearts of most men, but the President appeared to enjoy it. He left Oyster Bay at 9 o'clock a. m. on the Government yacht Sylph, and was hardly into the Sound before the first part of the hurricane struck her. The captain ordered everybody on board, President Roosevelt included, to go below. The wind was blowing seventy miles an hour, and the waves and spray dashed over the Sylph. At times the yacht was in imminent danger, but as the result of skilful navigating the Sylph was steered into the shelter of the Navy Yard, and remained until 2 o'clock, when, the wind having abated, the President was taken to Ellis Island.

President Roosevelt and the others put in a few minutes inspecting the accommodations for immigrants and then sat down to a luncheon. No speeches were made. During the luncheon the bell tower, twenty feet high and located almost where the President landed, was hurled down by the wind. A few minutes later the top of a heavy metal ventilator over the dining room was torn away and hung by ragged pieces of tin. Workmen cut it loose and took it away.

Cause $1,000,000 Loss.

Atlantic City, N. J.—The hurricane which struck this city caused damage of more than $1,000,000. Fully fifty buildings were unroofed, several smaller hotels and houses wrecked, the board walk and verandas of large hotels swept out to sea and pavilions undermined and torn to bits.

The Hotel Strand was damaged to the extent of $20,000. The old Empire Theatre, the new Bartlett, the Hotels Rudolf, Chelsea, Youngs, Marlborough and Willmore are all damaged.

New Haven, Conn.—The hurricane which struck this city wrecked about half a dozen of the boats of the New Haven Yacht Club. They were anchored near the Yacht Club, and were swept from their moorings against the club's pier.

Nyack, N. Y.—Twenty rowboats and launches were wrecked during the storm here.

Plainfield, N. J.—Joseph Watts Jr., during the storm stepped on a live wire and was killed.

MADE COINS IN PRISON

Convicts in a Pennsylvania Penitentiary Counterfeiters.

Coinage of Subsidiary Silver Pieces Had Been Carried on in the Institution—Prison Inspectors' Discovery.

Philadelphia, Pa.—Following closely upon the exposure of gross irregularities in the cigar department of the Eastern Penitentiary came the public announcement that the illegal coinage of minor silver pieces has been carried on by convicts in the big institution. George Vaux, Jr., one of the prison inspectors, summoned newspaper men to his home and voluntarily made this statement:

"Dr. W. D. Robinson and George Vaux, Jr., who are at present the visiting inspectors on duty at the Eastern State Penitentiary, made the statement that it has come to their official knowledge that within a short time an attempt has been made by certain convicts now confined in the penitentiary to manufacture counterfeit silver coins."

"But a few pieces were made, and a number of these have come into the possession of the inspectors, together with metals and dies used, the attempt thus being nipped in the bud. The evidence in the case is not yet complete, but all that has been secured has been submitted to the United States authorities."

Mr. Vaux refused absolutely to give any more details. From other sources, however, it was learned that dimes, quarters and half dollars were the coins manufactured. United States Secret Service detectives were at once called in. Their investigation is still in progress to learn whether there was collusion between the convicts and employes of the institution.

LOTS OF DEER THIS FALL.

They Wintered Well in Maine and Have Thrived Since.

Bangor, Me.—No frosts have fallen as yet to kill off the swarms of goats in the woods, but the cool evenings of the last few weeks have diminished the energy of the insects, and the deer which have haunted the waterways during the summer are beginning to come out into the clearings to nibble at the second crop of clover. Reports from all parts of Eastern Maine are to the effect that deer have been seen in pairs and in herds, often showing themselves in places where no deer have come for years.

A great majority of the deer, however, are yet in the deep woods, along the streams and by the lakes, and those that have been seen are no more than a quarter of the number actually existing. It is plain from all accounts that there are more deer in Maine at this time than a year ago. Lumbermen say that the animals wintered well, and came into the spring in good condition. The dry weather from April 1 to June 1 helped the fawns to gain strength, and later on the feed became excellent. Accordingly the prospect for good hunting this fall is very good.

SENATOR FINDS FATHER SLAIN.

Southern Legislator Searching For Missing Parent Discovers Dead Body.

Newbern, N. C.—Furnifold G. Simmons, father of Senator F. M. Simmons, was murdered on his plantation a few miles from Pollocksville, Jones County. He had been missing. Senator Simmons, who was in Raleigh, and Senator Simmons' son James, who is a merchant in Newbern, were informed and both went promptly to the old homestead to assist in the search. The body was found near the river. Mr. Simmons had been shot several times with a shotgun. Bruises about the head indicate that he was clubbed also.

Mr. Simmons was a quiet, inoffensive man about seventy-five years old, and generally esteemed. The cause of the murder is unknown. A negro has been arrested as the assassin.

ROBBERS STAND OFF A TOWN.

Gang of Eight Men Picket Valley Springs, S. D., and Get $8000.

Valley Springs, S. D.—Standing off the entire town at the muzzles of their revolvers, a band of robbers cracked the safe in the Minnehaha County Bank, between 2 and 3 o'clock in the morning, secured from $8000 to $12,000 and fled.

The robbery was planned carefully and the streets picketed by the outlaws before the attack on the bank was begun. The citizens were first aroused by the sound of several rapid explosions as the cracksmen started their assault on the safe. When they started to their doorways, however, they were met by a hailstorm of bullets.

Seven or eight men were concerned in the robbery. After their departure some time elapsed before a posse could be organized, and it was morning before the pursuit began. As yet there is no clew to the identity of the robbers.

TOO MUCH PROSPERITY.

The City Treasurer of McKeesport, Pa., Makes Too Little by His Job.

Pittsburg, Pa.—City Treasurer Samuel Milliken, of McKeesport, may resign because of too much prosperity there. He has a nominal salary of $150 a year. The amount that he receives from delinquent taxpayers, however, usually swells his salary to more than $5000 a year. But this year the city is in such a prosperous condition that there are very few delinquents. Mr. Milliken has just figured up that his percentage cannot possibly run over $2108.50, out of which he will have to pay $1200 clerk hire. This will leave him less than $1000 for his year's work.

$12,000 Jewelry Robbery in Chicago.

While Matilma Mamer was attending a meeting of a benevolent society robbers entered his jewelry store, at West Harrison and Jefferson streets, Chicago, and carried away $12,000 worth of watches and jewelry.

Two Feet of Snow Blocks Trains.

Two feet of snow covers the ground, greatly delaying trains in South Dakota. It is said to be the worst storm in three years. At Mellora the snow is 40 inches deep, and at Kenmore nearly twelve inches.

SAY PROSPERITY WILL STAY

Optimistic Reports From North, East, South and West.

RECORD CONDITIONS PREVAILING

Advices Received by the New York Herald From Many Districts Are Unanimous in Predicting an Era of Continued Good Times—Commercial Agencies Report That Trade is Improving Generally.

New York City.—The Herald says: Merchants, manufacturers and bankers express themselves as satisfied that no diminution of our national prosperity is in sight.

The only note of doubt, and that a smothered one, is heard in New York City. Elsewhere the confidence is shared by all.

No financial stringency is reported, save in the metropolis. From the Middle West word is sent that the country banks are not asking for any assistance in furthering the process of moving the looming crops.

The steel companies are proceeding in a manner suggestive of confidence in continued prosperity.

The farmers of the South were never so well off, other crops besides cotton bringing in munificent returns. On the Pacific coast business is in a most satisfactory condition, every industry reporting brisk trade and excellent prospects.

The mercantile agencies do not report any more failures than at the same period a year ago. Trade journals print symposiums from their correspondents in various parts of the country that bespeak an optimism almost unanimous.

No reductions in wages are reported in any part of the country and the stoppage of work in New England cotton mills and Pittsburg glass works is declared to be merely temporary and not significant as regards future consumption of finished products.

The steady progress toward peace in the local building trade situation is taken to indicate a resumption of easier money, for it is estimated that with fifty thousand men idle here all summer at least $500,000 in wages has been withheld every week from circulation in channels where the tide of cash ebbs and flows.

The transient buyers have brought more money to New York this autumn than ever before, and they have left more extensive orders and taken away with them better qualities of goods than previously.

This has tended to offset the undeniable dullness in the wholesale dry goods district that has prevailed for some time.

The shrinkage in [illegible] two [illegible] F[illegible]

[illegible] and who are [illegible] with New York City. [illegible] the greatest confidence [illegible]ance of good times.

At Bradstreet's Commercial Agency it is felt that local conditions are steadily improving. Each week sees a resumption of work on more and more buildings in this city.

The far-reaching effects of the troubles in the building trades have not been appreciated by the average man. Brickyards up the Hudson were idle all summer. That was a quick, direct consequence of the strikes and lockdowns. At the same time the lumber trade felt the curtailing of demand, and this depression extended all over the Eastern States. The steel and iron business suffered, and all workers in wood soon felt the effect of diminished building operations, as did all allied trades.

In the West building has been steady and increasing in extent, and the metal and lumber trades have enjoyed continued prosperity.

There are no more failures reported now than in the corresponding weeks a year ago. There are a few large failures reported all over the country where the liabilities exceed $100,000 or $150,000, but the small dealers and the merchants are paying their bills as they fall due, and the banks report no unusual requests for loan extensions.

DEATHS IN FLORIDA STORM.

Nine of Wrecked Steamship Inchulva's Crew Drowned.

Jacksonville, Fla.—The wires being down south of Palm Beach and Tampa some details of the hurricane have come by mail and by passengers on incoming trains.

The steamship Inchulva, of Liverpool, owned by the Inch Shipping Company, of Galveston, loaded with lumber and cottonseed meal and bound for Hampton Roads for coal, went ashore near Boynton. The ship's steering gear broke and she struck the beach with great force, breaking into three pieces. The captain and mates and fourteen of the crew were saved. Nine men were drowned, among them the engineer.

At Palm Beach the damage was serious. Gruber's Opera House was partially unroofed, as well as his business block on Narcissus street and his warehouse. The Seminole block suffered heavily, and the Palms block to a smaller extent. Two lives were lost in Tampa through the storm.

The spire of the Buelah Baptist Church (colored) was torn from the building and carried across the street.

The property loss at Tampa will reach at least $50,000, probably more.

It is estimated that half the orange crop has been cut off around Tampa and one-fourth on the East Coast.

A Carnegie Observatory.

A letter received at Tulare, Cal., from George E. Hale, of Chicago, Secretary of the Committee on Observatories, says that a Carnegie observatory will be built on the top of Mount Whitney, 14,898 feet, the highest point in California. The building will be 16x30 feet, of granite and wood.

Ignoring the Canal.

The Colombian Congress is now ignoring the canal treaty, giving all its attention to the danger of Panama secession.

KILL 100,000 IN BALKAN

The Turks Are Deliberately Exterminating the Christians.

ATROCITIES OF SULTAN'S

Soldiers Spread Over Monastir to Slaughter the 700,000 Christians—Thousands Are Slain Also in Adrianople—Two Hundred Thousand Persons, Homeless Starving in the Forests.

Sofia, Bulgaria.—The situation of the 700,000 Christians in the vilayet of Monastir is desperate.

The Turkish troops are making a clean sweep of the whole Bulgarian element, and are not sparing the other Christians. Despite secret protests of European nations, the Sultan is carrying out unabatingly his savage policy of extermination.

News filters through from Monastir very scantily, but it all tells of towns and villages destroyed, thousands of families massacred, with tortures of children and women and other atrocities.

Nearly 200,000 persons are starving to death in the forests, their homes destroyed and their lives in peril from roving bands of soldiery.

It is estimated now that nearly 100,000 have been massacred within the past few weeks in various parts of Macedonia, mostly in Monastir.

Unless there is speedy intervention by civilized nations, it is feared, not only by the revolutionary leaders, but also by Bulgarian Government officials, that all the Christian population of Monastir will be slain.

The Turkish troops are scattered all over the vilayet, and the work of murder, pillage and destruction goes on daily without a sign of cessation.

In the vilayet of Adrianople also the Turkish and Albanian troops are pursuing their usual tactics of burning and plundering the villages, and killing the peasants, instead of making even an attempt to break up the insurgent bands.

The Albanians, especially, are said to be beyond control. At Kostursco influential boys complained to the officers of the excesses committed by troops. The officers resented [illegible]ticism, and told the soldiers [illegible] boys were friends of the rebels, whereupon the soldiers burned the boys' farms.

The Turks have burned the [illegible] of Almagik and Erikler in the [illegible] of Losengrad. They beheaded two Bulgarians at Almagik in the presence of their families.

Twelve thousand troops are [illegible]bled around Malkotonovo, and are engaged in pillaging and burning [illegible]es. The popula[illegible] to the f[illegible] the villages en route, re[illegible] churches and burned the villa[illegible] Norakoj. Another body of Albanians going to Vasiliko, on the Black Sea, was attacked by a band, and is reported to have suffered a loss of 100.

A band led by the insurgent chief Atamasoff was surrounded by Turkish troops at Kokushko. After six hours' fighting the insurgents cut their way through the soldiers by throwing bombs. The Turks lost twenty.

CASTRO TO INVADE COLOMBIA.

9000 Men Sent to Los Andes, on Boundary Line.

Curacoa, Danish West Indies.—The foreign Consuls at Caracas, Venezuela, report that President Castro is making preparations for a new invasion of Colombia. Nine thousand men have been sent to Los Andes, on the boundary of Colombia and Venezuela. Arms and ammunition have been sent every day for a week from La Guayra. Their destination is unknown.

The judges and umpires of the mixed arbitration tribunals in the matter of claims aginst Venezuela, have been subjected to further attacks by the Venezuelan newspapers.

M. Filtz, the umpire for the Belgium claims, who rendered a decision against Venezuela for 11,000,000 francs in the matter of the claims of the company which has the concession for supplying gas and water to the city of Caracas, has been the particular object of President Castro's wrath.

The President has avenged himself by ordering the publication of vile attacks on M. Filtz, who is treated like a highway robber.

Foreign claimants are afraid to present their claims, as a list of all persons so doing is published daily in every paper in the republic and posted everywhere, and they believe the situation is becoming critical.

Man Kicks Another to Death.

In a fight at McDonough, N. Y., Tracy N. Borrows was kicked to death by Frank Gole, whom Borrows had just shot in the neck with a revolver. Borrows had accused Gole of escorting his wife to the Greene County Fair.

Wind Wrecks Circus Tent.

A circus tent was blown down at Anthony, Kan., and 100 persons were hurt. One man may die. Cages containing 200 animals were overturned, but none of the animals escaped.

Destructive Grasshoppers.

Grasshoppers have destroyed the crops of the Picuris Indians in Taos County, New Mexico, and a famine is threatened unless the Government helps them.

Holiness Leader Arrested.

The leader of the Holiness sect in Anniston, Ala., has been arrested for refusing to call a doctor for his daughter, who is critically ill with typhoid fever; the Mayor of the town has ordered medical treatment for the child.

Killed Alleged Sorcerer.

Regarded as a sorcerer, "Uncle A." Tinney, ninety years of age and a former slave, was called to the door of his cabin, near Richmond, Va., and killed by three unknown men.

Black Adventure.

A TERRIFYING NIGHT.

At the entrance to Boston harbor stands the oldest lighthouse in the country. Its great reflector, that from a point a hundred feet above the sea casts its rays to eat-boat and Cunarder obscured by snow one fate- and in the strange irony of ys a storm struck that coast with the greatest . With deepening night n the coast, snapped an- and hurled craft upon the bolted them outright and ir bones upon the beach. y ghost the pilot-boat Col- ed in through the surf fisherman's cottage in ext the storm lifted up a er and dropped her upon Toddy ks, and made kindling wood of her d corpses of her crew of eight, and then piled a coal barge upon those selfsame "Rocks," and in a few minutes there was no evidence that it had struck at all. Surfman Tobin, patrolling the beach was compelled to crawl on hands and knees against the wind, and once was blown into a pond to the lea of the strip of beach on which he was walking.

Through the terrifying night the Point Allerton crew patrolled the beach, and when daylight broke, commanded by Keeper James, they went to the rescue of a schooner that was driven ashore one and one-half miles to the north of their station. For several hours they worked, and brought every man ashore, then hauled their heavy apparatus home, and just as they reached it, almost exhausted, were notified of the wreck of a coal-barge on the rocks a mile down the shore. They set out at once for the scene of this new horror, and reached it just in time to save the crew of five men, who were struggling in the furious surf. With no thought of self, the life-savers plunged in through the breakers, and bore their burdens through snow-drifts to higher shore.

Daylight was fading when the crew reached their quarters again. They had worked in the water continuously for twelve hours, but at the first suggestion of dawn they were off again to renew the fight. A ship was ashore beyond Lighthouse Island, and might go to pieces at any moment. The snow-charged gale still roared, and the spray that dashed into the air was ice before it struck the earth. A cano attempted to t surf- beha t land wa pelled to of the of a mile away. A the crew seized their oars, determ to do or die. With splendid caro they sent their boat into the swirling surf. The breakers dashed at her and lashed her and enveloped her with spray, but she weathered it all. On a small portion of the wreck they found five of the crew crouching in the lea of a broken bulwark, and in the centre of the group a dead man lay. With a load of the living, half alive and dead the life-savers pulled for shore. Once in their snug quarters, they cut the boots from the sailors' frozen feet, and ministered to their bruised and wounded bodies.

Before this work of mercy was complete, word was received that three men had been marooned on Black Rock by the storm. Now, Black Rock was six miles down the coast and a third of a mile from shore. A six-miles' tramp through sand and snow with a heavy apparatus, and another perilous dash through the surf, was a not very encouraging outlook. After an incredibly fatiguing journey the party halted at a point a mile to windward of the shipwrecked men. The boat was skilfully launched, and the surfmen pulled for Black Rock. There the sea was running high and breaking dangerously. For an hour they lay to, tossing idly; then a break occurred, and in a twinkling the veteran commander seized the chance the storm had given, and rushed his boat through the breakers. Quick as a wink the three shivering sailors were snatched aboard, and the boat pushed back into safe water. That night the veteran keeper said of the work of thirty-six hours, "We succeeded in getting every man that was alive at the time we started for him."—Woman's Home Companion.

HEROIC PATIENCE.

An instance which shows the unflagging pertinacity and heroic patience with which men fight the sea was that in which the schooner Ireland went ashore. She struck on the Dog Fish bar in the "midnight and the snow," and for twenty hours Keeper Hayman and crew of the Gay Head Station worked without food or rest to rescue her crew. The masts of the vessel could just be made out as she lay broadside on about six hundred yards off the coast. Although the surf was somewhat broken by the outlying shoal, the wind blew with such velocity as to prove an almost insurmountable obstacle to the launching of the boat. Time and again they shoved the boat into the water, some of the men wading in up to their arm-pits, but they could not drive it against the gale—a new experience to men who had never known defeat. Again they tried it, and again they were blown back; then, to make their helplessness the more emphatic, a second large vessel was dashed upon the bar less than a hundred feet away from the other. Resolutely they picked up the boat, determined to run it through the surf, when a gust of wind stronger than the rest smote it from their grasp, and hurled it into a pool of water two hundred feet away. Then the life-line was tried—a No. 4 shot, the smallest—but it might as well have been a pop-gun against that gale. The second vessel to strike had immediately gone to pieces, and the dawn revealed no vestige of her.

Alternately through the night they attempted to communicate with gun or boat, and daylight found them baffled, but not disheartened. A No. 7 shot on six ounces of powder flashed from the gun, but met the gale, and fell into the sea far short of the wreck. Then through the day they fought to put the boat beyond the surf. It was a rush and a retreat, then a breathing spell and another rush, the men's determination growing with the fight. They had never been "licked," and they never would be "licked." When the wind wrenched their boat from them and threw her upon the beach, they waited for a lull, then picked her up and rushed again. Now the day was waning. For twenty hours they had toiled without food or rest, and the physical strain was telling upon them severely. When at last eight stout men rushed the life-boat safely through the surf and leaped aboard, they gave a mighty cheer, unmindful that their clothes were frozen like boards upon their bodies. They took six living men from the wreck, and left one dead man hanging in the rigging.—Woman's Home Companion.

A MARVELOUS FEAT.

Who can imagine a more deliberate and cold-blooded bit of heroism than that performed by Keeper W. W. Griesser, of the Buffalo Life Saving Station, who, in the teeth of an eighty-mile November gale swam out in the icy waters of Buffalo harbor to rescue a man who was clinging to some piling 500 feet from shore? At times the seas broke over the man so deeply that he was lost from sight, and it was evident that in that awful weather he would soon succumb and go to the bottom. Greisser saw him, and knowing that it would be useless to attempt to launch a boat, determined to swim to him with a line. As he plunged into the lake the mighty surf caught him and flung him stunned upon the beach, but he was up and in again, and this time gained the water beyond the breakers. It took half an hour for Griesser to swim 200 feet against the storm; then, coming to an old pile, he wrapped his arms and legs about it and rested for a few moments. The cold was intense, and his clothes were frozen to him when he let go and slid into the water, again to resume his journey. At times he had to dive through the great combers to avoid being buffeted back to shore, and three times a floating telegraph pole struck him on the back with crushing force, once almost rendering him unconscious. But he fought it out with incredible courage, and at the end of an hour was near enough to throw the line to the poor fellow, who was piteously crying for help. The half-frozen wretch had only enough strength left to tie the line about his wrist, and then drop into the water. At that instant a wave caught and fouled the line about the piling, and hurled Griesser back a hundred feet toward the beach. Exhausted, but not dismayed or beaten, he made renewed efforts to regain lost ground, and at the end of another half hour had reached the man again, cleared the fouled line and given the signal to the people on shore to haul in.

In transmitting the gold medal which Congress had awarded to Griesser for heroism, the Secretary of the Treasury said: "It would seem incredible but for indisputable evidence that you performed the marvelous feat, which was, indeed, effected only at the extreme peril of your life."

FIERCE FIGHT WITH A HAWK.

After a fierce fight with an immense white hawk Robert Dairymple, of Centre Grove, N. J., managed to subdue the bird, and now has it in captivity in a pen on his place. Robert, however, is carrying a badly wounded arm around in a sling and also has his head wrapped up in bandages. A white hawk is something of an ornithological curiosity, which is the reason that young Dairymple was so anxious to capture this specimen, which had been flying around his farm all year. He noticed where the bird often came to earth and in that place set a large steel trap which was fastened to a stake driven into the ground. The hawk was caught in the trap but made a fierce fight for liberty, pulling up the stake and trying to fly away with the trap, which proved too heavy for it, although it lifted it several feet off the ground in its attempt to escape. When young Dairymple tried to capture it there ensued a fight which lasted for some time. At last young Dairymple clubbed the bird over the head, finally subduing it. Several bird fanciers have offered Dairymple twenty to fifty dollars for the bird, but he refuses to sell.

$5000 FOR WARTIME RESCUE.

Daniel Prime, of Easton, Pa., a colored man, has received a letter from Charles Smith, an attorney of Jackson, Mich., saying that he is a legatee to the amount of $5000 under the will of Jonathan Moore, of that city. The letter explained why the bequest had been made. In the Civil War Prime was a sergeant in Company H, Fifty-fourth (colored) Massachusetts Regiment. Jonathan Moore was a First-Lieutenant in the Eleventh Michigan. Lieutenant Moore was wounded in the leg in a charge. Prime saw him fall, took off his blouse and wrapped it around the leg to stop the flow of blood, and then carried the lieutenant to the rear. The men never met again, but Moore learned the name of his rescuer. Mr. Moore was a manufacturer of furniture.

The United States now takes half the world's crop of rubber.

NEW IDEAS in TOILETTES

New York City.—Long coats make a feature of advance styles and will be much worn during the coming season. This one, designed by May Manton, is

THREE-QUARTER COAT.

well adapted to suiting material and cloth of lighter weight as well as to the silks and pongees of warmer weather, and to both the odd wrap and the costume. As shown, however, it is made of black taffeta stitched with corticelli silk, and is trimmed with handsome buttons and held by loops of silk cord. The long lines of the plents are singularly becoming and the generous sleeves mean comfort as well as protection for those of the bodice.

The coat is made with blouse and skirt portions that are joined beneath the belt. Both portions are tucked to give a box pleated effect, and the blouse is fitted by means of shoulder and under-arm seams. The sleeves are tucked to be snug above the elbows, but form full puffs below and are finished with flaring cuffs at the wrists. At the neck is a flat collar.

The quantity of material required for the medium size is six and a half yards twenty-seven inches wide, or three yards fifty-four inches wide.

lines tend to entail apparent height.

The skirt consists of a foundation, the front gore, the yoke, the shirred portion and the flounce, all joinings being concealed by the tucks and the shirrings. The front gore is laid in two tucks at each edge that are stitched flat to flounce depth, then fall free. Both it and the flounce are tucked at the lower edge.

The quantity of material required for the medium size is eleven and a half yards twenty-one inches wide, ten and three-quarter yards twenty-seven inches wide, or seven and a half yards forty-four inches wide, with half yard of all over lace for yoke.

Trimmed With Blue Thistles.

Purple thistles beloved by donkeys are most familiar to wayfarers, but the requisitions of a fashionable milliner take a different view of natural history and botany. A blue straw hat is trimmed with bunches of blue thistles arranged on both sides of the middle and front. A scarf of white tulle is twisted loosely about the crown, and forms a sort of bed for the blue thistles to spring from. A green straw hat with a medium brim has an Algerian scarf as over-brim trimming. This is of changeable silk gauze, two shades of green, bluish and yellow green, one of white and one of blue. A bunch of white thistles is set at the left of front.

The Fitted Bodice Now.

The return of the fitted bodice is heralded. Women have been trying to get rid of the pouch effect, in bodices and coats for some time, and the autumn and winter models show that they are succeeding.

Woman's Shirt W[illegible]rs to know no limit. Month by [illegible]nd week by week new designs ap[illegible] each one seeming more attractive tha[illegible] than the last. The May Manton model illustrated shows a broad pleat i[illegible] the front with tucks at each side and also from the shoulders, that are ar-

SHIRRED WAIST AND TUCKED AND SHIRRED SKIRT.

A Late Model.

Shirrings of all sorts are notable features of the season and of the latest models. The smart May Manton waist, illustrated in the large drawing, shows them used in a novel manner, and is singularly well adapted to the soft and pliable materials in vogue. The original is made of white silk mull trimmed with cream guipure lace and is charming, but the many thin wools and silks are equally suitable as well as the fine linen and cotton fabrics.

The waist is made over a smoothly fitted lining that closes at the centre front. The fronts and the back are shirred at the shoulders to give a yoke effect, and are again gathered at the waist line. The folds at the back give a tapering effect to the figure, while the front blouses slightly over the belt. At the centre front is a shirred vest-like portion that can be made high and finished with the collar, or cut off at the shirrings to form a square neck. The long sleeves are soft and full and are shirred to fit the arms closely above the elbows, but form puffs at the wrists. When elbow length is desired they can be cut off and gathered into bands.

The quantity of material required for the medium size is five and a quarter yards twenty-one inches wide, four and a half yards twenty-seven inches wide, four and a half yards thirty-two inches wide, or two and a quarter yards forty-four inches wide, with three yards of applique to trim as illustrated.

Nothing marks the season more surely than the shirrings and tucks that are so abundantly used. The very smart skirt illustrated in the large picture combines the two, and with them a full length front that adds greatly to its effect. Soft materials shirred are pretty beyond a doubt, but horizontal ranged to give a double box pleated effect, and is exceedingly becoming at the same time that it is simple. The original is made of white cheviot, but all waisting materials, silk and wool, as well as linen and cotton are appropriate.

The waist consists of the fitted foundation, which can be used or omitted as preferred, the fronts and the back. The back is plain, being smoothly drawn down in gathers at the waist line, but the front is tucked at the shoulders and gathered at the waist line to pouch slightly over the belt. The sleeves are tucked at their upper portion, but form full puffs below the elbows and are gathered into straight cuffs at the wrists.

The quantity of material required for the medium size is four and one-half yards twenty-one inches wide, four

SHIRT WAIST WITH BROAD PLEAT.

yards twenty-seven inches wide, three and three-fourth yards thirty-two inches wide, or two and one-fourth yards forty-four inches wide.

SCIENCE & MECHANICS

A new French life-preserver is a belt filled with calcium carbide. It is quickly inflated by acetylene on being wet.

Benzine locomotives of eight horse-power, drawing freight trucks of a capacity of twenty-five tons on narrow-gauge tunnel roads, are changing the working of German, Belgian and Austrian mines.

An Austrian inventor claims to have discovered a method of preventing the warping of floors constructed of xylolithe (a mixture of sawdust, burnt magnesite and magnesium chloride). He does this by fixing sheet iron, open-work, or reticulated plates to the foundation and embedding them in the plastic material. For covering iron floors in ships, etc., the reticulated plates are laid loosely on the foundation and a series of cross-cuts are made in the partially hardened xylolithe covering by thin knife blades to allow for expansion.

The production of nitric acid by electro-chemical methods is a new process that promises extensive changes in our agriculture. The manufacture of nitro acid from the nitrogen and oxygen of the air in sufficient quantities for commercial use has been the dream and hope of scientists for years. At Niagara experiments have been conducted successfully in producing commercial nitric acid by using a high-tension current in an air chamber, by which a yield of one pound of nitric acid is obtained for every seven horse-power hours.

A German invention deals with the manufacture of plastic compositions for flooring purposes. Ash, moistened with a solution of sulphate and chloride of magnesium, is mixed with kaolin, or clay, and talc; gypsum and magnesite are then added. The mixture is tamped and rolled in place while cool to form the bed or foundation of a pointless floor. When the bed has hardened a surface layer composed of asbestos and sawdust moistened with magnesium, sulphate and chloride and mixed with kaolin, or clay, and talc, gypsum and magnesite is applied.

In 1902 Rutherford suggested that as helium was almost invariably found in minerals containing uranium, this gas might very profitably be one of the final results of radio-activity. William Ramsay and Frederick Soddy now publish the results of a series of experiments to test this theory. The gases occluded by solid radium bromide, which are continuously generated, were known to consist mainly of hydrogen with some oxygen. After removing the hydrogen and oxygen the experimenters found indications of carbon dioxide; upon freezing this out, the resulting spectrum gave unmistakable indications of helium. In a subsequent experiment, more carefully conducted, the spectrum of pure helium was obtained.

Superstitions About Bees.

A correspondent of the Field states that three times within his experience have bees died within their hives on the death of their owners. It would be interesting to know if those bees were informed of the death, for it is a common superstition in rural parts that bees kept in the garden of a house where a death occurs if not informed of the event will either die or leave the hive. Hence the custom is still observed of making three taps on hives with the door key, after which the bees are told of the sad event. A piece of black crape is then fixed to the hive or hives, and an offering of pounded funeral cake, soaked in wine, is placed at the entrance. Another common belief is that if bees when swarming settle on a hedge stake there is certain to be almost immediate death in the family of their owner.—London Chronicle.

Bear-Killing Without a Gun.

An old hunter told me this story, which I will tell in my own words.

"Did you ever hear of the time I licked a bear without my gun? No? Well, I'll tell it to you. About sundown, one pleasant afternoon, I was roaming through the woods with no weapon of defense, when, to my horror, I saw a wounded bear running towards me with open mouth and foaming jaws. I hadn't the least idea what to do, so I did nothing; I stood still, scared to death. As the bear sprang upon me I instinctively put out my arm to protect myself, and my hand went into his mouth! Then a happy thought seized me! I thrust my hand in farther, grabbed hold of his tail, gave him a pull inside out, and he ran away from me back into the woods!"—Lippincott's.

A Queer Gem.

Among the many strange things found in the Philippines are bamboo opals, vegetable gems which are occasionally found in the stem of the bamboo. Not one piece of bamboo in a thousand contains one of these gems, for there, as elsewhere, the bamboo is usually empty. Accident, however, sometimes brings to light a small flint-like substance in the appearance of a real opal. These growths are called by the natives tobacur, and some of them reproduce the characteristics of the opal so perfectly that even experts may well be puzzled to detect them from the real gem.

Largest English Farm.

Lincolnshire has the biggest English farm. Over 2000 acres are under plow. The second largest is near Coldstream, in Northumberland.

NO USE FOR RAT TRAPS.

Why Thrifty Individual Wanted His Money Back.

A wealthy resident of Philadelphia who has recently built an expensive log cabin on an island in Penobscot bay tells of his experience with the fishing and farming population of the island when he was building his rustic residence. As many workmen were employed for all summer, the owner of the new home opened a small store to supply his help with tobacco and other needful articles, including groceries for those who lived in camps with their families. One day an old laborer named Grant came to the store and told the clerk that his home was overrun with rats, which destroyed every bit of food as fast as he took it from the store. The clerk showed him a wire rat trap and told him he would sell it at cost, and that if it did not satisfy him he could bring it back after giving it a fair trial. Grant took the trap home, but brought it back a week later, saying that he did not wish to purchase.

"Didn't it catch any rats for you?" asked the clerk.

"Every blamed one of them," was the reply. "There isn't a rat on the premises now, and that's why I brought the trap back, as I do not wish to pay out money for things that I cannot use."—Philadelphia Ledger.

Hindo Boy's Strenuous Life.

When he is four years old the Hindoo boy's time of idleness and happy freedom is over. His father then consults an astrologer as to which would be the luckiest day to send the son to school. When the date has been fixed he is given a bath, his very best clothes are put on and he is taken to pay a visit to the temple and to offer up sacrifice to the god of learning, praying that in his school life he may become learned and industrious. Then he is taken to school and a period of rigid discipline begins. If he is the first boy to arrive in the morning he is given one stroke of the cane across his back, and each boy as he comes get an added stroke, the last boy receiving an abundance. How fatigued that schoolmaster must be! If a child is very late indeed he is made to stand on one leg for an hour or hold his arms straight out before him or hold a brick high in the air. For every new lesson he learns he must give the master a present.

Coal Burned in London Grates.

London grates burn 40,000 tons of coal on a cold winter's day. The product of this is 480 tons of sulphur.

TO ADVERTISERS.

Frequent changes of advertisements is one of the main requisites for a successful result; we therefore urge our advertisers to change their ads at least once a month. Try and get such changes to us as early in the week as possible; never later than Thursday noon.

The REVIEW *is on sale at the Union News Stand, east bound railroad station, and at E. M. Laing's, 149 W. Front St.*

ELECTION NEXT TUESDAY.

Voters should not forget that next Tuesday is the day set for voting on the proposed amendments. At different times in these columns we have endeavored to throw all possible light on this important measure, and have given the opinions of many legal minds qualified to pass on this question; and now all that remains is for the voter to do his duty by voting for or against them next Tuesday.

ASSESSMENT LIST TO BE PUBLIC.

On December 20 the new tax act [illegible] into effect, one of the provisions of which requires assessors to make two copies of the assessment list, one of which must be filed with the City or Borough Clerk for public inspection.

It has been the custom of many assessors to sacredly guard their duplicate lists from the public, and instances have been known where citizens were refused point blank to be permitted to examine such lists. The new law will no doubt be appreciated and taken advantage of by the many who think their neighbors are being favored in this respect.

NEW JERSEY AT ANTIETAM.

Probably the most sanguinary one-day battle this country ever saw occurred at Antietam, Md., September 17, 1862. Of the 93,000 men engaged in that battle, 20,856 were killed or wounded—nearly twenty five per cent. of the entire number. At Chickamauga the percentage of the loss was nine, and at Gettysburg seven.

New Jersey furnished her quota of brave volunteer soldiers in that deadly fray, and it is proper and right that honor should be shown them, as was done Thursday by the unveiling of a monument on the battlefield. President Roosevelt, Governor Murphy and other notable men took part in the ceremonies.

COUNTY FAIRS.

County fairs will "be in season" for the next few weeks. As the *Youth's Companion* says: "Posters appear on rural fences, and groups gather at the blacksmith's shop to discuss the entries for the three-year-old and the free-for-all class. The women have finished the fancy work they intend to exhibit, and are nearly through with the preserving. As for the younger members of the family, there is at least a welcome interruption in the routine of life.

"That is the superficial aspect of an institution which is characteristic of American rural life; but there is more to it than appears on the surface. The county fair has a long and honorable pedigree. It comes down to us from the rural fairs of England and Scotland and Ireland, introduced by the early settlers of this country, and fostered and improved by their children. It has played a good part in American life, encouraging agriculture, improving the breed of horses and other farm animals, keeping alive a love for art even where it has been unable to teach a knowledge of it, and in general fostering the homely but useful and wholesome things of life.

"Its best work, perhaps, has been of a social sort. This annual gathering of families and individuals has provided—formerly, perhaps, more than now—the opportunity for making and renewing friendships, interchanging ideas, getting news and, in general, broadening the outlook.

"Changes in the conditions of farm life have made the agricultural fair less of social necessity than it once was, but they seem not to have lessened its popularity. We still gaze with unaffected joy at the largest pumpkin, and hang our wreaths of laurel on the neck of the prize porker.

FOUR HUNDRED BOYS KILLED

The following able editorial from the Newark *Evening News* is so important in its character, of such vital interest to every parent in this land, and echoes our own sentiments so accurately, that we have taken the liberty to quote it in full, in the hope that it will be given more than passing consideration by our readers. We think the suggestions given in the article should embrace the young men as well as their parents. We belong to the old-fashioned class who believe that young people are capable of reasoning for themselves, and if a plain open and shut proposition is placed before them which effects their life or death, that they will choose the one which offers life. True, they are more prone to take chances than those of more mature minds, but we have yet to hear of a young man who would deliberately go against the wishes of his parents when he was convinced that it was a matter of vital importance to follow such wishes. The trouble generally is that parents try to drive their children instead of using argument, coupled with reasonable requests. A combination between parents and boys will result more speedily and more effectively than any laws which may be enacted by legislators.

The article follows:

"Let us suppose a case founded on fact. Suppose 400 bright, intelligent American boys were arranged, in single rank, facing the men and women of this great country. These boys, let us say, are from every State in the Union, they represent every grade of society, they are in good health, happy, hearty and in high spirits. They go to school and give promise of becoming excellent, patriotic citizens and successful business or professional men; and some of them are manifestly destined to places of the highest honor and responsibility if their lives are spared.

And now suppose that some one with due authority should say: "Men and women of the United States; fathers and mothers; tomorrow is the anniversary of the birth of this great, humane nation. You may celebrate it in any way your patriotic impulses dictate, but if you insist upon using firearms and explosives of the kind in common use every one of these boys will be killed. Some will meet instant death, others will live but a few hours, many will linger for days and weeks in unspeakable agony, but for each and every one of these bright and promising boys a grave will be dug and a bereaved family will mourn ere another month goes by."

"What would be the reply of the men and women, the fathers and mothers, the officials and authorities who would gaze on that line of living, pulsating, promising young pupils? that bright, appealing array array of lads looking hopefully for the verdict? What would be the answer? It would be an outcry of horror against the proposed slaughter, an overwhelming burst of indignation at the very suggestion of paying such an awful price, in human life for the passing privilege of indulging in a noisy, dangerous and unnecessary pastime. This would be the answer were the conditions as supposed. The real, the shameful, the awful answer is, "Dig their graves."

"All the difference between the actual and the supposed facts is this: the boys are not visibly drawn up in line before the assembled population of this country. But the American people are warned authoritatively each successive year, the lists of fatalities are given, the inevitable results of playing with gunpowder, cannon, toy pistols, etc., are fairly blazoned in the public prints, and the number of boys who will probably suffer death in consequence is fairly estimated. But the answer of the people thus far has been, "Dig the graves."

"The number 400 is taken for the basis of these remarks, because the terrible aftermath of last Fourth of July's celebration has been gathered in, and the casualty and fatality statistics, as compiled by The Journal of the American Medical Association, show that 4,449 persons in the United States and Territories were injured on that day; of these 446 terminated fatally, and of the latter number 406 deaths resulted from tetanus alone. The estimate of 400 bright boys slaughtered to make an American holiday is therefore under rather than over the actual figures.

"It is certainly time that this awful annual tragedy were ended. What with new and more diabolic inventions, such as dynamite crackers and cheaper and more unsafe firearms, the list of killed and wounded grows even more rapidly than the normal increase of population. It is not true patriotism that prompts the use of these fatal weapons or that insists upon a celebration of only noise surcharged with danger. It is only a counterfeit sentiment. There are a thousand ways of celebrating our natal day perfectly free from such dreadful results, and, once introduced, they would ultimately become popular. This is proved by the eminently satisfactory celebration of other holidays without so much as a single explosion of any kind. But whether a new and different kind of celebration of the Fourth of July would be popular or not, the present annual sacrifice of 400 American boys to the Moloch of false patriotism through the agency of the toy pistol, the giant cracker and locksaw, should be absolutely and irrevocably abolished. New Jersey has provided her full quota of these fatalities, and should be among the first States to stop the sacrifice."

HERE is a little paragraph from the Newark Evening News which needs no comment whatever:

"Mayor Newton B. Smalley, of North Plainfield, criticises the Republicans of Plainfield because they talk too much. It is peculiar how the faults of an individual always make that person see distinctly the same fault in others."

"It Never Rains Roses;

When we want more roses, we must plant more bushes." Pay the premiums on an Endowment policy, which will bloom into benefits when you most desire them.

ADVENTURE WITH A LYNX

"Who'll tell us a good winter story?" asked Bob, as the family, all at home for the holidays, gathered about the glowing grate on a stormy winter evening; "a regular rouser of a yarn, all about fighting blizzards and such?"

"Indeed," said his sister, "I'd rather ...e something summery—a story will make us forget for a few mo... the snow and the wind and the ...

...ght do that" said Jack, the ...n, a young collegian who had ...summer vacation in the ...woods. He had not been ...e then until now, and had ...cies to tell of his adven...

...addling my canoe up one of ...ll streams which in Canada ...run off into swamps and ...et lost there. We were a ...y of boys living in those woods where, you know, there ...not a human being for many and many a mile away. And we had an experienced old hunter, a regular woodsman among us.

"After a while I began to see, so far as I could take time to see anything, that I was losing my stream and getting deeper and deeper into the swamp. And now I began to think of getting back to the camp, but how was I to do it? I had been turning and turning about wherever I could find water enough to float my canoe, until I had little idea how far I had come or in what direction the camp lay."

"I began to realize that when I took up my gun to fire that I might get an answering shot from camp, as we had agreed upon, to let me know how to find my way there. But just as I was on the point of firing I thought of looking to see how my ammunition was holding out. I didn't want to be in those woods all alone without any. And, in fact, I found plenty of shot but not a full charge of powder in my flask.

"So I didn't dare to fire. I gave two or three shouts, hoping my voice might reach the fellows; and just then I heard a growl right square above my head. I looked up and saw a pair of the brightest, wickedest eyes I ever looked at in my life, glaring down upon me.

"I didn't know what it was, but I had heard the hunters tell about wild cats—I didn't care much then, Bob, whether you called it lynx or not—so that I guessed it might be that kind of a thing. For a moment I thought he was going to spring down on my canoe, and I knew that if he did there was little hope for me, for they do say that of all ugly things to take you at a disadvantage they are about the ugliest. What could I do in my cramped quarters without a chance of a shot at swirling it if he didn't turn me over her and the water, which was most likely? Those little Canada canoes are tricky things to manage.

"Well, he didn't bounce down on me at once, and as soon as I had time to rally my wits I gave a quick movement with my paddle and managed to reach the shore. There was a stump there and I set my back against it just as with a snarl and a growl he gave a leap and came to the ground not fifteen feet from me.

"I couldn't see anything but a dark mass, not very large, and those dreadful eyes. I thought the brute was going to spring at me and I fixed my eyes on the flashing ones to try the old plan of intimidation that we read of.

"I knew he could see far better in the darkness than I could, and I kept my eyes fixed upon him. It really seemed to have an effect, for he crouched down and crept off to one side as if trying to get round behind me. I turned, too, never taking my eyes off him. On he kept, making a complete round about the stump and I turned with him.

"Well, he kept that up for hours, at just about the same distance from me. In making his round he would sometimes be entirely hidden by the shadows and then come out again so that I could see the dim outline of his form; but in or out of the shadow all the time those terrible eyes kept up their glare. My own eyes ached and burned with the strain. I tried to calculate how the time might be going.

"At last a yellow light began to steal over everything and the moon came up—a little beyond the full, but so bright as to make things almost like day. Then I could see the grayish brown of the fur of my foe as he still crept round and round me. "I gathered all my nerve and fired. With a terrible snarling growl, which sounded like the exaggerated me-o-o-o-ow of a dozen home cats, he tore the ground with his cruel claws—how thankful I was they were not trying themselves on me! I kept out of the way of his struggles for a few moments until, seeing that my shot had done good work, I ventured near enough to give him a rap on the head with my gun, and that was the last of him.

"The next thing I heard was the crack of another gun, and then some shouts and hurrahs which sounded rather musically to me, you may be sure. I shouted back, and before long the old hunter and one or two of the boys came up."

Suits of striped galatea, linen and duck, and for dress wear plain white linen, are shown for the little man who is put in trousers as soon as he can toddle. Small boys will wear broad sailor hats turned up a bit more at the brim edge.

Ambition.

I'd rather give the world a smile
Than preach a mile long sermon,
For honest laughter's worth the while,
And mirth is quite confirmin'.

There's medicine in "ghoulish glee,"
Rare tonic force in laughter;
But may my humor kindly be—
No bitterness come after.

I'd rather make a nation's jokes
Than preach a nation's sermon,
And tickle ribs with friendly pokes
Than set the race a-squirmin'.

"There goes that funny, funny man!"
O words more sweet than honey.
Besides, a reputash, like that
Is worth a pot of money!
Moral.
'Tis funny to be funny,
But
There is such a thing as money.

Growls from the Tiger.

Money is no object; most of us believe it a myth.

Most girls close their eyes when they are kissed; do you blame them?

The poor ye have always with you—often so close that they touch you.

Politeness is the salt of life you hate to have it rubbed into you when you are cut up.

A lot of people who should be spending good time getting good money spend good money getting a good time.

It does not make it right to do what you ought not to do when you don't do what you ought to do.

It is all very well to get a good start, but the start you get when some fool puts his cold hands down your neck may be too good.—Princeton Tiger.

A Perpetual Supply.

Ascum—If "brethren" is a synonym for "brothers," why not "sistern" for "sisters"?

Henpeck—Nonsense! I've often heard of a cistern that would dry up occasionally.—Catholic Standard and Times.

John Randolph met a personal enemy in the street one day, who refused to give him half the sidewalk, saying that he never turned out for a rascal. "I do!" said Randolph, stepping aside, and politely raising his hat; "pass on, sir, pass on, sir!"

The Exceedingly Poor Verses.

"O, how glad we are," murmured the exceedingly poor verses as they went limping across the magazine page with their poor, imperfect feet; "how glad we are that a great poet wrote us instead of some obscure beginner. Otherwise we should never have attained any degree of publicity."—Baltimore American.

By Proxy.

"This, I suppose," said the visitor, "is the gun your great-grandfather carried through the Revolution."

"Most assuredly not," haughtily replied Cadleigh Rich. "That was his gun, but his man carried it for him, of course."—Philadelphia Press.

An Expert.

"I'm glad to hear that you have changed your mind.

"Yes, since our daughter came back she can tell what nearly everything you use on one of the hotel menus stands for in plain English."—Record-Herald.

A Simple Puzzle.

Cussie—Cholly says he met you and—aw—that you wemarked he was a puzzle to you.

Miss Pepprey—Yes; he reminded me of the average puzzle the moment he was introduced to me.—So simple when you know it.—Philadelphia Press.

The Spiteful Thing.

Amy—The way you wear your hair is becoming.

Mamy—Oh, thank you, dear.

Amy—Becoming very, commonplace, dear, I was about to say.—Pennsylvania Punch Bowl.

How He Considered It.

"Well, I understand that you are as good as married," remarked the first young man.

"As good? Better—much better! I'm not even engaged," replied the other.—Judge.

An Inference.

First Visitor—What crime did this murderer commit?

Second Visitor—It must have been some crime against woman. Look at all the flowers he has got.—Life.

No Germs, in That Case.

Oh, what a happy world 'twould be
If Noah had selected
A certain day to have the ark
Entirely disinfected.

—Chicago Tribune

Two Ways of Retiring.

"When a woman wishes to retire from the world," says the Manayunk Philosopher, "she enters a nunnery. All a man has to do is to marry a famous woman."—Philadelphia Record.

The Rewards of Culture.

"I used to think it was nothing but time and money wasted to send a girl to college.

"Why, of course, the money is never missed. Even the one cent postage stamp frequently has a corner on the envelope.

"There's a brandy smash!" as the wall fell when a drunken man fell through a plate glass.

THE MIDNIGHT MAIL.

Resonant, full, and deep
Is the voice of the Midnight Mail;
It rolls through the shadowy realms of sleep
When the high moon gleams on the rail,
It startles the drowsing oak,
And the clustered pines reply,
And the gray battalions of goblin smoke
Hang moveless under the sky.

But oh, not the lordly notes
That waken the dreaming hill,
Nor the cloud-white plume that backward floats,
Nor the clamor that warns, "I kill"—
Not the drifting smoke above,
Nor the transient furnace-glare—
But the freightage of sorrow and joy and love
Which the Midnight Mail doth bear!

The great, swift wheels—the long
Yellow chain of squares agleam—
It is not for these that the poet's song
Is blent with the roar of steam.
Not the triumph of splendid arts,
Nor the prince of the passionless rail—
But the anxious eyes and the beating hearts
That wait for the Midnight Mail!
—William Hurd Hillyer, in Lippincott's Magazine.

HOW ADJUTANT CUMMINGS PAID

By SANDY REDTOP.

"WANT me, Major?"

"Yes, Adjutant, I do. I want you to give our guests here a little exhibition of hypnotism; will you?"

"Why, how did you know I could?" asked the soldier.

"Ah, catch me not knowing what you young dandies in the regiment are up to!" And the Major laughed, looked very knowing, and gave Cummings a playful tap on the shoulder.

"But, Major, if I gave it here, I should monopolize—"

"Tut, tut, young man! No apologies. It's all right, and the girls will be delighted. Come."

Cummings smiled, then consented, though with evident reluctance.

While Major Onderdork was informing his guests that Adjutant Cummings would favor them with a little entertainment, Cummings looked about the salon in quest of a suitable subject. His eye fell upon a young man near him. After the quick breath of delighted applause which the Major's announcement had elicited had subsided, Cummings, in a low but clear voice, told the company that at their host's urgent request he would show them a few effects of the hypnotic influence, provided he could obtain one or more persons as subjects. Here he looked at the young man he had already chosen, who, after a moment's hesitation, arose, bowed, and declared that he would allow Mr. Cummings to try him, but he feared he should prove unimpressionable. Then two or three others offered themselves, whereupon Cummings briefly thanked them all, but signified his choice of the first volunteer. It is not necessary to enter into the details of what followed. Suffice it to say that the Adjutant, dashing, handsome and popular, proved himself a perfect master of his art, and held the Major's guests entranced for over two hours. He influenced his subject so thoroughly, despite the unbelief the latter had expressed, that the company was at times hushed into positive awe.

At the close of the evening Cummings sought the Major and asked whether he had satisfied him.

"Perfectly, my dear fellow, perfectly!"

"Who is the young fellow I hypnotized?"

"That? Why, to be sure—that is Hargrove—Robert Hargrove—fine fellow, and first assistant cashier for the great L— Trust Company, on Beaver street."

A little later, the company broke up.

The son of a wealthy but eccentric father, Stanton Cummings had chosen to enter military life. In consequence, his enraged and disappointed parent had cut him off with a dollar. Amid circumscribed surroundings, on a limited salary, the disinherited man saved nothing, and spent more than he earned. Naturally, after a few years, he was largely in debt, but how he was to meet his obligations, ever growing, never troubled him.

Recently, however, his superior officer had hinted at the possibility of his dismissal from the army if he did not pay his debts. At the present time, therefore, his mind was greatly perplexed.

As succeeding days went by, Cummings was frequently seen in and about the offices of the L— Trust Company.

"Strange how that quiet Hargrove has frozen to that military chap!" remarked one acquaintance at the club to another.

One morning the dailies announced the startling news that the L— Trust Company had been robbed in broad daylight of fifty thousand dollars! No one could understand how the robbery had been so successfully perpetrated. But that the strong steel doors had been passed, the cashier's private vault entered, and the money taken, was certain. No clue to the thief could be discovered, and the police were confronted with a mystery.

"It's not the amount," remarked Cummings among his messmates, "but the way the thing was done that startles."

"You know Hargrove, don't you?" asked a brother officer.

Cummings regarded his questioner with a quick, inquiring glance.

"I do," replied he. "What of him?"

"Oh, nothing, only the Trust Company, I hear, are inclined to blame him somewhat in the matter."

"In what way?"

"Not in any particular way. But they think the success of the 'steal' may have been due to some neglect of duty on his part."

Cummings laughed.

"There never was a trustier man in the world."

"That's what everybody says," returned the other, "but Hargrove is so worked up about it that he proposes to resign."

"Well," Cummings remarked slowly, "I can't see why he should. It would look better to stay right where he is."

"That's true enough, Adjutant, but Hargrove is a sensitive chap."

Months rolled away; the robbery remained a mystery and the company of Beaver street fame had parted with their first assistant cashier, not so much at their desire as at that of Hargrove himself. The Beaver street magnates politely hinted regrets, for there were few among them but trusted him; but Hargrove was determined. He left the city and for years was heard of no more. Adjutant Cummings, too, had made a change, having left the army after paying up his debts. He then sailed away for parts unknown. The strong currents of metropolitan life swept other names and topics of interest along the social channels upon which moved the life with which these two had once been familiar, and soon they were forgotten.

* * * * * * *

One cheerful day in October, seven years after the disappearance of Cummings, the doors of the L— Trust Company were darkened by a tall man attired in foreign style, and carrying a small bag.

A stout clerk glanced up from his books. Then he started with surprise.

"Robert Hargrove, sure as I live!" he exclaimed.

"Hello, Martin! How are you?"

The clerk arose and shook Hargrove's extended hand cordially. After further greetings, the new arrival asked whether the President was within.

"Yes, he is," replied Martin, "and he will be glad to see you. Step right into his private office."

For the ensuing ten or fifteen minutes President Green was the most astonished man in New York. Hargrove's sudden appearance had naturally surprised him, but Hargrove's story, told briefly and rapidly, was almost too much for the genial gentleman.

"Why bless my soul, young man," he declared, "it is simply unprecedented—paralyzing—that's what it is! So that handsome Stanton Cummings was at the bottom of the mystery?"

"Yes, through his influence over me by means of his hypnotic powers. He frequently called here during business hours. I never suspected him until, one day, when we happened to be alone in the cashier's office he commenced to exercise his strange influence. I strove to resist him and call for help, but was unable to do either. In a moment I had passed into the hypnotic state, during which I was unconscious of all that passed around me. When I regained my senses I was alone. Looking about me I saw the door of the private vault ajar. A hasty examination proved, to my horror and dismay, that fifty thousand dollars were missing. Instantly it flashed upon me how the money had been taken, but in the absence of positive evidence, I decided to breathe my suspicions to no one and bear upon my own shoulders whatever blame the company was inclined to impose.

"As you know, I shortly after resigned my position. I felt utterly disgraced. One night the idea occurred to me to verify my suspicions of Cummings, and compel him, if he proved to be the thief, to relinquish the stolen money. The next day I learned that he had disappeared. Happily for me, however, I gained a clue to the direction in which he had gone and followed him. I spent over six years in travel before I finally tracked my man to his hiding. It was in the wildest section of Northwestern Australia. At Sydney I had learned that Cummings was with a party of gold-seekers, and that they had 'struck it rich.' When I entered his camp Cummings recognized me instantly, turned deathly pale and showed so plainly that he was guilty of what I had charged him with that I had no difficulty in making terms with the rascal. This bag," Hargrove concluded, handing his grip to Mr. Green, "will show how satisfactory those terms were. It contains a full equivalent in first class Australian securities for the fifty thousand dollars taken by Stanton Cummings from your vault."—Waverley Magazine.

Sugar a Timber Preserver.

Among new uses to which sugar has recently been put is the preservation of timber. Much interest has been aroused by the announcement, as the result of a prolonged series of experiments, of a method of so treating timber as to secure even from soft wood a largely increased toughness and hardness. The treatment to which the timber is subjected is, roughly speaking, that of saturation at boiling point with a solution of sugar, the water being afterward evaporated at a high temperature. The result is to leave the pores and interstices of the wood filled in with solid matter and the timber vulcanized, preserved and seasoned. The nature of moderately soft wood, it is claimed, is in this way changed to a tough and hard substance, without brittleness, and also without any tendency to split or crack.

Economic.

Old Uncle Ben wanted to have his portrait painted, but he did not care to pay very much for it.

"Surely that is a very large sum," he said when the artist named the price.

The artist protested and assured him that, as portraits went, that was very little to ask.

Uncle Ben hesitated. "Well," he said at length, "how much will it be if I furnish the paint?"—Lippincott's.

A Rare and Interesting Trophy.

SCALP-LOCK SHIRT RECENTLY RECEIVED AT THE AMERICAN MUSEUM OF NATURAL HISTORY.

A rare and interesting trophy is now on exhibition among the North American Indian collection in the new west wing of the American Museum of Natural History. It is the scalp-lock shirt worn in battle by War Eagle, the famous, fierce old Sioux warrior. More than ordinary interest is attached to this garment from the fact that it is said to be the only garment of its kind in existence—at least the only one that has yet come into the hands of the white man. Extraordinary and peculiar interest is attached to it from the fact that nearly two hundred or more human locks of hair cover the front and back portions of the same. These are all from the heads of victims slain either in battle or massacre during the early days of frontier life.

The material is of heavy buckskin made in primitive Indian fashion. Four rows of fine porcupine work, V shape, are stitched in the front and back, sewed with sinews, and to these bands are fastened the many locks of hair. The locks are of all grades and colors, many long and fine ones being undoubtedly those of women. The full history of the coat has not been ascertained.—New York Mail and Express.

Removable Shoe Sole.

Can Be Put on and Off Much Like a Skate.

A removable metal sole for shoes is a novelty which will be appreciated by many laboring men, more particularly those engaged in some classes of mill work, who are compelled to wear hobnail shoes in the performance of the daily labor, and who may not desire to be thus encumbered in going to and from their work. In a device recently brought out to meet this demand the metal sole can be taken off like a skate and laid aside until again wanted.

The removable metal shoe sole is shown herewith. It consists of a shape of the size and lines of a heavy shoe sole, with portions cut away to decrease the weight as far as possible. On the front and side edges are clamp pieces adapted to engage with the soles of the shoes and hold the metal sole in place, in much the same manner as is done in the case of locking skates. At a suitable point forward of the heel there is secured to the leather sole a plate with tongue-piece adapted to lock with the rear part of the metal sole and to hold the same rigidly in place, and yet to permit of its convenient removal when it is so desired. The wearing surface of the metal sole is furnished with points, much the same as those of the hob-nails. Besides being a very great comfort, this scheme is said to make a very great addition to the life of a pair of shoes, for the reason that the wear is equally distributed between the leather and the metal sole.

METAL SHOE SOLE.

Man's fondness for sharing his misfortune is equalled only by his hesitancy in whacking up his good luck.

How Hemp is Grown.

Hemp of the Philippine Islands, or rather the plant from which it is manufactured, is known in scientific circles as "musa textilus" and by the natives as abaca. It belongs to the plantain family, closely resembling the banana plant. The latter has a leaf similar

THE ABACA FROM WHICH HEMP IS MADE.

in shape to that of the abaca, but of a slightly darker green. The difference in appearance must be told by the expert; the inexperienced can tell the difference only by tasting the fruit. The abaca tastes like a green persimmon. Many of the natives are engaged in its growth and sale. It flourishes on hilly ground, and, like the banana plant, takes about three years to flower. When it comes to the flowering age it is cut down and made ready for scraping. The stalk springs up again from the roots, and soon begins its aspiration to go to seed. It is not permitted to do so, however, as the seeding process reduces the quality of the fiber.

The abaca grows to the height of eight feet, but is not a tree in any sense except that it gives shade. Its leaves run from its roots, enfolding the flower stem until near the top, when they branch out into great waving fans. The manner of growth can be compared to nothing in the United States except a young onion, which is not a fair illustration on account of the insignificant size of the latter. But the leaf layers are wound in that way, though they are fully a quarter of an inch thick and six inches wide.

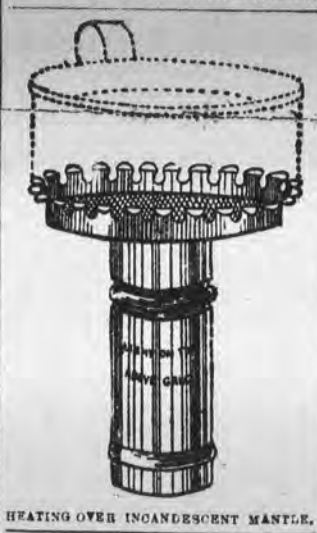
The whiteness of the hemp designates its grade, of which there are four. Binder-twine hemp is classed as "current," "fair current" and "brown." There are without doubt many tricks in this trade, and they are worked all the way from the lazy cultivator to the exporting agent and back again.

The pressing of hemp costs $1 a bale; the landing and shipping charges at Manila are thirty cents a bale. The freight to Manila averages about $1.25 a bale. The jobber's profit is enormous.

A great many things are made of hemp, from floor mattings to binder twine. The natives select the very finest of the fibre and weave a delicate fabric which is as expensive as the finest silk, and they make their rough garments of it as well. Sail cloth is made of it, and cordage, too. Manila paper is made of the rope ends; carpets are manufactured of it; it is used in upholstery and to make hammocks. It is asserted that Paris milliners use hemp in making bonnets. The time will come when new uses will be found for it and its waste, which is very large.

New Heater For Gas Jets

An attachment for boiling water and performing such operations on a jet filled with an incandescent mantle is among the recent novelties. There are



HEATING OVER INCANDESCENT MANTLE.

many attachments on the market for heating water over a fishtail burner, but with an incandescent burner such fittings are useless. The accompanying illustration shows an all-brass stove, which can be used under the circumstances by removing the mantle and chimney holder. It is asserted that it will boil a pint of water in about three minutes.

"The Little Father of the Russian Fleet."

At the recent celebration of the bicentenary of the founding of St. Petersburg the ancient craft above shown figured largely in the ceremonies. Concerning her the London Graphic says:

"This boat, it is interesting to note was presented to the Czar, Ivan the Terrible, by our Queen Elizabeth. When Peter the Great was a boy at Moscow, he played with this boat, and had her repaired so that he could sail with her in a lake. This led to the interest that he ever afterwards took in naval matters, and the founding of the Russian navy—his first war ships being little more than copies of this craft. He it was who christened her "The Little Father of the Russian Fleet," a name she has borne ever since, and in Russia she is regarded reverentially."

Of the children of school age in Russia 17,000,000 are receiving no instruction.

HORSES, DYING OF THIRST, DIG FOR WATER.

One of the most pitiable instances of the suffering caused by the prolonged droughts that have been reported from all over the world this season comes from Africa, whence a correspondent writes: "It is a common thing to see horses, when the surface water has dried up, digging in the sand to get water to quench their thirst, and it is surprising how deep they can dig. In the recent drought they were known to dig three and four feet down, and in many cases they struck the bottom without getting to water. Hundreds perished from thirst, and some died while in a weakened state from the sand giving way and holding them fast by the fore legs when down in a deep hole."

RAPID PHOTOGRAPHIC PRINTS.

Pictures Made as if Turned Out of a Printing Press.

The record for rapid photographic printing has been broken by a machine recently invented, and which is now engaged in the work of turning out prints for the publicity bureau of the Louisiana Purchase Exposition. This machine is a very compact affair, no larger than a small table. The cabinet seen in the illustration herewith reproduced, under the table top contains a 500 candle-power electric light, which is constantly in operation and which is covered, in order to concentrate all the light rays on the sheet of sensitive paper. The latter is held in place over the light by a device which is to be seen in the top of the table. The printing operation is performed by the manipulation of a treadle, which is moved back and forth under the table, and the prints are made almost as rapidly as this can be done. In fact, the speed of this machine is almost as great as a foot-power printing press.

The paper used in the machine is what is known as the developing paper, which is sensitive to artificial light. The sheets of the desired size are placed in some convenient place

RAPID PHOTOGRAPHIC PRINTING.

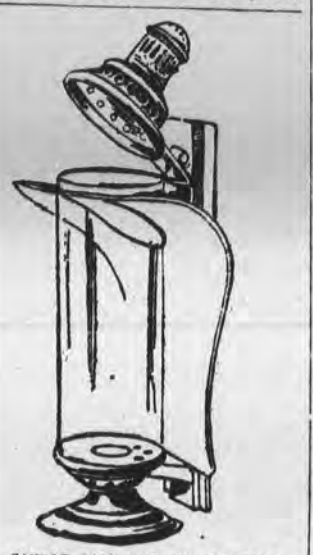
on the top of the table. The operator puts the sheet in place and drops the lid over it, which insures perfect contact of the paper with the negative. Pressure on the treadle opens a wing shutter under the table top, which heretofore protected the negative from the action of the light. A second or two at the most is sufficient for the exposure, and as the treadle is allowed to fall back into its normal position the shutter is again closed. Upon raising the lid the paper is projected by a spring attachment, leaving all in readiness for the succeeding sheet.

The operators at St. Louis have become very proficient with this clever bit of mechanism, and one of the young ladies recently established the record of 846 prints in one hour, the same negative being used during all that time. On another occasion, when it was necessary to make prints from thirty different negatives, 1500 prints were made in three hours. The latter task, under ordinary circumstances would have required the services of six men.

The prints made use of so lavishly by the Exposition authorities are for the purpose of advertising the event. The prints are sent to newspapers and journals of various kinds which make use of matter of this character.

New Safety Lamp.

A new safety lamp, the principal feature of which is that it cannot be opened by any unauthorized person



CANDLE LAMP FOR THE GERMANS.

has just been introduced in Bavaria. It is claimed that the lamp is especially adapted for use in factories where combustible goods are manufactured. Special candles, burning twenty hours and giving perfect light, are provided. The lamp is finding a ready sale in all parts of Southern Germany.

Essential.

"The tall silk hat," observed the student of affairs, "is an essential part of the equipment of the man who would be anybody in society. For it is only the man who doesn't care to butt in whose head is hard enough not to need the protection."—Puck.

A Pungent Record.

A bride in some parts of Switzerland receives from her friends a Gruyere cheese. It is not eaten, but is preserved by her, and all the important family events are marked on the rind.

The expert accountant generally speaks figuratively.

Most of us can find fault without the use of a search warrant.

TO RESTORE POLISH.

Four tablespoonfuls of turpentine, four of sweet oil, one of lemon juice and ten drops of ammonia make a dressing to restore the polish of mahogany. It should be shaken thoroughly before using and applied with a soft cloth.

CLEANING SILVER.

The following plan is highly efficacious for cleaning [illegible] which have been out of use for some time and have become discolored. Dip a soft cloth in sweet oil first, and then in powdered whiting or whiting. Rub the silver with a piece of Bulgaria until the stains disappear, polishing the other side; polish it with dry whiting, and give a final rub with a clean cloth.

HOUSEHOLD ECONOMY.

"Economy," remarks the resourceful Jerome, "is not buying what you don't want when you want it, in order that you may buy what you don't want when you have no earthly use for it." This aptly characterizes the state of being in many households. That a plaque or a plaster image may be purchased the supply of needles is allowed to reach the minimum of a broken one, pins have to be hunted for in unswept corners, cord and tape are luxuries. Anybody knows that a house without "medium black silk," "No. 60 cotton" and a generous supply of "No. 8s" is in reality an abode of squalor and utter misery.

USEFUL BORAX.

In the laundry borax has long been used and appreciated, but within the last few years it has been prepared according to such modern and scientific processes that now no one who delights in the fine dressing of linen should be without it. Borax produces the desired gloss, prevents the iron from sticking, and finally proves a source of economy both in the wear of the linen and in the labor spent on the ironing. Moderate pressure and ordinary skill will achieve equally good results. There is also no limit to the softening influence of borax, and the desirability of having it in the bathroom and on every toilet table, where only hard water is obtainable. Borax will be found useful in the laundry, where it aids and hastens the results achieved by good soap.—Brooklyn Eagle.

COLLAPSIBLE FURNITURE.

Collapsible and transmutable furniture is the most desirable kind that can be offered to the denizen of city flats these days, and, though much of it is of doubtful utility, much of it may be absolutely indispensable to the dweller. The trunk which [illegible] can be made to do duty as a dressing or writing table, appears to be a fascinating piece of furniture, and if it is as represented it will be eagerly sought after by the occupants of hall bedrooms and tiny flats. Baby fixtures, such as cribs and carriages, which can be folded up or turned into something else when not in use, have obvious advantages in homes where it is difficult to find room for children, and a table which has a best dress for cards and tea and an everyday surface for the pressing of skirts and trousers and similar necessary and boring occupations needs no recommendation.—New York Tribune.

Tomato Salad—Scald whole tomatoes, peel them, put on ice until cold; make a mayonnaise dressing; have small lettuce leaves in water; when ready to serve drain them and dry in a towel; arrange on a platter; cut the tomatoes in halves, crosswise; rest each half on a lettuce leaf; sprinkle with salt and pour over a little vinegar and put one tablespoon of mayonnaise on top of each.

Coffee Caramels—In an agate saucepan put one pound of brown sugar, one cupful of strong coffee, one tablespoonful of butter and one-half of a cupful of cream. Boil together without stirring until a little dropped in cold water is quite brittle. Pour into greased pans and when cooled mark off in squares with a knife. If desired grainy stir for a moment until the candy looks cloudy, then pour out quickly.

Chocolate Cream—Mix five level teaspoonfuls of cornstarch, half a cup of sugar and a pinch of salt; rub it smooth in one-third cup of milk; add it to two cupfuls of scalded milk; stir and cook over hot water ten minutes; melt one and a half squares of chocolate; add three tablespoonfuls of hot water to it and add it to the cornstarch mixture; stir until smooth; add the whites of two eggs beaten stiff and one teaspoon of vanilla; turn into a mould, put on ice and serve with cream.

Stewed Watercress—Trim off the coarse ends of the cress, wash it well through several waters and then throw into a saucepan of boiling salted water, cook until just tender, but not too long. Drain and press out all the water. Melt two ounces of butter in a saucepan, add the cress, sprinkle with a little flour, stir carefully over the fire for ten minutes; then pour in a cup of good broth, season with a little grated nutmeg, salt and pepper; boil ten minutes longer, stirring constantly. Turn into hot dish, garnish with croutons of fried bread and hard boiled eggs sliced or cut in halves.

Reindeer Meat.

No less than 174 tons of fresh and smoked reindeer meat were sent last year from Uleaborg to the interior of Northern Russia. The reindeer skins go chiefly to St. Petersburg, where they are treated in the local tanneries.

Zanzibar Copra.

During the year 1902 there were exported from Zanzibar over twenty [illegible] pounds of copra, valued at a over $625,000. It went almost to Marseilles, France.

Russian Sugar.

[illegible]g to official returns there [illegible]ugar mills in operation in [illegible]ussia last year. The beet [illegible]ountry amounted to nearly [illegible]ns, while the area under [illegible]s 1,310,000 acres. The [illegible]e all situated in the west- [illegible]and cis-Vistula provinces

[illegible]tly cured. No fits or nervousness after [illegible]ay's use of Dr. Kline's Great [illegible]$2 trial bottle and treatise free. [illegible]., Ltd., 931 Arch St., Phila., Pa.

Wild Animals in Captivity.

[illegible] captivity changes animal [illegible] nature. A lion captured when it is full grown will always be treacherous, but lions, tigers, leopards or other carnivorous animals that have been born in captivity can be tamed till they are quite as gentle and affectionate as poodle dogs.

Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free. F. J. CHENEY & Co., Toledo, O.
Sold by Druggists, 75c.
Hall's Family Pills are the best.

Homing Instinct of the Horse.

When Dr. Erwin's possessions were in transit between Oklahoma and Morrill, Kan., last March, a fine Arabian horse was lost from the car. The [illegible] turned up last week at its old [illegible] in Oklahoma and was all right.—Kansas City Journal.

$10 Big 500-Pound Steel Range Offer.

If you can use the best big 500-pound steel range made in the world, and are willing to have it placed in your own home on three months' free trial, just cut this notice out and send it to SEARS, ROEBUCK & Co., Chicago, and you will receive free by return mail a big picture of the steel range and many other cooking and heating stoves; you will also receive the most wonderful $1.00 steel range offer, an offer that places the best steel range or heating stove in the [illegible] any locality, and by which you can [illegible] ugh [illegible] w [illegible] carcass th [illegible] swirling s [illegible] is generally a financier with her and [illegible]aces.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c. a bottle.

H. H. GREEN'S SONS, of Atlanta, Ga., are the only successful Dropsy Specialists in the world. See their liberal offer in advertisement in another column of this paper.

Most of the excuses have already been invented.

Piso's Cure cannot be too highly spoken of as a cough cure.—J. W. O'BRIEN, 322 Third Avenue, N., Minneapolis, Minn., Jan. 6, 1900.

They come high, but we must have 'em—air castles.

PUTNAM FADELESS DYES color more goods, per package, than others.

A woman may not believe everything she hears, but she remembers it just the same.

DYSPEPSIA OF WOMEN.

Mrs. E. B. Bradshaw, of Guthrie, Okla., cured of a severe case by Lydia E. Pinkham's Vegetable Compound.

A great many women suffer with a form of indigestion or dyspepsia which does not seem to yield to ordinary medical treatment. While the symptoms seem to be similar to those of ordinary indigestion, yet the medicines universally prescribed do not seem to restore the patient's normal condition.

Mrs. Pinkham claims that there is a kind of dyspepsia that is caused by derangement of the female organism, and which, while it causes disturbance similar to ordinary indigestion, cannot be relieved without a medicine which not only acts as a stomach tonic, but has peculiar uterine-tonic effects as well.

Thousands of testimonial letters prove beyond question that nothing will relieve this distressing condition so surely as Lydia E. Pinkham's Vegetable Compound. It always works in harmony with the female system.

Mrs. Pinkham advises sick women free. Address Lynn, Mass.

CHILDREN'S DEPARTMENT.

A CURIOUS OCCURRENCE.

Wee Willy Nilly ran gaily away
To green grassy woods one fine summer day.
So weary she grew, the sweet little maid,
She lay down to rest in the cool, pleasant shade.

Now what happened next is certainly queer,
And sadly perplexed the poor little dear,
But, strange though it be, I really can't doubt it,
For Willy herself told me all about it.

She scarcely was settled, and taking her ease,
When birds circled round her in flocks from the trees,
While squirrels and rabbits and like quadrupeds
Stared solemnly at her or stood on their heads.

The birds chirped and chattered and fluttered their wings,
The "beasties" turned handsprings and did lots of things.
At last a pert bunny climbed up on a stump
And cried, "Willy Nilly is such a sad gump!"

Then wee Willy Nilly arose in dismay,
Determined to drive the rude rascals away.
But, presto! before she could speak, in her fright,
The whole saucy circle quick vanished from sight.

—Washington Star.

A MYSTIFIED CROW.

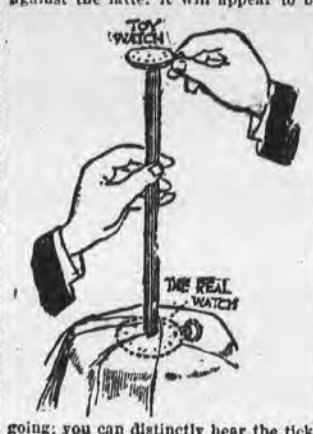
During a piazza game of ping pong, one of the balls was sent quite a distance out over the lawn, where a crow seized it and bore it off in triumph, evidently thinking it was an egg. After much pecking from all of which the frolicsome little ball bounced away unbroken, the crow had an excited consultation with several of his fellows, and then deliberately carried the ball to the top of a high tree and let it drop. Again the assembly of black feathered experimenters gathered around in amazement. Was there ever such a remarkable egg? It had fallen from a height that played havoc with their eggs and their little ones as well, and yet survived intact! Then one after another trainped on it, cawing loudly all the while.

At last, in sheer exhaustion and disgust, they all gave it up, flew to the top of their favorite tree, and, still cawing loudly, watched one of the ping pong players come out from the house and carry off this invincible egg that had baffled their boldest attacks.—New York Tribune.

MICROPHONIC TRICK.

Here is a curious illusion in accoustics based on the conductibility of sound through wood.

Take a long stick and at one end place a real watch and at the other a toy watch. If you will set your ear against the latter it will appear to be

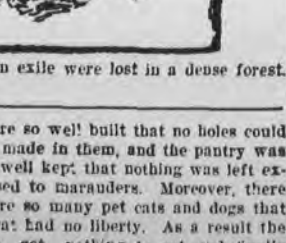


going; you can distinctly hear the ticktack, a fact which will produce the illusion that it is a real watch. The sound of the ticking has been transmitted through the wood because of the conductibility of wood.

In default of a toy watch you can simply place your ear at the bare end of the stick and you can hear the ticking of the watch at the other end just as if it were beside your ear. With this experiment you can perform a little trick; conceal the real watch under a cloth and place the toy watch in full view at the other end of the stick. To those uninitiated the ticking to be heard will appear marvelous.—New York World.

THE PHANTOM PIN.

In studying the properties of the reflection of light there are numberless interesting experiments to be performed. One is herewith presented: Take a cork and cut it out into the form of a disk of about the thickness of an inch. In the centre stick the point of a pin. This done, take a glass



about three-quarters full of water and place the cork upon the surface of the water with the pin below. Now if you will look at the cork from above you will not see the pin, but if you will alter your position and diminish the sense of the visual ray by placing the eye on a parallel with the table on which the glass rests, you will perceive a pin above the cork.

FABLE OF TWO RATS.

A rat seeking a place in which to live chose a palace, saying he preferred a high life, while his companion chose a hut, saying he was content with less. But the palace was found to be a poor place for a rat. The walls and floors were so well built that no holes could be made in them, and the pantry was so well kept that nothing was left exposed to marauders. Moreover, there were so many pet cats and dogs that a rat had no liberty. As a result the rat got nothing to eat and finally starved to death—all from trying to live in too high "style."

The other rat found the hut just what he wanted. There were plenty of holes, the provisions were poorly protected, the barn was near by. The cottage rat, accordingly, lived in plenty and enjoyed what was really high life for a rat. "For," he said, "a palace has fewer opportunities for a rat than a hovel, and they who aspire should consider what the advantages for them are in the places which they seek."

A WARSHIP'S MASCOT.

The mascot of the battleship Massachusetts is a three-legged dog named Rodger. The dog was brought to the ship at Culebra Island, West Indies. When the ship was in New York harbor last winter the dog was allowed to go ashore with several of the men, and while on the dock was attacked by Bum, the mascot of the training ship Hartford.

For a while both dogs put up a game fight, until Rodger slipped and caught his right hind leg between two planks. This was an opportunity for Bum to get the better of Rodger, and he rushed at him and burying his teeth in the back of Rodger's neck, tried to shake him. As a result the mascot of the Massachusetts had his leg broken, and the boys separated them and carried their pet to the hospital, where it was found necessary to amputate it.

On his return to the ship Rodger was unanimously elected an honorary member of the crew.

Americans Own Homes.

There are over seven and a quarter million families living in their own houses in this country. More than a million acquired homes in the last ten years.

French Possessions in Asia.

Historical Puzzle.

Two of Roger Williams' companions in exile were lost in a dense forest. Can you find them?

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "CROSS BEARING."

The Rev. James E. Holmes Urges Us to Have the Paul Spirit of Courage and Contentment, Even When We Stagger Under a Load of Adversity.

BROOKLYN, N. Y.—In the Summerfield Methodist Episcopal Church Sunday morning the pastor, the Rev. James E. Holmes, had for his subject "Cross Bearing." He took as his text Matthew xxvii: 32: "And as they came out they found a man of Cyrene, Simon by name; him they compelled to bear His cross." Mr. Holmes said:

Three kinds of crosses were in use in the days of Jesus, the so-called St. Andrew's cross, the cross in the form of the letter "T" and the ordinary Latin cross. It was on the last of these that Jesus suffered crucifixion. This consisted of a strong upright post, which was carried beforehand to the place of execution, and two cross-pieces, which were born by the victim. It was these transverse pieces which proved too heavy for the Master. It was probably between the hours of 9 and 10 o'clock in the morning that that memorable procession, of which Jesus was the central figure, set forth for the place of execution; a place outside the city walls. Ordinarily such a procession was in charge of a centurion, and preceded by a public crier, who from time to time proclaimed aloud the nature of the crime. He also carried a white wooden board on which this was written. The longest route was always selected, and the most crowded streets, to attract the attention of the people. Each of the condemned would be accompanied by a guard of four soldiers, and, as a matter of course, a great crowd would follow. The weight of the cross soon proved too heavy for the exhausted strength of Jesus. You must remember He has not tasted food or drink since the Paschal supper the night before, and that events had occurred since then in quick succession, every one of which must have stirred His soul with deepest emotions. The betrayal by Judas, and the farewell to His disciples had occurred, after which He had spent some hours alone in Gethsemane, engaged in a terrific mental and spiritual struggle. It was then, as you remember, that His enemies found Him, since which time He has stood surrounded by enemies, practically alone; for His disciples had all forsaken Him. Meanwhile He has been hurried from place to place and from one official to another; from Annas to Caiphas, then to Pilate, then to Herod, and then again to Pilate. Indignity upon indignity, torture upon torture have been heaped upon Him all that livelong night and all that morning, so that it is not to be wondered at that the weight of the cross was too great for Him. Up to the last gate, however, He managed to drag it, but here He sank exhausted beneath the heavy load. It happened just then that this man, Simon of Cyrene, came upon the scene, and him the Roman soldiers seized and compelled to carry the cross the remainder of the way.

On first thought it might seem strange that the people would permit such an indignity put upon a fellow Jew, but this Simon was undoubtedly a foreigner, which his dress would indicate, and the soldiers would know that it was safer to put this humiliation on a foreigner than upon a native of Jerusalem. As it was, the people do not seem to have resented it, that a fellow Jew had to suffer the defilement of bearing a heathen cross, and this may have been the explanation that Simon was a foreigner, and only a proselyte Jew. How greatly surprised and chagrined he must have been, to be thrust so unexpectedly into such a predicament! How it happened that he was there walking abroad on a fast day we do not know. He may have been idly strolling along that country road without any particular aim or purpose in view, or he may have lived outside the city walls and was entering the city on business or to worship or merely on pleasure bent. We cannot know how to explain his presence there on that road between Calvary and Jerusalem just at that moment when some one was needed to bear the cross of Christ, but it happened that he appeared on the scene just as Jesus sank beneath His load, and he finds himself seized by the Roman soldiers, and despite his remonstrances, compelled to bear the cross of Christ. It is all so sudden, and so unexpected, that he can scarcely know whether it is not all a dream.

We see it all as he did not. We see in Simon's experience that for which we would gladly give all that we have. And why could he not appreciate it? Was it ignorance on his part? Had he never heard the name of Jesus of Nazareth? Had he not heard of those strange and startling events that had been stirring Jerusalem of late? To him it only appears as an unfortunate accident that he happened to cross the path of this man Christ on the way to execution, just as He sank down under the weight of His cross. As it is, he considers himself abused, humiliated, disgraced, and now he longs for the moment of release, that he may hide himself from the gaze of the people and bear in silence the defilement that has come upon him and upon his house.

And now I wish to place alongside of this, and in contrast to it, the words of the apostle Paul, "God forbid that I should glory save in the cross of Christ." To Simon the cross of Christ means disappointment, disgrace and loss; to Paul it is the one thing glorious and worth rejoicing over. How explain the difference in sentiment? It will not do to say Paul is simply dealing in a figure of speech, while Simon actually suffered the weight and the disgrace of an actual cross, for Paul bore the cross of Christ as actually as Simon.

It was the cross that brought him into conflict with the authorities and with mobs; it was the cross that drove him from place to place, a vagabond on the face of the earth; it was the cross that brought him into prison, and into danger; it was the cross that made him a disgrace, and his name an execration wherever there was a Jewish synagogue. Paul suffered loss and pain and humiliation over and over again on account of the cross. Call it a figure of speech if you will, but his back was bent, and broken; his bodily pains were as genuine, his humiliation was as deep and his loss as great as came to Simon of Cyrene and far more so. The experiences of the two men were very similar, almost identical; for it was on a country road leading into Damascus that Paul first came face to face with Jesus Christ, and it was then and there that the cross of Christ was laid upon him. And that from that moment until he died he bore that cross, feeling keenly the weight of it, the humiliation of it, the loss it occasioned him, but, unlike the other men, glorying in it and rejoicing on account of it. Why the contrast? Ah! Paul understood the cross, its meaning, its purpose, its power; Simon did not. Paul saw that that cross, instead of being the instrument of torture and shame, was on the contrary God's saving and sanctifying instrument among men. In that cross Paul beheld the method and the means whereby the transcendent plan of the Almighty to save this sinful world was made possible. Now any accident, or any providential occurrence that linked him to that cross, and thus to the glorious purposes of the Lord, Paul rejoiced in and counted most fortunate.

And now, my friends, I ask you to consider for a little while these two methods of cross bearing. The world is divided into Simons and Pauls; I am almost tempted to say equally divided, but perhaps not. On the one hand there are the people whose lives are a perpetual groan and complaint, and their burdens are not imaginary, either. Their backs are bent and breaking; their hearts are wounded to the very core; their souls are crushed. Life is a great disappointment. It was not ever thus with them; no, it is of comparatively recent happening. Almost without a note of forewarning, in a moment, in the twinkling of an eye, they have had thrust upon them an unspeakable sorrow, or some appalling responsibility, or some irksome restraint, or perhaps it is an overwhelming disgrace. Now are they like Simon of Cyrene, full of bitterness and resentment, struggling along under their burden with dogged persistence, but finding no joy and no profit in their cross. On the other hand, there are the Pauls; the men and the women that are bearing burdens just as real and just as heavy as the others. They have their own responsibilities and restraints, their own sorrows and disappointments, and they are as heavy to carry, and as painful, too, as men ever have in this life. But what a contrast they present! for their life note is joyous and triumphant, notwithstanding the cross on their backs. Simon is the man who is bearing his lot in gloomy and sullen silence, and bearing it in a way that makes you feel he is none the better for having to do it. Paul is the man whose sufferings and losses you can plainly see are the explanation of his buoyant and courageous spirit. His lot, disagreeable and difficult as it is, he accepts, not as the other man, with bitterness and resentment, but in that spirit of faith and obedience that God has a right to expect from all His children.

I know there are some to whom this will sound strange and perhaps impossible, and I know they are conscientious and religious people. They accept it as a fact that men must expect to be suddenly halted in life, and, like Simon of Cyrene, made to bear some heavy and humiliating cross, and they endeavor to be stout-hearted and brave under the ordeal, but it is always and only a disagreeable and unfortunate circumstance in their lives, and they resent it and hate it as did Simon, and that is all. They never seem to find the source of strength and happiness in their cross. Now, is it true that the Paul attitude and the Paul spirit are possible? Possible to the average man, I mean? Or do they require the Paul conversion and the Paul visions? Is it true that the Paul spirit is possible in ordinary life, or must one have first caught a glimpse of the third heaven? I ask you to ponder this query, in the hope that we may clearly see and be convinced that it is no unattainable principle for any man, anywhere in this world.

Here are two young men—classmates at college, or shopmates, if you please, in the same office or factory. The one is about as diligent as the other and about as successful. Nevertheless, there is a marked difference. The one finds study or business, as the case may be, irksome and enjoys it neither inspires nor develops him. He simply does what he does because he ought to or must, and his whole life is nothing more than a stolid persistence lacking the heartiness and the hopefulness of the other. The other man is no better scholar, no better workman or business man, but he is a contrast, notwithstanding. Whether it is study or business, he finds his joy and inspiration in what he does, and does what he does from a spirit of love. There are the same restraints, the same burdens upon both, but the one exults in them and is developed by them, where as the other is full of resentment, and is in no way benefited. While the one is full of enthusiasm and anticipation, the other is heartless and crushed. The one is Paul, the other is Simon.

People used to wonder why George William Curtis, the distinguished and gifted editor of Harper's Magazine, entered the lecture field. He was known to have a lucrative position and a considerable income from his writings; and so it seemed strange to many people that he should take up lecturing, with its inconveniences and risks. Some were inclined to regard him as mercenary, but on his death the explanation appeared. Years before, so it is said, Mr. Curtis had engaged in a business enterprise with a friend which proved unfortunate for both. It was in order to meet all the obligations incurred by the firm which bore his name that necessitated his going on those extended lecture tours; and Mr. Curtis lived long enough to retire from the lecture platform—and that, too, after he had paid every dollar of indebtedness, with interest. Some might say that is superfluous honesty, and yet many men there are to-day who would do this very thing Mr. Curtis did, and as a matter of fact the number of men who have done so in the past is not small. Indeed, there are men living in our midst who are striving to do this self same thing. But all men do not manifest the same spirit in this otherwise noble task. One man will act as if he were a bond slave, and while he is faithful to his duty, does it in a cheerless, heartless manner, apparently finding nothing in his hard experience to rejoice in or be thankful for. He goes about his task as Simon bore the cross—cursing the luck that brought him to the hour, and full of bitterness and resentment on account of it. Without heart or inspiration, and without comfort or joy, he takes up his cross and trudges toward Calvary. On the other hand, there are men to whom these heavy tasks become an inspiration and a source of strength; who are finding their happiness and their development in carrying the cross, a happiness and a development that they would otherwise never have known.

If you and I are to have the Paul spirit of courage and contentment, even while we stagger under the heavy cross, it can only be by the way of the Paul attitude toward God and the Paul relationship to Jesus Christ. This is the same Paul who wrote, "We are children of God and if children then heirs; heirs of God and joint heirs with Christ;" the same Paul who wrote, "All things works together for good to them who love God." Afterward Simon of Cyrene understood the cross of Christ, and then he became a Paul. Though the authorities turned him out of the synagogue as defiled, though he and his family became ostracised, it mattered little to them, since they could clearly see how great a good had come to them in the form of misfortune.

And do we not see how true this is of many people about us? Do we not see that the burden of the family to that young mother, and that the new and heavy responsibility to others were just what they needed to round out their characters and to fill their careers with force and strength?

And whatever may be the form of the weight of the cross laid upon us in this life my friends, let us remember these two things: That it is possible, like Paul, the apostle, to find the inspiration and joy of our lives in the cross; and, further, that it must be so if our attitude toward God is one of faith and obedience and our relationship to Jesus that of a loyal and loving disciple.

God's Gifts.

Into all our lives, in many simple, familiar ways, God infuses this element of joy from the surprises of life, which unexpectedly brighten our days and fill our eyes with light. He drops this added sweetness into His children's cup and makes it to run over. The success we were not counting on, the blessing we were not trying after, the strain of music in the midst of drudgery, the beautiful morning picture or sunset glory thrown in as we pass to or from our daily business, the unsought word of encouragement or expression of sympathy, the sentence that meant more for us than the writer or speaker thought—these and a hundred others that every one's experience can supply are instances of what I mean. You may call it accident or chance—it often is; you may call it human goodness—it often is, but always call it God's love, for that is always in it. These are His free gifts.—H. W. Longfellow.

Entirely For Itself.

No nation has a right to live entirely for itself any more than an individual.—Rev. Dr. Woods, San Francisco, Cal.

Kitty Ate the Newfoundland.

The jungle rub fad of the foolish is very profitable to animal dealers who reacquire them after they have been half reared at perhaps a quarter the price at which they were sold. A dealer recently received a letter says Leslie's, from a lady who had bought a whelp lioness, which runs as follows: "Please come and take Kitty away. She has eaten our Newfoundland dog."

When a difference of opinion arises it is sometimes wise to split the difference.

The crook can easily make a name for himself by adopting an alias.

Why He Was Happy.

The old man on the lanky nag was chuckling to himself when the neighbor rode up.

"Why are you so happy, Rufus?"

"Can't help it. Certainly it is an ill wind that blows nobody no good."

"What do you mean?"

"Why, just as my wife was about to give me a two-hour lecture a cyclone come along and blew her into the next county."—Chicago News.

Zanzibar Trade.

Ivory, hippopotamus teeth, rhinoceros horns, oilseeds, nuts, beans, rubber and wax are now the principal exports from the Chinde district of the Zambesi River.

FALL KIDNEY CHILLS.

With the chilling air of fall comes an [illegible] and dropsy signs vanish. They extra tax on weak kidneys.—It's the time [illegible] urine with brick dust sediment, Doan's Kidney Pills are needed—now high colored, pain in passing, dribbling, recognized the world over as the chief frequency, bed wetting. Doan's Kidney Kidney and Bladder remedy. Pills remove calculi and gravel. Relieve Aching backs are eased. Hip, back, and heart palpitation, sleeplessness, headache, loin pains overcome. Swelling of the nervousness, dizziness.

DEERFIELD, IND.—"It was called rheumatism. I could get no relief from the doctors. I began to improve on taking Doan's sample and got two boxes at our druggists, and, although 68 years of age, I am almost a new man. I was troubled a good deal with my water—had to get up four and five times a night. That trouble is over with and once more I can rest the night through. My backache is all gone, and I thank you ever so much for the wonderful cure Doan's Kidney Pills."

JAS. H. BROWN,
President, Ridgeville Banking, State Bank.

BAXTER SPRINGS, KANSAS.—"I received the free sample of Doan's Kidney Pills. For five years I have had much pain in my back, which physicians said arose from my kidneys. Four boxes of Doan's Kidney Pills have entirely cured the trouble. I think I owe my life to these pills, and I want others to know it." DAVID DAVIS,
Baxter Springs, Kans.

FALMOUTH, VA.—"I suffered over twelve months with pain in the small of my back. Medicines and plasters gave only temporary relief. Doan's Kidney Pills cured me." F. S. HUGHES,
Falmouth, Va.

Charming Japanese Children.

Nowhere are children more cherished than in Japan. Their parents are devoted to them, and are constantly with them, carrying them about, watching and joining in their games, and apparently never so happy as when with them. Other peoples might come in for a great share of admiration, and fathers seem to have as much pride in their offspring as mothers.

It is amusing on a fine morning about six o'clock to see half a dozen men sitting on a low wall, each with one or two little children whom he plays with and pets. The little folks are led to show off their cleverness, and, judging from appearances, they form the main interest of their fond elders.

One would imagine that with so much petting children must be spoilt and disagreeable. The contrary is the case, the children of Japan being the most well-behaved and charming little people in the world.—Philadelphia Telegraph.

The Weight of Ice.

In order that consumers may determine whether or not they are receiving the correct weight of ice a very good method to employ, next to weighing the ice itself, is to measure it very carefully with reference to its length breadth and thickness, and then compute the weight by the following method: We know in the first place that one cubic foot of water weighs 62.5 pounds, under ordinary conditions, and that the weight of any volume of ice is just ninety-two one-hundredths as much as the weight of the same volume of water. Therefore, one cubic foot of ice weighs ninety-two one-hundredths as much as the same volume of water. This equals 92 times 62.5, or 57.5 pounds. Hence to determine the weight of the ice take the product of the three dimensions divide by 1728 (since there are 1728 cubic inches in a cubic foot) and multiply by 57.5. The result will be the weight of ice in pounds.—New York World.

Sporting Meteorology.

"On the car the other day I overheard a short dialogue conducted certainly under cross purposes," said Will Hedger. "An old gentleman, somewhat hard of hearing, sat by me. A young fellow came in and, referring to the prevailing Little Rock summer custom, said:

"'Well, we won.'

"'Yes, pretty warm,' assented the old gentleman.

"'Eight to one,' continued the youth, referring to the score.

"'Worse than that, 92,' the old man gave answer, referring as before to the weather.

"Then the young men changed seats and found more congenial companions with whom to discuss the ball game."—Arkansas Gazette.

Even the blind beggar may have an eye for business. N. Y. Sun.

Black Hair

"I have used your Hair Vigor for five years and am greatly pleased with it. It certainly restores the original color to gray hair. It keeps my hair soft."—Mrs. Helen Kilkenny, New Portland, Me.

Ayer's Hair Vigor has been restoring color to gray hair for fifty years, and it never fails to do its work, either.

You can rely upon it for stopping your hair from falling, for keeping your scalp clean, and for making your hair grow.

$1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

ANNUAL SALE, TEN MILLION BOXES

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

Clerk at the Speaker's Desk.

The speaker's right hand man is called "clerk at the speaker's desk" and is one of the most useful men in the house of representatives. It is his business to know things, all things; in fact, everything connected with legislation. He must know parliamentary law, precedents of the house and must have them ready at a second's notice, so that they may be cited by the speaker or the chairman of the committee of the whole house whenever a point of order is raised or a parliamentary point is to be decided. He must know all the members of the house and from what state they come in order to tell the speaker or the chairman how to recognize them when they address the presiding officer. He must know all the secretaries of the president and clerks of the senate, so as to tell the presiding officer when there is a message from the president or the senate to be received by the house. He keeps the time on men who are addressing the house, and the "hammer" falls when he says that a man has consumed his allotted time. Of all these tasks the greatest is to be well informed upon parliamentary law. There is no index to parliamentary rulings, and many points are found by the man who will delve and dig and study the subject all the time.—Washington Post.

Infant Geniuses.

When he was but a schoolboy in the Jesuits' college at Dijon Jacques Bossuet was known as one of the best classical scholars in Europe.

At eight Louis de Bourbon, prince of Conde, was a perfect Latin scholar. Three years later he published a work on rhetoric, and at seventeen he was appointed governor of Burgundy.

Fenelon displayed so much precocity that he won fame as a preacher of rare eloquence when he was but fifteen years of age. Pascal wrote treatises on acoustics at twelve, at which age he was busily occupied in constructing elaborate circulating machines, and at sixteen he published his treatise on "Conic Sections," which Descartes refused to believe was not the work of a great master.

John Stuart Mill was studying Greek at three, had practically mastered the language at seven and a year later was acting as schoolmaster to his younger brothers and sisters. John Ruskin actually produced a manuscript work in three volumes before he reached his seventh birthday.

Mark Twain Is a Fog.

Mark Twain's former lecture manager told this story of an entertainment given by the humorist in London during a heavy fog: "One night the queen's concert rooms were like a smokehouse, and I saw from my chair in the royal box a shadowy dress coat, supported by a pair of shadowy trousers, girdled by the faint halo of the ineffectual footlights. A voice was in the air, but it was difficult to locate it with any degree of certainty. The apparently headless trunk of the lecturer told what he knew of our fellow savages, the Sandwich Islanders, and at intervals out of the depths ascended the muffled murmur of an audience invisible to the naked eye. Mark began his lecture on this occasion with a delicate allusion to the weather and said, 'Perhaps you can't see me, but I am here.'"

Improving on Horse Power.

In Venezuela many years ago a wealthy agriculturist was appointed minister of marine. Being a hard worker, he asked at once for particulars of the fleet. The secretary brought him particulars about the only war ship. The details gave length, tonnage and horse power. At this last the minister stopped the secretary and bade him write down quickly an order to the chief of customs. "Take out these 120 horses at once, and I will send you good mules in their places," explaining that mules were much more economical, both as regards food and ability to withstand fatigue.

Wavering.

Nervous Old Lady (addressing officer on board a passenger steamer)—Oh, captain, I wish you'd go and speak to the man at the wheel. He keeps turning it first one way and then the other, and I'm sure he doesn't know his own mind.—London King.

A Bit Unkind.

Holden — Burgess says he always says what he thinks.

Belden—That accounts for it. Saw him at the club last night, and he didn't utter a word the whole evening. —Boston Transcript.

Her Title to It.

Nell—Is she a society woman?

Belle—Yes, indeed. She belongs to no less than eighteen societies for the suppression of as many things. Philadelphia Record.

The genius and inspiration of American civilization rest upon the individual thought, character and action of every citizen.—Schoolmaster.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

David H. French to Elston M. French, $1.00.

First Nat. Bank of Plainfield to Wm. H. Kirch, $2,150.

The banks of Gloucester county are almost bursting with deposits of the farmers, and the statements just made by the two institutions show deposits of upward of three-quarters of a million of dollars. While some crops have been a failure, others have come up finely and high prices are ruling, so that the farmers are wearing the broad smiles of prosperity.

The Great Trenton Fair.

Who has not heard of the Trenton Fair. Far famed, because it is the best, largest and most unique of many out of door exhibitions. This year no stone has been left unturned to make it the grandest show in its history. Every department is complete and the entertainment provided is of a character in keeping with the name Trenton Fair. For the occasion the New Jersey Central will sell reduced rate tickets, good going and returning on date of sale, the Fair dates being September 28th to October 2d.

A New Enterprise.

The community is agreeably pleased by the advent of a new store in town where mankind will get new ideas, styles makes and designs, and especially so by the introduction of the method of fitting out men complete from underwear to headgear for from $10, and boys from $3 as inaugurated by Harry Feinberg the popular priced outfitter, at his store 339 West Front street, opposite Grove street, where he has been filling the needs of all with his new and up-to-date stock of clothing; furnishing goods, hats and shoes; where you will find an abundant array of everything in wearing apparel for men and boys. A visit to his store will be well spent and as his motto stands, satisfaction guaranteed or money refunded, it means well for that establishment and those that patronize it.—ADV.

WANTED-FAITHFUL PERSON TO TRAVEL, and supervise force of salespeople and make collections for manufacturing house. Straight salary $20.00 a week and expenses. Salary paid weekly and expense money advanced. Previous experience unnecessary. Local territory. Business successful. Position Permanant. Enclose self addressed envelope. Superintendent, 324 Dearborn street, Chicago.

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address

Rev. EDWARD A. WILSON, Brooklyn, N. Y.

LEGAL NOTICES

SPECIAL ELECTION
—ON—
—Constitutional Amendments.

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or voting Precinct in the *County of Somerset, must meet on*

TUESDAY, SEPT. 15, 1903,

from one to nine o'clock p. m., at such places as may be designated by the Township Clerks of the respective townships of said county, for the purpose of making, altering and revising, as the case may require, the registry of voters entitled to vote in their several districts or voting precincts for use at the special election to be held on Tuesday, September 22, 1903, as required by an act entitled "An act to provide for submitting proposed amendments to the Constitution of this State to the people thereof," approved April 8, 1903.

Special Election
SEPTEMBER 22, 1903.

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHURTS,
CHARLES H. BATEMAN.

Election Notice!

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the *County of Somerset will hold their first* meeting on

TUESDAY, SEPT. 1, 1903,

At 10 o'clock in the morning, at such places as may be designated by the Township Clerks of the respective townships of said county. Such boards shall organize according to law and then proceed to ascertain the names and residences of all the legal voters in their respective districts, by making actual inquiry at every dwelling house or habitation, or of the head of every family residing therein, and shall continue such enumeration of voters from day to day, on successive days, completing same on or before Friday, Sept. 4. (Sec. 23 Election law.)

SECOND MEETING
AND PRIMARY ELECTION

Said Boards of Registry and Election will also meet on

TUESDAY, SEPT. 8, 1903,

At the same places from 1 until 9 p. m., for the purpose of transcribing and making up from its canvass books two lists of all persons entitled to vote in its election District, who shall personally appear before the board for that purpose, or be shown to its satisfaction by the affidavit in writing of some voter in the election district to be a legal voter therein.

On the same day between 1 and 9 o'clock p.m., the Primary Election shall be held in every election district in the County of Somerset.

THIRD and FINAL MEETING.

Said Boards of Registry and Election will also meet on

TUESDAY, OCT. 27, 1903,

At the same places, and between the hours of 1 p. m. and 9 p. m. for the purpose of revising and correcting the Original Registers, and for adding thereto the names of all persons entitled to the right of suffrage in such Election District at the next election.

Notice is hereby given to all Boards of Registry and Election in the County of Somerset that they are required to strictly observe Sections 24 and 32 of "An Act to Regulate Elections (Revision of 1898)," approved April 4, 1898, and that the County Board of Elections will be in session in Somerville on

Wednesday, Oct. 28, 1903,

For the purpose of receiving the registers and receipting for affidavits, etc.

General Election Nov. 3, 1903

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHURTS,
CHARLES H. BATEMAN.

PROPOSED AMENDMENTS
TO THE
CONSTITUTION

STATE OF NEW JERSEY.
DEPARTMENT OF STATE

As required by an act entitled "An act to provide for submitting proposed amendments to the Constitution of this State, to the people thereof," approved April 8, 1903, notice is hereby given that on Tuesday, the twenty-second day of September, 1903, a

SPECIAL ELECTION

will be held in the several election districts or precincts of this State, at such places as the clerks of the several townships, cities, and municipalities of the State shall provide, to enable the electors qualified to vote for members of the Legislature to vote for or against each of the following proposed amendments to the Constitution.

S. D. DICKINSON,
Secretary of State.

ARTICLE V.
EXECUTIVE.

1. Insert in lieu of paragraph 10 a new paragraph, as follows:

10. The governor, or person administering the government, the chancellor and the attorney-general, or two of them, of whom the governor, or person administering the government, shall be one, may remit fines and forfeitures and grant pardons, after conviction in all cases except impeachment.

ARTICLE VI.
JUDICIARY.

1. Insert in lieu of Section II a new section, as follows:

1. The court of errors and appeals shall consist of a chief judge and four associate judges or any four of them.

2. In case any judge of said court shall be disqualified to sit in any cause, or shall be unable for the time being to discharge the duties of his office, whereby the whole number of judges capable of sitting shall be reduced below four, the governor shall designate a justice of the supreme court, the chancellor or a vice-chancellor, to discharge such duties until the disqualification or inability shall cease.

3. The secretary of state shall be the clerk of this court.

4. When a writ of error shall be brought, any judicial opinion in the cause, in favor of or against any error complained of, shall be assigned to the court in writing; when an appeal shall be taken from an order or decree of the court of chancery, the chancellor or vice-chancellor making such decree or order shall inform the court in writing of his reasons therefor.

5. The jurisdiction heretofore exercised by the supreme court by writ of error shall be exclusively vested in the court of errors and appeals; but any writ of error pending in the supreme court at the time of the adoption of this amendment shall be proceeded upon as if no change had taken place.

Section IV.

1. Insert in lieu of paragraph 1 a new paragraph as follows:

1. The court of chancery shall consist of a chancellor and such number of vice-chancellors as shall be provided by law, each of whom may exercise the jurisdiction of the court; the court shall make rules governing the hearing of causes and the practice of the court where the same is not regulated by statute.

Section V.

1. At the end of paragraph 1 add the following:

The court may sit in divisions at the same or different times and places.

Strike out paragraph 3.

Section VI.

1. Insert in lieu of paragraphs 1 and 2 the following:

The court of common pleas shall be constituted and held in each county in such manner as may be provided by law.

ARTICLE VII.
CIVIL OFFICERS.

Section II.

1. Insert in lieu of paragraph 1 a new paragraph, as follows:

1. Judges of the court of errors and appeals, justices of the supreme court, the chancellor, the vice-chancellors, and the judges of the circuit court and the court of common pleas shall be nominated by the governor and appointed by him with the advice and consent of the Senate; all persons now holding any office in this paragraph named, except the judges of the court of errors and appeals as heretofore existing, shall continue in the exercise of the duties of their respective offices according to their respective commissions or appointments; the judges of the court of errors and appeals, except those first appointed, the justices of the supreme court, the chancellor, and the vice-chancellors shall hold their offices for the term of seven years, and shall, at stated times, receive for their services a compensation which shall not be diminished during the term of their appointment; and they shall hold no other office under the government of this State or the United States; the judges of the court of errors and appeals first appointed shall be appointed one for three years, two for five years and two for seven years; judges of the court of common pleas shall hold their offices for the term of five years.

Strike out paragraph 2.

Thomas E. Currin, assistant cashier in the First National Bank, has moved into the house recently completed for him on ...ountain avenue.

...y Day exercises will be held in ...h Chapel Sunday School tomorrow ...oon at 2:30. Rev. J. S. Zelie will ... an address.

Thos. Frank French, the wholesale grocer, of Somerset Street, has sold his business to W. C. Dunham, the transfer to take place on October 1st.

Miss Minnie Williams, daughter of Mr. and Mrs. Seaman Williams, of Sandford ...

[redacted]

school are now admitted to all colleges without passing examinations.

Dr. Richard Moldenke has been elected Secretary of the advisory Board in connection with the model foundry to be operated during the Universal Exposition at St. Louis next year.

Elaborate preparations have been made for the special services which will be held in St. Mary's Roman Catholic Church tomorrow. The church was dedicated three years ago and this celebration will be in honor of the third anniversary.

Rosh Hashonah, "head of the year," is the Jewish New Year and began last Monday night at sunset, and was the beginning of the 5,664th year after the creation of the world. Reformed Jews keep but one, while the orthodox observe two days.

Miss Eleanor Cooley, daughter of Dr. and Mrs. Justus H. Cooley, of Westervelt avenue, this borough, and Henry C. Jerkins, of New York City will be united in marriage in the Friends' Meeting House, Watchung avenue, Wednesday afternoon, October 14.

Sunday School Conventions.

A convention of the Union County Sunday schools will be held at Cranford, N. J. Thursday October 8.

The State Sunday School Convention will be held at Newark, November 18 20. An interesting program has been arranged.

Course of Entertainments at Grace M. E. Church.

The following entertainments will be given at Grace Methodist Episcopal Church: Mozart Symphony, Monday, October 19; J. Williams Macy, Tuesday, December 1st New York University Glee, Banjo and Mandolin Club, Thursday, January 28.

Death of Mrs. Thorn.

Mrs. Mary E. Thorn, widow of Edward M. Thorn, died at the home of her daughter, Mrs. Robert Carson, of Belmont avenue, this borough, Wednesday morning. Funeral services will be held from the house this afternoon at 2:30 o'clock. Interment will be in the North Plainfield cemetery.

Mrs. Thorn had been a member of the First Baptist Church, Plainfield for forty years. Four daughters survive her.

Examination of Teachers.

Notice is hereby given that there will be a meeting of the County Board of Examiners of Somerset County, for the examination of candidates for teachers' certificates, at the Somerville Public School on Friday and Saturday October 2 and 3 Each applicant for a certificate should be present as early as nine o'clock a. m.

H. C. KREBS,
County Superintendent.

Slight Blaze on Willow Avenue.

The home of George F. White, 41 Willow avenue, caught fire yesterday afternoon about four o'clock and was damaged to the extent of about $25. The fire was caused by sparks from a chimney falling on the roof.

Before the fire department reached the house, neighbors succeeded in putting out the blaze.

Fresh Strawberries.

E. S. Elliott, of West 8th Street, is picking about three quarts daily, of fine luscious strawberries. The fruit is large, of fine appearance and flavor, and no difference can be noted between the quality now and in the early part of the season when he gathered the first crop.

In the southern part of the state several cases have been reported recently of strawberries being raised, but the cause of the late appearance of the berries is thought to be on account of the late spring which prevented the plants from bearing; the fall crop being the first and only fruit the vines bore this year. Mr. Elliott says this is not the case with his berries, as he gathered a fine crop in the early part of the summer. He says his vines are loaded with green fruit and if the frost does not interfere that he will gather a great many more.

After Intruder; Shot His Son.

John Bunn, of Bernardsville, who has been annoyed recently by sneak thieves visiting his chicken yard, was awakened several nights ago by his son, Bell Bunn, who resides in the same house, with the information that some one was prowling around the back of the house. Hastily dressing, the elder Mr. Bunn seized a loaded gun and proceeded to investigate the premises. His son in the mean time had run around the house in the opposite direction, and as he came into view his father, thinking it was a burglar, fired and wounded his son in the leg. As the young man fell to the ground the father recognized him. He was at once removed to the house and the wound was dressed. The wound is not considered

[redacted]

the Bolters.

Considerable curiosity has shown itself in Plainfield the past week about the effect the bolt made by the MacMurray delegates in the recent convention will have on the vote in November says the Elizabeth *Journal*. "The delegates who went out at that time are non-committal as to how far they intend carrying their temper into the campaign, but there is no indication so far of their having softened toward the situation.

"While they seem to be stolid in their apathy toward the compaign, it is said there is a disposition on the part of some to take a calmer view of the situation. There was much talk at first that the bolting delegation would carry their strength over to the Democratic ticket at the coming election, but this will be so distasteful to the sentiments of the fifteen who bolted the convention, because they are of the deep-dyed Republican type, that little credit is given to that talk,

"The seriousness of the bolt is magnified by Democrats here and there, who are not identified with the issues of the cumpaign to any extent, but not so much is said by either the adherents of the bolting delegates or by the opposite faction."

An Old Landmark in Bernards Township to be Torn Down.

Members of the Bernards Township School Board met last Thursday and decided to sell at public sale the old brick schoolhouse, which is to be superseded by the handsome new stone structure that is nearing completion, and will be ready for occupancy in about a month. The furnishings in the old building and the ground upon which it stands will also be sold. The old building will no doubt be torn down, and one of the oldest landmarks of this historic village will pass into oblivion. Under the roof of this old brick building, which has been standing almost a century, many men of prominence throughout the State received their early training. Notably among them were L. A. Thompson, former clerk in Chancery; the late Mayor of Elizabeth, John C. Rankin; W. L. Dayton, who was appointed foreign Minister. Several of the old Frelinghuysen family attended the school, as well as T. L. Southard who was attorney-general.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

William Birrell to Carrie Pearson, $1.

Henry D. Morrison et ux to Mattie J. Wolfe, $1.

Cornelius E. Gulick et ux to Wm. Birrell, $1.

Leah M. Marshall to Geo. W. V. Moy et al, $1.

John Giddis to Jane B. DeMott, $1.

Park Golf Club Score.

At the close of the play for the two cups last Saturday at the Park Golf Club, the score stood as follows:

Nelson A. Miller, 107, 24—83; Ray B. Carroll, 93, 9—84; S. St. John McCutchen, 99, 14—85; Rev. Dr. H. K. Carroll, 105, 19—96; A. W. Anderson, 103, 71—86; Charles A. Reed, 100, 13—87; Charles B. Morse, 101, 12—89; Leon R. Thurlow, 106, 15—91; George T. Rogers, 115, 20—95; Samuel Townsend, 110, 15—95; Rev. J. O. McKelvey, 111, 15—96.

There was also a team match between the Bachelors and Benedicts which resulted as follows:

Bachelors—Ray B. Carroll, 6; G. W. Faber, 2; Leon R. Thurlow, 2; Charles B. Morse, 4; Frank Rogers, 0. Total, 14.

Benedicts—Dr. H. K. Carroll, 0; S. St. John McCutchen, 0; Rev. J. O. McKelvey, 0; Samuel Townsend, 0; W. L. Murray, 1. Total, 1.

SUBURBAN NOTES.

WATCHUNG.

Arrival and departure of mails at Watchung.

Leave Plainfield 9:15 a. m.	5:35 p. m.
Arrive Watchung 9:30 a. m.	6:00 p. m.
Leave Watchung 12:30 p. m.	6.10 p. m.
Arrive Plainfield 1:00 p. m.	*6 40 p. m.

*This mail makes connection for all outgoing mail from Plainfield the same evening.

Howard Vail and family who have spent the season at the cottage on Lake Vein, have returned to Newark.

Mr. and Mrs. Taggard, of New York City, who have spent the summer months with Mrs. Edward Cantwell, have returned home.

Miss M. M. Schick, of Silver Lake Park, N. Y., has been visiting with Postmaster Schmidt's family.

Dr. and Mrs. R. Moldenke's little daughters, Anna and Elsie, have returned to the Mary Drexel Institute, Philadelphia, to resume their studies.

Mrs. Bodine, of Brooklyn is visiting Mrs. Gordon.

The election last Tuesday was very quiet, and the Election Board found time hanging heavily on their hands.

Mr. and Mrs. Texier entertained a large party of friends last Sunday.

Mrs. David McLeash, of Johnstown, N. Y., who has been visiting Mrs. Texier, has returned home.

Peter Moran has set out a large water cress plantation for H. Texier, also a large tract in violets.

Mrs. Col. Heinz, of New Rochelle, has been visiting her daughters, Mrs. Richard and Mrs. Charles Moldenke.

Mrs. J. H. Koch entertained friends from Brooklyn last Sunday.

LIBERTY CORNER.

A silo which was being constructed for Seiler Brothers was blown down last Tuesday by the wind.

Mrs. E. H. Terry, of Plainfield, is visiting Mrs. Muse.

Mrs. I. Naughright, of Far Hills, is visiting at Mr. Quimbigs.

Mrs. C. N. Conkling has returned to her home in New York City.

The Village Improvement Society will meet in the chapel Monday evening September 28 at 8 o'clock.

Mr. and Mrs. Harry Acken, of Plainfield, visited Mrs. Acken's mother last Sunday.

George English, U. S. A., son of the late James R. English, of Elizabeth, died at Fort Thomas, Kentucky, Sunday, September 20. His remains were brought to this place and interred in the Liberty Corner Cemetery last Wednesday. Rev. C. B. Condit officiated at the funeral services.

Cat Survives Dynamite Explosion.

With three lives still to his credit, Thomas J., the large black tomcat once the property of Frank O'Neill, of Kenvil, is still interested in things mundane. The last and most remarkable of his exploits was on the night when the forcite works at Kenvil were destroyed by an explosion which shook the country for miles around. Thomas J. must have been on the roof of one of the buildings at the time, because after the explosion he was found somewhat singed and considerably broken, up in a tree at Ledgewood, three-quarters of a mile from the scene of the wre[illegible]. He was recognized by the collar w[illegible] employ[illegible] at the forcite works pu[illegible] him three weeks ago, when he left his former master, Frank O'Neill, and went to make his home at the mills. The men at the mill were kind to him, because they had read of the attempts of O'Neill to kill the cat by five different methods, including shotguns, pitchfork, drowning and chloroform. Thomas J. was howling feebly and pitifully when found, and now has a warm berth beside the hearthstone of Mr. and Mrs. Herman Siegle, who discovered him and rescued him from the treetop.

Somerset County Courts.

In the Somerset County Courts Thursday the jury rendered a verdict in favor of the plaintiff for $100 damages in the case of Judson Westlecraft against Frederick V. Jacobus. The case of John Grogan against Alvah Gray was not taken up

WHEN A HOUSE GETS ON FIRE

Do You Know What to Do? Suggestions Which May Prove Valuable.

How many of the REVIEW readers know just what to do in case their houses or their neighbor's houses got on fire?

How many know where the nearest fire box is located and where the keys may be found?

How many know how to "pull" a fire box, supposing they have the key?

These are important matters for all people to know, and as simple as the proposition appears it is doubtful if one person in three knows where and how to properly send in a fire alarm. This is left, like many other things, until the time arrives to act, when minutes, and sometimes seconds, may mean the loss of property.

When a fire occurs, get the key nearest by in a line toward the fire-box; insert key in box, turn the key, and open door. A small hook will be noticed when door is opened, this is to be pulled downward, and completes an electric current which rings the fire alarm corresponding to that box number.

It is only a question of a few moments to look up the location of the nearest fire box, and for convenience a list of all the fire boxes and where the keys may be found, follows, giving box and location of same following which is given location of fire box keys.

132 Manning and Westervelt avenues.
Dr. J. H. Cooley, 121 Westervelt ave.
John A. Goodwin, 178 Manning ave.
Philip Giese, 50 Westervelt ave.

G. R. Rogers, 32 Sycamore ave.
Geo. L. Howard, 80 Mercer ave.

It is probable that some names in the above list may be wrong; if so, kindly notify this office and it will be rectified in a future issue of the REVIEW.

"FIRST AID" SUGGESTIONS IN CASE OF FIRE.

The following suggestions, if acted upon, may be found of value, as oftentimes a slight thing at the right time, may save a house from total loss.

If a kerosene lamp is turned over or explodes, try and smother the flames with a rug, piece of carpet, blanket or other woolen article; if this fails, and the flames get beyond you, close the doors and windows of the room where the fire is and turn in an alarm.

In case of a gasolene stove getting out of order the best thing to do is to remove stove out of doors. In such an event, *pull the stove toward you*—that is, face the stove and back out, pulling stove with you. Should you push or carry stove in front of you in same direction you are going, the flames would fly backward and burn you. If stove is too hot to get near it, take a rake, hoe, or some such tool and pull it toward you

If the chimney gets on fire, put plenty of common salt on the fire in the stove; this will soon smolder the fire in the chimney.

Some people wait too long before summoning the fire department for fear of the damage they will do. This is wrong, as the firemen will do nothing to damage the property unless it is absolutely necessary to do so in order to extinguish the blaze. It is their object to save, not destroy.

It is always best to try and put out a fire, if it is a small one, but at the same time, to be on the safe side, the department should be immediately notified.

It is hardly necessary to add that in case a fire is discovered in a box, basket or anything removable, that the first effort should be to get it out of the house, bearing in mind to pull it toward direction you wish to go—don't forget that.

It sometimes happens immediately after a storm that the alarm will not respond when hook is pulled. In such cases another box should be tried.

It is well for the person sending in an alarm to remain by the box until the firemen arrive so they can be notified where the fire is, unless it can readily be seen from the box.

The above suggestions are made by Chief of Fire Department J. J. Stahl.

Somerset County Courts Reopened.

Owing to the fact that the Attorney General declared last Tuesday to be a holiday, the regular term of the Somerset County Courts was postponed to Wednesday, when Justice Garretson presided with Judge Schenck on the bench. The following Grand Jurors were called:

George E. Pace,	Cor. V. N. Suydam,
Peter J. Zeglio,	Howard P. Reynolds,
Newton B. Smalley,	William J. Moore,
Elias W. Howell,	Parmenas C. Henry,
Charles C. Acken,	David R. Dilts,
Ellsworth Brokaw,	William W. Smalley,
William H. Cawley,	John H. Mattison,
Charles H. Bateman,	Michael J. Hickey,
Holcomb D. Dilts,	Sewell O. B. Taylor.
P. Stelle Tingley,	Rynear Staats,
John V. Z. Griggs,	Clayton B. Allshouse,
George Mantz,	Frank C. Elliott.

All the jurors were present. Frank C. Elliott was excused. Constables Frank D. Cramer and Dennis Wyckoff were detailed to take charge of the jury.

The following causes were taken up:

SUPREME COURT CAUSES.

1. W. P. Lindsley v. Ernest Fischer—ejectment. Oliver K. Day; Reed & Coddington.

2. G. A. Van Doren v. Henry Willoughby—contract. J. J. Meehan; P. Q. Oliver.

3. John Clifford Schorb (by his next friend, John Schorb, Jr.) v. Geo. Marsh et als.—tort. J. P. Runyon; P. H. Gilhooly.

4. John Grogan v. Alvah Gray—tort. Charles J. McNabb; H. C. Suydam.

5. Wm. P. Hardenberg v. Eldridge G. Snow—tort. Lindabury, Depue & Faulks; David Harvey, Jr.

6. Judson Westlecraft v. Frederick V. Jacobus—tort. J. J. Meehan; L. A. Gibby.

CIRCUIT COURT CAUSES.

1. Wm. S. Gilhully v. Phebe E. Conkling—tort. Lambert & Stewart; Lindabury, Depue & Faulks.

2. R. J. Southwick v. Alonzo DeCamp—contract. Bartine & Beekman; Jno. A. Frech.

3. Nancy M. Miller v. Ruth E. and T. L. Dennis—contract. H. K. Gaston; Jas. J. Bergen.

4. Susan Jennings v. M. & S. Traction Co.—tort. Andrew Foulds, Jr.; Willard P. Voorhees and Alvah A. Clark.

5. W. C. Van Duzer, v. W. C. Durling—contract. Dungan & Reger; Horace Codington.

6. G. V. Van Doren et al. v. Estelle P. Brokaw—attachment. E. M. Wight; Geo. W. Anderson.

7. Aug. Bolmer v. Board of Freeholders of Somerset county—tort. J. L. Griggs; Jno. A. Frech.

8. Albert Mackie v. Frank O. Dunning—certiorari, argument. Isaac P. Runyon; Reed & Coddington.

9. Catherine and Wm B. Koechlein v. M. & S. Traction Co.—tort, argument, Andrew Foulds, Jr.; Willard P. Voorhees and Alvah A. Clark.

10. Aug. Bolmer v. Board of Chosen Freeholders of Somerset county—tort, argument. Jas. L. Griggs; Jno. A. Frech.

SOMERSET COMMON PLEAS.

1. G. A. Van Doren v. M. & S. Traction Co.—tort. J. J. Meehan; Alvah A. Clark.

SOMERSET QUARTER SESSIONS.

1. Harry Doyle ads. Inhabitants of Bridgewater township—appeal from Justice Kitchen. Dungan & Reger; Alvah A. Clark.

JUSTICES' APPEALS.

1. North Jersey Nurseries Co. v. David Y. Moore. Justice Bowers.

2. Pasquale Tullo ads. Angelina Azzoto. Sutphen.

3. Thomas and Margaret Conners ads. James J. McCloskey. Dezendorf.

4. Lewis Van Dorn v. Wm. D. Vanderbeek. Fleming.

5. Albert Voorhees ads. Frank Albert. Kitchen.

6. John Van Middlesworth ads. Joseph M. Maher. Sutphen.

7. Lemuel A. Tunison ads. John P. D. Kirch. Smalley.

The following licenses were granted:

INNS AND TAVERNS.

Frank Linke, Smalleytown.
Mahlon H. Rupell, North Branch.
Oscar Vleit, Gladstone.
Alfred E. Beins, Warren.
Henry E. Walter, Bernardsville.
Daniel B. Hoffman, Kingston.
John H. Groceley, North Plainfield.
Andrew R. Holcombe, Neshanic.
J. H. Taylor, Martinsville.
John Burns, Raritan.
George C. Ball, Somerville.

SALOONS.

William N. Honan, Raritan.
John Cagnassola, Raritan.
Jouh Fazekas, Bound Brook.

WHOLESALE.

Jacob Miller, Somerville.

The applications of Thos. Howard, for hotel at Peapack; Rafael Pizo, for hotel and saloon at Bound Brook and Louis Curcio, for saloon at Raritan, were laid over until Oct. 2, when Judge Schenck will give each applicant a hearing.

The following constables were appointed to serve during the term: Dennis Wyckoff, Jacob Hyler, David R. Moffett, Job Coddington, W. N. Pangborn, James Woods, Edward Farrell, Garret Dockerty, Frank D. Cramer, James Ralph, Arthur S. Dixon.

The list of petit jurors is as follows:

Bedminster—Charles P. Wyckoff, Geo. Philhower, Robert G. Lane, Frederick K. Lamerson.

Bernards—George Codington, Wm. N. Conkling.

Branchburg—Wm. Van Fleet, Asa C. Hall, Peter L. Tunison, Harmon P. Sutton, Elias H. Hoagland.

Bridgewater—Judson V. Coin, Charles Mehlenbeck, John Gernert, Jr., Lewis A. Bellis, Wm. Schure, J. Watson Terhune, David W. Pinkerton, George W. Smith, Thomas I. Honeyman, Samuel Ayres, Frederick Frech, John G. Gaston, James Hunter, Jr., Charles J. Smith.

Franklin—Garret V. Suydam, Wm. B. Voorhees, Henry Van Doren, John Stothoff, Edwin Garretson, John A. Voorhees, J. Frank Westcott.

Hillsborough—Charles A. Stryker, Jas. McCrady.

Montgomery—Stephen H. Drake, Peter A. Staats, Louis R. Labaw, Howard W. Meseroll, John N. Brokaw, Augustus Bechtold.

North Plainfield—Levi C. Kline, Andrew Love, Jr., Richard E. Cortell, Albert Brokaw.

Warren—Aaron H. Spencer, Diedrich Ehlen, Joel Giddes, Adrian Martin, Peter Friday, Wm. H. Codington.

A New Railroad.

A new line of railroad track is said to be projected across the central part of this State, says the Newark *News*, and it is expected to be in running order in the not distant future "if present plans go through." Periodically reports of a similar character get into print. They usually trace with heavy lines on a well-drawn map, a road leading from Paterson via Morristown, thence down through Somerset county to Princeton and Trenton, but not noticing Newark. The routes change a little each succeeding year, but they rarely start from any other city than Paterson, and they all stop at the Delaware River.

The latest, however, is over an entirely new route, and, unlike its predecessors, it does not wholly ignore this city. The Delaware, Lackawanna and Western Company is this time the projector. It is to start its line at Millburn, in this county, touch Springfield in Union county, then pass on to Scotch Plains and Plainfield and thence parallel the Central road until it connects with the main line at Hampton Junction.

Were this line built it would provide three railroads from Easton to New York, practically paralleling each other, and only a mile or two apart. A loop of this kind would be considerably shorter than the present Delaware, Lackawanna and Western main line across the State, and present a more direct route for through traffic, but the Central and the Lehigh Valley roads now traverse the same section touching all the main towns and villages, and the new loop would have few important stopping places or commercial centres. The local traffic of such a line would hardly pay, but the time saved to through trains may possibly make its construction advisable, since the element of time is now one of the most important of all that enter into railroad competition. But the new spur is not yet built.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

A calf with two heads is the latest freak in Chatham. It died soon after it was born.

A large walnut tree, over a hundred years old, at Hancock's Bridge, Salem, has been cut down, having been bought by parties who will have it sent to Germany.

The ordinance passed by the Salem City Council prohibiting swearing on the streets has worked better than was expected. There has only been one arrest during the last ten days, and that was a farmer, who had not been in town since the new rule was made.

John Ward, of Perrineville, has sold $700 worth of McIntosh apples from a 13 year old tree. He also has 13, Weathy apple trees, 13 years old from which he sold this season 156 bushels at one dollar per bushel.

One hundred and ninety seven fish caught in less than four hours off Ocean City is believed to be the record catch of the season. Ninety per cent. of these fish were weakfish, the balance being sea perch and flounders. There were five persons in the party which made this phenomenal catch.

Some farmers in the vicinity of Vineland are marketing quite a fair crop of strawberries. The fruit comes from fields where frost nipped the buds last spring. Under the influence of the cool wet summer the plans recovered and put forth a second crop of blossoms. The berries are of good flavor and sell at twenty-five cents a quart wholesale.

Captain S. Nicoletti, vice-president of the American Land Improvement and Silk Culture Association of Philadelphia, has been making a tour in the vicinity of Vineland with a view to establishing a colony of cocoon growers. Investigation proves that the mulberry tree is a thrifty grower in this soil, and it is expected that a colony here will be the resut of Nicoletti's efforts.

Farmers of Warren county are meeting with severe losses on account of the rotting of the potato crop. Hundreds of bushels are being thrown away and the rot goes on steadily. Luther Miller and Edward Mackey, both farmers living near Belvidere, have lost from six to eight hundred bushels each, and other farmers are suffring in proportionate degree. The potatoes seem to rot as soon as they are dug.

Hans Lehman has presented to the New York Aquarium the only specimen of the swallowtailed filefish which has ever been on exhibition there. He caught it in a small net while fishing in Raritan Bay. L. B. Spencer, the assistant superintendent of the aquarium, pronounced it a perfect specimen. The body of the fish is five inches long and its tail measures eight inches, besides being split like a swallow's.

The copper box which was taken out of the cornerstone of the old Orange Methodist Church, which is to be dismantled and torn down, was opened Monday night and many interesting relics were found in it, among them being a section of the first Atlantic cable and an autograph letter from the late Cyrus W. Field. The letter was dated August 1, 1858, and stated that the portion of the cable was a bona fide piece of the original "Atlantic rope."

The historic old Seth Boyden homestead, in Hilton, where for many years the inventor lived and worked, was almost totally destroyed by fire Monday. The origin of the fire is not known. The house was at least one hundred years old. Obadiah Boyden, a son of the inventor, went to California in 1849, during the gold fever, and upon his return purchased the place for his parents, and later deeded it to his mother. The old people lived there for many years, and it was in the workshop that was preserved in the rear of the house that Seth Boyden conceived and worked out many of the inventions that gave him fame and success.

Captain John Smith, of Palmyra, relates the harrowing experience he had recently in consequence of having accepted as a present a bunch of bananas fresh from the tropics. Being detained in the city until late he stayed at a hotel all night. The bananas he deposited in the corner of his room, and placed his watch and pocketbook under the pillow,

[Continued on Last Page.]

Young Man--- This is For You.

By Frederick Breithut.

OUR young men hate advice. When you consider the amount of it which they have to swallow, you can hardly blame them.

As things stand to-day, a boy is taught as much as can be expected in school. We doubt whether as much can be said for the home.

But, be that as it may, the youth is thrown upon the world without any knowledge of it. Naturally, he makes mistakes. Society realizing its weakness in not preparing him in a better manner, indulgently forgives the young man on the ground that he is "sowing his wild oats."

Some few people, seeing where things are wrong, try to help the young chap along by giving him advice. They hope in this way to do the work which years of education should have done.

The young man does not forgive society as readily as society forgives him. He realizes unconsciously perhaps where the fault lies and resents the soothing talk which he is invited to digest. Moreover, he often feels that the man who is doing the advising is in no way superior to himself.

Despite all this, we are going to give advice. But, young man, we are not going to preach a sincere sermonette of the usual order.

We don't care whether you save ten cents a day or not. We don't think it makes much difference. We don't care whether you make a worldly success or not. We know it does not make any difference.

In these days of mammon worship it is dangerous to try to get a young man to look upon anything higher than money. And the young man who sets out with higher ideals than the attainment of wealth is ordinarily regarded as either a fool or a freak. It is that young man we want to talk to.

But our words are feeble. Let us rather listen to what a powerful man had to say on this topic. John Ruskin's words follow:

'I have no patience with people who talk about the 'thoughtlessness of youth' indulgently. I had infinitely rather hear of thoughtless old age and the indulgence due to that. When a man has done his work and nothing can any way be materially altered in his fate, let him forget his toil and jest with his fate, if he will; but what excuse can you find for wilfulness of thought at the very time when every crisis of future fortune hangs on your decisions? A youth thoughtless! when all the happiness of his home forever depends on the chances, or the passions, of an hour! A youth thoughtless! when the career of all his days depends on the opportunity of a moment! A youth thoughtless! when his every act is as a torch to the laid train of future conduct, and every imagination a fountain of life or death! Be thoughtless in any after years rather than now—though, indeed, there is only one place where a man may be nobly thoughtless—his deathbed. No thinking should ever be left to be done there."

There is little need be added to this.

Young man, stick to your ideals! Try to make them real, no matter what your friends think about them. You know your work better than they do. You can get away from their despise, but you cannot get away from yourself.

No doubt commerce is a great thing. But it is not everything. To place the useful always above the ideal is a demoralizing influence, the results of which are most harmful and pernicious.—New York Evening Journal.

Life by the Clock.

WHILE attending a recent gathering of his profession, an eminent physician directed notice afresh to the daily tension under which most Americans do their work. We rise on time, he remarked, in the morning, whether by an alarm clock, by the call of a servant, or by habit, eat breakfast and read the paper on time, a clock in every room, and a watch frequently in our hand. We then, on time, meet office and outside engagements, business appointments, consultations, always preconsidering the amount of time that will be required, and timing the next engagement accordingly. Often we subdivide this time, and note by our watches exactly how long we can discuss a subject.

This is no exaggeration of the American habit. Even such breaks in work as are compelled by the need of physical refreshment are brought within time limits. We eat on time just as we transact all our business on time. If the typical American were to be depicted in his most characteristic attitude, it would be perched on a stool at a "quick lunch counter," consuming his midday meal in seven minutes at the outside.

Doubtless punctuality is a virtue. Doubtless also the practice of doing things exactly on time has won for us, as a people, a large measure of industrial success. But, carried to an extreme, as it often is, it is wearing to the individual. The people whose nerves break down from exhaustion incident to overwork are not often not so much the victims of overwork as of the habit of compressing every bit of work within prearranged limits of time. Let anyone try the experiment of doing a given piece of work steadily and with application, but without noticing by his watch or a clock exactly how much time he is consuming, and he will be amazed to find how much easier it will go off than when he is timing himself, and scheming to bring the prescribed task within a fixed number of minutes.

We know a great deal more about sanitary matters than our fathers and grandfathers knew. We have hunted down microbes. We have concocted serums. Diseases which were once regarded as visitations of Providence we now know to be preventable and we take suitable means of preventing them. All these discoveries and new remedies ought to diminish the death-rate and to promote longevity. They have not done so, as a matter of fact; perhaps they might do so if they had a fair chance. The trouble is that along with these devices for lengthening life we are adopting practices which tend to shorten it. One of the most wearing of these is the habit of bringing all the details of our work within exact time limits.

The Eccentric Husband.

By Helen Oldfield.

OBSERVERS may experience varied emotions at the vagaries and the blunders of genius—regret, indignation, scorn; they may even feel a secret satisfaction that, after all, the beloved of the gods are in some respects inferior to everyday mortals; but nothing they may do can excite surprise.

But the latitude allowed to genius does not cover the same blunder on the part of those who are men of talent, level headed and shrewd in every relation of life, except in that of marriage.

The usual explanation that they are carried away by infatuation, though true sometimes, is not always so, and when it is, it does not sufficiently account for the why and wherefore that men who pride themselves upon their insight into character, men who rarely if ever make a mistake in the men whom they select as their lieutenants, who choose their friends with discretion, men remarkable for good judgment and strong common sense, go so far astray when it comes to choosing the power next the throne, the one friend of a lifetime.

Neither is accident a sufficient reason. It is not held as a valid excuse when a man has appointed an incompetent agent, a swindling attorney or a dishonest cashier. There must be something which, to quote the old saying, "pulls the wool over men's eyes" where women are concerned and obscures the clearest judgment.

This something undoubtedly exists, and is almost invariably one of two things, perhaps caprice, that mental impulse which takes no counsel with reason, but goes its own gait, unheeding and blindly regardless of warning. An impulse which with both sexes has apparently more to do with the choice of a companion for life than upon any other occasion. Why it should do so is one of the mysteries, but it does, and the reason may be that on such occasion it wakes up in unusual strength.

Caprice, under the guise of fancied independence of opinion, frequently influences able men in all affairs, and in marriage when reinforced by will and by the subtle attraction of sex it sometimes governs them altogether. If this be the reason, caprice is the cause of many more marriages than is suspected and becomes patent only when the unsuitability is such as to be plainly known to every one.

Next to this comes the headstrong, almost preposterous self-confidence which makes a man certain in his own conceit that if he fancies a woman he understands her and will be able to shape her to his wishes.

Opposition only confirms him in his opinion. Even sensible and practical men exhibit this propensity, a feeling as unreasonable in its way as the ancient rule of chivalry which obliged each true and doughty knight to fight to the death in support of his ladylove's claims to pre-eminence in beauty above all her sex.

There is an innocent vanity in most men, usually kept down by experience and good sense, as to their own sound judgment upon points where the world holds a cursory judgment a sign of intellectual power, and when the choice of a wife is to be made this vanity rises up full grown.

CHIEF OF POLICE KILLED

He and a Captain Shot by an Angry Detective.

AWFUL TRAGEDY IN INDIANA

Culmination of a Feud That Has Distracted the Police Force of Evansville, Ind.—After Shooting the Chief and Captain, the Detective Kills Himself Beside Bodies of His Victims.

Indianapolis, Ind.—For several years the Police Department of Evansville has been distracted by petty feuds among the patrolmen and detectives, and when the recent riots occurred these jealousies were potent in rendering the department inefficient.

It has been customary for one set of men and detectives to belittle the work of the other, and there have been occasions when criminals have escaped justice because of the efforts of one faction to circumvent the other.

These conditions culminated in a terrible tragedy, in which Thomas Hutchens, a detective, shot and fatally wounded Frederick Houke, Chief of Police, and Captain Frederick Brennecke, Jacob Lutz, a butcher, of Boonville, was a bystander.

One of the bullets intended for Brennecke penetrated Lutz's lung, and the doctor, who arrived a few minutes later, reported that he was fatally wounded. After dealing death to these three men Hutchens fired a bullet into his own temple and fell dead.

Early in the evening Hutchens reported at headquarters and asked Captain Brennecke to excuse him from duty, as he was sick. Instead, Brennecke ordered him to go to the Fair Grounds, where an entertainment was in progress.

When Chief Houke arrived Hutchens made a similar request, but the Chief sustained the captain, and Hutchens left, muttering something against the two officers.

He went to the Fair Grounds and entered the German village, where he was telling his troubles to a friend when Captain Brennecke and Chief Houke entered.

"There's two men that I'm going to get even with," said Hutchens to his friend, and as he spoke drew a revolver. A shot rang out Brennecke groaned and reeled. Hutchens heard the groan and it seemed to please him.

He dashed toward Brennecke and fired again. The bullet went into the captain's arm. The first shot had torn his lung. The captain fell in a heap as Chief Houke, who was a dwarf beside the massive Hutchens, ran toward the murderer to prevent another shot.

Hutchens turned upon the Chief and fired. Houke staggered and fell. The bullet entered his breast.

Patrolman Crowe sprang upon Hutchens, but the big detective threw him off as though he were a child. Another shot rang out and Lutz, the butcher, fell with a bullet in his breast. He was an innocent bystander, one of a hundred in the tent.

He is a Councilman at Boonville, his home. While Crowe was readjusting himself for another attempt to quiet the murderer, the crowd of men and women in the tent were thrown into a panic and shrieks and groans filled the air.

Houke, Brennecke and Lutz lay in pools of blood upon the sawdust bed of the "Village." Hutchens ran to the door, and with a cry that no one would ever see him tried, placed the revolver to his own head and fired, killing himself instantly.

O. P. DEXTER ASSASSINATED.

Shot Near His Summer Home in Franklin County, N. Y.

Malone, N. Y.—Orranda Perry Dexter, about fifty years old, a resident of Norwalk, Conn., and the only son of Henry Dexter, for many years President of the American News Company, was shot and killed while driving half a mile from his summer home, which is seven miles from Santa Clara, N. Y., the nearest telegraph office. It is a lonely spot in the woods and no one is known to have seen the shooting.

Mr. Dexter has been for years engaged in litigation with property holders in that part of Franklin County, and owns large tracts of land in the towns of Dickinson, Santa Clara and Waverly. He has made many bitter enemies and it is said had been warned many times by his friends that his life was in danger, but he always said he could take care of himself. His father lives in New York City.

SUICIDE FOLLOWED CONFESSION.

U. S. Deputy Marshal Was Implicated in Plot.

San Francisco, Cal.—W. P. Gamble, the United States deputy marshal who confessed complicity in a plot to substitute old Chinese for young Chinese who had been ordered deported, committed suicide in Buena Vista Park by sending two bullets into his brain.

Rather than face the disgrace of a trial and possible conviction in the Federal courts he left his young wife and killed himself.

Several days ago Gamble confessed his part in the scheme to defraud the Government to United States Attorney Woodworth and United States Marshal Shine, thinking that he was assuming the role of State's evidence, thereby saving himself from punishment.

Polo Ball Kills L. F. Swift's Son.

Nathan Swift, son of Louis F. Swift, the millionaire packer, died in Chicago from the effects of a blow on the temple with a polo ball at Onwentsia Field during a game.

Wheat Loss Is Great.

Board of Trade men at Duluth, Minn., say the damage to the Northwestern wheat crop by rains will not fall below $20,000,000. They say the loss will be increased through reduced grades. The wheat crop is estimated in round numbers at 200,000,000 bushels in Minnesota and the Dakotas.

Quarantine Against New Laredo, Mexico.

The Texas State Board of Health has established a rigid quarantine against New Laredo, Mex., because of suspected yellow fever.

SENATOR GREEN'S ARREST

New York Politician Accused of Complicity in Postal Frauds.

He Is Charged With Paying Bribes in Order to Furnish Time Recorders to Government.

Binghamton, N. Y.—Senator George E. Green, President of the International Time Recording Company and Chairman of the Republican County Committee, was arraigned before United States Commissioner Charles S. Hall on two indictments recently found against him by the Federal Grand Jury in Washington, charging Mr. Green jointly with George W. Beavers, of Brooklyn, with conspiracy to defraud the United States Government and charging Mr. Green with giving bribes to Beavers.

The Government was represented by United States District Attorneys G. B. Curtiss and T. L. Arms and by Inspector Mayer. Mr. Green was represented by James T. Rogers, the Broome County Assemblyman and Republican leader on the floor of the Assembly.

A plea of not guilty was entered to both of the indictments and bail was set in $5000 on each indictment, Jonas M. Kilmer qualifying as surety.

A formal examination into the charges brought against Mr. Green will be held before Commissioner Hall, Mr. Green will at that time be represented by John B. Stanchfield, a Democratic attorney, of Elmira, and T. R. Tothill, of this city. The indictment recites that Green, as President of the International Time Recording Company, undertook to furnish and did furnish, large numbers of time recorders to the Postoffice Department through George W. Beavers, and in so doing committed several offenses against the United States.

The indictment then sets forth that Green and Beavers on December 11, 1901, entered into an unlawful agreement, whereby Green undertook to pay Beavers ten per cent. of all sums paid to the Time Recording Company for all clocks and supplies furnished the Government, and that on the same day Green gave to Beavers a personal check for $325, drawn on the Knickerbocker Trust Company, of New York, to influence Beavers' decision to the detriment of the United States.

It is further charged that on January 13, 1902, Green gave to Beavers a draft on the Seventh National Bank of New York for $381.18; another check on April 26, 1902, for $418.36, and another on October 8, 1902, for $842.88.

The second indictment is worded much the same as the first and contains eleven counts.

The fourth count sets forth that Green and Beavers conspired on December 18, 1901, by sending out an official letter notifying certain officers that time recorders had been ordered for them, the letters having been unlawfully signed with Beavers' initials.

The tenth and eleventh count deals with a check for $1042.88, which, it is alleged, was given to Beavers by Green on behalf of the Time Recorder Company on October 8, 1902.

Senator Green has been Chairman of the Broome County Republican Committee for eight years and served two terms as Mayor of Binghamton. He is the general manager of the Yaqui Paper Company of Mexico, with offices in New York; is the owner of the Boremus Stamp Cancelling Company of Washington, which has figured prominently in the recent Postoffice Department investigations; is the President of six or eight large industrial corporations, director in about a dozen others, and in many ways has for years been the most prominent business man of this city.

WOMAN KILLED A BRIDE.

Jealousy Probably Was the Cause of a Tennessee Crime.

Nashville, Tenn.—The wife of John E. Wilson, a detective, was shot and killed at her home, and Miss Lenna Cunningham is in jail charged with the murder. Several years ago Wilson married the sister of Miss Cunningham, who went to live with them and continued to make her home with her brother-in-law after the death of her sister.

Wilson married Miss Alice Carey, of Louisville, and brought his bride to Nashville.

No cause is known for the deed other than the statement made by Miss Cunningham that providence directed her to commit the crime. She was probably jealous.

CAR RAN 106 MILES AN HOUR.

Highest Speed Ever Attained Reached on German Road.

Berlin, Germany.—An electric car ran at the rate of 106 4-5 miles per hour on the Zossen military road, said to be the highest speed ever attained, but engineers in charge expect 125 miles per hour will be reached.

It was found last year when a speed of 200½ miles was reached that the 70-pound rails and ordinarily ballasted roadbed would not stand the strain. Since then the roadbed has been reconstructed with broken basalt and closely set with pine ties faced with oak, so as to have the springiness of the pine and the hardness of the oak. The new rails are a little over 100 pounds.

Mysteriously Killed in a Bedroom.

Lawrence F. Adams, twenty-one years old, was shot and killed by William H. Reed, aged twenty-eight, a clerk in the Atlantic City postoffice, at their home in Atlantic City, N. J. The shooting took place in Adams' room on the third floor of the house. Reed was arrested. He says the shooting was accidental. The police say, however, that they have been informed that the men quarreled before the shooting.

Venezuela Wants Peace.

General Hernandez, the Venezuelan Minister, at Washington, has received a telegram from his Government saying that the reports in American newspapers of the likelihood of war between Venezuela and Colombia were not true. Venezuela, the telegram said, was at peace and wanted peace.

Trials of Submarines Postponed.

Further general trials of the submarine boats have been postponed until October 15.

A MISSION TO ABYSSINIA

U. S. Consul Skinner to Treat With King Menelik.

WILL HAVE ESCORT OF MARINES

The Consul-General at Marseilles Thinks Trade With Abyssinia May Be Increased by a Conference With the King—A Warship Will Land Him, and a Guard Go With Him to the Capital.

Washington, D. C.—The report from London that United States Consul-General Robert P. Skinner, at Marseilles, is going to Abyssinia to arrange a commercial treaty with King Menelik was confirmed at the State Department.

Mr. Skinner has been planning this trip for the past two months, and has several times consulted with the officers of the State Department on the question of trade possibilities in Abyssinia. Mr. Skinner is still in this country on a vacation, and is expected to return to Washington and perfect his plans for the trip to Abyssinia before departing for his post at Marseilles.

According to information obtained at the State Department, Mr. Skinner is of the opinion that trade with Abyssinia may be improved by a personal conference with King Menelik, and that some kind of friendly relations may be established with the Abyssinian ruler to the advantage of the United States.

The officers of the Navy Department acknowledged that there had been correspondence between the State and Navy Departments in regard to furnishing a guard to accompany Consul Skinner to King Menelik's capital in Abyssinia, and that it had also been arranged that Mr. Skinner is to go to Abyssinia on an American naval vessel. The port where it is proposed to land Mr. Skinner is Jubitil, and as no ship has yet been selected for this mission it is considered very probable that the Machias, now at Port Said, will be used.

It is explained that only a small marine guard will accompany Mr. Skinner, and this will probably be taken from either the Brooklyn or San Francisco, now at Beirut, but not unless they can be spared from these vessels. The Navy Department officers insisted that they did not know what Mr. Skinner's mission to Abyssinia is to be, and that all that has passed between the Navy Department and the State Department was a letter asking for the use of a warship and a small body of men to go with the United States Consul.

American cloth is the standard of value in Abyssinia, according to authorities quoted by Consul-General Skinner in his annual report, published by the State Department in "Commercial Relations," 1902. Consul Covert, of Lyons, also quotes from the report of the Italian Consul in Abyssinia, who says:

"The population of Abyssinia is about 10,000,000. The products of the country, exclusive of cereals, are ivory, sibeth or civet, wax, hides, coffee and gold, the latter abounding in the mountains, where the mines are merely scratched. In cotton, North Americans have captured the market against England, France and Germany. In spite of the high price of labor and the enormous cost of freight for such a distance, Americans have succeeded in capturing the trade by the low prices of their products. Different nations sell these goods, but they are all American made."

BIG STEEL RAILWAY SWINDLE.

Boston & Northern Company Defrauded of $100,000 by Bogus Transfers.

Boston, Mass.—An extensive fraud perpetrated upon the Boston & Northern Street Railway Company by the printing of bogus transfer checks, their sale to conductors of the road at a nominal price, and by them turned into the company at their full value has just been exposed.

Five persons, including two printers who printed the counterfeit checks, one conductor who is charged with selling them and two other persons alleged to be the principals in the plot to defraud have been arrested. A large number of fraudulent checks and the plates from which they were printed have been found by the officers.

The police have the names of more than twenty other conductors who have been turning in these bogus checks at the company's office for several months past, and their arrest is soon to be made. It is said that fully $6000 bogus checks per week have turned up at the office of the company since last November, and it is believed how sustained by the company will equal, if not exceed, $100,000.

Lynn, Mass.—Two employes of the Boston and Northern Street Railway were arrested in this city in connection with the extensive frauds perpetrated upon that company by means of bogus transfer checks. The men are Herbert E. Sherman, janitor at the Central Square station of the company, and Herbert Morris, a conductor on the Lynn and Boston division. Sherman admitted having purchased about $1,000 worth of the counterfeit transfers at various times, while Morris at the time of his arrest had 400 of the bogus checks in his pockets.

Killed Singer For Her Money.

Eugenie Fougere, a well known French music hall singer was murdered in her villa at Aix les Bains. A woman servant was also murdered and another so maltreated that she lost her reason. Robbery was the motive for the crime.

Football Player's Back Broken.

Augustus Decker was seriously injured while engaged in a practice game of football on the Lake Forest University gridiron, Chicago. He is a student in the school for boys. It is believed that his back is broken. The young man is practically paralyzed. He fell and several members of the team fell upon him.

May Prevent War.

A more peaceful outlook prevails in Bulgaria, and it is thought the Powers may prevent war.

DAZED BY HIS SENTENCE

Embezzling Cashier of Southport National Bank Gets Ten Years.

Full Penalty of the Law—He Had Misappropriated Funds and Securities to the Amount of $100,000.

New Haven, Conn.—Charged with misappropriation of funds and securities of the Southport National Bank to the amount of $100,000, Oliver T. Sherwood, former cashier of that institution, who was brought back from Panama, was sentenced by Judge Platt in the United States District Court to ten years' imprisonment, the maximum penalty. Sherwood appeared very nervous in the court room, his face and hands twitching convulsively, and he heard the sentence as if dazed.

In pronouncing sentence, Judge Platt expressed regret that an unpleasant duty had fallen to him, and said that he had tried hard to convince himself that it would be possible to meet the ends of justice by giving the prisoner a sentence of less than ten years, but he was unable to reach such a conclusion. He asked Sherwood and his counsel to remember that the court had it within its power to take into consideration all the three counts, and that since he chose to take only one of them, he was exercising forbearance as far as was consistent with the circumstances. He then sentenced the prisoner to ten years in prison.

ALL HOPE FOR THE CANAL GIVEN UP

Government Concludes Treaty Is Dead, and Morgan Says It Is Well.

Washington, D. C.—When the State Department closed its doors at 4 o'clock Tuesday it was agreed the Panama canal treaty was dead, although eight hours yet remained within which the Colombian Congress might take affirmative action upon it. No word however, had been received from either Minister Beaupre in Bogota or Minister Herran, the Colombian Charge here.

President Roosevelt now may elect to proceed under the Spooner act and take up the Nicaragua route or he can permit affairs to drift in the hope a way may be found to straighten the path of the Panama route.

Montgomery, Ala.—On hearing that the State Department had heard nothing from Minister Beaupre concerning the Panama canal treaty, United States Senator Morgan said:

"The treaty has been dead for twenty-five days. Nothing could have resurrected it. The action in Bogota means the building of the canal by the Nicaragua route. President Roosevelt has no discretionary power. It turned out exactly as I expected. It is the best thing for this country and the world."

WHOLESALE ARMY DESERTION

General MacArthur Reports 12[illegible] aways From Department of Cali[illegible]

Washington, D. C.—General MacArthur, commanding the Department of California, in his annual report, says the importance of an artillery reserve for the Pacific Coast cannot be overestimated, and he recommends that the entire organized militia of all arms, situated within easy distance of San Francisco, be invited to participate in a course of coast military training at the Presidio. He has the following to say on the subject of desertions:

"One thousand three hundred and forty-four men deserted during the fiscal year covered by this report. Of this number, 914 were from the permanent garrisons in the department, and represent, approximately, 19.42 per cent. of the main strength thereof for the year. The remaining 430 were from recruits, casuals and regiments passing to and from the Philippines."

HONORS OLDEST NAVAL VETERAN.

Secretary of Navy Visits Home on Seaman's 100th Birthday.

Philadelphia, Pa.—Secretary of the Navy Moody inspected the United States Naval Home in this city. He came from Washington and was the guest of Captain Clark, Commandant of the Naval Home. He said he had selected this date for his visit as a tribute to William MacAbee, the oldest American naval veteran who celebrated the one hundredth anniversary of his birth.

In his address to the inmates of the home the Secretary said:

"You must not think you are objects of charity by receiving the shelter of this home. You are here in the most honorable sense and nothing is a gift to you. You earned all you are receiving by your service under the flag."

Boy Dies of School Initiation Injuries.

Ralph McBride, aged seventeen, died at Bluffton, Ind., as the result of initiation into a high school secret society. Reed and four other students of the Bluffton high school went through the initiation last spring, and it is said the ordeal caused injury to the bone of McBride's leg. The immediate cause of death was septic inflammation of the leg. The Grand Jury returned indictments against nine students in connection with the affair.

Quickly Joined Dead Husband.

James L. Ferriere, a well known newspaper man of New York, died in Paris, France, as the result of a paralytic stroke. His wife in a fit of distraction soon afterward took her life. Mr. Ferriere was formerly for several years an editor of the Paris edition of the New York Herald.

Austrian Army Plans Stolen.

Plans for the mobilization of the Austrian army in Galicia were stolen from the cavalry headquarters at Lemberg.

Two Indiana Banks Fail.

The Elston banks at Topeka and La Grange, Ind., have suspended payment. The failures will mean no inconsiderable loss, for most of the proceeds of the recent harvest, amounting to about $200,000, were in deposit in the two banks. Both were controlled by Robert Elston, of La Grange.

Castro Imperils American Interests.

A decree of President Castro of Venezuela suspending the mining code was said to imperil American plants in that country.

HUSBAND ASSASSINATED

Arrest of Widow the Sequel of a Midnight Shooting.

Two Alleged Accomplices Also Locked Up, One Being Her Admirer—Bloodhounds Failed on Scent.

Suffolk, Va.—Charged with [illegible] been an accessory to the [illegible] assassination of Peter Winn[illegible] the victim's widow, Ida [illegible] Comelo in Courtland, Va. In jail [illegible] O. A. Alley, who is [illegible] crime itself, and Greenlee [illegible] ture of whose alleged [illegible] vilay the killing of Odom [illegible] who is said to have [illegible] making the act. It is said [illegible] Bulgaria tentive to Mrs. Odom, [illegible] the othe on a previous occasion, protests o from home so the hus[illegible] rival might visit the [illegible] carry fear of detection.

Mrs. Odom was arrested in [illegible] The seizure of the woman was a[illegible] of stories of her former alleged [illegible] tions with Alley that reached the [illegible] thorities at various times after Wednesday, when the murder was committed. It was told that Odom left his bedroom shortly after midnight to ascertain the cause of a strange noise outside his home. He carried a gun, but whether he had opportunity to use it is a disputed point. The widow says he did. The police hold the opposite belief.

Following the sounds of shots Odom, the back of his head bored by two bullets, was found in the yard. He was dying when lifted from the ground and too far gone to tell the story of the shooting, it was said at the inquest next day. Before the Coroner could reach the house the victim was dead.

Taking the bloodhounds to the spot where the dying man was found the detectives vainly sought to make the dogs follow a trail. Sniffing expertly, the hounds run around the yard several times, nose to the ground, apparently unable to get the scent. If they found traces of the murderer the tracks did not lead far, for the dogs would not leave the place. It appeared to some who watched them they were at a loss others believed they had found a tr[illegible] that led to the house instead of aw[illegible] from the Odom home.

Berry Odom, a brother of th[illegible] man, sought evidence day and [illegible] He collated all the stories hea[illegible] Alley's reported attentions [illegible] Odom, and from them develope[illegible] ory on which he swore out wa[illegible] for the arrests. No difficulty was [illegible] perienced in taking the woman into [illegible] custody beyond the pathos attending her separation from two little daughters, but a large and heavily armed posse was deemed necessary to the capture of Alley. Some of the best known men in the county aided the [illegible]

MEETS HIS FATE IN TENEMENTS.

Politics Leads Boston Society Man Into Cupid's Snares.

Boston, Mass.—One of Cupid's prettiest romances is contained in the announcement just made of the engagement of Ellery H. Clark, amateur all-round champion of America, clubman, social favorite, politician and lawyer, to Miss Victoria Mary Maddalena, a pretty brunette of humble Swiss origin.

Politics led the scion of wealth and Back Bay society into the very heart of Boston's tenement district. He won the goal of his political ambition, that of School Committeeman, but lost to Cupid. While working for votes Clark met, wooed and won the girl, not yet out of her 'teens, who is to become his bride this fall.

To better conduct his campaign Clark took up his lodgings in a cheap hotel over a saloon, and close to the elevated. There he fell victim at first sight to the charms of the pretty brunette. She is the oldest of four children of Daniel Maddalena, who came to this country from Switzerland in 1878, and soon afterward married.

TO DISARM NEW YORK TOUGHS.

Recent Shooting Affray by "Monk" Eastman's Gang Stirs Up Police.

New York.—The New York tough must give up his gun. The recent bloody affrays between East Side gangs have called the attention of the police to the fact that the roughs and loafers of that section of the city go armed with revolvers. In a fight one night this week 100 shots were fired by members of the gangs. Now the things will be disarmed.

The police have planned a systematic campaign. The first move to be made is to relieve the toughs of their revolvers. Permits have to be obtained from the police for the right to carry weapons, and the department does not issue such permits to men like "Monk" Eastman, "Piggy" Donovan and their followers. A sudden descent on the various notorious gangs is to be made, and all men found carrying weapons will be arrested. Police Magistrates will then be asked to inflict the full penalty.

SALT TRUST WRECK COMPLETE.

Has $37,500 Unencumbered Assets Out of $11,000,000 Capital.

New York.—If the story told by certain stockholders of the National Salt Company be true one of the most remarkable cases of trust wrecking ever brought before the public is to be aired in the courts. The company is an $11,000,000 corporation, and out of the sale of the assets they brought only $37,500, and it now develops that there is a claim of $200,000 against the proceeds of the sale.

Countess a Socialist.

A sensation has been caused in German court circles by the discovery that the Countess Adele Gross, who died recently, was secretly a Socialist, subscribing to many sums for the Socialistic propaganda.

Lynched by His Own Race.

Negroes overpowered the Sheriff at Lisbon, Ark., took a negro named Hellem and hanged him to a water tank, where his body was left dangling. Hellem was charged with assaulting two negro girls aged five and ten.

The Funny Side of Life.

KICKED ALL THE TIME.

All his life he'd been a kicker;
Some at kicking could be quicker;
Kicked at life and kicked at death,
Even kicked with his last breath,
Kicked because he so desired,
Kicked the bucket, then expired.
—Philadelphia Record.

CURIOUS.

"But, professor, how can you tell beforehand how much a man will weigh before he had been born?"

"Before men had arms with their flats."

BUSINESS.

"Grocer must have a grudge against me. He said he would give me credit for my order some day."

"Oh, he only said that from force of habit; he's an undertaker."

SELF-DEPRECIATION.

"What I like," said Willie Washington, "is a good, sensible girl."

"Why don't you propose to one?"

"What is the use? If she were sensible she'd say no!"—Washington Star.

HIS FINISH.

"You say that long-haired pianist gave a 'finished performance,'" said the Theatrical Thug. "Well, I'm glad he finished his 'finished performance' before he finished me!"—Baltimore Herald.

NOT TO BE ENDURED.

"Dash boy, is it true that you have discharged your valet?"

"Ya-as, the scoundrel! When I took him out with me he managed to make people think he was the mashah and I was the man, haw haw!"—Chicago Tribune.

A CRYING NECESSITY.

"What the world needs is more poets."

"More poets? Why, there are so many poets now that they can barely make a living."

"Yes, but if there were more of them they couldn't live at all."—Judge.

AMBIGUOUS.

"You'll be sure to tell Miss Smythe that I called while she was out?"

"Oh, yes. She'll be delighted to hear it."—New York Journal.

FORGOT HIMSELF.

"This offer of your heart and hand is very sudden," said the summer girl, "but I will take it."

"Ah!" gasped the swell dry goods clerk, badly rattled, "will you take it with you, or shall I send it home?"—Philadelphia Public Ledger.

RETORT.

Fussleton—"And what would you say, sir, if I were to tell you you were not a gentleman?"

Frostleton—"I would immediately reach the conclusion that you and I really had more in common than I had thought we had."—Baltimore American.

GOOD BUSINESS SENSE.

"Is Simpson, the tombstone maker, a good business man?"

"Good? I should say he is! Why, that man's business foresight is simply wonderful. He has just started a quick lunch restaurant by way of extending his operations."—Baltimore News.

STILL MORE EXCLUSIVE.

Mrs. Woodby—"There's nothing like a college education to open the way to exclusive society. Since my son started to go to the university he's got into the Four Hundred."

Mrs. McGinty—"My son's doing even better at college. He's on the nine."—Philadelphia Press.

IMPLACABLE.

"I understand that you spoke in derogatory terms of me," said the man who is always looking for trouble.

Mr. Sirius Barker looked at him reproachfully and said:

"Is it your habit to hunt people up and interrupt their work simply because you happen to understand something?"—Washington Star.

CAREERS UNTIMELY END.

Waggsby—"Yes, Shinkum had a great criminal career until his own carelessness brought it to an untimely end."

Naggsby—"How was that?"

Waggsby—"All went well with him until he attempted to take the gold filling from the teeth of one of his hold-up victims. That was where he struck a snag."—Baltimore American.

A MARVELOUS TIMEPIECE.

Phonograph Attachment Reminds One of His Duties.

The latest piece of clockwork ingenuity comes from Geneva.

In that home of horological marvels a clock with a phonograph attached to it has just been constructed. The clock acts as a mechanical mentor.

If a man has to keep a business appointment at 12 o'clock to-morrow he tells his phonograph clock all about it, and sets the alarm indicator at 11:30. At that time on the morrow the clock will speak the message of reminder, giving him half an hour in which to get ready.

"There is no limit to the things that clocks will do," said a London clock expert, "if only they are adapted. They have already been made to play tunes, work models, print records and do a hundred other duties. There is no likelihood of any firm going in extensively for the manufacture of horological phonographs."

An order for coffee for two, tea for one, eggs and bacon for all, might be given to the servant's clock, with the indicator set at breakfast time.

The ardent lover who must miss one evening in the week from his adored one's side on account of other pressing business might easily persuade her to whisper the three words which are the essence of most courtship colloquies. Then, in the middle of his reluctant work, and with a prefactory hiss, out would come the old, old story, and, provided there were two such clocks employed, there would be mutual contentment.—London Express.

WISE WORDS.

White lies are but the ushers to black ones.—Marryat.

Nature creates merit and fortune brings it into play.—Rochefoucauld.

Patience is power; with time and patience the mulberry leaf becomes silk.—Chinese proverb.

A true man never frets about his place in the world, but just slides into it by the gravitation of his nature and swings there as easily as a star.—E. H. Chapin.

As riches and favor forsake a man, we discover him to be a fool, but nobody could find it out in his popularity.—Bruyere.

Write your name in kindness, love and mercy on the hearts of those who come in contact with you, and you will never be forgotten.—Chalmers.

So remarkably perverse is the nature of man that he despises those that court him, and admires whoever will not bend before him.—Thucydides.

Let men peer as close as they may into the secrets of nature, they do not analyze away the fact that God, the mysterious, the unnamable, can yet delight in man, and man in him.—Henry Wilder Foote.

He that is faithful in the first alternative—that tests him not only acts more promptly, but also sees further in the next. Each little grace invites a larger; and his step being upward, his view is wider.—James Martineau.

If my dreams of doing something splendid and rising to something great are dead and gone, I will take hold with a will at what I know I can do still to a good purpose, and then let the eternal love which is watching for me take care of the rest.—Robert Collyer.

President Eliot on Judgment.

Said President Eliot, of Harvard, to a body of students some years ago:

"If the law requires that four cents' worth of postage be placed on a letter, comply with it. But do not place one stamp on top of the other. Exercise judgment.

"Love is erratic. Its course is not smooth. A lady requested her husband, who was absent in Europe, to grow a Van Dyke beard as that was all the style at home. The husband replied that he would do as requested. A few days later the devoted wife sent her husband a beautiful scarf pin, which she desired him to wear on his return home. She was entertaining house guests and wished her husband to make a good first impression.

"When the loving wife saw her husband she rushed to her room and wept piteously.

"Gentlemen, how was that obedient husband to grow a Van Dyke beard and not hide the scarf pin? I say, exercise judgment."

Rustic Work.

Sooner or later every owner of a country home runs up against the idea of rustic work. Generally it hits him hard—sometimes too hard. If you really need seats or summer houses in your woodland nothing can be more appropriate than logs with the bark on, because they harmonize with the growing trees, says Country Life in America. This is the real secret of the popularity of rustic work—its fitness. It is opposed to costlier and more architectural features which make a strong contrast with natural surroundings. Occasionally, however, you will find a man who has fallen head over heels in love with rustic work for its own sake. The consequence is that he fills the lawn in front of his house with all sorts of rustic impossibilities, which look doubly foolish because they have no earthly use and because they are out in a sunny spot in the midst of an environment which is civilization rather than nature.

Indiana's Great Oak.

The famous "Johnston's giant oak tree," on the farm of Joseph M. Johnston, near Amora, Ind., has been purchased and cut down by James Trister. It was conceded to be the largest oak tree in Indiana, measuring six and a half feet through at the base, making four twelve-foot logs containing 6780 feet of lumber.—Denver Republican.

One little brownie-boy sat on a wall,
Two little brownie-boys played with a ball;
Three little brownie-boys jumped in the hall,
Four little brownie-boys heard mother call,
Five little brownie-boys weren't there at all.

Six little brownie-boys came on a run,
Seven little brownie-boys raced up like fun,
Eight little brownie-boys sat in the sun,
Nine little brownie-boys each ate a bun,
Ten little brownie-boys found there were none.

—Chicago Record-Herald.

WILD THYME.

To one who loves the companionship of the flowers, an old field in midsummer days is replete with special interest. The breaking of the virgin soil eradicates much of the native plant life, and when the long tilled ground has earned a rest and is at last permitted to lie fallow for a while it becomes the home of many a plant that has wandered hither from Europe, where perhaps for centuries it has played a part in popular tradition and been sung in poetry.

One of the most interesting of these introduced wildings is the wild thyme, now sparingly naturalized in the oldest

parts of our Eastern States. It is a prostrate plant, whose tangled stems love to form themselves into cushiony mats with us, though in England it sometimes is found hanging in short graceful curtains from jutting crags. In late summer the small purple flowers appear, crowded at the tips of the branches, but its deliciously fragrant leaves make the plant a continuing delight throughout the open year.

In Old World superstitions the mounds of wild thyme were accounted favorite haunts of the frolicking fairies, so that it was just as might have been expected that Puck in "A Midsummer Night's Dream" did "know a bank whereon the wild thyme" blew. This, by the way, is the only passage in Shakespeare wherein this wild flower is mentioned, though English literature is full of allusions to it. Thus Sir Francis Bacon mentions it as one of several plants which, trodden upon and crushed, "perfume the air most delightfully." Cowper speaks of a spot, the mere mention of which makes us long for the country, "ankle deep in moss and flowery thyme." Does not Keats make Endymion hold

"a basket full
Of all sweet herbs that searching eye could cull,
Wild thyme and valley lillies"—

and Wordsworth in a passage that might have been written of one of our own neglected fields, describes a meadow where

"bloomed the strawberry of the wilderness;
The trembling eyebright showed her sapphire blue,
The thyme her purple, like a binsh of even."

In the days of classic Greece and Rome, this plant was one that was burned as incense in the temples, and readers of Virgil's "Georgics" may remember his recommending the burning of fragrant thyme to ward off impending misfortune. The famed bees of Hybla pastured upon beds of the aromatic herb, as witness the poet Martial's "cheese cakes dripping with Hyblean thyme."

In the traditions of the church, too, the little plant has a place—figuring as one of three of which the Virgin Mary's bed was made.—Philadelphia Record.

KINGBIRD AND ORIOLE.

The difference in the nature of the two birds was strikingly exhibited in the style of the two nests. The kingbird hasn't a particle of imagination, says the National Magazine, not an atom of the artistic in his soul. His shape, dress and voice declare it. He is hardheaded, straightforward and serious, somewhat overbearing, perhaps, and testy, but businesslike and refined in all his tastes. His nest is himself over again; strong, plain, adequate, but like its builder, refined. Contrast the oriole's. Romance, poetry and that indescribable touch—the light, easy, negligent touch of the artist—in every line of it. Why, the thing was actually woven of new mown hay—as if one should build his house of sandalwood—with all the scent of the hayfield about it. I put my nose near and took a deep, delicious breath. The birds had selected and cut the grass themselves and worked it in while green. Some of it was still uncured, still soft and sweet with sap. One side, exposed to the sun through a leaf rift, had gone a golden yellow, but the other side, deeply shaded the day through, was yet green and making more slowly under the leaves. And this nest was woven, not built up like the kingbird's; it was hung, not saddled upon the limb—suspended from the slenderest of forks so that every little breeze would rock it. And so loosely woven, so deftly, slightly tied.

HIEROGLYPHICS.

The game of hieroglyphics, which is really a trick, is played with a confederate, and if cleverly done a "goodlie companie" may be deceived.

A showman, armed with a long, pointed stick, stays in the room and his confederate, the guesser, is shut out while the company thinks of a word. The guesser is called in and the showman proceeds to spell out the word on the floor with sundry taps and strokes of his stick.

The solution is simple enough. The taps represent the vowels; one tap for "a," two taps for "e," three for "i," four for "o" and five for "u," and the guesser need pay no attention to any other sounds made by the stick. The rest is done by the showman's clever talking. Suppose, for instance, the company selects the word "book." The cue is given in the sentence which the showman uses to call the guesser in. He would say, in this case, "Better come in," and the guesser will know at once that the first letter of the first word in that sentence will be the first letter of the word to be guessed. The showman taps four times with his stick and makes a lot of misleading strokes and signs; then he taps four times more for the second "o," then he says, in an offhand way: "Kind of hard, isn't it?" or any other sentence introduced by the letter "k." He finishes up with more signs and strokes, as if to puzzle the guesser, who, of course, has already secured his word.

The showman must be quick and clever in placing his consonants at the beginning of spicy sentences, otherwise the humor of the trick is lost.—New York World.

FROGS SWALLOW SPARROWS.

"Do you know that out in one of the States of the Middle West one of my books was taken out of the school because it contained a statement that a frog which I watched caught and swallowed a sparrow?" asked a writer. "The probability of this was debated for an hour or more, and it was then decided that no frog could choke down a sparrow, and the book was withdrawn. They did not happen to know that frogs sometimes grow to a length of sixteen inches. There is a man in the upper part of Connecticut who has a number of frogs as long as that," he said, spreading his hands to indicate the length. "He often feeds them with mice and sparrows, and I have a photograph showing one of these frogs just about to take a bird in his mouth."—New York World.

COVERING BOOKS.

To cover paper bound books take two pieces of cardboard, a tiny bit larger than book. Paste fly leaves at front and back to cardboard, which of course is outside. Then take a strip of strong cotton cloth, paste it down back of book, have it wide so it will cover about one inch of each piece of cardboard, thereby joining the two pieces together. Now put a cover of brown paper over all, pasting securely, and your decorated cover goes over this.

The books may be covered with decorated silk, plque or duck if you paint or embroider, but the simplest way is to cover with tissue paper (not crepe). Paste a pretty card on the front and after cutting title and author's name from old cover arrange them prettily on the new one.

Appendicitis' Friends

For those who have a tendency to appendicitis the list of things which cannot be eaten with safety is long. Sir Frederick Treves declares that one of the deadliest sweetmeats is preserved ginger, but pineapple, fresh or preserved, is almost equally risky, while oranges, figs, raspberries, in fact, all fruits with pips, are also very dangerous eating.

THE SEWING ROOM.

A separate sewing room is a blessing which every mother who has her dressmaking done in the house appreciates. This room need not be large, but if it is a separate room that is all one needs for comfort. In this room all the tools required to build a gown are kept, and there is no necessity for tucking them away in odd corners after the day's work is finished. A chest of drawers where new and old materials are kept is invaluable. In one drawer there should be patches and scraps for mending; in another new dress goods which are waiting to be made up; in another dressmaking supplies.

A sewing machine and dress form, large work basket, cutting table and spoolstand form the furniture of this useful apartment, and a great deal of valuable time is saved by having these articles within reach at a moment's notice.—Pittsburg Dispatch.

PRESERVING PREPARATIONS.

Sort over your stock of fruit jars to see there are no defects, and that covers fit perfectly.

Do not use old rubbers. No matter how sound they may appear they are apt to be porous and will let in air.

Pour water into each jar, seat and invert. If it leaks ever so slightly do not use it.

When you have selected sufficient perfect jars, wash each one inside with a dish mop and hot soda water. Then sterilize by setting them in cold water, letting it come to the boiling point and boil for a quarter of an hour. Fit each jar with a ring, cover and leave in the water till used.

Get the other utensils needed together. You will require scales, a strainer, skimmer, silver spoon, perforated wooden spoon, large saucepan, a wooden rack to stand it on, a jelly bag, pint and cup measuring cup, funnel for fruit canning, tray, towels, holders, etc.

As the preserving should be done, if possible in the cool early morning, all these should be attended to the day before if possible.

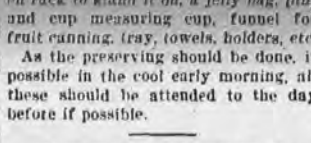
HOW TO WASH CHIFFON.

White chiffon is not nearly so perishable as it is generally thought to be; it will bear washing several times if carefully handled.

Wash in warm water and castile soap, rubbing gently with the hands, and rinse out in clear water. Have ready plenty of needle-pointed pins and a smooth, clean place on the bed where the spread has been carefully tucked in tight. Wring the chiffon dry by squeezing and quickly pin it out on the bed, going all down one side of the piece first with pins about an inch apart, and then stretching to the opposite side and pinning both ends out.

A little practice will enable a woman to stretch it rapidly, and almost as soon as it has been pinned carefully it has begun to dry. Five or ten minutes will dry it perfectly. When unpinned the chiffon is as smooth and fresh as if just from the store.

Accordeon-pleated chiffon can be washed without ripping up, if a basting thread is first run firmly through the lower edge of all the pleats, gathering them into a bunch like a closed fan. Instead of being pinned out, it should be hung in an open window with a heavy weight attached to the lower edge to keep the pleats out straight and to stretch them. They will be found in good condition when dry and released from the [illegible].—New York Press.



Breakfast Waffles—One and a half cupfuls of flour, half a level teaspoonful of soda, one teaspoonful of salt, add buttermilk to make a thin batter, add one cup of cold boiled hominy and two eggs well beaten. Bake in hot waffle iron.

Boiled Cucumbers—Peel cucumbers, cut them in halves lengthwise, then cut each half again lengthwise. Put them into boiling salted water and simmer until tender. Make a white sauce with butter, flour and cream. Drain the cucumber thoroughly and add them to the same. Sprinkle over chopped parsley. Serve hot.

Preserved Gooseberries—Weigh the fruit and allow a pound of sugar to each pound of berries. Dissolve the sugar in a very little water, and when it comes to the boil drop in the fruit. Let it cook fifteen minutes, then skim it out with a perforated spoon, and fill into glass self-sealing cans. Boil the syrup until rich and thick, pour it over the fruit, and seal.

Gooseberry Marmalade—Top-and-tail the berries, allow three-quarters of a pound of granulated sugar to a pound of fruit; put together in layers and set on the back of the stove to heat up very slowly. As the berries soften and the juice starts, mash the berries to free the juice and cook gently till thick. It must be cooked until the skins are tender. Seal like jelly.

Blackberry Plombiere—Pick over, wash and drain a quart of blackberries and press through a sieve. Make a good syrup of one and one-half cups of sugar and three-fourths of a cup of water, when cold add to the blackberry puree and set in a cold place. Then turn in a freezer for twenty minutes, and when it begins to thicken stir in a pint of whipped cream and pack for two hours before using.

WISDOM OF THE BEE.

Legent of the Visit of the Queen of Sheba to King Solomon.

"Here is the legend of the visit of the Queen of Sheba ao King Solomon," said the Pascagoula Diogenes in the Rotunda of the Great Southern hotel, Gulport, Sunday. "The queen reigned over a people that lived on the border of the Red Sea, who were the richest in Arabia. They were represented leading an idle life, owing to the abundance of natural produce of their country, which afforded the sustenance of life and also frankincense, myrrh, cinnamon and balsam that gave them an extensive commerce with other nations.

"The queen, owing to the splendid reputation of King Solomon, whose power and wisdom had spread to the remotest parts of the world, visited him at his own court. Presenting herself at the foot of his throne, in each of her hands she held a wreath of flowers—one composed of natural, the other of artificial. Art, in the labor of the mimic wreath, had exquisitely emulated the lively hues of nature; so that at the distance it was held by the queen to exercise the sagacity of the monarch for his judgment, it was deemed impossible for him to decide which wreath was the production of nature, and which the work of art. Solomon was, for a moment, perplexed; yet, to be vanquished by a woman irritated his pride.

"An expedient presented itself to the king by a swarm of bees on the outside of a window, which he ordered opened; the bees rushed in the court and alighted on one of the wreaths, while not a single one fixed on the other. Sheba was baffled and was convinced of the wisdom of Solomon. Such is the story handed down that the bee only rests on the natural beauties, and never fixes on the painted flowers, however inimitable the color may be laid on."—New Orleans Times-Democrat.

Women Brokers.

Two young women in New York have lately made a hit as stock brokers. One of them was a school teacher. Many women would rather deal with a woman broker when possible; and the men in the same line like her because she carries on her affairs in a businesslike way. The other woman broker, who has an uptown office, is just as discreet and systematic. They are both making money.

SATURDAY, SEPTEMBER 26, 1903.

TO ADVERTISERS.

Frequent changes of advertisements is one of the main requisites for a successful result; we therefore urge our advertisers to change their ads at least once a month. Try and get such changes to us as early in the week as possible; never later than Thursday noon.

The REVIEW *is on sale at the Union News Stand, east end railroad station, and at E. M. Laing's, 249 W. Front St.*

PUBLIC SENTIMENT AROUSED.

Two horses driven to a patrol wagon in Jersey City had their tails docked and were much pestered by flies. Their driver prompted by a great big heart, secured two long tails from horses that had recently died and deftly attached them to what remained of the tails of the living horses, so that life to them again became bearable.

More and more are people awakening to the fact that dumb animals have nerves and suffer pain just as keenly as a human being and where ice they have thoughtlessly been indifferent in the matter, now that the subject has been brought to their attention through newspapers, humane societies and the literature and books they send out, public sentiment is changing, and the time is not far distant when people who now drive horses with mutilated tails, because it is fashionable, will soon look at the matter from a humane point of view and their former pride in the mutilated appendages will be turned to regret and shame.

Public sentiment is slow to concentrate on a subject, but when it does start it moves quickly and decidedly and there is no resisting it.

TUESDAY'S ELECTION.

Indications are that the constitutional amendments have been rejected, but it will take the official count to decide it. So far as can be learned, the returns from the twenty-one counties of the State indicate that the majority against the amendments is about one thousand.

In nearly every instance these figures are estimates, and the returns are still incomplete. In some cases the estimates vary in the basis, some taking the average vote for and against one amendment, and others taking the vote on another amendment.

Many reasons have been expressed as to the defeat of the amendments, but it appears that there was no organized fight made by the friends of the movement, while those opposed did make a fight—principally by organized labor; although it is not publicly known why they opposed it.

About ten per cent. of the normal vote was polled, hence the result can hardly be called a representative expression of the people.

One thing which operated against the amendments was the manner in which the ballots were prepared, the idea prevailing that the unusual way of marking them was a trick on the part of some person or persons to carry the amendments by confusing the voter. This caused many to vote against them.

It is simply impossible to account for the apathy of the voters on this important matter, thousands of whom neglected to vote.

THE SCHOOL LAW MUDDLE.

The Court of Errors and Appeals has decided that the McKee school act of 1902 is invalid.

This unfortunate condition of affairs will affect every school district in the State, and an immediate return to the old laws in force prior to 1902 will become necessary.

The principal points effected by this decision are:

1. No way to legally distribute school moneys, because no school census has been taken as the old law provides.

2. The State Board of Education as now constituted is an illegal body.

As originally drafted by a commission consisting of former Senator Edward C. Stokes, of Millville; J. Brognard Betts, of Trenton; and S. St. John McCutchen, of this borough, the new law was constitutional, but when it reached the legislature, so much tinkering was done to it that it was rendered unconstitutional.

One State educational officer is quoted as predicting that if the court overthrew the law, which it has done, the result could be best and most aptly illustrated by the use of the word "chaos."

"In the first place," said this man, "there will be no money on which to run the public schools. The appropriations for the support of the schools are now made on the basis of the attendance. We shall have to go back to the old law, under which appropriations were made on the basis of a school census, and no such census has been in three years, and none can be made until next May. In the second place the State Board of Education will go out of existence. The old board was appointed from the old Congressional districts, eight in number, which have been changed under the last federal census and re-arranged into ten districts.

"The decision," said State School Superintendent Baxter, "was no great surprise. Now we must go ahead on the old laws until we can secure from the Legislature a new and pefect act. As to chaos reigning on the school bond question, I am confident that no great evil can come from any attempt to invalidate the present bonds. A suit against them would be an equity one, and holders of New Jersey school bonds sold under the McKee law need not feel any worry."

The Legislature will probably be called in special session within the next four weeks to pass a law supplanting the McKee school act.

Treasurer Briggs and State Controller Morgan decided that the setting aside of the McKee act leaves them without power to disburs some $960,000, appropriated by the last legislature to defray 35 per cent of amount to be raised by taxation for the public schools.

The tying up of the school funds is, however, only one of the problems arising from the setting aside of the act. Officers are without legal authority, and the validity of bond issues for the erection of school buildings, and the power to incur debts by school authorities are questioned.

The law committee of the State Board of Education will prepare a memorial to the Governor urging the necessity for an extra session.

TROUBLE IN HUNTERDON COUNTY.

Hunterdon county is having an investigation of its Board of Freeholders, charged by taxpayers with extravagance and corruption.

Hunterdon county has taken advantage of the Strong act and decided to do away with the present board of freeholders, which will go out of existence next January and be replaced with three commissioners.

Supreme Court Justice Swayze has appointed Judge George M. Shipman of Warren county to make the investigation, which will extend back five years, since which time the appropriations have greatly increased.

During the past seven months it is charged that the Board has spent $110,500.00, while a few years ago $50,000 was considered enough to run the county a whole year.

One of the peculiar facts brought out by the Freeholders is that the county has 18,000 bridges in its domains—nearly equalling the number of inhabitants, allowing one bridge for each man, woman and child. It has been suggested that the present Board was trying to accomplish that result and but for their unexpected dismissal would soon have accomplished it!

The Board is composed of twenty-one members—fourteen Democrats and seven Republicans.

THE PLAINFIELD BOLT.

The Camden *Post-Telegram* is really serious over the matter of the bolt of the fifteen Plainfield Republicans, and gives advice that is good. It says "Stand by the ticket." Union county Republicans need to get together and stop their bickering if they would elect their ticket this fall. Factional fighting before the primaries was bad enough, but if the disgruntled Fowlerites of Plainfield make good their threat to cut the ticket, how shall they themselves be benefited by a Democratic victory?

"We doubt if there was ever waged in the state a fiercer factional fight than the Loudenslager-Vansant battle in this county last year, but the successful candidate was given the full party support on election day and by that means the common enemy was vanquished and the scars of the primary fight were quickly healed.

"'United we stand; divided we fall,' is a motto not to be ignored by Union County Republicans."—*Elizabeth Journal.*

LAST week a letter from ex-marshal Fahn was published in the REVIEW wherein he charged Chief Marshal Campbell, of the borough, of spending much of his time when on duty in back rooms playing cards, or at other places drinking beer, and that when needed he was always "out of sight."

These charges are serious and demand immediate investigation by the proper authorities.

But if the charges are not true, then it is up to Campbell to clear his name and reputation from the accusations.

Big Trees of Santa Cruz.

Santa Cruz, Cal., is rapidly becoming a show place. By accident more than foresight a grove of giant redwoods, in the canyon of the San Lorenzo, a little more than five miles from town, escaped the ax. Gradually it dawned upon the people that board measure was not the only standard by which the value of trees could be computed. Thus the lines of preservation were drawn about grove, and each year the size, and majesty of these monbecomes more impressive, and as they attract a larger numsitors. There are about 60 his grove, ranging from 30 in circumference, and from t in height. Beside their mensions, the curiosities mer of growth and the e grove itself combine one of the most attrac- California.—Sunset Mag.

It at the Post.

lowun," said the fair posthe square chin, "I must really decline to become your r half."

B-but why?" asked the astonished oung man who had figured from his form sheet that it was he under the ire in a canter.

"Because," replied the female exender of the frosty digit, "the man I marry must be brave and fearless. To-night you let out the information that you have loved me for five long, weary years but have not dared mention it until the present writing. A man who has no more nerve than that would hide under the bed while his wife went downstairs to interview a burglar who was making a raid on the family larder. Therefore, Mr. Slowun, I will work the piano for a little slow music while the curtain drops on the farewell scene. You will find your hat on the usual peg of the hall rack. Good evening."—Chicago Daily News.

Potato Planting.

The potato planter of to-day would make a farmer of a generation ago sit up and rub his eyes. It requires that the potatoes be supplied, but will do all the rest of its own initiative. It picks the potato up and looks it over—or seems to—cuts it into halves, arters ar any desired number of s, separates the eyes and removes old ends. It plants whole potaor parts thereof, as desired, as together or as far apart as the ment of the farmer on the driving suggests. Having dropped the seed it covers it, fertilizes it, tucks it in like a child put to bed and paces off the next row with mathematical accuracy.—Agricultural Journal.

Right Way to Bribe.

An amusing story is told among lawyers of a Walloon peasant who had gone to law with a neighbor. In a conversation with his lawyer he suggested sending the magistrate a fine couple of ducks.

"Not for your life," said his adviser. "If you do you'll lose the case."

The judgment was given in his favor, when he turned to his lawyer and said: "I sent the ducks." Astonishment on the latter's part turned to admiration when his client continued: "But I sent them in my neighbor's name."—London Express.

"Whisky on the Roof."

Terence V. Powderly, formerly commissioner-general of immigration, has been confined to the house all winter by an old injury to his knee, which has recenly given him much trouble. He was out recently for the first time in several months. He met Senator Penrose, of Pennsylvania, just outside the white house.

"How's your gout getting along?" a bystander asked Mr. Powderly.

"Oh, I suppose you might as well call it gout as anything," he replied.

"Up my way," remarked Senator Penrose, "they call it 'whisky on the hoof.'"—N. Y. Sun.

Looked Hard to Him.

Cholly—I tell you, Sloman's a clevah fellah. Heard him tell a girl lawst night something about "Kind hearts are bettah than cwowns," or something or othah.

Ascum—"Kind hearts are more than coronets." And did you consider that original with him? That's an old one.

"Ya-as; but think how clevah of him to keep it in his head!"—Catholic Standard and Times.

Great Expectations.

Her Former Mistress (admiringly)—He certainly is a bright baby, Norah. I expect he will make his mark some day.

Mrs. Mulcaughy (fondly) — Sure, ma'm, an' we expect he'll be able to do more than make his mark—we want him to be able to write his name!—N. Y. Times.

Beyond a Doubt.

"Riches will not buy happiness," remarked the man with the quotation habit.

"Perhaps not," responded the chronic doubter, "but I know lots of guys who would be happy if they had money enough to make the experiment."—Cincinnati Enquirer.

Making a Noise.

"What do you mean by accepting a callow youth like Jack who's just out of college? Why, he'll never make a noise in the world!"

"Oh," said Mabel, "you just ought to hear him give his cute college yell and you wouldn't think so!"—Baltimore Herald.

Trick of Photography.

A German photographer, Kunwald, when taking a picture of a lady of doubtful age, places sheets of celluloid between the negative and the printing paper, thus producing a very softening effect, which hides the discrepancies of age.—Photography.

Finally Got It.

"What do you want, little boy?" asked the druggist.

"Say, mister," said the boy, who had been wrinkling his face, scratching his head and rubbing his right foot up and down his left leg in the effort to remember something that had escaped him, "what's the name of that place where we've got so many soldiers?"

"Fort Sheridan?"

"No; it's a good deal further away than that."

"The Philippines?"

"That ain't just it, but it's somewhere around there."

"You don't mean Manila?"

"Manila! That's right! I know'd I'd get at after awhile. I want a bottle of manila extract for flavorin' ice cream. How much?"—Chicago Tribune.

The Telephoto Lens.

The up-to-date explorer now takes a biograph or cinematograph with him. One of the first to do this was Prof. Haddon, of Cambridge, who has also included a phonograph among his outfit. With these instruments combined the scientific traveler can bring back an extraordinarily vivid record of manners and customs and cause the remotest savage to dance cancans and shriek their war songs in the decorous theater of the London university. Moreover, there is the telephoto lens, a combination of telescope and camera, with which all kinds of extraordinary subjects can be taken, such as a lion attacking an antelope, secret ceremonies of savages and other functions at which the immediate proximity of the explorer is highly undesirable in the opinion of all parties.—Pearson's Magazine.

A Spotless Character.

Prospective Employer—You don't drink?

Applicant—No, sir.

"Don't gamble?"

"No, sir."

"Don't smoke?"

"No, sir."

"Wouldn't touch the filthy weed, eh?"

"No, sir."

"Never swear?"

"Never, sir."

"Consider it a vile habit, I suppose?"

"Yes, sir."

"Well, I guess I'll try somebody else. I wouldn't feel quite comfortable if I had a coachman so much better than I am myself."—N. Y. Times.

Up-to-Date Courting.

"Then you will be mine?"

"All yours!"

"Oh, joy!"

"Oh rapture!" (They embrace.)

"It's getting late, dear; one more kiss, and then good-by. My husband doesn't permit my callers to stay after ten, and besides I must put the children to bed."

"But our wedding will be soon?"

"Yes, love, if our divorces do not flash in the pan. Good night. Give my love to your wife."—Houston (Tex.) Post.

House Rents in Mexico.

Rents are high in Mexico, not alone because of the growing demand for better homes and business houses, but because building is expensive and taxes are not low. The contribution to the government from a houseowner is no less than 12 per cent. of gross receipts from his rent, and this is quite aside from his water, paving, sewer and other taxes.

Horse Sausages.

The canton of Geneva recently passed a law which makes it compulsory that butchers who sell horse sausages must wrap them up in blue paper, so as to avoid confusion. The butchers are in high dudgeon, and have complained to the federal authorities that the new law interferes with the freedom of commerce.—Cincinnati Engineer.

Penalty for Russian Students.

By a law recenty enacted in Russia any university or high school student who creates or causes disorder shall be drafted into the army for a period of from one to three years. This is to curb the rashness and fondness for mischief of college students who imagine they have the privilege to annoy all creation.—N. Y. World.

The Real Thing.

"Have you ever played a leading role?" asked the theatrical manager.

"Sure thing," replied the applicant.

"What was it?" queried the t. m.

"I led the mule in an Uncle Tom's Cabin company for two years," answered the embryo star.—Cincinnati Enquirer.

Not Superstitious.

"I am afraid you are superstitious," "Deed I isn't," said Mr. Erastus Pinkley; "some folks is a-skyaht of ghoses an' all kin's of critters; but as long as I has a rabbit's paw in my pocket I feels puffickly safe." — Washington Star.

He Had the Goods.

Earnie—Why did she refuse him? I thought she said he was a man of sterling qualities.

Helen—Yes; she did; but she found a man with sterling silver.—Philadelphia Record.

Slim Diet.

"Casey, they till me th' dochter has put ye on a slim diet, b't yeh kape on atin' as hearty as iver!"

"So I do, man, but I eat spare-ribs."—Baltimore Herald.

Valuable Insecticides.

The damage to the cotton crop from the leafworm, which in some seasons exceeded $30,000,000, is now prevented by insecticides.—Science.

Merely Foolish.

Many a man thinks he is unlucky when he is merely a fool. — Chicago Daily News.

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address.

THE INADVERTENCE OF MISS PERKINS.

BY WARREN CLARKE.

IT was a queer little house, with sharp pointed gables and wide perpendicular weather-boarding, that seemed entirely out of place on busy Summer street, with its strenuous bustle and hurried air of importance. But the house was a relic of other days, when the now thriving town was simply a village, and the old residents, who had long since died or moved to quieter and more fashionable quarters, had considered Summer street the most desirable place of residence in the county. The Honorable Peter Perkins had built the house, and there he had lived for years, nominally practising law, but in reality cultivating that unproductive field, so dear to the heart of every true patriot, the field of Political Preferment; and being uniformly unsuccessful, at length, after a particularly disappointing campaign, had died, leaving only his daughter Martha—Miss Perkins—and his little old-fashioned house.

Westfield, with all its miniature metropolitan ways, had not outgrown the habits of everybody's knowing about everybody else's business, and after the Honorable Peter Perkins was laid in his final resting place, there was not a household in Westfield in which the probable doings of Miss Perkins were not more or less discussed. But Miss Perkins, being what her neighbors called "a strong-minded person," did not leave her friends long in uncertainty, for the very day after her father's funeral she announced her intention of opening "a flower store," a new venture for Westfield, but one that she felt sure the growing refinement of the people, as they got more money and were brought more and more in touch with city ways, would warrant.

Accordingly, in a few days there appeared a neat sign over the front door: "Miss Perkins, Flowers." And into the little front parlor there came a counter and a refrigerator, while the window was filled with fragrant blossoms—roses, carnations and violets predominating. The cut flowers came from a florist in a nearby city, but it was not long before a small greenhouse in the back yard did much to supply the demand.

[redacted] ks they [redacted] lied upon.

And so Miss Perkins' store became a permanent institution, and Westfield wondered how the town had ever gotten along without it. It was such a convenient stopping place, too; the ladies made it a sort of rendezvous, and drop in when you might, you were almost sure to find some one to tell you what was going on or coming off in Westfield society. Indeed, the young society reporter of the Westfield Weekly Watchman depended upon Miss Perkins' store almost entirely for the social gossip that made up her weekly "society letter." It is true that in this way she always printed what every one already knew, but the Watchman was a conservative paper and did not feel called upon to assume the responsibility of printing news before it had been discussed and confirmed by the whole town.

Miss Perkins was busy behind the counter one morning, arranging a freshly cut supply of flowers, when two young ladies arrived at the door at the same instant, and came bustling in together.

"Why, good morning, Miss Clemans," exclaimed Miss Perkins, looking up in surprise. "Good morning, Miss Elwell; aren't you chickens out a little early this morning?"

"Oh, not at all," replied Miss Clemans with a laugh. "You know, we're early birds at our house; I've been to market already."

"Well, dear me!" exclaimed Miss Elwell, who was a rather languid creature, "I'm sure you are an early one. Now nothing in the world would usually get me out this early, but I have a very important piece of news, and I could hardly wait to get down town to tell it."

Miss Elwell stopped and looked at Miss Clemans to see that she was duly impressed, while Miss Perkins went on arranging her flowers.

"Well, now that you are here," said Miss Clemans, "let's have the news. What is the wonderful piece of information that has gotten Miss Lazybones out of bed before ten o'clock?"

"I never was more surprised in my life," said Miss Elwell, "and I know everybody will be completely upset over it. Can't you guess what it is?"

"Why, of course I can't! How provoking you are! Without a hint of any kind except that it's the most surprising thing that ever happened!"

Miss Elwell seemed to enjoy her friend's curiosity. Finally Miss Clemans said:

"The most surprising thing that ever happened? You must be going to get married!"

"Now, see here, girls," exclaimed Miss Perkins from behind the counter, "that's the way young ladies talk, I believe, in the comic papers, but it isn't the kind of wit that is considered good form in good society, so Rose, if you have any news to tell, let us have it, and, Blanche, stop your chaffing."

The girls laughed, and Miss Elwell said:

"Miss Perkins' curiosity is getting aroused, so I won't keep you in suspense. Mabel's engagement is broken!"

"What!" cried both her listeners at once. "Mabel Richey?"

"Um-umph," said Miss Elwell, nodding her head in affirmation.

"Oh, you're joking," said Miss Clemans, "she and Harry were just devoted to each other. Why, nothing could ever come between them. Mabel told me so."

"But something did, just the same," replied the bearer of the news, "and that something was Miss Marguerita Daisy De Jones, of New York."

Miss Clemans exclaimed, "Well, I never!" and Miss Perkins groaned.

"To think," finally said the elder lady, "that Harry Martin has no more sense than that! What the young men of this day and generation are coming to I'm sure I can't tell. Here that bold-faced creature with her blonde hair——"

"It's blondined, I know," put in Miss Clemans.

"And her pink cheeks," continued Miss Perkins, "comes to town with nobody to introduce her but the hotel keeper, and sets half the men in town crazy, and they do say that some of her worshipers are not single men either," and Miss Perkins set down the sprinkling can so hard that the noise attracted the attention of people in the street. "It does beat all; Harry Martin was such a nice fellow, too!" said Miss Perkins; and then suddenly she asked, "When did it happen?"

"Oh, it's been going on for a long time, I guess," said Miss Elwell, fingering some flowers on the counter, "but the break came night before last. Mabel's brother Dick told my brother Tom yesterday, and Tom's been coaxing me to lend him my wheel, so he came straight home last night and told me. It was raining too bad for me to get out then, so I had to keep it to myself all night. I guess from what Dick said they must have had an awful time. It seems that Miss Marguerita Daisy De Jones is going to give a supper at the hotel to-night to a lot of young fellows, and Mabel heard that Harry was going, and of course that made trouble. They just had it in the parlor and she gave him back his ring and he left in a great huff. Dick says [redacted] never intended going at [redacted] but [redacted] ed to. [redacted]

"Well, I don't believe he was going," said Miss Perkins, "and somebody ought to patch it up between them."

"I don't think anybody will," replied Miss Elwell; "they're both as proud as Lucifer and as stubborn as—I don't know what. Tom says he bets Harry goes away, and I suspect he will. Well, I feel sorry for them, but I don't know what we're going to do about it. Say, Miss Perkins, what is that plant over in the corner? I never saw anything like it before."

Miss Perkins told her the name of the plant, and then a commercial traveler, who wanted to sell Miss Perkins some glass that she didn't need for her greenhouse came in, and while Miss Perkins was explaining why she didn't want and couldn't use a thousand panes of glass, even if it was the clearest ever cast, the young ladies slipped away.

All morning Miss Perkins, who usually did not give much heed to the gossip that went on in her little room, thought of the lovers' quarrel she had heard discussed. Both of the young people were general favorites in town, and their marriage had been deemed an eminently suitable one; it was a shame, thought Miss Perkins, that a frivolous stranger with yellow hair should have the power of working so much mischief.

"I do hope," said Miss Perkins to herself, "that those girls won't chatter about it all over town. I ought to have warned them about talking too much—not that it would have done any good, but it might have eased my conscience a little."

As she spoke a carriage drove up to the door, and Harry Martin sprang to the pavement and came in.

"Good morning, Miss Perkins," he said in his brisk, whole-souled manner. "Some roses this morning? Ah, those are beauties; how many have you? Three dozen, only? Well, I want them all. Here's my card, which you will drop in the box, and send them to——"

And he wrote an address on a tag lying on the counter.

"This address, I've left mother in the carriage and she's afraid of the horse, so I'll hurry out. Good morning, Miss Perkins."

And Mr. Martin was out and away before Miss Perkins had hardly recovered her breath.

She looked at the address he had left.

"Miss De Jones, Liberty House, City."

And then Miss Perkins lost her temper.

"Why, the impudent puppy!" she cried. "If he thinks I'm going to send those flowers to that creature, he's mistaken! He's crazy, he is. I wonder if his mother knows?"

And then out of pure vexation she sat down in a back room and had a good cry.

A few moments later she came out and calmly put the roses in a box, dropped Mr. Martin's card among them, tore into little bits the tag he had addressed, and with a firm hand wrote a new one, which she placed in the box; then put it with a half dozen smaller packages, which Nero, the factotum of her establishment, would deliver. Then Miss Perkins regained her habitual smile and gentle self-possession, and went about humming little snatches of happy songs and seemed as one conscious of having done a good deed.

* * * * *

Harry Martin was not a happy man. Indeed he had been miserable for thirty-six hours, for he was, or had been, deeply in love with Mabel Richey, and in reality had never been introduced to the golden-haired girl with the three-sectioned name, until since the quarrel with his sweetheart. But since that tempestuous interview, he had sought, and easily obtained an introduction, and had decided to send her roses for the decoration of the table at the supper that was making several Westfield sweethearts jealous and unhappy.

And Mabel Richey was not a happy woman. She had wept all night after the quarrel and gotten up the next morning firmly resolved to die rather than show any signs of weakening. And she had gotten through the preceding day fairly well; the only times that she manifested any unusual feeling being when the name of Miss Marguerita Daisy De Jones was mentioned in her presence.

Miss Perkins' Nero was never very swift, and it was quite the middle of the afternoon before he reached the Richey residence and left a long box evidently containing flowers. Mabel was in her own room, and Jennie, the maid, took the box to her. It did not take her many seconds to tear the box open and scramble among the roses for the card; even before she looked she felt sure of the name she would find on it, and when she read, "Mr. Harry Martin," she sank down on the floor and laughed and cried and said:

"Oh, what a goose I am!"

In less than ten minutes she was down stairs in a fresh frock with the tear-stains all washed away, and her father's stable boy speeding with a note to "Mr. Harry Martin," and under the stimulus of a coin in advance and the promise of another when he returned, Jack really hurried.

Harry Martin, for some reason, had found the work in his father's office very irksome that day. After he had made several more or less serious blunders, the elder Martin suggested in a tone permeated with sarcasm that he go home and rest, and Harry, acting on the suggestion, had put on his hat and street coat and left the office. He stopped on the front steps, however, and wondered where he would go and what he would do. Westfield, and life itself, seemed a dreary waste; he wanted to get away from it all. The satisfaction he had expected to feel in sending a box of roses to Miss De Jones was not very much in evidence, and he heartily wished he had never seen nor heard of that frivolous young woman.

While he stood on the steps wrapped in melancholy, which he punctured with an occasional, "Deuce, take it all!" he saw Jack, the Richey's stable boy, approaching, wearing a broad grin. Harry, from old time habit, began feeling with one hand for a coin and held out his other for the note, then he suddenly started and thought with bitterness—

"What an ass I am! He hasn't anything for me."

"Here's a letter, Mr. Martin," said Jack, his grin widening, and then he added in a lower tone, "Miss Mabel, she told me to hurry."

"Well, hurry back, then," said Harry, tearing the note open, and giving Jack the expected coin. "I'll take the answer.

The note he opened read:

"My Dearest Henry—How very good of you to send the roses. Oh, you don't know how awfully unhappy I have been! It was so mean in me to be jealous, but I know that you forgive me. When shall I see you? Yours,

"Mabel."

Harry whistled.

"Roses! What the deuce does she mean? I'll just go and see. Poor little girl, she's been all cut up and I've been a perfect brute!"

While he upbraided himself he was already taking rapid strides toward the Richey residence, which he reached long before Jack did.

He saw the roses in the drawing room before Mabel came in, but by what happy inadvertence they got there he could not guess, nor did he try to find out when Mabel came—they had other things of which to talk.

But on his way home, two hours later he dropped into Miss Perkins' and paid for the roses.

"And oh, Miss Perkins," he said, "about their delivery; wasn't there—through some inadvertence—a mistake made——"

Miss Perkins looked him straight in the eye.

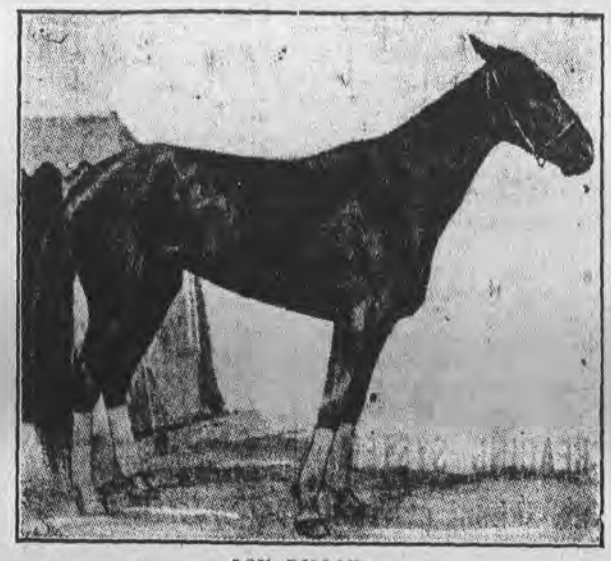
"Was there?" was all she said.—Waverley Magazine

Censored the Bonbons.

The censorship in Russia continues to be used in the usual arbitrary manner. One of the most curious examples of the use of the power has recently come to light.

A manufacturer of sweets was in the habit of wrapping up bonbons in colored paper, which was covered with all manner of little pictures. One of these pictures was that of a landscape with a storm coming up from the sea. Underneath was the sentence: "The storm rages: it approaches nearer." These papers were confiscated by the censor and their further use forbidden under a heavy penalty, as it was thought that they were political propaganda.—London Express.

FIRST HORSE TO TROT A MILE IN TWO MINUTES



LOU DILLON.

Lou Dillon accomplished at Readville (Mass.) track what American trotting horse breeders have labored years to produce—a mile trotted in two minutes. Millard Sanders was the driver of the great mare. For pacemakers there were two running horses hitched to road carts, Peggy From Paris, driven by "Doc" Tanner, and Carrie Nation, driven by Scott McCoy. Lou Dillon is a five-year-old red chestnut mare by Sidney Dillon, dam Lou Milton. She has never been raced. She was trained last year for the first time. She was bought by C. K. G. Billings for $12,500 at the sale of the Henry Pierce stables at the Cleveland May sale last year. The reason for the low price was her bad disposition and the difficulty in driving her. Last year she did a mile in 2.06 in her work at Memphis, Tenn.

Springs in the Anchor.

To Relieve the Cable of Repeated Shocks.

The constant tugging and pulling on the cable chain of a boat at anchor in a somewhat rough sea is very great, and when maintained for any great length of time seems to have a weakening effect on the chain links, which part under the severe stress. The boat is not only thereupon put in great

RELIEVES ANCHOR OF SUDDEN STRAINS.

danger, but there has been sustained the loss of the anchor and part of the cable, which is often a matter of very considerable moment. An anchor has been recently placed on the market, the design of which is said to overcome this danger by offering a yielding connection between the anchor and the cable chain, which connection absorbs all sudden or undue strain and increases the life of the chain and anchor by a very great deal. The shank of the anchor is hollow, and its interior is divided into three partitions. Through the centre of the hollow shank there extends a rod with two perforated pistons, one on each side of the central partition. These chambers are filled with oil to take up the shock of a sudden stress by acting as an elastic cushion. On opposite sides of the shank are two auxiliary pistons, working in chambers similar to the one described, but of smaller dimensions. All three pistons are held in their normal position by means of springs, which carry them back to their proper places after each disturbance.

By the operation of the perforated pistons and the auxiliary pistons a complete cushion is obtained, and yet the parts are of sufficient strength to stand the wear and tear to which they are put. Such a device will be of great value to the smaller craft along the sea coast, and especially to a great many fishing boats which are compelled to anchor in exposed places at times.

A Delicate Compliment.

A French correspondent who has been traveling in Turkey tells an amusing story of the high authorities in Salonica. It came to their knowledge that the representative of an important Paris newspaper (which may here be called La Journee) was on his way to Salonica, and that he had been instructed to record precisely what he heard and saw. Immediately the authorities sent for a hundred copies of La Journee, and when the correspondent at last arrived he was amazed to see Turks squatting on doorsteps, in shops, wherever he went, with their eyes fixed upon a copy of La Journee.—Golden Penny.

Genius and Long Hair.

Israel Zangwill says: "There are three reasons why men of genius have long hair. One is that they forget it is growing. The second is that they like it. The third is that it comes cheaper. They wear it long for the same reason that they wear their hats long. Owing to this peculiarity of genius you may get quite a reputation for lack of twenty-five cents."

ARC LAMP FOR INDIRECT LIGHTING.

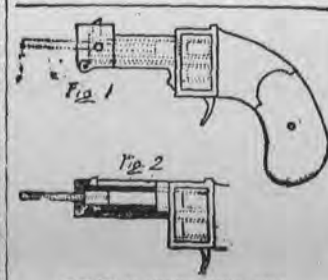
The illustrated arc lamp, a German invention, is specially noteworthy on the score of its strong and simple construction, the long period of burning

NEW GERMAN ARC LAMP.

without attention and the uniform distribution of the light. The lamps can be used singly on any voltage from 100 to 300 volts, or in series. About 300 of them were used for lighting the Dusseldorf Exposition. The light from these lamps is said to be especially adapted for photography, surgery, etc.

Cattle-Slaughtering Gun.

A German engineer, E. Finke, has invented a cattle-slaughtering gun, which provides a firearm for the killing of cattle. The weapon drives a bolt



CATTLE-SLAUGHTERING GUN.

into the brain of the animal, thus affording by means of a longitudinal perforation a path for the powder gases into the brain cavity. This produces a great shock and instant death of the animal. The enlarged rear end of the bolt fits in the barrel of the firearm, whilst the tapering front part thereof passes through a cap removably fastened on the barrel, and which serves as a stop for the bolt.

IN THE PUBLIC EYE.

THE PRINCESS OF MONTENEGRO.

How Eva Halliday Deaf, Dumb and Blind, Was Lifted Out of Darkness.

THE wonderful progress made in the education of the deaf, dumb and blind girl, Eva Halliday, a pupil in the Wisconsin School for the Deaf, continues to interest all who have heard of the affliction of the girl and the methods taken to teach her bright mind and to lift her out of darkness into light.

For the remarkable success in a very short time, the pupil is indebted to her patient and efficient teacher, Miss Hypatia Boyd, herself totally deaf and partly bereft of speech.

In four months the child was taught 125 words and sentences. To-day she is not only able to read and write Braille, but she cleverly operates an ordinary typewriting machine.

Miss Halliday was born with none of the afflictions from which she is seeking and finding relief. They were the result of an attack of catarrhal fever when she was but six years of age. She is now about sixteen. The girl's parents lived in Wausau, Wis., and were without means with which to undertake her education. Her condition was brought to the notice of the superintendent of the school for the deaf, the province of which does not include the teaching of the blind, but the sympathy of Superintendent Cary was aroused to such an extent that he made a personal appeal to the Board and was allowed to receive her at the school.

Teacher and pupil were thrown together by accident, and this is one of the interesting features of the story. Some time previous Miss Hypatia Boyd, of Milwaukee, who was deaf and had only a limited power of speech, applied to the institution for permission to enter for the purpose of learning how to teach the deaf and dumb. It is not the function of the school to impart this class of education, but finally an arrangement was made by which she was allowed to do as she wished.

Being endowed with a wonderful amount of energy, she entered enthusiastically on the course that was especially prepared for her. Soon after this, the sad condition of the Wausau girl was brought to the notice of the superintendent, and he at once decided to take her in and place her in the care of Miss Boyd.

This was in February, 1902. At the time that she entered the institution the girl knew only eight signs that to her veiled mind indicated anything.

EVA HALLIDAY AND HER TEACHER.

To illustrate, the blowing of the breath over the back of her hand was taken to mean that she was about to take a railway trip, and this was but one of several unique methods adopted to reach her mind.

The child's education began by the use of the manual alphabet generally, but particularly by any means by which it was thought best to convey the meaning of words and things. From the first the child seemed to be strangely drawn to her teacher, who would take her delicate hand in her own, and by the arrangement of the fingers, sundry patting and clapping, signs were spelled into her mind.

A box of objects would be spread out on the table. The blind girl would take up one of them and be allowed to feel it over and over again. Then Miss Boyd would spell the name of the object into the hand of her charge. Several other objects would be similarly treated, when the girl would commence over again and spell back the signs, showing that she understood what she held in her hand.

By artifices of her own, Miss Boyd was able to impart the rudiments of an education. For instance, the child was taught to understand that the touch of the hand on the cheek signified "good," and by raising the arm of the pupil and pulling it forward with several up and down motions the idea of "running" was conveyed. She has a sign to indicate the presence of certain other girls, the sense of touch and smell aiding her in this respect.

Practically all of this work was accomplished in the first four months that she remained in the institution. Speaking of the progress of her pupil, Miss Boyd said:

"I can never forget the beautiful change that came to her countenance when she was freed from her prison. At first her thoughts, as reflected in her face, were of an indescribably sad and pathetic nature, but from the day that I taught her her first word she began to look out on the world with an affection, an intelligence, and even a keen sense of joy that did one's heart good to see. And it is this and other things that convince me that Eva has a mission to fulfill in this world. In a way that I cannot find words to describe she awakens all that is sweet and noble in human nature, and gives to those who come in contact with her a strength and courage productive of much good, especially in overcoming obstacles and difficulties. Her happiness never leaves her. I believe she is the happiest child that I have ever seen. It is a real pleasure to see her day after day enter my school-room and feel around until she finds her teacher, and then, throwing her hands about my neck, cling to me in the way that must bring tears to the eye.

An element in the better fort[illegible] the girl is that she has enli[illegible] earnest sympathy of a well-k[illegible] wealthy Pennsylvanian, w[illegible] for the deaf and dumb ha[illegible] many fields. The philanth[illegible] William Wade, of O[illegible] Wade sent her a watch, [illegible] was able to read the [illegible] also provided her with a [illegible] the use of which she [illegible] mastered. He also pres[illegible] making a tandem bicycle, on [illegible] and pupil have spent ho[illegible] and rare enjoyment.

Miss Boyd has on se[illegible] taken the child to Milw[illegible] once when they were on the [illegible] her teacher by telling her of her [illegible] teacher.

She writes on an ordinary typewriting machine, finding the keys by the touch, doing good work in spelling and forming sentences. She has also learned how to operate a sewing machine and to do a variety of needlework. She goes walking and shopping, and is able to identify many of the attaches of the institution by feeling a button, a finger ring, by the sense of touch or smell.—New York Herald.

[illegible] Bulgaria [illegible] protests o [illegible] carry [illegible] Delavan the pupil sur[illegible] [illegible] g the othe [illegible] perience before she had known

Mitten-Like Hat Brush.

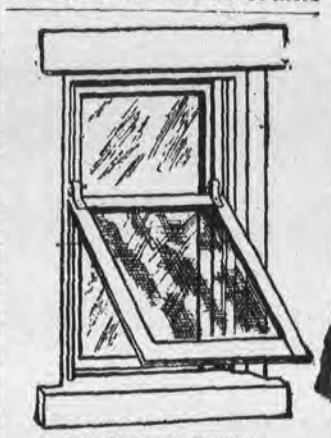
Were it not for the perspiration thrown off by the human cuticle the palm of the hand would make an ideal hat brush for rubbing up a slight-

CONVENIENT HAT BRUSH.

ly disordered silk hat, but to th[illegible] plush used in the manufacture of [illegible] headgear the moisture of the hand is disastrous. The curves of the hand seem to fit into those of the high hat to a nicety, and a Baltimore hat-maker has taken advantage of this fact to make a very convenient brush. This is a bag-like construction made of a suitable quality of plush and large enough to fit over the hand like a mitten, in which manner it is used, as shown in the cut. Having performed its functions, the device folds into three parts, one overlapping the other and fits snugly into the pocket.

A Screen Hanger.

Screens are a household necessity at the hot season of the year, yet, in many cases, a source of much inconvenience from the trouble they cause in their handling when the house is to be closed



A NEW SCREEN HANGER.

for the night or in case of a sudden storm. Much is claimed for the screen hanger shown herewith. It is said to keep screens always closed—make them fly tight, never stick, blow off or get loose. They are easily removed to clean windows and as easily put on by the amateur hand, requiring no professional hand in the first place. They are quite inexpensive, too, one dollar buying a set of hangers for twelve screens.

Some girls waste a lot of time looking for the ideal man when there are a lot of real ones lying around loose.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address F. J. CHENEY & CO.

Ships For War and Peace.

Those unfamiliar with the differences in the construction of ships made for war and peace may wonder that the speed of 13.1 knots an hour maintained by the Kearsarge is a cause for jubilation when passenger steamers make more than twenty knots. The pe- e ship, being built for speed, is ars of gain her limit gone to conve- ver the latter uses 25,000 to 37,000 orse-power, while the Kearsarge uses uf 6500. The Kearsarge made in her ficial trials 16.84 knots, but she was n greased for the occasion; every n p of coal used had been sorted out by the builders, and a crew, every man e expert, employed regularly in trials, ed that speed for but four hours smooth water.

xony there is an industrial r every 14,641 inhabitants.

ne is always willing to half way. N. Y.—39

Mrs. Tupman, a prominent lady of Richmond, Va., a great sufferer with woman's troubles, tells how she was cured.

"For some years I suffered with backache, severe bearing-down pains, leucorrhœa, and falling of the womb. I tried many remedies, but nothing gave any positive relief.

"I commenced taking Lydia E. Pinkham's Vegetable Compound in June, 1901. When I had taken the first half bottle, I felt a vast improvement, and have now taken ten bottles with the result that I feel like a new woman. When I commenced taking the Vegetable Compound I felt all worn out and was fast approaching complete nervous collapse. I weighed only 98 pounds. Now I weigh 109½ pounds and am improving every day. I gladly testify to the benefits received."—MRS. R. C. TUPMAN, 423 West 30th St., Richmond, Va.—$5000 forfeit if original of above letter proving genuineness cannot be produced.

When a medicine has been successful in more than a million cases, is it justice to yourself to say, without trying it, "I do not believe it would help me?"

Surely you cannot wish to remain weak and sick.

Mrs. Pinkham, whose address is Lynn, Mass., will answer cheerfully and without cost all letters addressed to her by sick women. Perhaps she has just the knowledge that will help your case—try her to-day—it costs nothing.

PISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION 25 CTS

New York City.—Coats in three-quarter length make a notable feature of autumn styles and will be greatly worn by young girls. This May Manton one

MISSES' ENGLISH COAT.

is made in tailor style and is essentially smart. As shown the material is fuschia colored cheviot stitched with corticelli silk and the garment makes part of a costume, but the design suits the general wrap equally well and is appropriate for all suiting and cloaking materials. The loose sleeves are peculiarly good, inasmuch as they allow of wearing over the blouse without rumpling.

The coat is made with fronts that are cut in two portions and seamed to the shoulders, backs, side-backs and under-arm gores. The neck is finished in regulation coat style and the right front laps over the left in double breasted fashion. The sleeves are cut in one piece each and are finished with flare cuffs, over bands, at the wrists.

The quantity of material required for the medium size is three and a half yards forty-four inches wide or two and three-quarter yards fifty-four inches wide.

Two Stylish Garments.

Waists made with round yokes outlined by berthas appear to gain in favor with each succeeding week. The one illustrated in the large drawing by May Manton is peculiarly attractive as well as practical, inasmuch as it can be made high or low, with full length or elbow sleeves, and so serve a double purpose. The model is made of black and white checked louisine, with yoke of lace and bertha and cuffs of white panne cloth edged with lace applique, but any number of combinations might be suggested. The sleeves are among the latest and show cuffs of the newest sort. When made in elbow length these last are omitted and the puffs are pushed up to droop over their edges.

The waist is made over a fitted lining and closes invisibly at the centre front, the yoke being hooked over at the left shoulder. The lining is snugly fitted, and on it are arranged the yoke, the full fronts and back. The bertha is circular and serves to outline the yoke. The sleeves are shirred at the shoulders to fit the arm snugly, but form drooping puffs below the elbows.

The quantity of material required for the medium size is four and an eighth yards twenty-one inches wide, three and a half yards twenty-seven inches wide or two and a quarter yards forty-four inches wide, with seven-eighth yards twenty-one inches wide for bertha and cuff facings, three-eighth yard eighteen inches wide for yoke and collar and three and a quarter yards of applique edging to trim as illustrated.

House jackets are among the comforts which no woman should consent to be without. The one shown in the large drawing is graceful and becoming, at the same time that it is comfortable and appropriately can be made from a variety of materials. The model is of dark red albatross with frills and insertion of twine colored lace, and is finished at the neck and waist with ties of red louisine ribbons.

The jacket is simply made with fronts and backs, and is trimmed to give the vest effect. The fronts are gathered at their upper edges, and are arranged over a yoke which serves to keep the fulness in place. The back is plain across the shoulders, but gathered at the waist line, where it is attached to the belt which passes under it and the fronts to openings cut at indicated points, then through these and over the full front. But, if a simpler adjustment is preferred, the trimming outlining the vest can be omitted and the belt passed under the entire fronts, giving the effect shown in the small cut. The neck is finished with a big collar and the sleeves are in one piece each, cut in bell shape.

The quantity of material required for the medium size is three and three-quarter yards twenty-seven inches wide, three and a quarter yards thirty-two inches wide or two yards forty-four inches wide, with six yards of lace and four yards of insertion to trim as illustrated.

Complete Leather Costume.

For the modest sum of $195, says the New York Evening Post, one may become the owner of a complete costume of leather, as carefully tailored as the most modish cloth gown, and so contrived as to be fairly light in weight and perfectly ventilated. The leather gown is designed for automobiling. It is made with a gored and fitted skirt and a stylish shirt waist. There is much stitching on both skirt and waist, and the latter is finished with a high collar and a cravat of the leather. The sleeves are wide at the wrist, and there are under-sleeves of mauve satin tightly shirred at the wrist against wind and dust.

Styles For Small Girls.

Soft silks and woolens in sun-pleated and accordion effects will be worn by children and young girls this fall. One such frock, that is adapted to the small girl, hangs in fan pleats from a tiny yoke of lace. The neck is cut high, which is a characteristic of the fall models for small girls.

A Fall Collar.

Deep collars of panne, ornamented with embroidery or inset lace, will be much worn in the fall, replacing the cape collars of lace, embroidered batiste, etc.

WAIST WITH BERTHA.

WOMAN'S HOUSE JACKET.

Woman's Wrapper.

Tasteful morning gowns are among the possessions which no woman should be without. This one, designed by May Manton, is eminently graceful and becoming at the same time that it is simple and involves neither excessive labor nor expense. The model is shown in blue cashmere with trimming of Arab colored lace, and is exceedingly effective, but all materials used for house gowns are equally appropriate.

The wrapper consists of the fronts, backs and under-arm gores. The back is arranged in the Watteau pleat that always is satisfactory. The fronts are loose and are finished with the frill which is extended from the big collar and passes down the entire front. The sleeves are full and finished with frills of the material. At the waist is a ribbon which confines the fulness sufficiently for neatness, but this can be omitted when a looser adjustment is desired.

The quantity of material required for the medium size is eight and three-quarter yards twenty-seven inches wide, eight yards thirty-two inches wide or five and a quarter yards forty-four inches wide, with fifteen and a half yards of insertion to trim as illustrated.

WOMAN'S WRAPPER.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "A SUPREME OPPORTUNITY."

The Rev. Cornelius Woelfkin Preaches Entertainingly on the Fascinating Biblical Romance of Esther—Seize Your Opportunities Resolutely.

NEW YORK CITY.—Sunday morning the Rev. Cornelius Woelfkin, minister of the Greene Avenue Baptist Church, had for his subject "A Supreme Opportunity." He chose as his text Esther iv: 14. "Who knoweth whether thou art come to the kingdom for such a time as this?" Mr. Woelfkin said:

The history of Esther is a fascinating romance. Every changing scene in the panorama is a graphic illustration of the providence of God. It traces the transition from obscurity to prominence; from weakness to power. The scene opens showing Esther an orphan girl belonging to a captive and despised race. Naturally, every door of influence would be closed to her. Alone in the world, dependent upon a cousin's bounty, the horizon of her life was limited. Her chief endowment was beauty, and that, as the world goes, is more likely to become a snare of evil than a benediction of good. Yet, behind this humble, modest life there is working the might, wisdom and love of God. The Queen's throne is empty. The royal crown is waiting some one who may please the mood of the King. Thousands of gentle blood dream of the Queen's place as the acme of all ambition. But the providence of Jehovah has reserved the place for Esther, the orphaned Jewish girl.

This same divine power seeks to mold every life. The circumstances and conditions that environ us may not seem promising. But what are these with God? His strength is made perfect in weakness. The vast majority of men and women who have made the molds of history were those whom God's providence brought from obscurity and lowly conditions. Your way is hot hid from the Almighty. There is a place held vacant for your filling. That place is as honored and dignified as any royal throne, because it is divinely appointed. The steps leading thereto may seem to be contingencies, accidents, fortuitous chances, and through the moods of other persons. But if there be the spirit of faith to trust Him, diligence to discover His will and readiness to obey, He will bring us to the place and position most suited for our eternal profit and glory. No one else may step into our place, until we, through unbelief and disobedience, have forfeited the privilege of its occupancy.

Every life has its own unique endowment. Success or failure depends upon the manner in which we hold these possessions. If we hold them selfishly to profit ourselves withal, they turn into corruption. But if they be held in trust as a sacred stewardship, used for the furtherance of His purposes and the bringing of His kingdom, they will turn out eternal treasures. Our temptation is to discredit our possessions and opportunities. But we may not despise the day of small things.

Esther had only personal beauty to commend her at first. This is not a gift despised by Satan in his attempt to ruin a soul; then why should it be discredited as a power for good? The lad had only five loaves and two fishes, but, consecrated to His service, they fed the multitude and more. It all turns upon whether we are using our endowments in the interest of self and by the energy of self, or whether we are living and working in co-operation with Him and for His glory. The form of a life will vary. God does not duplicate and make all lives to conform to a like pattern. There was a vast difference between the captive maid that served in Naaman's home and the orphan captive who mounted the Persian throne, but it was the same God who worked in each.

The orphan girl became the bounteous queen. She enjoys the honors and emoluments of royalty. Banquets are held in her honor and a retinue of servants minister to her continually. Can she support the dignity thus thrust upon her? Will adulation, flattery and vanity enervate her soul's ability, or will she grow strong and potent for good amid opportunities? Only trial can answer such queries, and that comes soon enough. From the outer world she hears the lamentation of her kindred people. Mordecai, her cousin, is in sack cloth and mourning and would not be comforted. All the captives are wailing with fear. What could it mean? If she had only been party to the conference between her royal husband and the prime minister prince she would have understood. If she could see all the clerks writing the sentences of death which were being hurried throughout the empire she would have known. She seems to be exempt. Does she not dwell in the palace? But the blackness overshadows her even there. No circumstance or condition can shut it out. The court of Persia permitted no one wearing sack cloth, that symbol of sorrow and mourning, to enter the royal precincts. They would not be disturbed by painful reminders of life's sorrows. But even the royal purple can neither ignore nor escape them. The tragedies of life are not shut out by hiding and ignoring them. We can build no barrier that will prevent their invasion.

The Redeemer of the world did not ignore them. He did not isolate Himself from human woe, but through suffering became a Saviour, forgiving sin, bringing glory out of the crucible of suffering and planting the light of hope amid the shadows of death. If Esther seeks to save her life alone she will lose it. But if in seeking to save others she lose it, she shall save it. We cannot in a time of epidemic think of ourselves alone. Individual carefulness will prove fatal.

There came a moment of despair to Esther. What can she do more than others. She had not been called into the King's presence for a whole month. And to venture unbidden might mean death. She had her limitations. Even her position seemed unequal to the need. Her privileges fell short. It is always so. A grave crisis ever brings the shadow of despair. There are problems that confront every generation that seem insoluble. We become bewildered and perplexed; we feel our inadequacy and despair. This perplexity and despair is purely human. Its shadow never falls upon the throne of God. He shall not fail nor be discouraged till He hath set judgment in the earth. All that He requires is an instrument that will not balk at the cost, and He brings speedy relief. Let us fling the sacrifice of life into the situation, and nothing shall be impossible to us. It is this desire to keep our skins whole, and to conserve our personal ease and comfort that makes situations difficult. Paul was an optimist, because he threw his life into the crisis. Comfort, ease, quiet, pleasure, were not aimed at by him, therefore he could confidently write: "I am pressed on every side yet not straitened; perplexed, yet not unto despair; pursued, yet not forsaken; smitten down, yet not destroyed." Selfishness brings the midnight, self-sacrifice the dawn.

Then followed Esther's heroic resolve. A crisis always develops the character. In a moment she read the meaning of her providential experiences. She saw something of God's plan in her life. Why had she been exalted from the lowly position of an orphan to the regal dignity of a queen? Why had she been preferred above all others for this great place? The recruiting begins to crystalize. God foresaw this crisis, anticipated the need, and for such a time as this was Esther come to the kingdom. In the very heats of that gravest difficulty lay her supreme opportunity. Our greatest moments are often set in darkest circumstances. The providences of God have shaped our course, and there is a purpose and end as definite as that of Esther's in our lives. The hand that guides may be invisible, and the light may not always illumine the meaning. But if we are faithful in trust and obedience to every passing opportunity, we shall some time understand that we, too, are come to the kingdom for a specific end.

To seize this supreme opportunity involved a risk. She dare not wait to weigh the chances too minutely. Life itself is a stewardship. Duty constrains us to pay out its energies in proportion to obligations and opportunities. Sometimes the whole price must be paid down at once. But if life be held at the disposal of God it will make little difference whether it be paid in installments or at one payment. Life is a possession that we must surrender anyway, but we may elect whether it shall be invested in eternal treasure or squandered in temporal gratification.

Esther was shut up to two courses, and both threatened death. Silence and inertness would mean to be overtaken in the general massacre. Attempt at salvation could but anticipate death by a few days, and had the chance of success. There is not much room for choice. Death is the worst that can come, and that will come either way. Esther said, "If I perish, I perish." This is synonymous with those expressions made by the martyr spirits of history. It is the only attitude and expression that will fit the supreme crisis and opportunity. In just such situations Moses said, "Blot me, I pray thee, out of the book which thou hast written," Jesus said, "I hold not My life of any account as dear unto Myself. I am ready to die." Whoever goes upon a great mission must, like the early Christians, take his life in his hands. It is only along that pathway that salvation lies. It is a great price, but often paid for an inferior purpose. Heroism asks for life as the price of patriotism, home and freedom. Ambition demands life for reputation and honor. Convenience and progress do not hesitate to accept life as a price. Our bridges, buildings and tunnels are built with the cost of life. Shall we, then, murmur at the missionary who is willing to risk fever and riot in the interests of eternal salvation? When examples of self-devotion fall into the perspective of history we applaud the martyr spirit. God help us to value and covet it when near at hand.

Esther went with fear and trembling, but not cowardice. Heroism is not foolhardy. To go forward in the face of danger, despite fear, is true courage. Paul ministered in Corinth with much weakness, fear and trembling, but beneath all was the splendid heroism of self-devotion. "If I perish"—but such a spirit cannot perish. It may seem to fall in self-sacrifice, but it does not perish. Some heroes of faith come out unscathed from conflict, they are delivered from the edge of the sword the force of violence and power of fire. Others are stoned, sawn asunder and killed. But they do not perish. The martyrs torn by lions on the Roman arena were as victorious as Daniel who was delivered. The witnesses who burned at Smithfield were as triumphant as the three men who could not be burned by the seven fold heat of Nebuchadnezzar's furnace. The Huguenots who fell on St. Bartholomew's Day were no less conquerors than Joshua's army. Christ did not perish on the cross. Paul did not perish in Rome. Telemachus did not perish in the Roman arena. Such dying is the highway to life and power.

The Queen asked the forfeited lives of her people. She was related to them and a sufferer with them. From their side she was moved with compassion. From her queenly position she obtained deliverance. This is the object of all mediation. Our Saviour as the man Jesus is touched with the feeling of our infirmities. As the exalted Lord He intercedes to supply our need according to His riches in glory. The privilege of prayer is granted to us, that from the human side we may feel the burden of human sorrow and woe, and so be pressed into an intercession for divine succor. In our weakness we are tempted to abuse this great carte blanche of our Lord. Salome, who received the same overture from a king as did Esther, asked the death of John the Baptist. Many a petition of prayer would end in death if granted. But no carnal, selfish supplication will receive the indorsement of the Lord Christ, and consequently fails.

Then we come to the banquet scene. It is most suggestive. Only the hostess and two guests, but what issues tremble in the balances. Esther is under sentence of death. The dark hour is drawing nigh. Haman, the prime minister, is in glee; he is succeeding most marvelously. Yet in one day all is suddenly reversed. The Queen becomes the author of life and Haman is sent to the gallows built for another. Success may be upon us in the very darkest hour, while failure may be dogging the tracks of the most lightsome heart. Righteousness seems to be worsted in the conflict with evil. Good measures seem to fail, evil ones to triumph. Scrupulous honesty goes to the wall, while trickery and fraud are crowned with success. Virtue is seemingly strangled and vice is robed with royalty. And we are tempted to be envious at the prosperity of the wicked. But we may not pass judgment until the issue is seen. There will come a day when righteousness shall flourish and evil perish. The plots of the world's Hamans, Herods and Judasses all miscarry. Sin and evil rot at the core. Righteousness and truth have the quality of immortality.

At the right moment Esther not only stated the plot, but named the adversary and enemy—this wicked Haman. It was an awful crisis. It is always a crisis when contending principles come to the decisive struggle. In every soul there is a Haman who seeks the betrayal and destruction of the spiritual life. In our conflict with this evil self there comes a time when we must be specific in naming the foe. No salvation comes from generalities. This adversary and enemy may wear different names in our disposition. It may be pride, envy, jealousy, bitterness, worldliness, etc. Whatever it may be, it has planned our ruin and waits the moment of execution. If we would save our lives, families, cities and the world we must deal uncompromisingly with the particular Haman who is working destruction. Not until Haman goes to the gallows can life stand secure.

Having seized the supreme opportunity at great risk, Esther finds a great reward. The clerks write the message of life more rapidly than they wrote the sentence of death. The good work is hastened with more speed than the message of woe. Joy supplants sorrow and life comes in the place of death. The harvest of sacrifice is life. We sow in tears, we reap in joy. In this success-ful mission of Esther the mediators we have an adumbration of the salvation wrought out by Jesus Christ. He took His life in His hands. He died and rose again from the dead. He secured a reversal of the sentence of death written against us and proclaims forgiveness of sins and the gift of eternal life. Ours is the privilege first to receive and rejoice in this truth, and then to speed the glad tidings to every creature in all the world. These are our supreme opportunities. They may be shadowed with self-sacrifice, but if they are resolutely seized they will issue in the morning of joy.

Victories Won.

"It is not by regretting what is irreparable that true work is to be done, but by making the best of what we are. It is not by complaining that we have not the right tools, but by using well the tools we have. What we are, and where we are, is God's providential arrangement—God's doing, though it may be a man's misdoing; and the manly and the wise way is to look your disadvantages in the face, and see what can be made out of them. Life, like art, is a series of mistakes, and he is not the best Christian nor the best general who makes the fewest false steps. He is the best who wins the most splendid victories by the retrieval of mistakes."—F. W. Robertson.

Makes One Charitable.

True religion will make its possessor truly charitable in dealing with his business associates and competitors.—Rev. G. I. Stair.

COMMODORE NICHOLSON OF OUR NAVY

Recommends Pe-ru-na--Other Prominent Men Testify.

Commodore Somerville Nicholson, of the United States Navy, in a letter from 1837 R Street, N. W., Washington, D. C., says:

"Your Peruna has been and is now used by so many of my friends and acquaintances as a sure cure for catarrh that I am convinced of its curative qualities and I unhesitatingly recommend it to all persons suffering from that complaint."—S. Nicholson.

United States Minister to Guatemala Endorses Pe-ru-na.

Dr. W. Godfrey Hunter, U. S. Minister to Guatemala, ex-member of Congress from Kentucky, in a letter from Washington, D. C., writes:

"I am fully satisfied that your Peruna is an efficacious remedy for catarrh, as I and many of my friends have been benefited by its use."—W. G. Hunter, M. D.

Member of Congress From Virginia Writes.

Hon. G. R. Brown, Martinsville, Va., ex-member of Congress Fifth District, 50th Congress, writes:

"I cheerfully give my endorsement to your Peruna as a cure for catarrh. Its beneficial results have been so fully demonstrated that its use is essential to all persons suffering from that disease."—Hon. G. R. Brown.

The day was when men of prominence hesitated to give their testimonials to proprietary medicines for publication. This remains true to-day of most proprietary medicines. But Peruna has become so justly famous, its merits are known to so many people of high and low stations, that no one hesitates to see his name in print recommending Peruna.

The highest men in our nation have given Peruna a strong endorsement. Men representing all classes and stations are equally represented.

If you do not derive prompt and satisfactory results from the use of Peruna write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

BEST FOR THE BOWELS
Cascarets
CANDY CATHARTIC

GUARANTEED CURE for all bowel troubles, appendicitis, biliousness, bad breath, bad blood, wind on the stomach, bloated bowels, foul mouth, headache, indigestion, pimples, pains after eating, liver trouble, sallow skin and dizziness. Money refunded for each package of PUTNAM FADELESS DYES if unsatisfactory.

Does success make the optimist, or does the optimist make success?

A Death-Feigning Plant.

That certain insects, birds, mammals and reptiles habitually pretend to be dead when danger threatens them is a well known fact; but it is generally believed that this stratagem is resorted to only by animals. In South America, however, there is a plant a species of mimosa, which resorts to death feigning, evidently for the purpose of preventing grass eating animals from eating it. In its natural state this plant has a vivid green hue; but directly it is touched by a human finger or by any living animal it collapses into a tangle of apparently dead and withered stems.—London Globe.

Tried by Time.

Eugene E. Lario, of 751 Twentieth avenue, ticket seller in the Union Station, Denver, Col., says: "You are at liberty to repeat what I first stated through our Denver papers about Doan's Kidney Pills in the summer of 1899, for I have had no reason in the interim to change my opinion of the remedy. I said when first interviewed that if I had a friend and acquaintance suffering from back ache or kidney trouble I would unhesitatingly advise them to take Doan's Kidney Pills. I was subject to severe attacks of back ache, always aggravated if I sat long at a desk. It struck me that if Doan's Kidney Pills performed half what they promised they might at least help. This induced me to try the remedy. It absolutely stopped the back ache. I have never had a pain or a twinge since."

A FREE TRIAL of this great kidney medicine which cured Mr. Lario will be mailed to any part of the United States on application. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

HAPPENINGS IN NEW JERSEY.

Concluded from Page 1.

as is his custom. In the morning he got up and dressed without noticing anything unusual, but when he lifted the pillow to get his valuables he found a venomous tropical snake coiled around his wallet. He succeeded in killing the reptile without being struck, and now has it preserved in alcohol. He left the bananas with the proprietor of the hotel where he stopped.

Cupid has wrought such havoc in the ranks of the public school teachers of Paterson that the commissioners of public instruction at their meeting yesterday had to fill twenty vacancies, that number of women instructors having married during the summer vacation. When the schools opened Superintendent Goodenough filled the vacancies temporarily with seniors from the Normal School. The available list is now nearly exhausted, and in order to find teachers it will be necessary to draw on other classes in the Normal School.

Officials of the Middlesex and Somerset Traction Company, have two odd claims for damages. Several days ago a man was jarred by the sudden stopping of a car and dropped his false teeth on the footboard. He wants damages. Another man sent this demand a day or two ago: "I was on a trolley car that left New Brunswick about 7:30 in the afternoon, Sunday, September 13, 1903. While passing through Sayreville, a short distance from the siding, I was struck in the face by a piece of watermelon, thrown by parties along the track, ruining my clothes. I hereby make a claim for same in the amount of $20, and for the assault $100. Please forward check for same."

Concerning Proctor's Theatres.

The east Side of New York has a new combination house this season, and one that bids far to surpass in popularity any theatre of the kind in the entire metropolis. It is Mr. Proctor's big, handsome play house in Fifty-eighth Street. In point of comfort, luxurious fitting, artistic decorations and accessibility, this theatre has many points of advantage over its competitors. This season its policy was changed, and since August only the better class of popular price traveling combination are now being played, the bill changing weekly, with low price matinees on Monday, Wednesday, Thursday and Saturday. The prices range from $1 to 15 cents, the latter admitting to the gallery, which, by the way, is always jammed to the limit. Melodrama dominated in the weekly programs, but it is always the best sort of melodrama.

Insane on One Point.

Erskine mentions a case where a person who had been confined in an asylum prosecuted his brother and the proprietor for imprisonment and false arrest. The prosecutor, himself a witness in support of the indictment, was put into the witness box and examined. When Erskine came to cross examine him, he tried to discover some lurking delusion of mind, but during a cross examination conducted with all the skill and sagacity of which he was master, for nearly an hour he was completely foiled.

But a gentleman who had come accidentally into court whispered in Erskine's ear that the witness thought he was the Saviour of mankind.

On receiving the hint Erskine made a low bow to the prosecutor, addressed him in terms of great reverence, respectfully begged to apologize for the unceremonious manner in which he had treated a person of his sacred character and called him by the name of Christ. The man immediately said: "Thou hast spoken truly. I am the Christ."

The Original Carnation.

The original carnation was a five petaled bloom native in the south of Italy. It was imported into England about the time of the Norman conquest. As early as 1619 horticultural works gave minute directions for the cultivation of the flowers in winter. The carnation industry has risen to considerable importance during the last ten years, according to Town and Country. As 2,500,000 of young carnation plants are sold each year and florists produce an equal amount grown by themselves which are not sold, the entire production of young carnation plants approximates 5,000,000 and upward a year. These plants are grown under glass during the winter time for cut flower purposes, producing an annual average of more than 100,000,000 blooms. What becomes of this enormous number of flowers is somewhat of a mystery. They are put to innumerable uses.

Spiders Eat Their Mothers.

One of the most unnatural things in nature, if the expression is allowable, is the manner in which the young of the common wolf spider treat their mother. After the little creature has laid her eggs she envelops them in a silken covering, so as to make a ball about the size of a pea, and this she carries about with her wherever she goes and will defend it with her life. When the young are hatched, they climb on her back, giving her a monstrous appearance, and ride about until nearly half grown, and as soon as they discover their strength they fall to and devour their mother. As a rule the maternal relation is recognized in the animal and insect world only as long as the necessity for protection exists, but instances of the young actually devouring a parent by main force and common consent are extremely rare.—London Nature.

AMONG OUR ADVERTISERS

Bradley & Smith, brush manufacturers, are still doing business at 251 Pearl street, Pearl street, New York City where they have been since 1860.

S. Hirsch, the New York Ladies' tailor, 432 Watchung avenue, Plainfield, is exhibiting some of the latest models for fall and winter. He assures the highest grade of workmanship and an absolutely flawless fit.

The Crescent Furniture Company believe in preparing for cold weather and have purchased a large quantity of stoves of all kinds which they are placing in the store adjoining their old headquarters at 23 Somerset street.

Louis C. Ortner, formerly of Elizabeth, has recently opened a grocery and vegetable store, corner of Park avenue and Fourth street. He will also make a specialty of American and imported delicacies. See his advertisement elsewhere in this paper.

Mrs. E. E. Waldron, of 150 East Fifth street, has added to her establishment a full line of toilet articles with a specialty of shell pins and combs. An assortment of fine hairgoods and articles for manicuring will be on sale. A gas and electric dryer adapted for quick and uniform work has also been added.

The Plainfield Business College reopened September 1. More students have now registered than during any previous year at same date. Pupils from many surrounding towns are attending, Somerville, Bound Brook, Martinsville, Dunellen and Raritan. The school has been greatly improved and enlarged during the summer vacation.

It is the talk of the town that there will be more fur clothed people in town this fall than has been for many a season, as demonstrated in workshops of the Plainfield furriers. The Boston Cloak and Fur store 245 West Front street opposite Post office, have more orders for furs, cloaks and suits on hand than any other house could handle, and it is only the superior knowledge of Gaiman & Berkowitz, who are the only European artists in that line in Southern Jersey, that this can be accomplished with promptness and dispatch.

WANTED-FAITHFUL PERSON TO TRAVEL and supervise work of salespeople and make collections for manufacturing house. Straight salary $20.00 a week and expenses. Salary paid weekly and expense money advanced. Previous experience unnecessary. Local territory. Business successful. Position Permanent. Enclose self addressed envelope. Superintendent, 324 Dearborn Street, Chicago.

LEGAL NOTICES

SPECIAL ELECTION
—ON—
Constitutional Amendments.

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or voting Precinct in the County of Somerset, must meet on

TUESDAY, SEPT. 15, 1903,

from one to nine o'clock p. m., at such places as may be designated by the Township Clerks of the respective townships of said county, for the purpose of making, altering and revising, as the case may require, the registry of voters entitled to vote in their several districts or voting precincts for use at the special election to be held on Tuesday, September 22, 1903, as required by an act entitled "An act to provide for submitting proposed amendments to the Constitution of this State to the people thereof," approved April 8, 1903.

Special Election
SEPTEMBER 22, 1903.

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHURTS,
CHARLES H. BATEMAN.

Election Notice!

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the County of Somerset will hold their first meeting on

TUESDAY, SEPT. 1, 1903.

At 10 o'clock in the morning, at such places as may be designated by the Township Clerks of the respective townships of said county. Such boards shall organize according to law and then proceed to ascertain the names and residences of all the legal voters in their respective districts, by making actual inquiry at every dwelling house or habitation, or of the head of every family residing therein, and shall continue such enumeration of voters from day to day, on successive days, completing same on or before Friday, Sept. 4. (Sec. 23 Election law.)

SECOND MEETING
AND PRIMARY ELECTION

Said Boards of Registry and Election will also meet on

TUESDAY, SEPT. 8, 1903,

At the same places from 1 until 9 p. m., for the purpose of transcribing and making up from its canvass books two lists of all persons entitled to vote in its election District, who shall personally appear before the board for that purpose, or be shown to its satisfaction by the affidavit in writing of some voter in the election district to be a legal voter therein.

On the same day between 1 and 9 o'clock p.m., the Primary Election shall be held in every election district in the County of Somerset.

THIRD and FINAL MEETING.

Said Boards of Registry and Election will also meet on

TUESDAY, OCT. 27, 1903,

At the same places, and between the hours of 1 p. m. and 9 p. m. for the purpose of revising and correcting the Original Registers, and for adding thereto the names of all persons entitled to the right of suffrage in such Election District at the next election.

Notice is hereby given to all Boards of Registry and Election in the County of Somerset that they are required to strictly observe Sections 24 and 32 of "An Act to Regulate Elections (Revision of 1898) of 1898" approved April 4, 1898, and that the County Board of Elections will be in session in Somerville on

Wednesday, Oct. 28, 1903,

For the purpose of receiving the registers and receipting for affidavits, etc.

General Election Nov. 3, 1903

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHURTS,
CHARLES H. BATEMAN.

The ladies of Holy Innocents' Church, Dunellen, and St. Paul's Bound Brook, will entertain the visitors at luncheon.

Golden Wedding Celebration.

The golden wedding anniversary of Mr. and Mrs. John Bodine, of Grandview avenue, was celebrated Thursday. There were present four generations. The couple were married October 1, 1853. in the Dunkard Church, at Sand brook, N. J., by the pastor, Rev. John Moore. Soon afterward they moved to this borough. Mr. Bodine is one of the oldest contractors in the borough and many of the best houses here and in Plainfield were built by him.

Plainfield Democratic Campaign Officers

At a meeting of the Plainfield Democratic Club, Monday evening, the following officers were elected to serve during the coming campaign:

President, Charles A. Sturtevant; Vice President, Charles L. Moffett; Recording Secretary, Charles Messerschmidt; Financial Secretary, Victor Troice; Treasurer, B. W. Marshall; Executive Committee, A. J. Nolan, Sylvester Sharkey, J. V. F. Dilts, Frank McInerney, Charles Messerschmith, Michael O'Keefe, M. Leichtentritt, P. J. Reville and George Fischer.

Republican Club for Plainfield.

A number of prominent Republican of Plainfield realizing the need of a club for the city, met Wednesday and effected an organization, with the following officers, the office of president being left open: Vice-president, Sheriff Corielle; secretary, W. S. Angleman; treasurer, J. Fred McDonald. An executive committee was also selected.

Its membership represents every polling district in the city. Headquarters will be established at once and an aggressive campaign begun to bring about the election of the Republican ticket.

The constitution adopted reads:

The objects of this club are to promote the interests of the Republican party, and to that end to provide for its members and all legal voters of the city of Plainfield information respecting National, State, County and local political issues; to promote harmony among Republican voters of the city of Plainfield and to interest our Republican voters in good government and procure their attendance at primaries of the party and at the polls on election day.

It will be the duty of all members of the Club to support the platform of the Republican party and in all legitimate ways endeavor to secure the election of the Republican ticket.

Auction Sale of Valuable Lots.

On Saturday, October 10, six very desirable building lots will be sold on Westervelt avenue between Grandview and Summit avenues. For persons desiring to build, this location is an attractive one situated as it is near the Watchung Mountains and on one of the principle avenues of the borough. See advertisement elsewhere in this paper.

NO RACE SUICIDE HERE.

Triplets and Two Sets of Twins Look Encouraging.

A Pennsylvania conductor on the Long Brach division reports the following incident which nearly gave him nervous prostration, says the Newark *News*:

At Long Branch on the regular morning run there were the usual number of pasengers, and among them a natty little women, full of life and bustle, with seven small children and two maids, the later loaded down with satchels and bundles. It was evident that the party were returing home after a summer outing, and all looked extremely well, especialiy the children.

While collecting tickets the conductor reached the Long Branch party and the women handed to him three single tickets The party were spread out, with their satchels and bundles, occupying four seats. Conductor Titus looked at the tickets an then looked over the party, and, addressing the women, said:

"Are these all your tickets? I hardly think this is right."

"Yes thats all," said the women, smiling.

"But there are three grown persons and seven children," said conductor Titus, "and there are only three single tickets."

"Well the tickets are for myself and maids," replied the women. "As to the children, these are twins," indicatsng two of them; "these are twins," indicating another pair, "and these are triplets," and they are all under five years of age."

It was evident the mother spoke the truth, for the children indicated resembled each other and they were all small.

Foster—Bach.

Mrs. Charlotte C. Bach, and Mr. James C. Foster, both of North Plainfield, were married at Millington last Sunday afternoon by Rev. Chas. B. Condit, of Liberty Corner, at the residence of the bride's sister, Mrs. Fred. Bauman.

August Bach, of this borough, brother-in-law of the bride, was best man, and Miss Eliza Happe, of Liberty Corner, sister, of the bride, acted as bridesmaid. Two little boys, sons of the bride, acted as pages and carried baskets of flowers.

There were about thirty-five invited guests present. The house was decorated with autumn leaves, golden-rod and bitter-sweet.

The bride's gown was of white and blue satin; she carried white roses.

After the ceremony the couple made a short trip to Washington, D. C. They will reside on Grove street, this borough.

The Thirtieth's Reunion.

The thirteenth annual reunion of the 30th Regiment of the N. J. V., will be held in Somerville, Wednesday, October 14.

The comrades will meet at the Court House at 10:30 a. m., where the business meeting will be held. The address of welcome will be made by Hon. James J. Bergen, President of the Board of Commissioners, and replied to by some member of the regiment. Other impromptu speeches will be made. At 1 p. m. the comrades will march up Main street escorted by the Somerset Band, and counter march to the Somerset Hotel, where dinners will be served, the band discoursing music from the front balcony in the meantime; after which the comrades will disperse.

Official Figures on Amendments.

The Somerset County Board of Elections met at Somerville Monday and canvassed the vote on the constitutional amendments. The total vote of the county was as follows:

Article 5—For 458; against 394
Article 6—For 452; against 395
Article 7—For 444; against 409

Trolley Line a Lane of Death.

There is a growing demand for some policing or lighting of the tracks of the Middlesex and Somerset Traction Company, in the vicinty of South River and Sayreville, where they run through the clay-producing section, and seem to possess a peculiar fascination for drunken clay workers. During the last few years there have been over ten men killed as they lay asleep on the rails. The tragedy of Sunday night, when an known man was killed by a car that was stopped within a few feet of another man, has aroused public interest in the matter. The trolley company has equipped all of its cars with powerful searchlights, but even these have proven only partly effective. The company disclaims further responsibility in the matter.

Last Days of Pompeii.

Rehearsals for this spectacular productions are being held daily, and give promise of good results. This play requires 150 performers and will be given at the Casino by amateur talent at a date to be announced later on.

MAYOR SMALLEY BEHIND THE BARS?

Herald Says he was Mistaken for a "Confidence Man" and Placed in Jail.

The following telegraphic despatch appeared in the New York *Herald* and the Newark *Evening News* for some reason failed to appear in the Plainfield dailies.

That so interesting a bit of news concerning the Mayor of North Plainfield be denied the many people who were not fortunate enough to read it in the *Herald* or *News* seems regretable, and we therefore print it here for them in full.

SOMERVILLE, Sept. 26.—Mayor Newton B. Smalley, of North Plainfield, was locked up in the county jail here yesterday through a mistake on the part of a new German jailer.

When this dignitary entered the office of the sheriff and picked up the commitment papers he saw two men, well dressed, sitting on a bench. One was a "confidence man" and the other was Mayor Smalley. The former was waiting to be taken to his cell and the latter was waiting to see the sheriff on business.

The jailer singled out the Mayor and with little ceremony took him by the collar. Mr. Smalley tried to explain that he was the Mayor of North Plainfield, but the German, thinking he was feigning insanity, rushed him behind the bars.

The mistake was soon discovered.

SUBURBAN NOTES.

WATCHUNG.

Arrival and departure of mails at Watchung.
Leave Plainfield 9:15 a. m. 5:35 p. m.
Arrive Watchung 9:30 a. m. 6:00 p. m.
Leave Watchung 12:30 p. m. 6.10 p. m.
Arrive Plainfield 1.00 p. m. *6.40 p. m.
*This mail makes connection for all outgoing mail from Plainfield the same evening.

Dr. Richard Moldenke was a guest of Commissioner Parker, of the Anthracite Strike Commission, last week.

S. H. Tug[illegible] and special music by Reuben Sharp, cornetist, and Mr. Witt Frazee, cornetist, George Speer, violinist, Edward Speer, organist, at the Chapel 8 p. m. Sunday.

A social was held Wednesday evening at St. Peter's Lutheran Church on Grove street with the intention of raffling off a silk quilt made by Mrs. J. H. Koch, but owing to the short notice given the raffle was postponed for another day.

Rally Day memorial exercises were held in the chapel last Sunday. Rev. Mr. Herring delivered the address. George Speer rendered violin music and Miss Florence Ackor sang a solo. The chapel was crowded.

Rev. Theodore Duensing has resigned as pastor of St. Paul's Lutheran Church, and will soon remove to Brooklyn. Rev. Dr. Chas. Moldenke will preach next Sunday morning.

Names of pupils on Roll of Honor for September. Grammar Grade.—Clara Kelm, Tessie Schmidt, George Schmidt, Willie Demler, Douglas Demler, Minnie Beyer.

Primary Grade.—Elsie Schmidt, Helen Schmidt, Tiny Texier, Theodore Wormser, Tony Wormser, Gussie Troiano, John Blumetta, Minnie Blume, Clara Mobus, Lillian Willis.

* * *

LIBERTY CORNER.

Walter Smalley, of North Plainfield called on his friends here this week.

Mrs. William Bird and Mrs. James Boyle, of Plainfield, called on friends here last Monday.

Arthur Benbrook and Miss Anna Havalett, of Morristown, N. J., spent Sunday with Mrs. Rommel, an aunt of the young lady.

James King, of Jersey City, is spending two weeks here among friends.

The Public school will hold a box sociable at the home of John Wood, next Tuesday evening. A cordial invitation is extended to every one. The ladies are requested to bring boxes to which is attached their name and in which is luncheon for two. The proceeds will be used in the purchase of an organ.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Bell Lewis to First National Bank of Plainfield, $25.

Lewis M. Codington et ux to Frank Mobus, $325.

Calvin D. McMurtry, sheriff, to A. Arthur Cannon, $2,050.

Alfred University to Geo. N. Van Orden, $100.

Richard G. G. Moldenke et ux to Alfred B. Moldenke, $1.

James L. Griggs et ux to Geo. Hummer et ux, $3,050.

Annie E. Hummer and husband to James L. Griggs, $2,500.

WHERE THE CRANBERRY GROWS.

Facts but Little Known Regarding This Popular Berry.—New Jersey Heads List in Production.

She was the young wife of a millionaire, says the Newark *Evening News*, who gave her orders to the cook to be careful in stewing the cranberries and not forget to peel them first. This would seem to indicate that people know little about the cranberry saving its close affinity to the turkey and its peculiar delicious flavor, without which a turkey dinner would be deprived of much of its succulence.

The cranberry, like the whortleberry, grows wild on swampy ground, but it is the cultivated berry that is largest and possesses the most deliciously tart flavor. The berry is grown principally in New Jersey, Connecticut, Massachusetts and Wisconsin, and it is a singular fact that a one-legged Connecticut Yankee named John Webb was first to cultivate the cranberry. Previous to 1857 the vines had grown wild in Ocean county, N. J., and no attempt at cultivation or preservation of the vines had been made by the growers.

Somewhere about the year 1850 "One-legged John" landed in Ocean county, and between farm work and cranberry picking managed to eke out a sparse existence. John was a thoughtful man, and it did not take him long to figure out the difference between the cost of raising and the market price for the cranberry.

He was a poor man, but by dint of close saving he managed to get together enough money to purchase an acre of swamp ground. It takes three years of hard work in the cultivation of the growing vine before happy results are reached.

The expense of caring for it during two years is $100 an acre, and in September of the third year the blossoms appear and give indications of what may be expected of the crop. While working his acre during the first year John discovered what the whole world has now to be thankful for—that on spots of the peat bottom, where there was sand, the vine was doing better than elsewhere—and after gathering his crop at the end of the third year he covered the peat with three inches of sand, while the other growers wondered.

The next crop was something to wonder at, for the berry was larger, of a richer color and a far finer flavor, to say nothing of the crop being double what the other growers had realized. From thenceforth the hills were torn down to cover the peat bogs, and John bought more land and continued his growing. In twenty years he was a rich man and, the cranberry did it.

Not one-tenth of the quantity was put on sale before 1857 that was offered during the following few years, for previous to that time it was a great luxury, which only people of means might indulge in. It was here, in Ocean county, that John Webb made his discovery and gave to the world the cranberry in all its pertection.

Nothing in nature pleasanter for the eye to rest upon than a cranberry marsh in full bloom of the vines can be imagined. It is one mass of bright green things growing in all their luxuriance, pleasant to the eye and refreshing to the senses, but the rearing of the vines until bearing time, at the end of three years, is attended with no end of care and toil. A slip of the vine is first used, one end of which is thrust into the sand and the sand pressed down hard around it. The slip quickly takes root and everything looks promising for its growth.

Nothing seems to have troubled the vine in its wild state, but the cultivated vine has three powerful enemies. During the first two years of its growth a sharp edged, stiff-leaved grass, called the three-square grass, grows out of the sand with the growth of the vine and a persistent and hardy bulrush also makes its appearence, each twining to choke the vine out of existence.

The third destroyer of the cranberry vine is a destructive little insect called the webworm. The sharp-edged grass and bulrush have to be removed by gouges and grub hoes, and this process must be kept up every week during two seasons, so fully does the soil seem to be impregnated with their germs and so rapidly do they grow.

In New Jersey alone there are some 10,000 acres of swamp land devoted to the cultivation of the cranberry, and probably the same amount in the other cranberry growing States, and even this is insufficient to supply the increasing demand for the berry. England and other foreign countries were not slow in appreciating the delicious tartness of the cranberry and it peculiar adaptability to the turkey, which is another article of diet indigenous to the United States.

Not less than one-third of the entire cranberry crop is shipped to foreign countries, and, like our ever delicious apple, the foreigner seems to get the pick. Nothwithstanding this fact, although prices will rule high, there can be no doubt that we will not be deprived of our delicious cranberry jelly at our turkey dinners, which will soon be in season.

Mr. Blair Wins His Suit.

The suit of Thomas Walters against his former employer, C. Ledyard Blair, of Somerville, to recover $103 for wages which, he declared, were due him by the terms of his contract, was disposed of Tuesday by a verdict for Mr. Blair. The suit was the outcome of an incident at Blairsden, Mr. Blair's summer home near Peapack. His housekeeper, Mrs. S. W. Simpson, was alleged to have driven Walters from the house at the point of a revolver, because he refused to depart after she had discharged him. Walters instituted criminal action against Mrs. Simpson and civil action against Mr. Blair. He failed in both.

Mysterious Death of Somerville Man.

William Brown, a well-known resident of Somerville, was found lying near the Hamilton street crossing of the New Jersey Central Railroad, there at an early hour Sunday morning with his skull crushed. He was taken to the Somerset Hospital, where he died at noon without recovering consciousness.

There is considerable mystery surrounding the man's death. He lived in First street, a half block from where he was found, with his wife and two children. He left his house after supper Saturday night and started to return near midnight. It is not known how he came to be on the railroad.

The side of his head was crushed, and his brains were strewn along the track, but there was no other bodily injury to indicate that he had been struck or dragged by a passing train. Part of the hat Brown wore was found on the Bridge street crossing, a block from his body. The authorities are still investigating the case.

Women Tramps Bother Somerville Policemen.

A police was called to the station of the New Jersey Central Railroad at Somerville Tuesday night to arrest a woman who was found stealing a ride on a freight train. She was found in an empty freight car by a conductor of a westbound train.

When the train stopped there and she was aware that she was about to be arrested she jumped nimbly from the car and sprinted down the tracks and escaped before the arrival of the policeman.

Woman tramps are a recent inuovation on the freight trains of the Jersey Central. They have been seen in a few instances in company of male tramps. A woman tramp who was arrested along the railroad some time ago boasted that she had come to town on a coal train from Pennsylvania.

A Jersey Monstrosity.

Charles Stein, of West New York, has in his possession a freakish-looking animal, which he caught last Sunday in the woods at Fort Lee. It possesses sixteen toes, all perfectly developed, five on each of the front feet and three on each of the hind feet. In appearance it resembles a guinea pig, but Stein, who was once a keeper in a menagerie in Germany, claims it is not, but probably of that species. The monstrosity is smaller than a guinea pig, has long silky hair, and a head shaped like a board. One side of its coat is fiery red and the other pure white. It has no tail. The animal has made friends with a cat which Stein has at home, and both enjoy their meals at the same time and from the same plate. Stein's neighbors who have seen the animal are as much mystified as to its species as he is. He intends to exhibit the animal before some of the keepers in one of the metropolitan zoos.

Somerset County Courts.

Twenty-seven indictments out of fifty-seven bills, is the record of the Grand Jury, which adjourned last week.

Pelino DeBacco, was arraigned for trial before Justice Garretson, under indictment for the murder of his brother-in-law, L. Polobizio. He pleaded not guilty. He will be tried during this term of court.

A sensation was created by the indictment of several wholesale liquor dealers for illegal selling. These indictments are the result of investigations made by the New Jersey Liquor Dealer's Protective Association. Following are those indicted: Frank Kovac, Louis Curico, Sebastin Frescella, John Filak, Frank Bufano, Lawrence Wells, Adolph Bohran, Lena M. Hurston and Henry Haurand, the latter from this borough. Each pleaded not guilty and gave $200 bail for trial, which will probably be held this term.

The following prisoners were arraigned and each plead not guilty:

Stewart Hardgrove for mayhem, atrocious assault and assault on Augustus Lane (colored). Held under $2000 bail.

Charles Q. Wyckoff, assault and battery on Frederick Wyckoff.

Charles Q. Wyckoff, assault and battery on George Myers.

Alexander Wyckoff, assault and battery

[*Continued on Last Page.*]

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

Isaac Law, ninety years old, died at his home near Merchantville, last week. He was a negro slave and claimed to have served Lincoln's meals on several occasions.

B. P. Barracliff, an extensive cattle dealer, of Vineland is dangerously ill with blood-poisoning, caused by the sting of a mosquito. His right arm became inflamed soon after the bite, and swelled to enormous size.

Rev. J. B. Richards, pastor of the Methodist Protestant Church, of Magnolia has purchased a farm in Pennsylvania, and will retire from the pastorate of the church there on October 20. He has moved to his new home, but will be there on Sundays until his final departure.

Joseph Fenton, of Second street, South Amboy, picked last week in his garden some fine strawberries, being the second time the plants have borne fruit this season. He disturbed them among his friends to whom the luscious fruit proved a treat.

The keel of the Washington, the first armored cruiser ever built in New Jersey, which is to be constructed by the New York Shipbuilding Company was laid last Wednesday. The time limit of construction by the Government is forty-two months, and the contract price is $4,035,000.

A destructive wind storm, accompanied by heavy rain and hail, swept over the northern section of Hunterdon County Sunday afternoon. In some localities the apple trees were stripped of their fruit, corn was levelled to the ground and other serious damage done, the extent of which cannot be accurately estimated.

Rather than go through life with one ear, John Purcell, sixteen years old, of Trenton, submitted to a painful operation last Sunday and now appears with an ear tightly bandaged and sewed to his head with many stitches. The member was badly lacerated Saturday night in a mill where Purcell is employed. It merely hung suspended by the skin when the doctors commenced work.

Employes of the Erie Railroad Company have been advised that hereafter any employe who shall have his pay with held by a writ of attachment, for debt or otherwise, will be dismissed from the service of the company. One exception is made. Should the proceeding prove to be a mistake, without grounds for action, the employe will be exonerated.

A swarm of bees compelled a gang of carpenters to quit work at the home of Morris Goodwin at Salem. The bees had made their home for several years in the eaves of the house, but the owner decided that several improvements were to be made. The men with mosquito netting over their heads, started to tear away the boards, but the bees made things so warm that the task was given up.

The merchants of Belvidere have received many calls for shostrings during the past month, and it is said in four weeks than in the five years previous. The watch fob and belt craze is responsible for the great demand. The craze has even spread to the county jail. One of the women visitors at the jail instructed an inmate in the art, and since then he has made and sold about fifty belts, twenty fobs and twelve baskets made of cheese cloth.

Joseph Albini, forty-five years old, of Kingsland, was arrested by Deputy Game Warden Reipe in a field along Schuyler avenue, North Arlington, last week for shooting song birds. The prisoner was taken before Justice Byron, of Kingsland, who fined him $25 and costs. The game laws have been frequently violated of late it is said, in North Arlington along the meadows, and the authorities have been asked to be on the lookout for offenders.

Frank Keller, a teamster in the employ of John Berger, a contractor, of Verona, was arrested in Montclair last week by Lewis C. Tweed, an officer of the Society for the Prevention of Cruelty to Animals. He was arraigned before Justice Darlington and charged with driving horses whose backs were covered with sores. Keller admitted that the animals had been in that condition for two weeks. The justice fined Keller $30 and costs, which were paid.

WRECK ON THE SOUTHERN

Train Plunges at High Speed From Trestle Into a Stream.

MAIL COACHES ARE DEMOLISHED

Out of a Crew of Sixteen Half a Score Were Killed and the Others Injured—Locomotive and Cars Dashed Upon Rocks, Crushed Into Pieces—Tragic Scenes Attended the Accident.

Charlotte, N. C.—While running at a high rate of speed train No. 97, on the Southern Railway, the southbound fast mail train, jumped from a trestle seventy-five feet high, half a mile north of Danville, Va., and was almost demolished. Of the crew of sixteen men, including mail carriers, on the train, nine were killed and seven injured.

The dead are: J. A. Broady, of Saltsville, Va., engine driver; A. G. Clapp, of Greensboro, N. C., fireman; J. T. Blair, of Danville, Va., conductor, and J. L. Thompson, of Washington, D. C.; W. T. Chambers, of Midland, Va.; D. T. Florry, of Nokesville, Va.; P. N. Ardanwright, Mount Clinton, Va., mail clerks; a flagman named S. J. Moody, of Raleigh, N. C., and a boy of twelve years, son of J. L. Thompson. The express messenger, W. F. Pinkney, remained uninjured.

The injured are: Louis W. Spiers, Manassas, Va.; Frank E. Brooks, Charlottesville, Va.; Percival Indenmauer, Washington; Charles E. Reames, Culpeper, Va.; Jennings J. Dunlap, Washington, D. C.; M. C. Maupin, Charlottesville, Va., and J. Harrison Thompson, St. Luke, Va., mail clerks.

All of the injured men are seriously hurt and have been taken to the hospital in Danville. The recovery of Spiers is not expected and other clerks are thought to have received fatal injuries.

The trestle where the accident took place is 700 feet long and is located on a sharp curve. Reuben, the engine driver, was a new man on that division of the Southern, and it is said he went to the curve at a high rate of speed.

The engine had gone only about fifty feet on the trestle when it sprang from the track, carrying with it four mail cars and an express car. The trestle, a wooden structure, also gave way for a space of fifty feet.

At the foot of the trestle is a shallow stream with a rocky bottom. Striking this the engine and the cars were reduced to a mass of twisted iron and steel and pieces of wood. As the cars went down they hit the sides of the Riverside Cotton Mill, which is very close to the trestle.

Several thousand persons were soon at the scene of the wreck. No one on any of the cars had made an effort to jump, and the bodies of all those killed were found in the wreckage of the different cars to which they belonged.

Women who drove to the wreck from Danville fainted at the sight of the bodies. It seemed miraculous that any one should have escaped death, for every car completely collapsed after striking the rocks at the foot of the trestle. The express matter in the express car was practically destroyed except six crates of canary birds. None of the birds was hurt, though the crates were in the thickest of the debris.

All unofficial opinions agree in giving only one cause for the wreck—the high speed of the train on the sharp curve. The train was running about an hour behind time. It is believed that the engine driver, being unfamiliar with the road, did not take into consideration the danger of coming on the curve with such great velocity.

The mail bags in the mail car were torn open and the letters and packages were scattered, but it is believed none is lost. Fire, which appeared in the wreckage shortly after the accident, was quickly extinguished by the Danville Fire Department.

In loss of life it was one of the most serious wrecks that have taken place on the Southern. It is the third time that a fast mail has been almost entirely demolished.

The ill-fated train was the regular mail train which carried mail from eastern points to the West and Southwest, coming over the Southern Railway from Washington to Atlanta. No passengers were carried on the train between the two points, the train being made up of an express car and three or four mail cars.

TEACHERS BECOME MOTORMEN.

It Pays Better in Ohio—So Eight Schools Remain Unopened.

Springfield, Ohio.—There are eight township schools in this county—in Mad River, Moorefield and Harmony townships—that have not been opened this fall and cannot be opened until teachers are secured. There is a dearth of teachers, due to the fact that the salaries paid are considered insufficient. It is said that many teachers in the rural districts have deserted the country and come to the city to take places as motormen and conductors on the street railway because the pay is better.

A. B. Graham, Superintendent of the Township Schools, said the trouble is due largely to the fact that the poorest workman on the streets receives as much on the average as the country teacher.

Big Contract For Fuel Oil.

The State of Texas contracted with the Higgins Oil Company, of Beaumont, to purchase seven barrels of fuel oil to be used in the State charitable institutions. The price is said to be thirty cents per barrel.

Trusted Employe a Suicide.

William S. Mills, money order clerk in the office of the Southern Express Company, at Nashville, Tenn., was found dead in a room in a hotel with an empty morphine bottle by his side. Investigation of his books has revealed a shortage of less than $200. He had been a trusted employe of the Southern Express Company there for more than twenty years.

Texas Has Good Cotton Crop.

Texas railway officials report favorably on the cotton crop in that State.

IN WHITE HOUSE AGAIN

Vacation Ended, President Roosevelt Returns to Washington.

His Advent Marks the Beginning of the Busy Season in Legislative and Administrative Matters.

Washington, D. C.—President Roosevelt, accompanied by his family, Secretary and Mrs. Loeb, and members of the executive staff, who spent the summer at Oyster Bay, have returned to Washington. Postmaster-General Payne, Major Symons and one or two other intimate friends of the President were at the station when the special train arrived, but the President and the members of his family were driven immediately to the White House, where they spent the evening quietly.

The President received no callers except Major Symons, who as Superintendent of Public Buildings and Grounds, is Major-Domo of the White House. As only three members of the Cabinet are in the city, it is not probable that a formal Cabinet meeting will be held this week. Many persons are in Washington, however, with the object of seeing the President on various business and political matters, and Mr. Roosevelt will probably have a busy time of it.

When the President was asked if he had enjoyed his vacation, he said:

"I did. I had a bully time. Never felt better in my life. I am ready for thirteen months more of hard work."

The report has been current recently that President Roosevelt, in view of the resolutions adopted by the Central Labor Union in Washington concerning the case of Foreman W. H. Miller of the Government Bindery, will confer with labor union leaders in regard to a final disposition of the case. This report, it can be said authoritatively, is not true.

The President will confer with nobody about the Miller case, in so far as it is concerned with the principle set forth in his correspondence with Secretary Cortelyou, when he ordered the reinstatement of Miller in the Government service.

That principle, as enunciated in Mr. Roosevelt's letter to his secretary, is that there shall be no discrimination against the employment of non-union men in the Government departments.

Mr. Roosevelt regards that point, which is clearly defined at the very opening of the Miller case, and which is, in fact, the only real point at issue, as definitely settled, and any attempt to get the President to reverse himself, and declare for Miller's dismissal, as the Central Labor Union's resolutions ask, will be futile.

Entirely aside from the principle involved in the Miller case, the President may, however, have to reconsider the case on its merits. That is, he may have to pass on it in the light of the evidence which the union may present in support of its claim that Miller is unfit morally for employment in the Government Printing Office, but so far as the principle of unionism is involved in the case, Mr. Roosevelt will not consider it further.

MEXICO VOTES GIRL A MEDAL.

She Ran City of Linares in Yellow Fever Epidemic.

Linares, Mexico.—The heroic action of Miss Manuela Flores, the beautiful eighteen-year-old daughter of old Colonel Mariano Gomez, Mayor of this city, has attracted the attention of President Diaz and the Mexican Congress, which has voted a medal to her.

This high honor will be conferred upon Miss Gomez in recognition of her brave and untiring service to the people of this city during the yellow fever epidemic. For several weeks she has been the acting Mayor of Linares.

Surrounded by the dying victims of the terrible disease, and with her father, the Mayor, lying at home stricken with the malady, she assumed the duties of Mayor and has directed the affairs of the city in its time of greatest distress with an ability that has won for her the praise of the highest authorities of the Mexican Government.

When death entered her own home, she remained at her post of duty.

She saw the population of the city reduced from 15,000 people to less than 3000, a result of death and panic due to the epidemic. When her associates were fleeing to the mountains to escape the scourage Miss Manuela was directing and carrying out plans for improving the sanitary condition of the city and using her utmost efforts to prevent the spread of the disease.

All the city officials were stricken with the fever and died. As they dropped off, one by one, Miss Manuela took up their respective duties, and she is now performing the work of the other officials, as well as that of Mayor.

MUSTACHE CAUSES APPENDICITIS.

Patient Had Habit of Nibbling It and Swallowing Hairs.

Sioux City, Iowa.—J. J. Snyder, a cigarmaker, has had appendicitis from from biting off his mustache and swallowing the hair.

Snyder was taken to a hospital, where an operation was performed, and the surgeons found the hairs. After recovering consciousness Snyder acknowledged he had a habit of biting his mustache.

Robbers' Clean Out a Nebraska Bank.

Robbers dynamited the safe in the Ewing (Neb.) State Bank and escaped with the entire contents, taking all papers as well as cash. The noise of the explosion awakened the citizens, but the escape had been made before a posse could be formed.

Cuba to Urge Reciprocity.

At a meting of Cuban planters, sugar brokers and bankers and merchants at Havana, it was decided to send a committee to the United States to seek the co-operation of the American boards of trade in support of a reciprocity treaty with America.

Belmont Retires From the Turf.

August Belmont, Chairman of the Jockey Club, announced that he would leave the turf for a year and sell all his horses in training, retaining his breeding establishment.

ROOSEVELT TO LABOR MEN

President Sticks to His Decision in the Miller Case.

NOT TO DISMISS THE FOREMAN

He Cannot Discriminate Against Him Because He is Non-Union Man—Question of Fitness Will Be Determined in Routine Way—Two-Hour Conference With Mitchell, Gompers and Others.

Washington, D. C.—President Roosevelt announced to labor leaders who conferred with him on the subject that his decision not to dismiss Foreman W. A. Miller, of the Government Printing Office, is final. He told them that the question of Miller's personal fitness must be settled in the regular routine of the administration. Foreman Miller is the man who was dismissed because he had been expelled from the local bookbinders' union and afterward was reinstated by direction of the President. At the conclusion of the conference, which took place at the White House and lasted until almost midnight, the President issued the following statement:

"Pursuant to the request of Samuel Gompers, President of the American Federation of Labor, the President granted an interview this evening to the following members of the Executive Council of that body: Mr. Samuel Gompers, Mr. James Duncan, Mr. John Mitchell, Mr. James O'Connell and Mr. Frank Morrison, at which various subjects of legislation in the interests of labor as well as Executive action were discussed. Concerning the case of William A. Miller, the President made the following statement:

"'I thank you and your committee for your courtesy, and I appreciate the opportunity to meet with you. It will always be a pleasure to see you or any representatives of your organizations or of your federation as a whole.

"'As regards the Miller case, I have little to add to what I have already said. In dealing with it I ask you to remember that I am dealing purely with the relation of the Government to its employes. I must govern my action by the laws of the land, which I am sworn to administer, and which differentiate any case to which the Government of the United States is a party from all other cases whatsoever. These laws are enacted for the benefit of the whole people, and can not and must not be construed as permitting discrimination against some of the people. I am President of all the people of the United States, without regard to creed, color, birthplace, occupation or social condition. My aim is to do equal and exact justice as among them all. In the employment and dismissal of men in the Government service I can no more recognize the fact that a man does or does not belong to a union as being for or against him than I can recognize the fact that he is Protestant or Catholic, a Jew or a Gentile, as being for or against him.

"'In the communications sent me by various labor organizations protesting against the retention of Miller in the Government Printing Office the grounds alleged are twofold: 1. That he is a non-union man; 2. that he is not personally fit. The question of his personal fitness is one to be settled in the routine of administrative detail, and cannot be allowed to conflict with or to complicate the larger question of Governmental discrimination for or against him or any other man because he is or is not a member of a union. This is the only question now before me for decision, and as to this, my decision is final.'"

The labor leaders came away from the interview much downcast at the President's firm and unyielding position. As one of them remarked, "He stands pat, and that is all there is to it." No intimation was given as to what course the labor federation would take as the next step in the controversy. No criticism was offered on the President's remarks or his attitude in the matter, but it was indicated that the Federation could not afford to lie dormant under the reverse that the committee met, and that the Miller case could of necessity be forced to the front in the National Convention in Boston in November.

Mr. Gompers said he had nothing to say by way of comment on the President's statement. As a matter of courtesy, if for no other reason, he said he should decline to say whether it was satisfactory.

CARRIED WATER IN HIS HAT.

Thereby an Ohio Man Saved Trestle From Destruction by Fire.

Delaware, Ohio.—F. P. Hills, cashier of the Delaware Savings Bank, saved a 300-foot trestle on the Pennsylvania Railroad from burning by carrying water in his derby hat. While visiting his farm north of town Hills discovered that the trestle was on fire. The water barrels placed near by the company were filled, but no buckets were at hand. Taking his new fall hat and carrying water in it for almost an hour, he put out the blaze just a short time before an express train went by at a speed of a mile a minute.

First Class at Annapolis May Smoke.

On the recommendation of Captain Willard H. Brownson, commandant of the Naval Academy, Secretary Moody authorized the discontinuance of the rule prohibiting smoking so far as it applies to the members of the first class. In the opinion of the Secretary the members of this class are old enough to be relieved of such a restriction.

Payne Not to Resign.

It was said in Washington that Postmaster-General Payne's health having improved, his resignation from the Cabinet was not expected; Mr. Payne informed the President that his report on the postal investigation would be submitted late in October.

More Teachers Wanted in the Philippine

The Civil Service Commission, Washington, has received a call from the Philippine Government for 150 male teachers, at salaries ranging from $900 to $1200.

DOUBLE CRIME IN CHURCH

Husband Shoots Wife and Himself While Choir Chants.

Herman Rossow, of Lacrosse, Wis., Takes Desperate Vengeance on Wife From Whom He Was Separated.

Lacrosse, Wis.—While the congregation of the most fashionable German Lutheran Church of this city was taking communion Sunday morning and the choir chanting a Psalm, Herman Rossow shot his wife in the church and then himself. She is dying, but he may recover to answer the charge of murder. They married three years ago, she being nineteen and a popular girl and he twenty-seven years old, with the best of prospects and wealthy parents. For the past two years they have had domestic troubles, culminating a short time ago in her leaving him. Although a divorce suit was not commenced it was contemplated, non-support being the charge.

Rossow has stated at different times that his wife would not live to get a divorce, but, being a peaceable man, no one thought anything of it. To-day he stopped at a livery stable near the church, ostensibly to chat, but really to watch for his wife, who he knew was a devout church member. When she entered the church he rushed to the entrance as she was in the aisle, just ready to kneel at a pew, ran up behind her and shot her three times in the back with a revolver of large calibre, the balls going clear through her and passing up the aisle.

The screams of the injured woman mingled with the voices of the choir and panic reigned instantly. Rossow then shot himself in the region of the heart, but did not hit that organ. Rossow evidently repented of suicidal intent and with blood gushing from his wound raced up the street. Eugene Derr, an ex-police officer, caught him.

Rossow says he goes not regret the deed, as no matter how it ends it will terminate his domestic troubles.

CATCH A REPEATER, WIN A PRIZE

Rewards of $50,000 to Purge Election in New York.

New York.—The Citizens' Union will offer rewards aggregating $50,000 for the arrest and conviction of violators of the election laws during the coming municipal campaign. It is proposed to obtain from fifty wealthy members of the union $1000 each toward this fund. A capital prize of $5000 will be offered for evidence first presented which shall result in a conviction. There will be several prizes of $1000 each and others of $700, $500, $400, $300, $200 and $100 each. Policemen and election officers will have the same chance of competing as private citizens.

The offenses for which rewards will be offered are numerous. An inspector of election who knowingly permits a person not entitled to vote is a good catch for the reward-seeker. So is any person who falsely personates any registered voter, or who registers or votes under an assumed name.

Directly or indirectly giving or receiving any money or other bribe for voting or withholding a vote is an offense. If any inhabitant of another State or county is detected trying to vote here his captor may win a prize. An additional sum will be given where the conviction is of an election official.

AGED MAN KILLS GIRL.

Wealthy Coal Broker, Sixty-five Years Old, in Jealous Rage Shoots Young Woman.

Pittsburg, Pa.—George Worthington Garwood, a wealthy coal broker, sixty-five years old, shot and killed Hilda Vogel, twenty-two years old, and then killed himself in a room at No. 121 Moultrie street. Jealousy was the cause of the deed.

Garwood was formerly a farmer, living at California, Pa. His wife and nine children are still living. For the last two or three years he has been dealing in coal land options in and around his native town and was very successful. This business necessitated his living in Pittsburg a good portion of his time, and about two years ago, it is said, he became infatuated with Hilda Vogel, who was a waitress in the restaurant where Garwood took his meals.

Since then Garwood has frequently shown his jealousy over attentions shown the girl by other men. Garwood took rooms at the Moultrie House in July and introduced the woman as his wife.

The Garwood family is one of the most prominent in Fayette County. One of the sons is principal of a public school in Pittsburg and a daughter is a stenographer.

NEGROES DISFRANCHISED.

Five-sixths of Colored Men in Virginia Now Have No Right to Vote.

Richmond, Va.—Registration books have closed in Richmond, and the result shows that 5000 negroes have been disfranchised. Less than a thousand are now qualified to vote, and they have been entirely removed as a factor in local politics.

Reports from the State at large justify the belief that at least five-sixths of the negroes in Virginia have not now the right to vote.

Republicans contend that their party will be largely augmented from the Democratic ranks, there being no fear of possible negro domination in the future.

Tillman's Trial Begins.

James H. Tillman, former Lieutenant-Governor of South Carolina, was placed on trial in Lexington, S. C., upon the charge of having murdered N. S. Gonzales, an editor.

No Lynching Indictments in Delaware.

The Grand Jury in the Newcastle County Court, Wilmington, Del., after deliberating all day, reported no indictments in the lynching of the negro White, who was burned to death by a mob on June 22.

$1,000,000 I. O. O. F. Memorial.

At the session of the Sovereign Grand Lodge of Odd Fellows, at Baltimore, Md., the report of the Finance Committee on the proposed million-dollar memorial building of the Washington Lodge of Baltimore was adopted.

"SOO" EMPLOYES IN A RIOT

Attack Company's Building in an Attempt to Obtain Wages.

AFTERMATH OF A STOCK BUBBLE

Consolidated Lake Superior Concern's Men, Unpaid, Grow Desperate and Battle With the Police—Four Wounded—Mob of 2000 Woodsmen of Mixed Nationality Held Town at Its Mercy.

Sault Ste. Marie, Mich.—The Canadian Soo after the most exciting day in its history was left practically at the mercy of a mob of more than 2000 Finnish, Norwegian and Italian woodsmen and miners, who were recently discharged by the Consolidated Lake Superior Company with two months' pay due them.

At midnight all the lights in the Canadian Soo were suddenly extinguished, and immediately the fire bells began ringing an alarm. The greatest confusion prevailed.

The rioting grew out of a promise to pay off all the men, although the Consolidated Lake Superior Company's officials who made this promise admitted that they had no knowledge of where the money was coming from to satisfy the men.

The trouble for the most part was confined to the grounds occupied by the works of the company, where an immense throng of woodsmen gathered to get tickets cashed.

Upon being told there was no money for them they became ugly, and a big rock that crashed through one of the windows of the offices was followed by a cloud of missiles of all descriptions, which demolished every window in the building and drove the officials inside to places of shelter.

A rush upon one of the doors was repulsed only after two policemen were seriously injured and a number of others more or less hurt. The policemen wielded their clubs and several shots were fired by occupants of the building into the crowd.

The injured member of the mob were taken away by their fellows, and no details could be obtained.

Three or four streams of water from fire hose seemed to drive the crowd away temporarily, but it returned later and forced an entrance into the ground floor of the building, where movable pieces of furniture were demolished.

An assault upon the stairs to the upper floors was thwarted by a number of officials, who confronted the rioters with drawn revolvers. The rioting by this time had become general, and about noon, in a fracas on one of the down-town streets, two Frenchmen were shot by the officers. Both were seriously wounded. This row grew out of an attempt of some French women to rescue one of their number who had been placed under arrest.

The shooting inflamed the mob to a high degree, and only a big display of force prevented a fiercer riot on the spot.

The local company of militia was assembled at 2 o'clock, ball cartridges were issued and orders given to fire to kill if commanded to do so. The appearance of the troops on the streets caused more confusion.

About 4 o'clock the leaders of the men held a conference and demanded that the company provide lodgings and food until their wages were paid. In an effort to appease them the officials turned over one of the large boarding houses operated by the company to the men, and this building is now headquarters for their operations.

A big meeting was held at night and speeches of the most inflammable kind were permitted without interference by the police.

A vigilante committee of the young men of the city has been organized to protect the house of the Mayor and Mr. Shield, president of the company, from attack by the rioters.

The greater number of the mob were ignorant Italians, Finns, Norwegians and Frenchmen, the latter perhaps the hardest of all to handle. All have been drinking, more or less, although the bars finally obeyed the order to close up.

KILLS WIFE AND SELF.

A. Bruce Brownlee, of Youngstown, Ohio, Committed Double Crime.

Youngstown, O.—A Bruce Brownlee, one of the most prominent citizens of Youngstown, shot and killed his wife, Henrietta, and with the same pistol committed suicide by firing three bullets into his body, one of which passed through his heart.

Brownlee had been drinking heavily for some time. He came home drunk at night, and shortly after his arrival the shooting took place.

The only other person in the house was Mrs. Hollingsworth, the aged mother of Mrs. Brownlee.

They leave a son, Bruce, Jr., seventeen years of age, who, upon learning of his parents' death, lost his reason.

GUILTY OF SEVEN MURDERS.

A Veteran of the Hatfield-McCoy Feud Strung Up at Last.

Richmond, Va. — Clifton Branham, who was hanged at Wise Court House for the murder of his wife, was by his own confession one of the worst desperadoes that ever infested the borderlands of Virginia and Kentucky.

As a member of the McCoy gang in the Hatfield-McCoy feud he killed Jack Hatfield, George Ments and a man named Mason. Then he became a moonshiner, organizing a gang that was a terror to Eastern Kentucky. Seven murders in all were committed by him.

Good Showing of a Railroad.

Figures of the Illinois Central's annual report show a substantial increase in earnings.

Russia on a War Footing.

Russian forces in the Far East number 250,000 men of all branches of the service and eighty warships.

Curtail Pig Iron Output.

It is announced that the Northern manufacturers of pig iron will curtail their output twenty per cent.

SAD FINALE OF A REUNION

Group Returning From Family Party Near Philadelphia Run Down.

Watching Their Own Train Approaching They Didn't See That a Flyer Was Coming—Slaughter in the Dark.

Sharon Hill, Pa.—A party of nine persons were run down at this station during the night by a fast train on the Philadelphia, Baltimore and Washington Railroad. Five met death instantly, one was fatally injured and three were seriously injured.

The dead are: Mrs. Jane Clark, of Philadelphia; Mrs. Jane W. Brown, of Philadelphia; David Farran, of Sharon Hill; John Farran, of Sharon Hill, grandson of David Farran; James Brown.

The injured: Miss Farran, of Sharon Hill; Thomas Brown, eighteen years old, son of the dead woman, injured about the abdomen and internally; condition serious; Miss Martha J. Farran, thirty-one, of Sharon Hill, broken nose; Miss Florence Argood, thirty-eight, of Sharon Hill, lacerations and contusions of the head and legs.

The Farran family at Sharon Hill entertained a number of guests, some of whom were numbered among the dead and injured. The Philadelphians decided to return on the train leaving Sharon Hill at 10.05 o'clock p. m.

The Sharon Hill family and friends accompanied them to the station. David Farran, his grandson, John Farran, and others who had spent the afternoon with those who were to journey homeward, went to the platform on the east side of the track. Between the two northbound and the two southbound tracks there is a fence.

As the Philadelphia train was heard in the distance the Farran family and their guests passed from the higher platform of the station to the nearest track. They failed to notice that the coming train occupied the track on which they were standing.

The engineer did not see the group at first, and when he did it was too late. The engine plowed through the group. The happy salutations of a minute before were turned into agonizing shrieks for help. When the engine struck the party bodies were seen to fly as though shot from a catapult.

The station was closed, no one, it is said, remaining to warn passengers of any impending danger. The only assistance, therefore, came from the crew and passengers on the train.

Dr. Webb, a Sharon Hill physician, cared for the injured. After temporary treatment they were hurried aboard the train and were rushed to the University Hospital at Philadelphia.

Five Killed in a Street Car.

Chicago.—A Wisconsin Central passenger train going at high speed crashed into an electric car at the Fifty-second avenue crossing of its tracks at Hawthorne. Jockey J. Williams and four colored stable hands were instantly killed.

TYPEMAKERS OUT.

About 1000 Employes Over Country Go on Strike.

New York.—The first strike of typefounders in thirty years has gone into effect, involving about 1000 men [illegible] and in San Francisco, Chicago, St. Louis, Cincinnati, Philadelphia and Boston. About 200 men are supposed to be affected in this city.

The strike was ordered in Chicago by President Nurnburger, of the International Typefounders' Union, and the order was telegraphed to the other cities.

According to Vice-President O'Mara, of the International Union, who is an employe of the Bruce Type Foundry in Great Jones street, the strike, while ostensibly for a new wage scale, is really for a recognition of the union. At a conference held between the employing typefounders and the union at the Park Avenue Hotel on May 21, a new agreement was submitted which included a clause providing that if the union could not supply enough men the employers could fill the gaps as they pleased. The employers, he said, would not agree to this, but submitted to a contract to be signed by the men as individuals. The union wouldn't have this, so no agreement was signed, and now a strike for union conditions has been ordered.

E. W. Nelson, President of the American Type Foundry in Jersey City, will take charge of the strike situation for the employers.

He said that no concessions would be made to the men, and that foundries all through the country would stand together in resisting the demands. This company, he said, had sufficient type on hand to last for some time.

SCANDAL CLOSES BILTMORE.

G. W. Vanderbilt Disgusted by Dishonest Employes, Goes Away For a Year.

Asheville, N. C.—Biltmore house, the country home of George W. Vanderbilt, two miles from Asheville, on which Mr. Vanderbilt has spent millions of dollars, is to be closed for at least one year and probably for a longer period.

Mr. Vanderbilt is disgusted with the discovery made some days ago that the estate had been robbed to the amount of $8000 or more. The servants at Biltmore House, with few exceptions, it is understood, have been discharged.

The Biltmore estate proper consists of 8700 acres, all of which is improved. On it is situated a mansion which is said to have cost its owner from $3,000,000 to $5,000,000. The whole estate comprises between 100,000 and 125,000 acres.

Alexander's Slayers Get Light Sentence.

The trial of the officers concerned in the murders of King Alexander and Queen Draga has ended. Captain Novakovics and Lazarevics were each sentenced to two years' imprisonment and the loss of their commissions. Dr. Velikovics and Captain Lotkijevics, former aide-de-camp to King Alexander, were sentenced to one month imprisonment each. The other conspirators were sentenced to serve terms of from three to twelve months. It is expected that King Peter will pardon all of them.

CONDITION OF TREASURY

Mr. Roberts Gives Figures of the Fiscal Year Ended Last June.

WORKING BALANCE, $86,000,000

Total Net Revenue, $560,396,67[illegible] Increase of $38,988,439—Expenditures Greater Than Those of 19[illegible] $583,783,934—Money in the [illegible] $687,140,621—$631,420,7[illegible] Remain

Washington, D. C.—Vi[illegible] Treasurer of the Uni[illegible] submitted to Secretary [illegible] Treasurer Roberts's annual report on the condition of the Treasury June 30, 1903, and its operations during the last fiscal year.

The total net revenue [illegible] making the total receipts from Bulgaria was $560,396,674, an [illegible] being the other $88,439 over the year [illegible] protests of the total expenditures [illegible] carry 1[illegible]7, an increase of $35,7[illegible] dicy surplus was $54,297,967, [illegible] with $61,287,375 in 1902. In [illegible] ceipts there was an increase of [illegible] $23,000,000 from customs, and a falling off of more than $41,000,000 from internal revenue, the latter being the result of legislation enacted with that object. On the side of the expenditures there was an increase in every important account except pensions and interest, in which there were slight savings.

The expenditures for the two military departments, together amounting to $101,257,554 and forming by far the heaviest outlay for any single purpose, were upward of $21,000,000 greater than those of the year before. The aggregate income, including besides the revenues the receipts from bonds, notes and coin certificates, was $1,211,234,007, and the aggregate outgo was $1,122,947,095. At the close of the year the Treasury held $865,058,809 in gold and silver on deposit against outstanding certificates and Treasury notes, besides $75,000,000 in gold, forming the reserve against United States notes.

Treasurer Roberts places the monetary stock of the country on June 30, including gold and silver, United States notes, Treasury notes and National bank notes, but not certificates, at $[illegible],688,149,621, an increase of $124,[illegible] for the year. The increase in gold was $99,137,401, and in National bank gold was $56,598,550. The total estimated [illegible] notes of gold was $1,252,731,990, [illegible] stock nearly forty-seven per cent, constituting whole. The gold in the Treasury of the amounted to $631,420,789, after a [illegible] of $71,220,480 in twelve months. During the year $126,715,723 in gold was deposited at the mints and assay offices. Of the receipts from customs at the Port of New York, constituting sixty-seven per cent. of the whole, eighty-eight per cent. was in gold. The proportion of gold at other ports is about eighty per cent. The [illegible] of gold were $44,982,027, [illegible] ports $47,000,505.

The increase of the [illegible] tion during the [illegible] of which $[illegible] gold certificates and [illegible] 363 in National bank notes. The share of money in circulation increased eighty-nine cents, and the proportion of gold to the whole rose to forty-two per cent., the highest ratio ever recorded.

There has been a continual increase in the proportions of paper currency of the denominations of $10 and under in circulation, but the growth hardly keeps pace with the demand. The supply can be increased, if Congress will authorize the issue of gold certificates for $10 and remove the restriction on the issue of $5 notes by National banks. To meet the constant pressure requires strenuous effort in the preparation of the currency for issue.

The National bank notes presented for redemption during the year amounted to $126,420,021, or fifty-one per cent. of the average outstanding. Of the five-dollar notes the redemptions were fifty-five per cent., of the ten forty-six per cent., of the twenties forty-nine per cent., of the fifties sixty-one per cent. and of the hundreds seventy-three per cent. These figures show that the tens and twenties remain in circulation longest.

AMBASSADOR HERBERT DEAD.

British Representative at Washington a Victim of Quick Consumption.

London.—Sir Michael Herbert, the British Ambassador to the United States, died suddenly at Davos Platz, Switzerland, of quick consumption. He was on leave of absence from Washington, and had been staying with Lady Herbert at the Hotel Belvedere, in Davos, for the past five weeks in the hope of benefiting his health. His wife and his brother, the present Earl of Pembroke, and the Countess of Pembroke, were present when he passed away.

Sir Michael Henry Herbert was the son of the first Baron Herbert of Lea. He was born in 1857. He was married in 1888 to Miss Lelia Wilson, daughter of Mr. and Mrs. Richard T. Wilson, of New York City. Lady Herbert is a sister of Mrs. Cornelius Vanderbilt, Jr., and Mrs. Ogden Goelet. Sir Michael entered the diplomatic service of Great Britain and in 1888 was made Charge d'Affaires at Washington. He was sent to The Hague in 1893 and the following year to Constantinople. There he remained until 1897, when he went to Rome for a year. In 1902 he was appointed Ambassador to Washington to succeed Lord Pauncefote. Sir Michael leaves a widow and one son, nine years old.

Murderer of Three Women Found Dead.

Tom Madison, the man who murdered Mrs. Ada Williams, her daughter and her mother, Mrs. Payson, on the night of September 16, and who has been pursued by a posse since, was found dead in a corn field thirty miles south of Hastings, Neb. He had shot himself.

Swift Has Cornered Lard.

Swift, of Chicago, has cornered the lard market and controls over half the world's supply, which exceeds 210,000 tierces.

Horrible Crimes Perpetrated by the Sultan's Bashi-Bazouks

There is no political turmoil in Turkey in which the Bashi-Bazouks are not permitted and encouraged to take a prominent role in the bloody drama of Armenian massacre. So thoroughly is this recognized that their name has come to be synonymous with bloodshed, their very appearance a grewsome forerunner of the harvest of death. Even the Turks themselves their connection has come to be regarded as the devil of the night, and a naughty and refractory child becomes obedient at the mere mention of that awful name.

These troops, known as irregular soldiery, are recruited solely by the Sultan, and they are always sure to do his bidding. They are the Sultan's chosen instruments when it becomes his imperial pleasure to wreak wholesale vengeance upon any of his Christian subjects. It was the Bashi-Bazouks let loose upon the Greeks at Scio in 1822 that reduced that fair island of gardens to ashes, while 25,000 people met death in a single day and 20,000 women and children were carried off and sold as slaves, to the scandal of Christendom.

In the Turkish war with Russia in 1877 thousands of Bashi-Bazouks were transported from their homes in the highlands of Asia and turned upon the helpless Christian population of southern Bulgaria, massacring over 40,000 of them in the month of June alone. It was at this time that a whole large school of children were killed at once and the bodies of the victims, together with the school house, burned by the destroyers.

It was the Bashi-Bazouks, armed with Martini rifles by command of the Sultan, though in defiance of the Berlin treaty, who began the awful Armenian massacres at Sassoun in 1894. For twenty-three days the work of carnage was permitted to go on in that single district, village after village being wiped out of existence, while 7,000 people—men, women and little children—were put to death with every conceivable torture. In one village all the young men were tied hand and foot, laid in a row, covered with brushwood and burned alive. Others were cut all and hacked to pieces; little children were cut in two and mutilated. Here fiting girls outraged in the presence of their families. On the last day of the quantity, the anniversary of the Sultan's accession to the throne, a speech was made to these ensanguined butchers by Zekki Pasha, the Turkish general, urging them to redouble the slaughter in honor of the day. So well did they act on this suggestion that after the war many of them boasted openly having killed a hundred Christians apiece. The Bashi-Bazouk, indeed, takes pride in his prowess and of the part he plays in the extermination of the Christians. In an interview with E. J. Dillon, the war correspondent, a notorious Bashi-Bazouk, after narrating several adventures of his, in the course of which he dishonored Christian women, killed Armenian villagers, robbed and looted from right and left, went on to say: "We did great deeds after that, deeds that would astonish the twelve powers to hear told. We attacked villages, killed people, gutted houses, taking money, carpets, sheep and women, and robbed travelers. Daring and great were our deeds, and the mouths of men were full of them."

Who are these Bashi-Bazouks who pride themselves on being such mighty men of valor, calling themselves "Lords of the Hills?"

They are Kurdish nomads, descendants probably of the ancient Carduchii who occupied the mountainous eastern border of the Assyrian Empire in the time of its glory.

While there are many different tribes or clans among the Kurds, they may be divided roughly in two general divisions, the nomads, lawless and brutal, to which belong the Bashi-Bazouks, meaning literally "crazy heads," and the serfs or subject Kurds, who are merely stolid, stupid peasants, content with tilling the soil in the most rudimentary way, but displaying wonderful skill in weaving rugs.

The nomadic Kurds never work, but depend upon the Armenians, as a parasite does upon a plant. When not upon the actual warpath, and nothing more than ordinary brigandage is going on, the chief of each tribe comes down from the mountains every spring at the head of his men to collect tribute of the Armenian villages in sheep, mules, rugs, stockings, or anything else that takes his fancy. All of their wheat and grain they get from the Armenians, who are forced to support themselves and the Kurds, and at the same time pay taxes to the Turkish Government.

CHIEF OF THE BASHI-BAZOUKS.

They are all very fond of finery, and never hesitate to avail themselves of any opportunity for adding to their store. They seem to know by intuition when an Armenian girl is getting her wedding finery together, and often appear at the last moment to snatch her wedding garments, fashioned with such loving care; then off to the hills with their ill-gotten booty. If the Armenians ever dare to make a complaint they are oftener than not thrust into prison themselves with the words, "All Armenians are liars. The Kurds are the Sultan's warriors. To do this is their right." The only time that these "crazy heads" are ever punished is when they are indiscreet enough to hold up some wealthy Turk or insult a Turkish woman.

It is from among these men that the Sultan has drawn his notorious Hamidieh Cavalry, called by his own name, and provided with uniforms and arms. While the unvarying rule of the Turkish Government has been to send its soldiers far away from their own homes for active service, a conspicuous exception has been made in their case. While they have special barracks fitted up for them in Constantinople, they are permitted in times of peace to remain in their own mountains, where they are authorized to act as police. The effect of this is to give them absolutely unlimited opportunity to plunder with the result of bringing into bold relief the worst elements in the Kurdish character.

While the Kurds are Moslems in religion, and largely under the influence of dervishes, no sense of religious duty or patriotism animates them in their guerilla warfare.

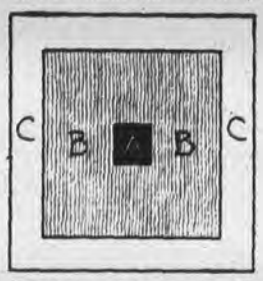
They go forth to battle simply as locusts to devour the spoil. Of this fact the Turkish Government is thoroughly cognizant, and when the Government, at its own expense, armed and transported these fiends in to Macedonia their very presence gave the lie to the promised reforms. To-day finds the Bashi-Bazouk in his element. Licensed by the Sultan, furnished for the first time with the uniform of the regular army, provided with the latest military equipment and protected by the Turkish soldiery, he has already begun his carnival of loot, license and bloodshed, looking to the utter extermination of the Christians, who, driven to desperation, have at last turned against the iron heel of the oppressor.—New York Commercial Advertiser.

BASHI-BAZOUKS IN FULL UNIFORM.

THE NEW CANADA

This illustration, says London Answers, tells more convincingly than would many columns of letterpress why the eyes of the land-hungry all over the world are turned to the Canadian West.

The square, C C, represents the total area of the Province of Manitoba, and



the Territories of Assiniboia, Alberta and Saskatchewan—270,000,000 acres in all. The shaded square, B B, shows the area of land good for farming—125,000,000 acres; while the black square, A, is the land at present under cultivation—4,000,000 acres. The black centre of cultivated land is but a dot on the great expanse of land suitable for tillage. From that little black dot over a million bushels of various sorts of grain were reaped last year. What will the harvest be when the whole area comes under the plow?

Cream to Burn.

Two little girls were engaged in an animated discussion as to the merits of their respective homes.

"Well, anyway," said one little maiden in a triumphant tone, "you may have more bedrooms than we have, but we have more cream than you do. We have enough for our cereal every single morning."

"Pooh!" said the other, "that't nothing. We own a Jersey cow, and we get a whole cowful of cream twice every day."—Lippincott's.

The Prince of Montenegro

Reminiscent of Hugo.

One of the Interesting Relics in the Great Writer's House.

Thanks to the devotion of M. Paul Meurice, his friend and literary executor, says the Paris correspondent of the London Graphic, Victor Hugo has now his museum in Paris in the house he lived in for so many years in the Place des Vosges. In the case of the great French writer the task of getting together several hundred articles of

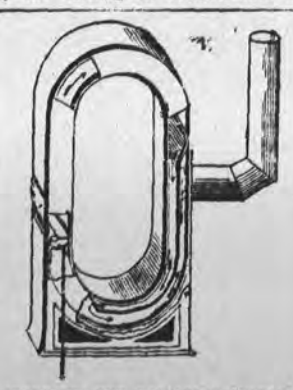
POET'S WORK TABLE.

interest has proved a comparatively easy one. This is due to the fact that Victor Hugo was not only a great author, but was also an artist—and particularly a caricaturist—of talent, and a wood carver and cabinet-maker of skill. The house in the Place des Vosges is, therefore, filled with interesting relics of the master. One that is regarded with the greatest respect is the writing table at which he wrote nearly all his masterpieces. This is in Louis XIII. style, and is very high, for Victor Hugo always wrote standing. Another desk is interesting from its associations. This is the one on which are placed four inkstands and four pens. These belonged to Lamartine, Alexandre Dumas, Georges Sand and Victor Hugo himself. In front of each is the framed autograph, covered with glass, of each writer.

Probably the most interesting part of the museum is the furniture made by Victor Hugo. He was in the habit of taking pieces of carved wood which he picked up here and there, and combining them into furniture of the most fantastic shapes. The results were often more bizarre and curious than artistic.

Stove Improvement

A comparatively small percentage of the heat of any stove having direct flue connection with the outside air, which applies to all fuel oil and coal stoves, becomes available for useful heating. Most of the heat passes up the chimney or flue. With oil stoves it is different. All the heat developed by the burning oil radiates into the

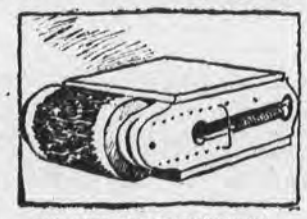


INCREASES THE RADIATING SURFACE.

room and furnishes useful heat or is utilized in cooking. In order to increase the efficiency of the first class of stoves, Philip S. Spiller has designed a stove which greatly increases the radiating surface, and, accordingly, extracts more useful heat from the oil burned. This object is attained by providing a circular flue encircling the entire stove. To still further increase the radiating surface and insure the hot gases produced by the flame, which is located in this passageway, passing entirely around the stove before escaping to the flue, a deflector is placed in the heat passage. The effect is to divide the heat passage with a division wall, deflecting the hot gases from the flue until such time as they have completed the entire circuit of the stoves. These are usually built in O-shape, and may be adapted for house-warming or for cooking or hot-water heating.

For Dressing a Belt.

A new device for applying dressing to leather belts is being introduced. It consists of a roller at the end of a case, into which a cake of dressing is



FOR APPLYING BELT DRESSING.

inserted and is kept in place by a spring follower, which keeps the cake of dressing in contact with the roller at all times. When the moving belt engages the roller it causes it to revolve rapidly and rub against the cake of dressing on the inside of the case. By this means the dressing is applied to the belt very evenly and quickly.

The Funny Side of Life.

NOT CURRENTLY CONSIDERED.

This world is but a fleeting show,
Where worth and folly join.
Posterity's the critic, but
It doesn't pay the coin.

Smith—"Gracious, no! If I had I wouldn't have to do it now."—Judge.

A BIT PUZZLED.

Jack—"Well, you see, I offered to kiss her tears away."

Molly—"Well?"

Jack—"She cried more than ever. And what worries me now is, whether she was crying for me to kiss the tears away, or at the thought of my kissing her?"—Comic Cuts.

PARTICULARLY RICH.

"Rich?"

"Oh, very! It would take at least two figures to write the number of seconds he can afford to spend at lunch."—Puck.

ATAVISM.

"Well, there's a curious, somewhat old-fashioned emotion that crops up sometimes, even in modern life."

"What's that?"

"Love."—The Wilderness.

EASILY SETTLED.

Pa—"I don't know whether to give you a ring or a watch for your birthday."

May—"What a dear, good pa you are! Then, of course, you will give me both."—Chelsea (Mass.) Gazette.

ASSURANCE.

"Young man," said the wealthy Mr. Pompous, "you ask for my daughter's hand. What expectations have you?"

"Why," replied the young man in a somewhat surprised tone, "I expect to get what I'm asking for."—Philadelphia Press.

WILLIE AND SALLIE.

"Willie, why does a lawyer write 160 pages of a legal document and then call it a 'brief?'"

"That's one on me, Sallie. But, then, there are a good many things about the lawyer business I don't understand."—Rollet Monthly.

STRENUOUS.

"What! you don't lift those heavy weights, do you?"

"I, aw, don't lift them, old fellaw, I just roll them over the floor."—New York Journal.

NO USE FOR ONE.

New Yorker—"Why are you looking so curiously at this map?"

Stranger—"Because I can't find my way without looking at it."

New Yorker—"Not find you way? I have lived in this city for forty years and have never had use for a map."—Judge.

GONE.

Edyth—"When I refused Charlie Alight before last, he threatened to blow his brains out."

Mayme—"Well, he didn't. He proposed to me last night."

Edyth—"Indeed! Then he must have got rid of them in some other way."—Chicago News.

A HARD TASK.

First Member Board of Public Improvement—"It will be mighty hard to enact any effective anti-mosquito ordinance."

Second M. B. P. I.—"Yes, especially in the light of the fact that each mosquito presents his own bill persistently and continues to blow his own horn."—Baltimore American.

COLD FACTS VERSUS SCIENCE.

Physician Tells of Danger of Hastily Formed Opinions.

In talking to a class of students recently, a prominent hospital physician of this city cautioned them against hastily forming and expressing opinions as to the nature of patients' diseases. He emphasized his warning with two stories from his own experience. He was once present at a clinic the subject of which was a man evidently suffering from some disease of the heart.

"A strange, unnatural, murmuring sound could be heard from that organ," said the doctor, 'and the pupil of one of the man's eyes was much dilated. The peculiar appearance of the eye struck all present, and seemed to have some connection with the cardiac, or heart, affection. We wondered what the precise nature of this relation could be, and more than one of us had out a note book as the discussion grew animated. But they were put away in a hurry when the patient remarked that his queer looking eye was made of glass.

"At another clinic the professor in charge was talking learnedly and pedantically about the importance of attending carefully to minor symptoms.

"'For instance, gentlemen,' said he, 'I have no doubt but that certain things might be confidently affirmed as to this woman's condition by the appearance of her teeth.'

"He was forging ahead with particulars when the patient interrupted him.

"'Here you are, sir,' she said, taking out her teeth, 'you can hand them around if you like.'"

DINNERS TO BUSINESS MEN.

Heads of Departments Remembered in This Way by Employers.

Twenty years ago the president of a big company, the owner of a big business or industry, would as soon have thought of asking his subordinate heads of departments to spend the summer at his country home as of giving them a formal dinner once or twice a year. Now the formal dinner-giving practice is so common that it is almost taken for granted. The big corporations of the country give annual dinners to heads of departments which cost thousands of dollars. Even mercantile firms, small in comparison, are in the habit of meeting their chief employes around the dining board.

There are several reasons for this interesting development. In the first place, Americans are learning to enjoy the formal dinner, with its elaborate menu, its wine and its speeches. Then the capitalist has come more and more to realize how much of his success is due to his heads of departments. Oftentimes he gives them an interest in the concern or corporation, and immediately they begin to work for the concern as well as the company. Anything that will bind them closer to the employer's interests is not overlooked, and a dinner once in a while is one of these.

North Plainfield Weekly Review.

Founded March 24, 1900.

An Independent Republican Newspaper published every Saturday at 33 Somerset Street, North Plainfield, N. J.

HARRY H. WEBB, Editor and Proprietor.

TERMS OF SUBSCRIPTION:

If paid in advance $1 per year; if not paid in advance $1.25 per year. The REVIEW is delivered by carrier in Plainfield and North Plainfield, and is on sale at news stands

Long distance and local telephone : : : 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, OCTOBER 3, 1903.

TO ADVERTISERS.

Frequent changes of advertisements is one of the main requisites for a successful result; we therefore urge our advertisers to change their ads at least once a month. Try and get such changes to us as early in the week as possible; never later than Thursday noon.

The REVIEW *is on sale at the Union News Stand, east bound railroad station, and at F. M. Laing's, 130 W. Front St.*

SOMERSET POLITICS.

SOMERSET COUNTY is normally Republian by about five hundred, but strange as it may appear, every important county office but one is filled by democrats.

The reason for this, which is well-known, is on account of the bickering between would-be leaders, who, if they cannot have everything their way they cut and slash the ticket or "bolt" thus helping to turn a Republican county over to the Democrats.

This is fun for the Democrats and no opportunity is lost by them in encouraging these so-called Republican leaders to keep up their revengeful methods.

The North Plainfield contingent, which has made an unenviable reputation for this kind of work now comes out and demands the nomination this fall of a certain boroughite for county clerk.

It has not been decided yet that there will be any nomination for County Clerk this fall, and if there is, the nomination will probably go farther South, but if there should be one and it be given to a North Plainfield man is it not reasonable to suppose that it would fall to a man who had always been loyal and worked for his party, and thus deserved the honor, rather than to one who has never done anything for his party and who owes his present position to the chief slasher and bolter of the Republican ticket here? But if it should be decided that the name of the would-be party leader's incumbent should be nominated then may we expect to see the next County Clerk of Somerset a Democrat.

Later.—It has been decided by Attorney General McCarter that the delegates elected to the county convention should nominate a candidate to fill vacancy caused by the death of F. W. Somers.

With this vacancy to fill and an Assemblyman to elect, the election promises to be more lively than usual.

A NEW COUNTY PROPOSED.

A report reaches us, emanating from New Brunswick, that the dissatisfied politicians of Plainfield who bolted the Elizabeth convention because they failed to get their favorite nominated, now propose to cut Plainfield out of Union county, unite with North Plainfield, of Somerset county and South Plainfield, of Middlesex county, and any other territory necessary for the success of the scheme, and form a new county. The chief purpose of this, as we understand, is to stop the bickering between factions in the Republican party in the district named.

Now this is becoming real interesting. Just imagine, if you can, the North Plainfield bolters and the Plainfield bolters, each side bearing records second to none in the State, brought together in one county. It would mean one long drawn out love feast where harmony would reign supreme(?). If there were not offices enough for the leaders and their friends, they would calmly accept the situation and everything would end happily, as they say in the story books (?). Yes, indeed!

But there are the people to reckon with—something the North Plainfield contingent failed to take into consideration when they tried to cut loose from Somerset. If the Plainfield bolters will profit from the experience of their neighbors in this direction it may save them much worrying.

EXTRA SESSION CALLED.

Governor Murphy has called an extra session of the legislature to be held on October 15, for the purpose of passing a remedial school law legislation.

Public opinion is divided as to the necessity of a special session, the negative side arguing that inasmuch as the court of errors and appeals has not made public its decision against the McKee law, that the state officers would be justified in going ahead with the distribution of the school funds; but other officials, Governor Murphy included, think the safe way is through a special session, which will cost the State little or nothing, and the legislature should then be able to pass a law which will stand.

BETTER DROP IT NOW.

It seems poor policy on the part of the State Bar Association, or of any person or persons, to try and pick flaws in the returns from the election of the constitutional amendments, when it has been so clearly shown that it was the intent of the voters to vote against all the amendments.

We believe the amendments, had they been carried, would have benefitted the State very much, and we worked for them, but realizing our defeat, we purpose accepting it, realizing that to amend the constitution on a technicality, against the will of the people, would be dishonest and precipitate the wrath of a majority of the people on all concerned in such an act.

With one or two exceptions the prominent Republicans of the State are opposed to any such scheme, and although much effort has been made (and is still being made, for that matter) to make a political issue of this election, such a course can do no harm, as the people generally know full well that the amendments were not at any time in their history made a political issue, but Republicans and Democrats worked side by side to get them introduced and brought before the people.

THE NECESSITY OF GOOD BANKS.

Our attention is drawn to the fortunate condition existing here in the city and borough through its excellent banking facilities by the following article from the *Youth's Companion*. The article is so applicable to this vicinity that one would almost think it had been written expressly for us:

"Since March, 1900, when the act permitting the organization of national banks with twenty-five thousand dollars' capital became a law, nearly seventeen hundred new national banks have been organized. This is about one-half as many as there were before the new law was passed. The majority of the new banks have started with the minimum capital. Many of them have been old state or private banks, which sought the privileges of the national banking act and gave in return to their depositors the security which the provisions of that act insure.

"The object of the law was to give safe and sound banking facilities to the citizens of the small towns, and attract capital to those towns. The figures quoted seem to indicate that there was an urgent demand for such legislation.

"It is of great importance to every community that its business men shall be able to obtain money when they need it. The merchant may desire to build a new store, and he must borrow part of the cost; the farmer's barns may need enlarging, and he has not ready money till after his crops have been sold: the lawyer plans a new house, and he cannot erect it unless he can borrow.

"Of course if it were possible or wise for a man always to postpone expansion of business facilities until he had the ready money to pay for the needed improvements, banks would not be so necessary; but much business is done on borrowed capital. It is borrowed money that builds railroads and erects large office buildings. Managers and promoters hire money just as they hire men, and that town in which money can be obtained easily by its enterprising citizens is the town which flourishes."

TO SAY the least, New York City politics are decidedly mixed, and it will be strange if some democratic voters do not vote for republicans, and *vice versa*.

THE Citizen's Union of East Orange, is taking active part in politics this fall, with the chances greatly in favor of electing its ticket. Sytematic effort on this line will surely succeed over the average, political machine.

SHERIFF'S SALE,
IN CHANCERY OF NEW JERSEY.

Between Emma F. Hobbs, Complainant, and George M. Merrill et als, Defendants.—Fi. Fa, for sale of mortgaged premises.

By virtue of the above-stated writ of Fi. Fa., to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE SECOND (2) DAY OF NOVEMBER NEXT,

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit

All the following tract or parcel of land and premises hereinafter particularly described, situate, lying and being in the borough of North Plainfield, in the county of Somerset and State of New Jersey, bounded and described as follows, to wit:

Beginning at a stone in the middle of the road and Warren st. and corner of Isaac Manning's land; thence along the middle of Warren st. north (47¼) forty-seven and one-quarter degrees west two chains and eighty-four links to a stone, another of said Manning's corners; thence north (42½) forty-two and one-half degrees east ninety links to a stone in David Coon's corner; thence south 47¼° east two chains and eighty-four links to a stone in Pearl street; thence along said Pearl street south forty-two and one half degrees west ninety links to the point or place of beginning. Containing one-quarter of an acre of land, more or less. Being the same premises conveyed by Emma F. Gamberton, now Emma F. Hobbs, to George M. Merrill, by deed dated December 18, 1901.

he bloodhound will not tear or rend he object of its pursuit. On the con- ary, when it overtakes such object simply evinces joy and gladness. he bloodhound will follow the trail Indians, or any other living creature hich leaves a trail.

In size the bloodhound differs as reatly from the Cuban dog as it does appearance, disposition and intelli- ence. It stands from 22 to 25 inches gh at the shoulder and weighs from 0 to 100 pounds, while the Cuban og measures from 30 to 36 inches the shoulder and weighs from 0 to 200. I have heard of their eighing as much as 300 pounds. I an find no evidence to show that the loodhound was ever bred or used in for any purpose. They are rare in England, and this seems e when we consider their many rkable qualities. However, Ameri- fanciers are becoming impressed h the true value of the breed, and breeders as J. L. Winchell, of Fair en, Vt.; Dr. C. A. Lougest, of Bos- Col. Roger D. Williams, of Lex- Ky., and Dr. J. R. As for the rest the day in the weather market, it was generally quiet and Atlanta's part is accounted for in: "Tossed my out- ar connubial."—Atlanta Constitution.

Treatment of Whooping Cough.

Jacob Sobel gives the results of his experience with the paroxysms whooping cough treated by pulling the lower jaw downward and forward. Pulling the lower jaw downward and forward controls the paroxysms of whooping cough in most instances and most of the time. The method is usually more successful in older children than in younger ones and infants. In cases without a whoop the expiratory spasm with its asphyxia is generally overcome, and in those with a whoop the latter is prevented. It is as successful as any single drug, or even more so. Mothers should be instructed in its use, so that attacks, especially at night, might be arrested. The manipulation is harmless and painless. Its only contraindication is the presence of food in the mouth or esophagus. Patients thus treated are less likely to suffer from complications and sequelae than those treated only medicinally. It is advisable to try this method in other spasmodic coughs and laryngeal spasms.—New York Medical Record.

A Spartan Father.

Two young law students were summoned recently at Budapest for having fought a duel. One of them was prosecuted by his own father, who urged that as the object of the punishment was to prevent any recurrence of the offense, it ought to be as severe as possible. The magistrate approved of the father's argument, and condemned the young students each to two months' imprisonment.

NOTICE

Dr. G. D. Herring, Osteopath, has removed from 212 West Front street to suite 309, 10 and 11 Babcock building, where he will receive his patients in the future, and will welcome at all times others interested in the science of Osteopathy.

J. H. SNYDER,

Our Fire Reserves.

By J. P. Kimball.

ON March 1, 1900, the area of forest reserves, thirty-five in number, as officially stated, was 71,697 square miles, distributed in eleven States west of the 103d meridian. With the additions of 1902 by President Roosevelt in Wyoming and Montana, the area foots up at present to over 80,000 square miles, an area equal to the combined areas of the New England States together with the area of Maryland.

With the forest reserves of 1891 and 1897, 3332 square miles in area, the additions of 1901 by President Roosevelt inclose the Yellowstone National Park on all but the western side, constituting an expanse of over 9000 square miles in Wyoming and some 2200 in Montana. On January 29, 1903, the President, not yet satisfied with his startling additions of nearly 8000 square miles to the Yellowstone reserves, was further induced to sign a third proclamation within eight months, merging the Teton, Absaroka and Yellowstone forest reserves with additional territory of several hundred square miles yet uncomputed, all to be known as the Yellowstone Forest Reserve.—North American Review.

Life in Newfoundland

By Norman Duncan

GO, in Newfoundland—where, on some bleak stretches of coast, the potatoes are grown in imported English soil, where most gardens and some vineyards are made of earth scraped from the hollows of the hills, where 419 bushels of lean wheat are grown in a single year, and the production of beef-cattle is insignificant as compared with the production of babies—in such a land there is nothing for a young man to do but choose his rock, build his little cottage and his flake and his stage, marry a maid of the harbor when the spring wind stirs his blood, gather his potato patch, get a pig and a goat, and go fishing in his punt.

And they do fish, have always fished since 400 years ago the island was settled by adventurous Devon men, and must continue to fish to the end of time. Of a total male population of 100,000, which includes the city folk at St. John's and an amazing proportion of babies and tender lads, about 55,000 men and grown boys catch fish for a living. Out of a sea that is cold, rock-bound and swept by great winds they take every year, by hook and trap, more than 150,000,000 pounds of cod (dry), of which they consume one-fourth and sell the rest to the Catholic countries of the world for $4,450,000. This dried fish, some salmon, herring, lobsters, cod oil, whale oil, seal oil and skins (the value of the seal fishery is approximately $400,000 for a haul of about 275,000 seals), lumber ($15,000) and copper and iron ores ($900,000) comprise the articles of export; the articles of import include everything else.—World's Work.

Good and Bad Citizenship

By President Theodore Roosevelt

THE line of cleavage between good and bad citizenship lies, not between the man of wealth who acts squarely by his fellows and the man who seeks each day's wage by that day's work, wronging no one and doing his duty by his neighbor, nor yet does this line of cleavage divide the unscrupulous wealthy man who exploits others in his own interest from the demagogue, or from the sullen and envious being who wishes to attack all men of property, whether they do well or ill. On the contrary the line of cleavage between good citizenship and bad citizenship separates the rich man who does well from the rich man who does ill, the poor man of good conduct from the poor man of bad conduct. This line of cleavage lies at right angles to any such arbitrary line of division as that separating one class from another, one locality from another, or men with a certain degree of property from those of a less degree of property.

The good citizen is the man who, whatever his wealth or his poverty, strives manfully to do his duty to himself, to his family, to his neighbor, to the State; who is incapable of the baseness which manifests itself either in arrogance or in envy, but who, while demanding justice for himself is no less scrupulous to do justice to others. It is because the average American citizen, rich or poor, is of just this type that we have cause for our profound faith in the future of the republic.

Ours is a government of liberty, by, through and under the law. Lawlessness and connivance at law breaking—whether the law breaking take the form of a crime of greed and cunning or of a crime of violence—are destructive not only of order, but of the true liberties which can only come through order. If alive to their true interests rich and poor alike will set their faces like flint against the spirit which seeks personal advantage by overriding the laws, without regard to whether this spirit shows itself in the form of bodily violence by one set of men or in the form of vulpine cunning by another set of men.

Let the watchwords of all our people be the old familiar watchwords of honesty, decency, fair dealing and common sense. The qualities denoted by these words are essential to all of us, as we deal with the complex industrial problems of to-day, the problems affecting not merely the accumulation, but even more the wise distribution of wealth. We ask no man's permission when we require him to obey the law; neither the permission of the poor man, nor yet of the rich man. Least of all can the man of great wealth afford to break the law, even for his own financial advantage; for the law is his prop and support, and it is both foolish and profoundly unpatriotic for him to fail in giving hearty support to those who show that there is in very fact one law, and one law only, alike for the rich and the poor, for the great and the small.

What a Candle Teaches

By Frederick Breithut

GROUPS of facts are usually uninteresting. The human mind prefers to leave cold reality and to soar into the high regions of imagination and desire. But facts are the only true basis of real knowledge. There is no getting away from them. If they are neglected, no matter how beautifully we build on another foundation, our structure is doomed to collapse. Considering this, does it not seem rather surprising that facts are so frequently neglected?

You can get a man to read a dish-water novel or a piece of sentimental poetry with the greatest ease. But put a scientific book in his hands, a book which contains truth and real instruction, and if you can get your man to read more than the first page you are lucky. Even though this is the case, I want to ask you to consider a little problem with me, with a view to getting some facts—the problem of a burning candle.

A burning candle is a small gas factory. No matter in what state any material is, whether it is a solid like wax, or a liquid like kerosene, it must first be converted into a gas before we can have a flame. The only difference between a candle and a gas factory is that the gases of the candle are not made at a distance and conveyed by means of pipes to distant burners, but they are manufactured on the spot and consumed as fast as they are made.

Our ordinary candle is made of tallow, a solid which consists mainly of two substances, one of which is called carbon, the other hydrogen. The burning of the wick melts the tallow near it. This molten tallow is absorbed by the wick and carried to the flame. It is here that the liquid is changed into gases. The decomposition of the molten tallow yields acetylene gas, marsh gas and olefiant gas and these burn with a flame. By burning we mean that the carbon and hydrogen of these gases unite with the oxygen of the air with sufficient heat to make a flame.

Flames may be luminous, as the ordinary yellow gas flame, or non-luminous, as the bluish flame you get in your gas stove.

The ordinary gas flame is luminous because particles of carbon, set free by the burning, are made to glow. You can prove this statement by introducing a cold object, like a plate or saucer, into a candle flame. You will see a black deposit of soot. This soot is the carbon which has come from the acetylene gas. The great heat of the flame makes the finely divided carbon particles glow in the flame.

The light of the Welsbach incandescent light is due to the glowing of the incombustible materials of which mantles are made.

The understanding of so simple a thing as the light of a burning candle takes a little thought. It took hundreds of years of blundering theorizing before men really understood why a candle burns.

You may ask, "What difference does it make why a candle burns? The thing is that it does burn and we can use it to give us light whether we know the cause of the flame or not."

In the first place there would be sufficient satisfaction in knowing the true cause of a phenomenon to warrant years of thorough investigation even though there were no practical result. Truth is higher than utility.

But the understanding of the real cause of flame has led to very practical results.—New York Journal.

The Old Hand Organ.

The old hand organ in the street
Has not the gaudy gold and gilt
The new ones have—but, oh, the sweet
Old tunes it plays with limping lilt!
"The Harp That Once Through Tara's Halls,"
"Jim Crow" and "Annie Laurie," too—
And, answering its bugle calls,
The old times rise for me and you.

"Then You'll Remember Me," it plays—
And straight our memories go back
Through all the dead years' mellow haze,
With frequent pause along the track.
And then we see the grass-grown streets,
The orchards gleaming in the sun,
Where crooning bees seek out the sweets
And shadows o'er the grasses run.

We see the flash of merry eyes;—
We see the gleam of old-time smiles;
And, ere the old-time music dies,
We live again the old-time whiles.
We walk the pathway in the lane,
And day-dream as we used to then
For on the rippling old refrain
The old times come to life again.

Play! Old hand organ in the street!
Play every song we used to sing,
And let our hearts in cadence beat
With each glad memory they bring.
Play, in your halting, careless way,
The fine old tunes that softly tell
Of every God-made happy day
In those old times we love so well.
—W. D. Nesbit, in Baltimore American.

JOHN THOMAS

BY MARY GRACE HALPINE.

"IT will not be the least use for him to come, uncle, as I have firmly resolved not to marry a rich man! That is, one born such; if a man get his wealth by his own exertions, it is quite another thing."

"My dear," said Mr. Bagstock, rather dryly, "if you had said that you had resolved not to marry a man solely for his riches, I should call it a very sensible decision; but, as it is, I can't say a great deal for its wisdom or justice. I happen to know a number of most excellent men who have the misfortune to be rich, as well as some of quite the contrary description, who don't own a hundred dollars' worth of property, and never will."

"True, uncle; and I don't deny that there are many worthy people among our rich men. What I do say is that the sons of rich men are generally the most useless and worthless portion of the community. Just look around our own circle, for instance, and tell me if you can find one, cursed with a rich father, who is not utterly bankrupt in truth, energy, self-reliance; in fact, everything that constitutes true manly worth."

Kate Vernon's soft, dark eyes sparkled, and the rich color in her cheeks grew brighter as she uttered these words.

Mr. Bagstock smiled as he looked upon her glowing countenance.

"Unfortunately, there is too much truth in what you say, Kate. But, though right in theory, you are wrong in fact. John Armstrong has been brought up to work. His father put him in his counting-room as soon as he left school, giving him the duties and salary of the lowest clerk in it; and, though he was only promoted according merit, he worked himself up to the position of head-bookkeeper. Mr. Armstrong then took him into the firm, giving him a certain share of the profits. He is a young man of excellent principles."

"I certainly ought to know that, uncle," said Kate, turning her head away, with an impatient gesture; "I have had John Armstrong's manifold perfections dinned into my ears ever since I can remember. I am sorry that you have to go away at this time; but as Cousin Jane is with me, we shall get along very well, I dare say."

"I hope that you will not only receive him kindly, Kate, but do your best to make his visit pleasant; if not for his sake, out of respect to the memory of the father that so loved him. You know he has never seen you, and may regard the idea with as little favor as you seem to do."

On the evening of the same day on which the above conversation took place, John Armstrong sat alone in his counting-room. There was not a sound in the warehouse, so busy and active through the day; his clerks had all gone home, but he still lingered, though it was considerably past his usual hour for leaving.

He held a letter in his hand from Mr. Bagstock, stating "that his niece and ward, Kate Vernon, had now reached the age of eighteen, and, as it had been the wish of both his father and hers that their meeting should not take place before that time, he deemed it advisable, as an act of justice to both, that it should not be delayed further."

John Armstrong's brow wore a thoughtful and perplexed expression. He had loved and revered his father above all human beings, and felt how sacred was his dying wish that he would form the acquaintance of his friend's daughter before committing himself elsewhere. And yet his heart revolted at the thought of being thus fettered in regard to a step upon which his lifelong happiness depended.

Motherless and sisterless, his heart had often yearned for the joy, the sympathy only to be found in the companionship of a loved and loving wife, but he had been so often smiled upon by scheming mammas and ambitious daughters, whose only lure was the report of his great wealth, that he had grown a little cynical in regard to women. He wanted to be loved for himself alone—as what man does not?

"The rich merchant may be received gladly," he muttered, "but would John Armstrong's self meet with so much favor in her sight? Ah, well! we shall see."

* * * * * * *

"Mr. John Armstrong, I presume? Let me introduce you to my cousin, Miss Jane Dudley."

The stately stranger bowed profoundly, first to the fair speaker and then to her companion, whose lovely countenance looked still lovelier from the brighter blushes that mantled it as he fixed upon it his admiring gaze.

"I am sorry to undeceive you," he said, smiling, "but, unfortunately, I have no such claim upon your favor as that name should give. Unfortunately, in more senses than one," he added, gallantly, with another bow to Kate.

"My name is John Thomas," he continued, handing her a letter, "I am but an humble clerk in the establishment of which Mr. Armstrong is the head. He gave me this letter of introduction to you, and also commissioned me to express his regrets that the imperative claims of business should oblige him to postpone a few weeks the pleasure he has so long anticipated."

Miss Vernon seemed to take this announcement very coolly; but not so with her companion, whose eyes looked still brighter from the scorn that she made no effort to conceal.

"Mr. Armstrong seems to be entirely devoted to the art of money-getting," she said, with curling lip.

"Mr. Armstrong is as devoted to his business as his father was before him," was the rather grave response.

"Let us hope," he added, with another bow and smile, "that he will ere long find a more worthy object for his devotion."

The terms in which the letter of introduction spoke of its bearer insured him a very cordial reception, while his pleasing and gentlemanly manner soon placed him on a friendly footing with both ladies. But, though polite and attentive to his fair hostess, he seemed from the first to be instinctively drawn toward her cousin, Jane, who on her part, received his advances coyly indeed, but with evident pleasure.

Some pleasant weeks passed—weeks which flew all too swiftly to at least two of the trio, and with whom admiration ripened into friendship, and friendship into love.

One day, as the happy pair were seated quietly by themselves—Miss Vernon having considerately withdrawn into the back parlor—they caught a glimpse of Mr. Bagstock descending from a carriage at the door, whose return had not been expected until the week following; upon which Jane manifested considerably more agitation than her lover anticipated.

"Don't be alarmed, dearest," he whispered, pressing fondly the little trembling hand in his; "I will make it all right with your uncle."

"Yes, but, dear John," she said, hurriedly, "do please step into the back parlor, and let me explain matters to him a little before he sees you."

Somewhat reluctantly John obeyed, disappearing through the folding doors into the adjoining room just as Mr. Bagstock entered.

The customary greetings over, Mr. Bagstock regarded his niece with both a vexed and amused expression.

"So it seems it is you that has got the mitten," he said. "I had a letter from Mr. John Armstrong, declining the honor of your hand."

"If he had waited a few days he would have been spared the trouble," said the young lady, with a look of offended pride, "as I happen to have chosen for myself, as every one ought to have the privilege of doing."

"So has he, it seems. And of all women that it should be your Cousin Jane?"

"Cousin Jane! Why, where could he have seen her?"

"Why, here, to be sure. Hasn't he been visiting here the last three or four weeks?" returned Mr. Bagstock, staring.

"No, indeed, uncle. His high mightiness didn't consider me of sufficient importance to warrant his taking so much trouble! He sent one of his clerks, Mr. John Thomas, who, I do assure you, uncle, is a most agreeable and excellent young man——"

"Who can speak for himself," said the individual alluded to, walking out from the back parlor.

"Why, John, my dear boy, how do you do?" exclaimed Mr. Bagstock, shaking him cordially by the hand. "I didn't get your letter until yesterday."

"Are you acquainted with Mr. John Thomas?" said his niece, looking from one to the other with a bewildered air.

Mr. Bagstock now began to have an inkling of the truth.

"I am, or ought to be, well acquainted with John Thomas Armstrong!" he said, smiling.

"Forgive me this deception, dear Jenny," whispered John, as he drew the astonished girl to his side. "I wanted to be sure that my wife loved me for myself alone."

"There will have to be a mutual forgiveness," responded the laughing and blushing girl, as she raised her head from her lover's shoulder; "my name not being Jenny, but Kate! I, too, wanted to be sure of your love."

"I hope you are both satisfied," said Mr. Bagstock, as soon as his merriment would allow him to speak. "I am sure you ought to be."

Neither John or Kate made any verbal response to this, but they looked perfectly contented.

Kate married the rich merchant, John Armstrong, and the happy years that followed proved the wisdom of their choice; but she often declares "that the dearest and sweetest name to her is the one by which she first began to know and love him, that of John Thomas."—New York Weekly.

CHILDREN'S DEPARTMENT.

HEREDITY.

Little Willie is a wonder,
So his parents say.
Tries to stay awake all night
And wants to sleep all day.

Likes to exercise his lungs,
Whoop it up and squall;
Makes more noise than some folks do
At a game of ball.

Willie's brow is very high;
Willie's hair is thin;
Willie wants to be the boss
Of all his kith and kin.

Yet his father's very proud—
Proud as he can be—
As he murmurs, "Folks all say
That boy takes after me!"
—Washington Star.

CHARLES CARROLL'S BRAVERY.

There is one episode in history which made a great impression on me the first time I remember hearing about it, and that impression has not been lost or even become fainter in the years that have passed since.

It happened in July, 1776, when a group of men, the representatives of the American people, were gathered together about a table, signing their names to that great work known as the Declaration of Independence.

Among the last to come forward was a man from Maryland, and after writing his name, Charles Carroll, one of the others said to him, "If England ever gets us in her power we are sure to be hung as traitors. But there are other men in the colonies by the name of Charles Carroll, so you have more of a chance to escape."

For a moment there was silence, then Carroll picked up the pen and after his signature wrote the words: "Of Carrollton"—the only man in all those fifty-six to tell the name of the town in which he lived.

Other things, perhaps, of far more importance to the world have taken place than when Charles Carroll wrote the name of his town after his own, but the remembrance of his unselfishness and bravery will ever be treasured in my mind as an evidence of those qualities which I most admire.—St. Nicholas.

INDIAN LEMONADE.

The sumac shrubs, whose reddening foliage and pyramidal clusters of crimson fruit are a conspicuous feature along our country roadsides and in neglected fields in the late summer and throughout the autumn, have a Western cousin which goes by the unusual name of Indian lemonade. It is a sturdy looking bush, with stout, leathery leaves, resembling in texture those of the well-known India rubber plant of our homes, but smaller, and bears amid the foliage small clusters of flattish berries, which are coated with a sticky crimson skin. This covering is as sour as a lemon, and if some of the berries are allowed to soak awhile in a vessel of water the result is a very pleasant, thirst-quenching drink.

The Indians of the arid regions where this sumac grows discovered long ago that this, in default of ice, was a good way to make warm drinking water palatable, whence the popular name of the shrub and of the beverage. Children, with their omniverous appetite for wild provender, are fond of munching the ripe berries, though one would think the acid dose would make their little jaws ache beyond bearing.—Philadelphia Record.

A FISHING ADVENTURE.

Upon one occasion in Northern Michigan I was trout fishing in company with a veteran timber cruiser, a man who knew everything about the rough bush life. In time we reached a bend in the stream where a lot of small logs had jammed during the spring freshet. My comrade unconcernedly ventured upon the logs, and before I could follow by some mischance he stepped upon a loose one and instantly disappeared. Had I not been looking at him it is likely I should have imagined he had crossed and gone into the brush upon the further side. One log of all the mass was rolling and a hand showed at one side of it. To dart across and seize the hand occupied very few seconds, but to my horror I could not pull him up through the narrow space through which he had slipped. To set a foot upon the log either side the opening and shove with all strength was the only hope. For seconds I clung to the wrist and strained mightily. Slowly the logs separated and up he came till he was able to twist upon his stomach across a log. Half drowned as he was he had not lost his nerve. "Do—don't let 'em squeeze back on me!" he gasped, and a moment later he was on his feet. Most men would have weakened then, but he was iron. He had swallowed a lot of water, had been cheek by jowl with an awful death, yet he had no idea of proving false. The logs were slowly slipping further apart and I was standing like a certain large gentleman of Rhodes, and unable to stand much more spreading or to spring to either side, while of course to slip into the water meant to enter the trap he had just escaped. In a few seconds he seized my hand and one quick haul carried me to firm footing. The logs at once closed like a gigantic trap. When we reached solid ground my comrade almost collapsed, and for half an hour he was a very sick man. Later he said: "I held my breath as long as I could, calculatin' you might try to get me, an' pardner, I'll never forget that little turn. I reckon I was in a mighty tight place."—Edwin Sandys, in The World's Work.

THE GOLDSEEKER.

Half a dozen Mexican cowboys rode into Douglas, Ariz., having in charge a wild man whom they had captured in Sonora, twelve miles below Cos. The man's hair was long and disheveled, his eyes were set far back in his head and his clothes were torn into shreds. The cowboys came upon him in the mountains near a pool of water, and had great difficulty in capturing him. When he was finally caught with a lasso the cowboys bound him hand and foot, tied him on a horse and rode with him to Frontieras, where he was given food and clothing. Later the cowboys brought him to Douglas and turned him over to American authorities.

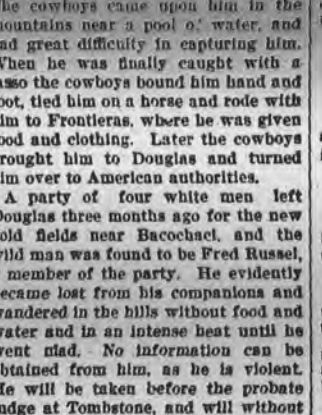
A party of four white men left Douglas three months ago for the new gold fields near Bacochael, and the wild man was found to be Fred Russel, a member of the party. He evidently became lost from his companions and wandered in the hills without food and water and in an intense heat until he went mad. No information can be obtained from him, as he is violent. He will be taken before the probate judge at Tombstone, and will without doubt be committed to the territorial insane asylum.—St. Louis Globe-Democrat.

BIG THINGS OF THE WEST.

In Southern California the vegetation is often remarkable for its size. At Santa Barbara is a grapevine which covers several hundred square feet, says the Scientific American, the vine itself resembling a tree, said to be the largest vine in the world, though this is open to doubt, for some of the old vines of Spain are of enormous size.

The Eastern heliotrope grows in the form of a vine reaching twenty feet upward, covering the fronts of houses, in some way resisting the frost if at all protected by overhanging roof. In the city of Pasadena a potato, which was trained to grow upon a trellis, assumed the form of a lusty vine over twelve feet high, producing an extraordinary number of potatoes.

Some of the photographs of fields of pumpkins taken in the fall in Southern California might well be considered open to suspicion, so numerous are the productions. One pumpkin exhibited in Los Angeles was so huge that a calf was held in the interior. Another colossal pumpkin raised in 1901 weighed two hundred and thirty pounds, and when dug out after the



SPECIMEN OF A CALIFORNIA PUMPKIN.

jack-o'-lanter fashion afforded a playhouse for the rancher's little daughter, if we may judge by the picture. In the old days California pears were famous all over the civilized world for their size, but to-day this reputation applies to all fruits. Strawberries grown there are sometimes so large that three or four would fill a plate. Sweet potatoes are often mammoth—four feet in length.

The School of Journalism.

As the profession of journalism now exists the code is somewhat of the Spartan. Enthusiastic aspirants flock to it and try to master it, but they are weeded out one by one in the workshop until only the newspaper men who were "born that way" remain. Perhaps the school of journalism can do that quicker. It may not require years of additional experience. The school may be a good test of a false start.—New York Commercial.

Pest of Woodchucks.

Woodchucks have been worrying the farmers of Gorham. One farmer found eighteen holes in his field, into which the pests disappeared when any one approached. The animal does great damage, having a special fondness for the growing bean pods, and they have been so numerous on Gorham farms that to attack them with gun and buckshot is about as effective as war against flies with a pea shooter. Some local genius has discovered a method of extermination that has won favor. Local powder dealers have been obliged to send out of town for their stocks of explosives, so great a demand for woodchuck that perchance there is a scarcity on the part of some of the powder sellers to make a liberal allowance of "empties." A bottle filled with lighted fuse placed into a woodchuck's hole is making by an explosion the end of Bulgaria the rodents. Farmers are adopting this idea with the other protests of Journal.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free. Dr. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa.

Work of Traction Plows.

The sixty-horse power traction engines used on Western ranches will pull simultaneously seventeen fourteen-inch plows plowing to sixty acres per day, or will plow, drill and harrow, all at one time, with properly arranged tools, from thirty-five to fifty acres per day.

$100 Reward, $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & Co., Toledo, O.

MISSES' BOX PLEATED COAT.

and are much worn by young girls. This one, designed by May Manton, is adapted to both the entire suit and the general wrap and to all the lighter weight materials in vogue, but, as illustrated, is made of pongee stitched with corticelli silk and trimmed with handsome buttons which are held by silk cords above the waist. The pleats give long lines which mean an effect of slenderness even while the coat is loose. The sleeves are the large and ample ones that slip on over the bodice with ease.

The coat is made with full length fronts and backs, and a skirt portion joined to them beneath the belt seams. The box pleats at the fronts are laid in, but those from the neck and at the back are applied. The neck is a flat collar and a detached belt is worn at the waist. The sleeves are pleated above the elbows, form full puffs below that point and are finished with roll-over flare cuffs.

The quantity of material required for the medium size is eight yards twenty-seven inches wide, seven and one-half yards thirty-two inches wide, or five and three-fourth yards forty-four inches wide, with eight and one-half yards twenty-one or five yards thirty-six inches wide for foundation.

they are becoming. The very charming model shown in the large drawing is adapted to all the season's materials and to variations of trimming that are very nearly without number, but in the case of the original is made of chiffon veiling in cream white with bands of antique lace as trimming.

The skirt consists of a foundation which is cut in five gores, the upper portion of the skirt and the two flounces.

Packing the Trunk.

Trimmed hats and starched blouses suffer greatly from packing. It is much better to pack the blouses rough-dry and have them got up when one arrives at one's destination. Hats can easily be packed before they are trimmed, with the ribbons which are to adorn them stowed away inside the crown. Linen collars can be packed very safely in the crown of a sailor hat, and this is one way of economizing space.

Tucked Blouse Waist.

Big round collars are much worn and are very generally becoming. The smart May Manton waist illustrated combines one of the sort with tucked fronts, that are exceedingly graceful, and can be made with tucked elbow or plain bishop sleeves. The model is made of mauve peau de cyuge stitched with corticelli silk, the trimming, shield and collar being of heavy applique in twine color, and is worn with a skirt of the same, but the design also suits the odd waist and all pretty, soft materials that can be tucked successfully are appropriate. When desired the shield and collar can be omitted and the neck worn slightly open.

The waist is made over a smoothly fitted lining that closes at the centre front. The back is plain, drawn down in gathers at the waist line, but the

WOMAN'S YOKE WAIST AND TRIPLE TUCKED SKIRT.

The medium size is six and one-fourth yards twenty-seven inches wide, three and three-fourth yards forty-four inches wide or three and one-fourth yards fifty-two inches wide.

A Feature of the Season.

Yoke waists of all sorts are among the features of the season and are made exceedingly attractive with trimming and contrasting material of various kinds. The stylish one designed by May Manton and depicted in the large drawing, is shown in pale pink crepe de Chine with yoke and trimming made of bands of pink silk held by fancy stitches, but the design is suited to a variety of materials, silk and light weight wools and to the many cotton and linen fabrics. Lace insertion can be substituted for the silk of the yoke, or bands of material feather stitched, or any yoking material can be used.

The waist consists of a fitted lining on which the front and backs are arranged. The yoke is separate and joined to the waist at its lower edge. Both front and backs are tucked at their upper portions, but the backs are drawn down smoothly, while the front blouses slightly over the belt. The sleeves suggest the Hungarian style, and are made with snug fitting upper portions to which the full sleeves are attached.

The quantity of material required for the medium size is four yards twenty-one inches wide, three and one-fourth yards twenty-seven inches wide, two and one-half yards thirty-two inches wide, or one and seven-eighth yards forty-four inches wide, with seven yards of banding to make as illustrated and five-eighth yards of material eighteen inches wide for yoke and collar.

Triple skirts are much in vogue and are exceedingly graceful and attractive when worn by the women to whom fronts are tucked for a few inches below their upper edges and form soft folds over the bust. The neck is finished with the big collar which laps over with the waist to close invisibly at the left of centre. The shield is separate and is arranged over the lining, beneath the waist. The tucked sleeves are eminently graceful and form frills below the elbows, but the bishop sleeves are plain, gathered into straight cuffs.

The quantity of material required for the medium size is four and one-fourth yards twenty-one inches wide, four and one-fourth yards twenty-seven inches wide or two and three-eighth yards forty-four inches wide,

WOMAN'S TUCKED WAIST.

with three-eighth yards of all-over lace for collar and shield and two and three-fourth yards of applique to trim as illustrated.

The error of an astronomical chronometer is rarely greater than two one-hundredths of a second.

A SERMON FOR SUNDAY

A DISCOURSE ON "THE GROUND OF CHRISTIAN CERTAINTY."

The Rev. Reginald John Campbell Tells in Beautiful Language of the Assurances of Divine Mercy Which Buoy the Hearts of Believers.

OCEAN GROVE, N. J.—Nearly 10,000 people filled the Auditorium here Sunday morning to listen to the Rev. Reginald John Campbell, pastor of the City Temple, London. His subject was "The Ground of Christian Certainty." He said:

My text, or rather, my two texts, will be found, one in the third chapter and fourteenth verse and the other in the fourth chapter and nineteenth verse of the First Epistle of St. John: "We know that we have passed from death unto life, because we love the brethren. He that loveth not his brother abideth for death." "We love Him because He first loved us."

The thought is not one of simple gratitude. The text teaches us that the power of loving comes from the fact that God is love. The writer of the fourth gospel, whether he was or was not the Apostle John, was probably one of the greatest theologians that ever lived, because his spiritual insight is so profound, and the inwardness of his master mind so complete. The writer of the Fourth Gospel is plainly the writer of these epistles. He was undoubtedly John the Divine. He never refers to himself by name, but only as the disciple whom Jesus loved. None of us would be willing to spare out of our Christian experience the fourteenth chapter of St. John. In this the disciple sets forth what we believe to be the profoundest and most beautiful truth concerning the relationship of the sanctified soul to the Redeemer. What a beautiful phrase is this: "The disciple whom Jesus loved." This man of wonderful ability, who remembers all that Jesus said and writes it down for our benefit. By that he did not mean that he was the only disciple whom Jesus loved, but he meant to say that he got his own spiritual experience from the same foundation that we get ours.

There are signs in the New Testament that the disciple whom Jesus loved was at one time a passionate, ambitious man. Mark that occasion when James and John were called the Sons of Thunder; when they came to Christ and said, "Master, shall we command fire to come down from heaven and consume these adversaries; yours and ours?" And Christ replied, "Ye know not yet what spirit ye are of."

Again, the mother of James and John comes to the Master and says, "Master, grant that these, my two sons, may sit the one on Thy right hand and the other on Thy left when Thou comest into Thy kingdom." She thought, and they thought, and they all thought that the kingdom was to be an earthly one; that Christ was to grasp the sceptre of the Caesars and rule over the world, and that those who stood nearest Him would occupy the places of greatest honor in His kingdom. Without rebuking them the Master turned to the two men and said: "Are you able to drink of the cup whereof I shall drink, and to be baptized with the baptism whereof I am baptized?" And they answered eagerly and with confidence, "We are." Then said the Master, "Ye shall indeed drink of My cup, and be baptized with the baptism whereof I am baptized."

The other disciples were much displeased with James and John. They could have spared themselves the trouble. The Master knew at once—coming as a Master of the truth He very well knew—what was in their hearts. The one was seeking the crown that was corruptible, and that fadeth away; the other was to live in history as the apostle of love. What a long way John must have traveled before this passionate, ambitious man was able to deserve this title, "the Apostle of Love." John gave the greater part of his young life to the preaching of the gospel of love. Toward the close of that long and wonderful career the beloved disciple was carried one Sunday morning to the congregation of the faithful. It was his last appearance at any earthly gathering. His parting benediction to the little flock comes down to us through the history of the ages: "Little children, love one another."

We know that often the words of our text were on the lips of the Apostle John: "We know that we have passed from death unto life, because we love the brethren." And again, the higher experience which makes possible the other, "we love the brethren because Christ first loved us."

This is not the only experience of the kind. Some of you might be inclined to say: "This is all well enough in its place to talk about the Apostle John as being the apostle of love." But we are not John. There are some other people who deserve the title. What about Peter, the impulsive fisherman? Peter was undoubtedly impulsive and selfish and not without his ambition, too. Listen to the conversation in the upper room, after the Master has performed the foot washing He begins to prepare His disciples for His coming in. He says: "Ye shall all be confounded because of Me this night." And Peter replies: "Though all should betray Thee, yet will not I." What he meant to say was this: "You have made a great deal of this man, who is allowed to lie on Your breast. Perhaps if a crisis came he might not be as much use as I would. If these should betray Thee, yet will not I." The time came when John admitted Peter to Pilate's hall. John stood silently by, ready perhaps to die for his Master. Peter was hiding somewhere in terror because of the Jews and Christ was dying. And then after the resurrection Christ came to him in secret. Peter wept out his penitence and the Master lifted him up again. Three times he was asked, "Simon, Simon, son of Jonas, lovest thou Me?" Peter answered, "Lord, Thou knowest that I love Thee." The last time, grieved because of the question, he replied, with deep emotion, expressive only of the love in his heart, "Lord, Thou knowest all things, Thou knowest that I love Thee." When was given to this fisherman the grand promise, "Ye are of Christ." And the answer of Christ was, "If I will that ye strive and achieve and he stand and wait, what is that to thee, follow thou Me." These two men, not long since rivals, came together to witness for the Master. Peter does the talking and John is silent. Both are prepared to suffer in the name of Jesus Christ of Nazareth.

The grand certainty in the heart of every one of these men was that they had passed from death unto life, through being made capable of loving. And they were capable of loving because they loved the brethren. Now, brethren, in every age, since John wrote these words for us, the same thing has held true. The ground of Christian certainty has been—through the love of God. There is no other ground of certainty to-day.

And the witness of the spirit is seen in nothing more than this: that those who are the sons of God show it in their demeanor.

The love of Jesus, what it is, none but His loved ones know, and your American Whittier, writing yesterday, as it were, says for us this morning: "Immortal love forever; full forever, flowing free."

But, brethren, John Wesley was one of the greatest preachers the world has ever known; the greatest preacher of the cross since the Apostle Peter. There never was a man fuller of love for the Master, fuller of inspiration than John Wesley. How is it with Methodism to-day? We will make the question bigger. How is it with the church of Christ to-day? What is our answer to be? To-day I notice, or seem to notice, two tendencies at work in the world. By the world I mean the world as you and I know it—the English speaking world. One tendency the new, eager and ever wistful doubt in Jesus Christ, the Christ that was; on the other hand, a disposition to question the Gospel of Jesus and suggest that even He Himself might have been wrong.

On this side of the water is a well-known writer, Dr. Sheldon, who has given us a book which has been sold on my side of the water, entitled, "What Would Jesus Do?" I have known many men in London who would not enter a church nor read a religious book, but were drawn to this work, not because it was cleverly written, but on account of the words on the title page, "What Would Jesus Do?" I have heard Christ cheered in a workingmen's meeting because He was referred to as the first great Socialist, also referred to as an example in economics.

In our literature of to-day there is wistful emphasis laid upon the meaning of Christ. But admiration for Jesus stands higher than mere adoration, but admiration is not adoration. Men might say all these about the Christ and yet misjudge what the Christ meant to bring to the hearts of men. Men are questioning the assurance of the love of God. Where shall we look for certainty if not to Jesus?

There is an optimism in American character which tends toward contentment with this present world. I have remarked it in my travels from east to west. A readiness to take things as they come and be satisfied with them.

In this assembly, as large as it is, a holiday assembly, too, there are undoubtedly men who have some great sorrow, and there are times when many of us have felt some great sorrow. I have found here and there we come across silent men, who have been beaten in the battle of life, and who have no part in this general optimism.

The world as God has made it is one of beauty. This morning, for example, the sun is shining around us everywhere; we are glad to meet its beams; the very brightness affects our spirit, and helps us to look forward with hope into the future. But do you realize that there is a tragedy under every green leaf? Hear the waves breaking upon the seashore! Do you realize that the smiling sea surrounding us yesterday strangled some mother's son? Here are we meeting in brightness and gladness. Do you realize that the same sun shining upon us is taking the life of some one in some part of this continent to-day?

Have you never felt, brethren, some time that you could improve on life if you had the power that is in the hands of God?

"Oh, love, could you and I with Him conspire,
To grasp this sorry scheme of things entire;
Would not we shatter it to bits—and then
Re-mold it nearer to the heart's desire."

It is because of this mood that I have found in America and England that people have asked the question, How shall we be sure of God? Where is spiritual certainty? One man once said to me, "If you were master of the community, I think I could trust you. I don't think you could wish me harm. Can't you make me sure of the love of God. Oh, make me sure of the victory of Christ!"

Now, brethren, listen to me; first of all, clear the ground by this reflection, that the only real communion, the only spiritual experience that is worth having is not that which can be set forth in terms of mind; it is not that which can be demonstrated by figures, and you will have to begin where they did—in the upper room. A man must find Christ for himself. Your soul should be the reflection of the mind of the Master. The only real communion, even here, is that which cannot be demonstrated.

For example, suppose the bishop, here, was called to his reward, and while I am speaking to you some one should say, "He is gone." But all that you can now see, his venerable body, would still be here, and yet you would say, "He is gone." Yes, it would be his soul that had gone to make perfect the union with Christ.

Brethren, take the Christ out of my spiritual firmament and the world would be dark and cold to me. There never was a time when the world's people were in such demand of a Christ as to-day. No, never! If you could take the Christ out of history, if you could suppose the world to be as it is men would still be asking for some one to save them, and the conquering love would be craved for by them, even if they did not know it.

Now, brethren, let us go back to the Christ by all means, but let it be the Christ of experience, not simply the Christ of history. Christ went away to come nearer. He went to His own and He never left them.

It is by no means God's purpose that any man should remain in the house of mourning. On the throne of the universe sits one with the heart of a child. No stranger cries but whose voice is heard by the One whom Paul preached, whom John loved the same, who in the far off days of Galilee walked upon the hillsides doing good. He is on the throne now.

Mr. Moody once told a story in England concerning the first evangelical mission there. He was asked to call upon a poor man in Dundee who had been bedridden for a long time. Mr. Moody went to take a blessing, but instead got one. The man had been standing under the blessing of Calvary; it was no shock to him to be told that the world seemed to be upside down, and the man would have had a poor time of it if they had spoken to him of his sufferings. When Mr. Moody left the chamber he said: "I guess when the angels pass over Dundee, they will stop at that house for refreshments." Do you see, brethren? Do you see?

Men like Peter and John who have been admitted to the fellowship of the cross do not doubt the love of God. Peace and pain, joy and sorrow, are not exclusive. The latter prepares the way for the former.

I once heard "Gypsy" Smith tell a story about his own little sons who had played truant, and in trying to be stern he had sent them to bed, and they were not to have any supper, if you please. He passed the rest of the evening listening about listening and wondering what the effect of the punishment would be. Finally, not hearing any sound, he made his way to the bed chamber. As he leaned over the bed one of the little fellows said, "Is that you, father?" I just went for him and drew him in and the little fellow sobbed out, "Father, will you forgive me?" "Yes, my son; yes, yes, I will forgive you, for I love you." "Then, father, take me down to supper." We know the great Father because we have looked into the face of the Son.

The Life That Counts.

The life that counts is a life on a high level, yet full of helpful healing sympathy for all life on its lowest levels. It is the first debt which we owe to our fellow men in this age. The man who has faith accepts the uncertainty of life as the consequence of its larger significance; he cannot interpret it, because it means so much; he cannot trace its lines through to the end, because it has no end; it runs into God's eternity. Something better is coming out of it than worldly fame or wealth or power. He is not making himself. God is making him, and that after a model which eye hath not seen. He can toil away at his work, not knowing whether he is to see its results now or not, but knowing that God will not let it be wasted. There is a satisfaction in being appreciated, in feeling that others acknowledge our worth or our power, and in gaining that praise from the world that is food to so many of us. But the man or woman whose lives are not on the highest plane are those who take on their burdens without flinching, or without prospect of reward, who do not look for the plaudits of pit and gallery, are unconcerned as to the audience so long as they play their part well, and in faith and patience, live the life where they belong even though their heavens fall.—Annie L. Jack.

The mind will be like the stuff it feeds on.—United Presbyterian.

Teaching Poll Parrots to Speak.

The strangest school in the world has been established in Philadelphia by a woman. It is a school where parrots are taught to speak by means of the phonograph, which is a new method only recently adopted by the founder of the school, Mrs. Jacob Hope. The old way of teaching parrots is tedious and unsatisfactory. The tutor, crouched in a corner out of sight of the bird, repeats to it, over and over, thousands of times, the same word, the same phrase, till his back aches from his cramped and still position and till his voice cracks and gives out. The new way of teaching these birds to talk is pleasant and wonderfully successful. The tutor sets his phonograph going at the parrot's ear, and then retires to read or to look after other business. His phonograph, while he rests, works for him. With a precision and perseverance that he could never equal it drums into the brain of the bird the sentence that is to be learned. This sentence the parrot acquires much more quickly and much more thoroughly by the new way than by the old.

The term at the Philadelphia phonograph school of languages for parrots lasts six months. The tuition fee is $40 a term, and the school has at present twenty pupils.—W. B. Trites, in Leslie's Weekly.

Costly Impoliteness.

It pays to be polite, and sometimes impoliteness is rather expensive. The smoke from a gas and electric plant in San Francisco annoyed Claus Spreckels, the sugar king. He complained to the President of the company, politely requesting an abatement of the nuisance. The President responded curtly and hinted that Mr. Spreckels should "chase himself." The sugar king, at an expense of $4,000,000, started a rival gas and electric company, and brought down the price of these illuminants to one-quarter what they had been. Then the President begged for quarter, and Spreckels sold his plant to the penitent company for $5,000,000. The sugar king cleared $2,000,000 by the transaction, and the company had to pay $5,000,000 for the impoliteness of its officer.

Speed of Motor Cars in France.

In consequence of the reckless driving of motor cars through villages many of the local mayors issued orders prescribing speeds of only six or eight kilometres an hour within certain bounds. These restrictions have been brought to the notice of the Prime Minister, who has just issued a circular to the Prefects, in which he says that, while he quite agrees that the speed of motor cars should be limited in places where there is considerable traffic, he does not think it equitable that the cars, which are so easily handled and pulled up, should be required to travel at a less speed than horse-drawn vehicles. He consequently invites the Prefects to see that the action of the local mayors is not vexatious and beyond the real requirements of public security, as it is necessary that hostility should not be shown toward the new means of locomotion, which is destined to render great services, and with which the public will gradually become familiarized.—Paris Correspondence in London Standard.

200,000 Kisses.

"Kissing the Book" is a practice which shows no sign of losing its popularity. Witnesses have enjoyed for several years the statutory right of being sworn in the Scottish fashion, but extremely few exercise it, despite the frequent objection urged against kissing the book on sanitary grounds. A witness in the Newcastle County Court has contrived to adhere to the practice, while showing his appreciation of the grounds on which doctors have condemned it. Immediately he stepped into the witness box he produced a Testament from his pocket to be sworn on. This precaution was at once commended by Judge Greenwell, who remarked that he himself would not kiss one of the court Testaments for £1000. In a court in another part of the country a Testament has been so long in use that it is calculated that over 200,000 persons have kissed it. The officers are said to have made this interesting calculation known to the world with feelings of peculiar pride.—London Globe.

Good Navy Marksmanship.

An interesting illustration of the excellent marksmanship of Uncle Sam's men behind the guns, as developed during the recent inspection trip of the naval committeemen on the U. S. S. Dolphin, has just come to light. Representative Roberts of Massachusetts was on the party. Approaching Gunner's Mate Speer of the ship, Mr. Roberts offered him a dollar to hit a sea gull. Speer took a forty-pound six-millimetre Colt's automatic gun, and after a trial shot he popped a sea gull on the fly at 400 yards. One of the Representatives was firm in his declaration that the shot was an accidental one, whereupon Speer shot another sea gull at 350 yards. The crowd of astonished witnesses to the feat finally came to the conclusion that Speer was the crack shot of the ship. This Speer modestly disclaimed, saying, "We've a shipload of 'em, sir." Speer got his dollar.—Washington Evening Star.

Even the sculptor may not cut much of a figure in society. N.Y.—10

WORN OUT, DRAGGED OUT,

Are Most Women in Summer —Pe-ru-na is a Tonic of Efficiency.

Mrs. Tressie Nelson.

JOSEPHINE MORRIS, 236 Carroll St., Brooklyn, N. Y., writes:

"Peruna is a fine medicine to take any time of the year, but I have found it especially helpful to withstand the wear and tear of the hot weather. I have taken it now for two summers, and feel that it has kept my system free from malaria, and also kept me from having that worn-out, dragged-out look which so many women have.

"I therefore have no hesitancy in saying that I think it is the finest tonic in the world."—Josephine Morris.

Peruna is frequently used as a mitigation of the effects of hot weather. What a bath is to the skin, Peruna is to the mucous membranes. Bathing keeps the skin healthy, Peruna makes the mucous membranes clean and healthy. With the skin and mucous membranes in good working order, hot weather can be withstood with very little suffering.

Frequent bathing with an occasional use of Peruna is sure to mitigate the horrors of hot weather. Many ladies have discovered that the depression of hot weather and the rigors they have been in the habit of attributing to malaria quickly disappear when they use Peruna. This is why Peruna is so popular with them. Peruna provides clean mucous membranes, and the clean mucous membranes do the rest.

If you do not derive prompt and satisfactory results from the use of Peruna write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

Mrs. Tressie Nelson, 422 Broad St., Nashville, Tenn., writes:

"As Peruna has done me a world of good, I feel in duty bound to tell of it, in hopes that it may meet the eye of some woman who has suffered as I have.

"For five years I really did not know what a perfectly well day was, and if I did not have headache, I had backache or a pain somewhere and really life was not worth the effort I made to keep going.

"A good friend advised me to use Peruna and I was glad to try anything, and I am very pleased to say that six bottles made a new woman of me and I have no more pains and life looks bright again."—Mrs. Tressie Nelson.

Canaries as Featherless Bipeds.

A canary breeder has two young birds, now about six weeks old, whose bodies are entirely destitute of feathers or down of any kind, with the exception of the quills on wings and tails. The skin is perfectly smooth, with no sign whatever of feathers to come.—Nature Notes.

Typhoid Fever.

The average mortality from typhoid fever is three times as great in American as in European cities. The cities in the United States which suffer most from the disease are Washington, Chicago, Boston, Philadelphia and Providence, in that order.

Older Than Solomon's Temple.

It is not generally realized that when Solomon erected his temple a thousand years before Christ, Americans in Peru were building their tremendous "structures to the glory of a creator god." Yet this is the conclusion toward which our archaeological researches in South America now point. Professor Max Uhle, of the University of California, writes in Harper's Magazine of the slow but effective processes by which these records have been unearthed, revealing city buried beneath city, as each new period of culture succeeded its predecessor. The article is illustrated by curious pictures of early pottery and of significant ruins.

STRAIGHT TO THE SPOT

Aching backs are eased. Hip, back, and loin pains overcome. Swelling of the limbs, rheumatism, and dropsy signs vanish.

They correct urine with brick-dust sediment, high colored, excessive, pain in passing, dribbling, frequency. Doan's Kidney Pills dissolve and remove calculi and gravel. Relieve heart palpitation, sleeplessness, headache, nervousness.

TELL CITY, IND.—I received the free trial of Doan's Kidney Pills. They are splendid. I had an awful pain in my back; on taking the pills the pain left me right away and I feel like a new man.—Stephen Schaefer.

Mrs. ADDIE ANDREWS, R. F. D. No. 1, BRODHEAD, WIS., writes: I received the free trial of Doan's Kidney Pills with much benefit. My little nephew was suffering terribly with kidney trouble from scarlet fever. Two doctors failed to help him and he finally went into spasms. His father gave him Doan's Kidney Pills and from the second dose the pain was less. He began to gain and is to-day a well boy, his life saved by Doan's Kidney Pills.

RUDDLES MILLS, KY.—I received the free trial of pills. They did me great good. I had bladder trouble, compelling me to get up often during night. Now I sleep well; no pain in neck of bladder; pain in back is gone, also headache.—JNO. L. HILL.

MEDICAL ADVICE FREE.

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the family bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

LAZY LIVER

"I find Cascarets so good that I would not be without them. I was troubled a great deal with torpid liver and headache. Now since taking Cascarets (candy Cathartic) I feel very much better. I shall certainly recommend them to my friends as the best medicine I have ever seen."
Anna Bazinet, Osborn Mill No. 2, Fall River, Mass.

on Charles Q. Wyckoff.

Charles C. Kemp, forging the name of W. H. Cawley to a check.

Charles C. Kemp, embezzlement of funds of the Credit Adjustment Company.

Theodore Lynch, carnal abuse of Lillie Wyman.

William Beuder, carnal abuse of Lillie Wyman.

Paul Leko, assault and battery on Lena Woxa.

Harry F. Hayes breaking jail.

The court was occupied last Thursday and Friday with the cases on the Supreme and Circuit Court lists.

The case of John Grogan v. Alvah Gray was an action for trespass and right of way over the plaintiff's lands. A verdict was rendered for the defendant.

The suit of Reuben J. Southwick against Alonzo DeCamp for $200 on contract, related to a bill for plumbing. The jury rendered a verdict of $181.40 for Southwick.

In the case of John Mair, of Plainfield, against Ernest T. Hand and Irving Hand, proprietors of the Netherwood brickyard, the plaintiff sought to recover $1,000 damages for an alleged injury to his property near the brick yard.

It was shown that Peter Robinson, a garbage collector had leased the property in question from Mair as a dumping ground. Robinson sold the garbage on the grounds to the Hands to be carted away as fertilizer. Mr. Mair claimed that the defendants had taken many loads of good soil away with the garbage and damage his property to the extent of $1,000. A number of witnesses testified that the lot had been ploughed and damaged.

Counselor Swackhammer, for the defense, declared that the lot was valued at less than $1,900, and that the Board of Health had condemned the dump. He contended that the defendants had greatly benefitted the property by removing the garbage and contaminated soil. After five minutes deliberation the jury rendered a verdict for the defendants.

The court adjourned on Monday until October 5, when the case of Gilbert A. Van Doren against The Middlesex and Somerset Traction Company is set for trial. Van Doren seeks to recover $1000 damages from the Traction Company for being ejected from a trolley car in the township of Bridgewater because he refused to pay two fares between the corporation lines of Bound Brook and Somerville.

The court expects to clear the calendar of civil cases by October 7, when it will take up the criminal cases.

There Will be no Strike

By a large majority vote of the trolley employees it was decided yesterday afternoon not to strike.

Mr. Kirch's New Location.

William H. Kirch, the contractor, carpenter and builder of 66 Duer street, has opened offices at 148 East Fifth street, and now includes in his business, steam and hot-water heating, plumbing, tining and roofing. Mr. Kirch recommends the Richmond boilers—"Heaters that Heat," and invites all who contemplate building or reconstructing to get an estimate from him. He has the contract for the extensive re-modeling of the Hill & Snupp store.

After thirty years the last toll road in Monmouth county has been made free, the transfer of the Highlands and Sea bright Turnpike Company to the Board of Chosen Freeholders having been made last week at Pleasure Bay. The turnpike company gets $4,250 for the two-mile stretch, which cost $5,000 to build in 1873 and in 1880, an additional $9,000 to rebuild. Of the amount paid, the county of Monmouth pays $3,000, and the balance was raised by the cottagers and residents.

A Sensitive Man.

"Ah! good morning," said a well-known gentleman, addressing a man whom he met in the street.

"How are you, colonel?"

"Look here," the first speaker, after a short pause continued, "every day I discover additional evidences of that you do not like me. Why is it?"

"Do you mean why you discover the evidences or why I do not like you?"

"Why you do not like me of course."

"Well, in the first place, you are such an outrageous liar."

"Yes."

"And, in the second place, it has been proved that you are a thief."

"Well," said the colonel "I merely wanted to know, and it strikes me that your reasons are very good. I am a sensitive man, and it nettles me to think that any one dislikes me without a cause. I am glad you have expressed yourself so clearly."—Tit-Bits.

Translated.

"I heard her boasting that her dinner party was a success from the beginning, and ended with the greatest 'eclaw.' What's 'eclaw,' anyway?"

"Why—er—that was the dessert, of course. Didn't you ever eat a 'chocolate eclaw'?"—Philadelphia Press.

LEGAL NOTICES

SPECIAL ELECTION
—ON—
Constitutional Amendments.

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or voting Precinct in the County of Somerset, must meet on

TUESDAY, SEPT. 15, 1903,

from one to nine o'clock p. m., at such places as may be designated by the Township Clerks of the respective townships of said county, for the purpose of making, altering and revising, as the case may require, the registry of voters entitled to vote in their several districts or voting precincts for use at the special election to be held on *Tuesday, September 22, 1903, as required by* an act entitled, "An act to provide for submitting proposed amendments to the Constitution of this State to the people thereof," approved April 8, 1903.

Special Election
SEPTEMBER 22, 1903.

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHURTS,
CHARLES H. BATEMAN.

Election Notice!

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the County of Somerset will hold their first meeting on

TUESDAY, SEPT. 1, 1903.

At 10 o'clock in the morning, at such places as may be designated by the Township Clerks of the respective townships of said county. Such boards shall organize according to law and then proceed to ascertain the names and residences of all the legal voters in their respective districts, by making actual inquiry at every dwelling house or habitation, or of the head of every family residing therein, and shall continue such enumeration of voters from day to day, on successive days, completing same on or before Friday, Sept. 4. (Sec. 20 Election Law.)

SECOND MEETING
AND PRIMARY ELECTION

Said Boards of Registry and Election will also meet on

TUESDAY, SEPT. 8, 1903,

At the same places from 1 until 9 p. m. for the purpose of transcribing and making up from its canvass books two lists of all persons entitled to vote in its election District, who shall personally appear before the board for that purpose or be shown to its satisfaction by the affidavit in writing of some voter in the election district to be a legal voter therein.

On the same day between 1 and 9 o'clock p.m., the Primary Election shall be held in every election district in the County of Somerset.

THIRD and FINAL MEETING.

Said Boards of Registry and Election will also meet on

TUESDAY, OCT. 27, 1903,

At the same places, and between the hours of 1 p. m. and 9 p. m. for the purpose of revising and correcting the Original Registers, and for adding thereto the names of all persons entitled to the right of suffrage in such Election District at the next election.

Notice is hereby given to all Boards of Registry and Election in the County of Somerset that they are required to strictly observe Sections 24 and 32 of "An Act to Regulate Elections (Revision of 1898) approved April 4, 1898, and that the County Board of Elections will be in session in Somerville on

Wednesday, Oct. 28, 1903,

For the purpose of receiving the registers and receipting for affidavits, etc.

General Election Nov. 3, 1903

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman.
J. H. MATTISON, Secretary.
JACOB SHURTS,
CHARLES H. BATEMAN.

A young couple called at Justice Hand's office the other day evidently with the desire to be made one, but after asking the price and learning that no trading stamps were thrown in, the couple left, saying they would call again. The Justice says he has laid up some trading stamps in case the couple return.

Rev. John Sheridan Zelie, pastor of the Crescent Avenue Presbyterian Church will speak and the choir of the Crescent Avenue Church will render vocal selections at the Y. M. C. A. meeting on Sunday afternoon at 4 o'clock.

Parties favoring the REVIEW with communications or reading notices should always sign their name—not for publication, but for identification. Several news items were sent to the office this week which would have been published had they been signed.

The following officers at the Park Club of this borough were elected at its annual meeting last Tuesday evening: President, Samuel St. John McCutchen; vice-president, George T. Rogers; secretary, Allen B. Laing; treasurer, Nelson A. Miller. E. H. Ladd, Jr., Henry A. McGee and Joseph Yerkes were chosen members of the board of governors.

Arrangements have been made for the formal installation of Rev. John Sheridan Zelie, as pastor of the Crescent Avenue Presbyterian Church, Plainfield. The service will take place Thursday evening, October 15. Rev. A. V. V Raymond, of Schenectady, N. Y., will deliver the charge to Mr. Zelie, while Rev. W. R. Richards, of the Brick Church, New York, will deliver the charge to the congregation. The sermon will be preached by Rev. Dr. Mott, of Elizabeth.

The Somerset County Board of Freeholders will meet at Somerville, Tuesday.

The new patrol wagon for Plainfield arrived Wednesday. Presents a neat appearance with its red wheels and dark blue body and brass trimings.

John C. Van Horn, aged seventy-seven years, died at the home of his son Sutphen W. Van Horn, of Summit avenue, this borough, yesterday morning. Arrangements for funeral not yet completed.

The Mayor in Role of Policeman.

Mayor N. B. Smalley, of this borough, according to report has appeared in a new role this week by arresting a man who was found ransacking bureau drawers shortly after noon Thursday in the home of T. N. Dudley, of Sycamore avenue, this borough. When the man endeavored to escape the servants ran out of the house and called for help. The Mayor who lives only a few doors away heard the screams and responded by collaring the man and placing him in the lock-up.

Convention of Firemen.

The New Jersey State Firemen's Benevolent Association met in annual convention at Atlantic City last Monday. Delegates were present from Trenton, Newark, Jersey City, Hoboken, Paterson Camden, Plainfield, Atlantic City, Orange East Orange and Elizabeth. Besides the delegates there were about 200 visiting firemen.

Pearson—Arthur Marriage.

Miss Helen H. Arthur, of Grandview avenue, this borough, and William E. Pearson, of West Third street, Plainfield, were married at the parsonage of the M. E. Church, Dunellen, last Saturday night, by Rev. N. J. Sproul.

Mr. and Mrs. Pearson went immediately after their marriage to the new home which had been previously built and furnished for them on West Third street.

...man—Beekman Marriage.

...rriage of Miss Maggie Van ...ckers, of Clinton avenue and ...ay Beekman, of East Third street, took place last Wednesday night at the home of the bride's mother.

Rev. Garrett Beekman, of Boston, uncle of the groom and Rev. John McMurray, pastor of Monroe Avenue M. E. Church, officiated at the marriage ceremony.

The wedded couple will reside in Plainfield upon their return from the bridal trip.

Vars—Titsworth.

Miss Mildred Titsworth, daughter of Mr. and Mrs. Louis T. Titsworth, of Dunellen, and Alexander Wilson Vars, of Plainfield, were married at the home of the bride's parents last Tuesday afternoon. Rev. L. E. Livermore, pastor of the Seventh Day Baptist Church, of New Market, officiated. Miss Grace Hildebrand, of Lebanon, was maid of honor, and Ralph B. Titsworth, of Dunellen, a brother of the bride, best man. Charles M. Titsworth and Ferdinand Titsworth were the ushers. After a reception, Mr. and Mrs. Vars left for a Southern trip. Upon their return they will reside in Plainfield.

Northrop-Arnett.

At Lambertville one of the largest weddings in many years took place Wednesday evening at the Centenary M. E. Church, when Miss Reba Arnett, daughter of Mr. and Mrs. George W. Arnett, became the bride of Hart John Northrop, of Plainfield, chief clerk to the superintendent of the New Jersey Central Railroad. The ceremony was performed by Rev. Sherman G. Pitt, pastor of the church. The best man was John Turnbull Minugh, of Jersey City. The maid of honor was Miss Minerva Bamstead of Trenton. The bridesmaids were Miss Olevia Silvers, Miss Matilda Akers, Miss Blanche Finger and Miss Lara Gordon, all of Lambertville. Miss Mildred Hazen Marparum was flower girl. The ushers were Frank Arnett Hazen, of Lambertville, cousin of the bride; Fred Howell, of Trenton; D. Hunt Fiscer, of Philadelphia, and Ralph N. Crystie, of Jersey City.

Mr. and Mrs. Northrop will reside in Plainfield upon their return next week from their wedding trip.

I. C. T. Club Reception.

The I. C. T. Club of Plainfield held a reception being the initial one of the season on Thursday, Oct. 1st. About a hundred and fifty guest were present from Plainfield, Elizabeth Roselle, Newark, New York, and Brooklyn. The music was furnished by Prof. Suhr's Imperial Orchestra. The committee in charge of the affair consted of Leonce Texier, Chairman; J. Willian Waters, Joseph Robinson, Arthur Caleu, and C. H. Bilyeu.

HEAVIEST RAINFALL IN MANY YEARS.

Great Damage all Over State and Especially at Elizabeth, Paterson, Newark & Nearby Points.

The heaviest rainfall of which the local weather bureaus have any record has been in progress since Thursday, and up to 6 o'clock Friday afternoon more than 12 inches of water has fallen.

Railroad and trolley service is badly crippled, and between Elizabeth and Plainfield the trolley line is tied up. In Plainfield the local trolley lines are still in service, but the cars are run very infrequently.

While no great damage has been reported here, fears are entertained, that the dams nearby may break at any time, and cause much damage.

Paterson is again flooded by the breaking of the Pompton Lake dam, and several have been reported drowned thereby Over $100,000 damages have been caused on account of this accident. Many persons have been made homeless and others are living in the second stories of their houses. The town of Pompton is under water.

Bridges in many portions of the State have been swept away.

At Elizabeth the water is up to the second story of many of the houses and streets are flooded. Boats are seen in many of the streets.

Victims of Westfield Wreck Awarded $3,000

In the suit of Allison M. Line and his daughter, Miss Emma Line, of Plainfield against the Philadelphia and Reading Railroad for injuries received in the Westfield wreck last January, the hearing of which took place last Thursday at Elizabeth, the jury awarded Mr. Line $2500 and Miss Emma Line $500.

Mrs. Pittis at Rest.

The funeral services over the remains of Mrs. Henrietta Pittis were held from the home of her son, Dr. Albert Pittis, of ... morning.

Rev. Dr. Rodman, rector emeritus of Grace Episcopal Church, Plainfield, officiated. Interment was made in Greenwood Cemetery, Brooklyn.

Hard Winter Predicted.

Nuts of all kinds give promise of being very abundant this year. Seldom has there ever been a time when the crop generally was so great. Chestnuts, walnuts, hickory nuts, and butternuts are all plentiful. According to old weather-wise folk this means a hard winter.

Vital Statistics of Borough for Past Year

The monthly meeting of the North Plainfield Board of Health was held last Monday evening.

Among other matters of interest which came before the meeting was the annual report by the Secretary, Rev. W. E. Honeyman, of the vital statistics, covering period of October 1, 1902, to October 1, 1903, as follows:

104 births, 34 marriages, 73 deaths.

15 died of consumption, 8 of heart disease, 7 of pneumonia, 6 of cancer.

One of the deceased was 95 years old. 8 men over 80, 13 over 70; 6 over 60, 11 between 50 and 60.

Only 12 children died under 5 years, 1 between 5 and 10 and but 14 all told died under 21.

27 cases of contagious diseases as follows: diphtheria 15, scarlet fever 3, typhoid fever 4, membranous croup 2, measles 3.

7 permits were granted for removal of bodies from North Plainfield cemetery to be reburied elsewhere.

Annual Meeting of Union County Temperance Women.

The nineteenth annual convention of the Union County Woman's Christian Temperance Union, was held in the Park M. E. Church, Elizabeth, Thursday. Many members were present from Plainfield. The following county officers were elected: President, Mrs. T. H. Tomlinson, Plainfield. corresponding secretary, Mrs. M. L. Rarick, Dunellen; recording secretary, Mrs. G. M. Mosher, Westfield; treasurer, Mrs. Mary T. Cox, Cranford. Honorary vice presidents: Mrs. Scriven Stoddard and Miss Julia A. Barker.

Devoe on Winter Weather.

"Prof." Devoe, the Hackensack weather prophet, says that "New York and New Jersey, especially and near the coast, will have a warm fall and early winter, with a dry October and a wet November. Thanksgiving month promises to be characterized by the unusual phenomenon of severe thundershowers.

"December will show a falling temperature but it will not be sufficiently cold to please ice farmers or skaters. In fact my calculations cut out heavy snows and material ice formations until March. I don't believe there will be any ice stored hereabouts until that month, when the severest cold will prevail for some days, if not weeks.

"Last year my prediction of a warm March was fully verified, and you will find that just the opposite weather conditions will prevail next March. There are not likely to be many heavy wind storms this winter, but carry your umbrellas pretty constantly, for rains will be numerous."

Independent Fife and Drum Corps Fair.

The sixth annual fair of the Independent Fife and Drum Corps of Plainfield will be held in Saengerbund Hall during the week of Oct. 12. The organization hopes to eclipse its phenomenal success of last season. Prof. Suhr's Orchestra, which was so popular at the fair held last year, has been engaged to furnish the music for this one also. The committee in charge consists of S. C. Terry, Chairman, D. V. Force, Secretary, J. V. Beekman, Treasurer, J. H. Adams, Nelson Peterson, H. G. Adams, Geo. Herman, F. W. March, F. L. Manchester, M. H. Brokaw.

LIBERTY CORNER.

Miss Lizzie Mitchell, of Elizabeth, is visiting at the home of Mr. ... H. Nuse.

Miss Minnie Wienken has returned home after spending several weeks among friends in Jersey City.

Mrs. C. C. Acken has returned home after visiting friends in Rahway.

Mrs. Kreth, of Brooklyn, N. Y., is visiting at the home of T. C. Wienkens.

Mrs. Elias Condit, of West Orange and Mrs. Samuel Condit, of Orange are guests at the parsonage.

Miss Bella Lockwood and Mrs. H. B. Rommel visited friends in Jersey City this week.

Mr. Tallman, of Rutherford, called on friends in this place.

Fred Hightman, of New York City is visiting at F. C. Wienkens.

Rev. C. B. Condit attended the meeting of Presbytery at ... Mrs. ... Van Cleaton, of Metuchen, are visiting friends at Millington and Liberty Corner.

State Endeavor Session in Orange.

In point of attendance, it is expected that the forthcoming State convention of Christain Endeavor Societies of New Jersey will be unprecedented. The sessions will be held in the First Presbyterian Church, Orange, Thursday and Friday, October 15 and 16, and for the first time arangements have been made with Trunk Line Association for a rate of one fare and a third to delegates. Over 300 tickets of this character have already been issued. In addition to this, for the reduced rate applies only where the single fare is at least seventy-five cents, There will be hundreds of Endeavors from Essex and Hudson counties. A notable list of speakers has been secured, including Rev. Dr. Francis E. Clark, of Boston, president of the United Society. Simultaneous meetings will be held both nights of the convention in the First Church and in Central Presbyterian Church.

House Robbed and Barn Burned.

Fire destroyed the barn on the farm of John N. Stiger, of Whitehouse early Sunday morning. Just a week before thieves entered the farmhouse and stole $1,300. The robbery and the fire are laid to the tramps who follow the lines of the Central Railroad of New Jersey.

The loss by the fire is more than $5,000. Three thousand pounds of wool in one of the buildings was destroyed. All the farm machinery and the gathered crops, a horse, several cows and a number of sheep perished. Mr. Stiger carried some insurance.

Conducted Banking Business Under Building and Loan Charter.

John W. Newbury and Rudolph Newmann, president and secretary—treasurer of the Mercantile Building and Loan Association of Freehold and Red Bank, who were convicted two weeks ago of having illegally conducting a banking business under the charter of a building and loan association, were sentenced last Tuesday—Newbury to a fine of $1000 and three years and six months in State Prison at hard labor, while Newman's sentence was $500.

The amount of surety required for the release of the men pending appeal was $5,000 for Newbury and $1,000 for Newman. Henry Kunsman, of Wallingford, offered as surety property in New Jersey which was refused. Kunsman then said owned property in New York valued at $100,000. Justice Fort declared that Monmouth County property was desired, and the surety was refused. Newbury and Newman went to jail.

BOROUGH HIGH SCHOOL MENACED

Would Rob the Borough of its Excellent High School and Undo the Work of Years.

At a meeting of the North Plainfield Board of Education on Monday evening a good deal of breeze was stirred up by what seemed on its face a harmless enough resolution, but which was intended, no doubt, to be an opening wedge again into that old and supposed-to-be-dead question about consolidation with Plainfield.

The Board met in special session to consider a scheme for a new school building, but decided to delay action on it until the regular meeting on October 26th, because Mr. Betts, the Assistant State Superintendent of Public Instruction, sent a letter to the Board advising that delay be held until the Legislature met next Thursday and framed a new school law. The Board thought it might avoid difficulty about bonds if no plans were matured until the next meeting.

As soon as this postponement of action was agreed to unanimously, James R. Joy, President of the Board, sprung a resolution in the shape of a letter directed to the Plainfield Board of Education in these words:

"To Board of Education, Plainfield:

"Your preparations to enlarge the facilities for High School instruction in Plainfield prompt us to address you in a matter of common concern.

"The policy of duplicating accommodations, efforts and expense by maintaining a separate High School organization in North Plainfield has frequently been questioned, but up to the present time no other course has been open to us. We would now, however, respectfully invite you to make a proposition offering a practicable basis for a union of the two High Schools. Inasmuch as such an arrangement, if consummated, would relieve our pressing needs for a new ... building.

As soon as the Clerk read the resolution, Mr. Valiant moved that it be adopted and the letter sent, and Mr. Woodruff seconded it. Mr. Valiant said that the time had come when a "Greater Plainfield" should be looked after in educational matters.

A. V. D. Honeyman took the resolution in hand, read it carefully and said that he was surprised that it should be sprung at this juncture. Continuing he said: "To attempt to remove the High School away from the Borough without consulting the taxpayers themselves, who have not been apprised of any such movement is an outrage on the community. The educational facilities of North Plainfield have been made so good by the expenditure of much money and with the hearty co-operation of the people themselves, that it is a matter of local pride to every taxpayer. Our High School is a part of our public wealth. This resolution is the entering wedge to tear down the system and send the children, who desire an education above the grammar grades, adrift. It means the breaking up of a system that everybody ought to preserve, and especially this Board of Education. For one, I will never cast a vote to do this thing, either to break up the school or to make an attempt to break it up, unless I know it is the wish of the community to do it. That wish does not exist. It is a purpose boding no good to the schools or the public. The resolution should be buried deeply, and cannot be done too quickly."

Mr. Valiant said he supported the resolution because he thought it was in the interest of the taxpayers. He had figured out the cost of maintaining the High School pupils at the Plainfield School and he thought it would about equal the cost of maintaining our own school. "Then," said he, "we get rid of building more school buildings, as the rooms occupied by the High School here can be utilized there. At all events let's see what we can do."

Mr. Honeyman responded at length, denying the correctness of the figures that would save money to North Plainfield. He had himself gone over them last Spring and the difference in North Plainfield's favor, by maintaining its own High School, was, as he recollected, some $3,000, which would more than pay the interest on a new school building to be erected right at our doors. But continued Mr. Honeyman, "suppose it should cost the same amount, or less, to the public, to send the children a mile and a half away from the present school in order to get an education, who is to be benefited except Plainfield, who gets the money for the tuition? No parent here will be benefitted. On the contrary, it means three miles extra walking every school day for every High School pupil, and, when the weather is bad, car fares every day each way. It cannot be possible that parents want to turn their backs upon a fine institution now in their midst and send their children to the corner of Arlington avenue and Ninth street, in the hope that it might easily reduce the taxes."

Mr. Burtis said the proposition did not strike him favorably. It was as much as saying that we could not take care of ourselves and had to depend on strangers. He believed in maintaining a good school. (Nevertheless, Mr. Burtis afterward voted for the resolution).

Mr. Joy said that he did not know how practicable the resolution was; Plainfield might turn it down, or make no proposition we could accept. But was there harm in seeing what they would do? Other towns with as small a population as this had only one High School, and why not this community?

Mr. Valiant said Baltimore had one large High School building, and if that did there, why could it not do here? For himself he thought there was nothing in the idea that a long walk to a High School was objectionable: when he was a boy he used to walk a mile or two to school and it didn't hurt him. The Plainfield school would have greater facilities, perhaps, than ours to educate well, and, if so, why not take advantage of it?

Mr. Fountain opposed the resolution on the ground that the children would have a long walk to reach the Plainfield High School and the great expense in time and money to get to and from there.

Dr. J. H. Cooley said the proposition, if intended to relieve the situation as to new school building here, did not meet the case. Already there is need for four new rooms for outside classes. In two years' time, which is the quickest the change could be effected and the two High Schools made one, all the six rooms to be vacated in the North Plainfield building would be filled. It did not provide for future growth here, and buildings would be needed. In the meantime, the work of putting up the needed school house for future outside classes is post-... A Overton ... the views of Dr. Cooley, and thought a building ought to be put up now. He said he would oppose the resolution.

Mr. Honeyman asked Mr. Valiant if he contemplated legislative action to consolidate school districts or otherwise assist his plan.

Mr. Joy answered and said that he understood none would be needed.

Mr. Honeyman then asked Mr. Joy if he contemplated going into a such a scheme without a public vote. Mr. Joy's answer was: "We have the *right* to, yes; but I might have my own views as to the policy of carrying such a plan into effect without a vote. But suppose Plainfield would do it gratuitously: would Mr. Honeyman then object?"

"That is not supposable," said Mr. Honeyman.

After a half hour's further warm discussion, in which, however, everybody kept his temper well in hand, the ayes and nays were called for and the vote was recorded as follows:

Ayes—Joy, Valiant, Burtis, Woodruff.

Nays—Honeyman, Overton, Cooley, Fountain. The motion was, therefore, declared lost.

Mr. Valiant asked permission to change his vote to "No," as he wished to bring the matter up again.

Negroes Colonizing in Southern Jersey

The great success of the Russian Hebrew colony of Woodbine, founded by Baron de Hirsch, has recently attracted another colony founder to Cape May county—former Representative White, of North Carolina, a negro. The new colony is in the lower end of the county on a tract of 3,500 acres. Already many negro families from Virginia and North Carolina have settled there. The town of Whitesboro has been laid out on a plot of 500 acres. In close proximity are half a dozen seashore resorts, where the negro farmers will find a ready market for their produce.

The founder will allow only the better class of Southern negroes to join the colony. He has agents in the Southern States offering farms to good and competent farmers on most liberal terms.

The land has been laid out in farms of ten, twenty and fifty acres. The soil is unusually fertile and yielded abundant crops to the pioneers this year.

About January 1 thirty families will arrive from Charlotte, N. C. Whitesboro lies along the line of the Pennsylvania and Reading systems. Many who become residents of the town will find employment in the summer months at Cape May, Holly Beach, Wildwood, Angleses, Sea Isle City and Ocean City.

Several canning factories will be built and thousands of dollars will be expended in making the new colony a success.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

An apple bough in full bloom was cut from the orchard of Matthias T. Welsh, at German Valley, last Saturday.

Mrs. Silas Neighbour, of German Valley, has a jar of peaches which she canned forty-one years ago, and which are in a good state of preservation.

It is said that out of fourteen public schools in Lebanon township five are still closed. The Board of Education has been unable this year to secure sufficient teachers to fill the schools.

Master George Brewer, of Grover, is the owner of a cat that in many respects resembles a gray squirrel. The hair on the back and shape of tail being exact counterparts. He has been offered a handsome sum for it, but refuses to part with it at any price.

A man on a run away bicycle at New Brunswick Tuesday, created a sensation by running plumb into a large plate window, smashing a hole in the glass big enough for a horse to walk through. The man's skull was badly fractured and his recovery is doubtful.

Lorenze Hogate, of Salem, sixty three years old, who for two years has been suffering with progressive paralysis, pulled a needle out of his right leg just above his ankle. Hogate was a butcher up to the time of his illness, and has no recollection of the needle entering his body, but felt it going through his stomach about two years ago, and then down through his leg. He attributes his present condition to the sewing implement. The point of the needle was bent, otherwise it was in a good state of preservation.

... panions, last week Edward ..., ... 5 years, of 124 St. Paul's avenue, Jersey City was seized, bound to a stake and a fire started at his feet. His clothes caught fire from the flames, and he was soon writhing in horrible agony. His frightened companions screamed for aid when they realized the serious consequences of their play, and a passer-by cut down the victim and had him conveyed to his home. His injuries were severe, but not of a serious nature. He will be swathed in cotton and plastered with oil for a few days before he can leave his bed.

Presence of mind saved Edward H. Radel, of New Brunswick from a ducking in the Raritan River and possibly serious injury. He was fishing last Saturday above the five-mile dam, which is near his summer home. Mr. Radel became so interested in the sport he forgot to watch the boat, and it soon was drifting toward the dam. As it was swept along he suddenly realized his perilous position. The boat was drifting along sideways, and he hurriedly swung it around with the bow straight for the dam. He went over the dam and took the drop of ten feet in good style, and the boat went through the rapids with a rush. Had he hesitated a moment he would have been thrown into the swift current and probably badly hurt in the rapids, which flow over a lot of rocks.

Baptists Holding Three Day Session at Somerville.

The Central New Jersey Baptist Association opened a three day session commencing Thursday at Somerville. The session is in commemoration of the seventy-fifth anniversary of the association's existence. A large number of ministers and laymen were present, notwithstanding the unusually hard rain-fall of Thursday and Friday. But as the Baptists are good water-proof people this causes no surprise.

Annual Convention of Sunday School Association.

The twenty-third annual convention of the Union County Sunday School Association met in the First Presbyterian Church, Cranford last Thursday.

Among the many interesting addresses and discussions on topics of interest, a number of Plainfield ladies were represented.

The officers of the association are: President, Rev. G. M. Shott, Scotch Plains; vice presidents, Rev. Henry Hale Sleeper, Elizabeth and E. L. Taylor, Westfield; secretary and treasurer, Richard P. Greaves, Westfield; recording secretary, Rev. W. B. Hamilton, Elizabeth; home department superintendent, William S. Webb, Westfield; primary and junior department, Miss Edith Cairns, Plainfield.

DEATH IN TORNADO'S FURY

Widespread Loss of Life and Property in the West.

BUSY TOWN NEARLY WIPED OUT

The Village of St. Charles, Minn., Laid Waste—Business Section Ruined and Nearly 100 Dwellings Torn to Pieces—Much Damage Was Done Elsewhere and Many Persons Were Injured.

Milwaukee, Wis.—The story of a terrific storm sweeping across the State from the Mississippi to Lake Michigan, carrying death and destruction in its wake, is told by the dispatches which come from almost every city. Twelve were killed and a score or more injured.

The worst of the storm was felt at St. Charles, Minn., just across the Wisconsin line, which was almost completely wiped out with a record of seven killed and twenty-eight injured, many seriously.

The dead are: John Hebens, Sr.; William Hebens, his son; Will Adams, Oscar Crittenden, George Jesson, Ed Murphy, Ed Peters, of Dover, Minn.

The entire main street of the town was literally wiped out, hardly a business place being left standing. Forty-two residences were destroyed, and the total property damage is estimated at $100,000. Among the buildings demolished were the Central School Building, the Chicago Great Western Depot, the Catholic church and Parrott's Wagon Works.

At 2.30 p. m. the storm cloud was seen approaching from the southwest, and there was an immediate scramble for places of safety. The tornado struck the town from the southwest quarter and made a clean sweep through it following almost entirely the line of the main street and devastating buildings on each side. Then the residences further back from the business centre were struck and many of them blown completely away.

It seems almost miraculous that there was not a greater loss of life. Four of those killed were in John Eben's saloon when it collapsed, and they were buried beneath the wreckage. Two others were in a dry goods store which was blown away, and they were killed by the falling walls. E. Peters, of Dover, was killed in the wreck of a hotel. The telephone exchange was demolished, and two of the girls were seriously injured.

The storm came upon the town with such suddenness that it was filling the air with debris of buildings before the citizens realized the nature of the [illegible] were caught beneath the [illegible] their business houses or remained pinioned down [illegible] the relief party.

[illegible] however, seems to have [illegible] dwellings, [illegible] to human [illegible] ported from several points in that locality.

At Almond, near Waupaca, three were killed, and at Blain, Wis., in the same district, two others met death. Wisconsin was not alone in feeling the effects of the storm, for the wind swept the upper peninsula of Michigan, also doing considerable damage there. The dead at Almond and Blain are: Albert Holtz, Almond; Mrs. Holtz, John Holtz, aged fifteen years; Abram Johnson and Mrs. Johnson.

The storm at Almond came unexpectedly. The day had been muggy, but a sudden shift of the wind was followed by a tornado, which tore down a dozen houses in various parts of Waupaca County.

The home of Holtz was destroyed, and all three occupants are dead. At Blain, in addition to the dead, Samuel Ericson was found in the ruins of his home, fatally hurt. Robert Mank was found with his back broken.

At Oshkosh the greatest trouble was due to falling electric light wires. Two men were struck and badly burned. At Baraboo the Baraboo River rose above its banks and flooded the business part of the city in a short time.

At Houghton and Marquette, Mich., the storm blew in the plate glass windows and the hail did damage. Several were injured at Independence, Wis., and the entire town was left in darkness by the burning of the electric light plant, due to lightning.

One man was killed and twelve were injured in Independence, where the property loss is $100,000.

In Racine, Carl Larson was struck by a falling electric light wire and killed.

MISS RUTH BRYAN WEDDED.

She Was Married on the Day After She Became of Age.

Lincoln, Neb.—Miss Ruth Baird Bryan, daughter of William J. Bryan, became the wife of William Hofner Leavitt, an artist, of Newport, R. I., at Fairview, the country home of the bride's parents.

The bride was unattended and her father did not give her away. She was attired in a traveling gown of brown zibeline, with a hat to match.

Shortly after the ceremony the bride and bridegroom started on a tour of the South and East. Their romance dates back five months, when Mr. Leavitt, who is the bride's senior by fourteen years, came to Lincoln to paint Mr. Bryan's portrait. Her parents thought Miss Bryan too young to marry, and she fixed her wedding date for one day after she became eighteen.

EXPLOSION KILLS FOUR MEN.

Steam Cooker Blows Up in Peoria Distillery With Deadly Results.

Peoria, Ill.—By the explosion of a steam cooker in the plant of the Corning Distilling Company four men were killed and one man was seriously injured.

The dead, who all were workmen in the distillery, are Neill Powell, assistant engineer; James McManus, James O'Keefe, and George Schaffer. Five men were badly scalded and bruised.

PERISH ON LAKE STEAMER

Captain Bravely Meets Death While Trying to Save Women.

Squall Strikes the E. L. Hackley on Lake Michigan and She Turns Over—Passengers and Crew Drown.

Sturgeon Bay, Wis.—The little steamboat Erie L. Hackley, with passengers and crew to the number of twenty-one on board, went down in a squall in Green Bay. Twelve persons, including three women, were drowned. The nine others, eight men and one woman, were saved by a passing vessel, but not until 8 a. m. next day, after a night of such suffering that several of them are at the point of death.

The Lost—Lawrence Barringer, Fish Creek, Wis.; Edna Barringer, sister of L. Barringer; Frank Fitzgibbons, Jacksonport, Wis.; Carl Kelly, Fish Creek; George Le Clair, Jr., Jacksonport, brother-in-law to the Barringers; Nels Nilson, Sturgeon Bay, Wis.; Joseph V. Orus, Fish Creek, captain of the Hackley; Henry Rabitoy, Fish Creek; Freeman Thorp, Fish Creek; ——Truchay, cook, Fish Creek; Miss Frances Vincent, Egg Harbor, Wis.; Miss Vincent, sister of Miss Frances Vincent.

Although the Hackney was a small vessel, with a limited passenger list, the experience of those who rode with her in the storm that swept her to destruction was as thrilling as in any greater disaster of the sea. The boat left Menominee, Mich., soon after 5 o'clock p. m., bound for Fish Creek. She had proceeded out only about seven miles when she was overwhelmed by a terrific squall from out of the southwest.

Angry seas crashed over the little vessel, threatening to engulf her, and Captain Orus decided to turn about and try to make the port she had just left. In bringing the Hackley about she fell into the trough of the sea, from which she could not get out. The captain threw the wheel hard down to port and then to starboard, working like mad to make the boat obey the rudder, but without avail.

As the vessel was thrown up and down in the deep gulf of waters some of the freight shifted to one side. Immediately the vessel listed and filled with water, then plunged to the bottom, going down within two minutes of the sliding over of the freight.

As the vessel sank the upper works and part of the main deck were torn off, carrying with them most of the passengers and crew. Several of the passengers were so terrified that they were unable to help themselves, and these were instantly drowned.

In the two brief moments before the Hackley took her last plunge efforts were made by some of the more self-possessed to unlash the life [illegible] before one of them could be put over the side the workers were struggling in the water. As the vessel settled men and women cried and shrieked in an agony of fear and ran about [illegible] and helpless. If the [illegible] saved.

All night long those who had succeeded in getting hold of wreckage clung to their frail support, but one after another succumbed and sank beneath the waves.

After fourteen hours of buffeting about in the storm Captain Asa Johnson, of the steamboat Sheboygan, from Washington Harbor, to Sturgeon Bay, discovered the wreckage, with the imperiled passengers and crew at 8 o'clock next morning.

Boats were immediately lowered, and the now nearly exhausted persons on the wreckage were transferred to the Sheboygan, though the rescues were made with the greatest difficulty in the furious sea.

POSTAGE ON CREMATED BODIES.

Department Rules They Shall Be Classed as Merchandise and Pay Regular Rate.

Washington, D. C.—Third Assistant Postmaster-General Madden received a request for information as to the postage rates on cremated bodies. Mr. Madden, after due deliberation, prepared a ruling to the effect that cremated bodies should be classed as merchandise, and should pay the regular rate of one cent for four ounces.

As a result of his decision four air-tight tin canisters, containing the cremated remains of a family, shipped from New York to San Francisco, were forwarded from the Washington post-office, where they had been held up pending a determination of the postage rates for the journey.

HARMONY COTTON MILLS CLOSE.

7500 Employes Out of Work, as the Supply of Cotton is Exhausted.

By the closing of the Harmony Mills, of Cohoes, N. Y., 7500 employes are out of work. The company says that its supply of cotton is exhausted. This is a great surprise, since only a short time ago an officer of the company said that it was fully protected against any possibility of a shortage, having a long term contract with a cotton grower. The company, however, found it profitable to sell from its supply, relying on a break in the market to secure cotton for its own needs. The market holding has forced the shutdown. A prolonged stoppage will cause hardship.

Gossip Caused Her Death.

"I do find that deceased, Elizabeth Brenneman, came to her death from hemorrhage caused by cutting her throat with suicidal intent, caused by despondency, the result of gossip," was the finding of Coroner Lepper, of Tiffin, Ohio, sitting on the case of Elizabeth Brenneman, who ended her life after learning of the reports circulated by her neighbors about her.

Suicide Left $10,000 to Brother.

John A. Paul, of Sanquoit, N. Y., is $10,000 richer by the suicide of his brother, George F. Paul, formerly of Sanquoit, who killed himself by leaping into the Missouri River at Omaha, Neb. The dead man left a will giving all his property to his brother.

England and the Tariff.

Prime Minister Balfour, at Sheffield, said that England must have a tariff, to protect her against the competition of other nations as well as her own colonies.

POSTAL SCANDAL CLIMAX

Senator Green, Former Postmaster Tyner and Nephew Barrett Involved.

THIRTEEN INDICTMENTS FOUND

Thousands of Dollars Paid Them by Bond Investment Companies to Prevent Exclusion From the Mails—James T. Metcalf, Harry C. Hallenbeck, Norman R. Metcalf and W. D. Doremus Indicted.

Washington, D. C.—The climax of the postal scandal came a few days ago, when James Noble Tyner, who for thirty-nine years has been prominent in the service of the Government and was formerly Postmaster-General of the United States, was indicted by the Grand Jury for conspiracy to defraud the Government he had served so long. Seventy-seven years old, stricken with paralysis, disgraced by summary dismissal from the honorable place of Assistant Attorney General for the Postoffice Department, Tyner was indicted, and at a hearing held at his house gave bail in $5000. Three indictments were found against Tyner and his nephew and former assistant in the Postoffice Department, Harrison J. Barrett, each charging them with conspiracy to defraud the Government, and two more have been returned against Barrett, charging him with receiving fees for services rendered or to be rendered in cases pending before him as an officer of the Government.

In addition to Tyner and Barrett James T. Metcalf, his son, Norman R. Metcalf, and H. C. Hallenbeck, of the Wynkoop-Hallenbeck-Crawford Company, of New York, have been indicted in connection with the contract for printing money order blanks which that company held for a long time.

An indictment against W. D. Doremus, another against State Senator George E. Green and George W. Beavers, a new indictment against W. Scott Towers and George W. Beavers and another against August W. Machen make up the list of those returned by the Grand Jury and complete the first phase of the postoffice investigation, no further indictments being expected from the data now in hand.

The Tyner and Barrett indictments present the most sensational feature of the entire investigation, and the one which baffled the postal inspectors longest. The case, as finally ferreted out by Inspectors Vickery and Fulton, presents a remarkable story of malfeasance.

It is charged that it was the duty of Tyner and Barrett—Assistant Attorney General and Assistant Attorney for the Postoffice Department [illegible] the [illegible] charges with [illegible] to report to the Postmaster General [illegible] and the issue of a fraud [illegible] fitness of the [illegible] company and learned in [illegible] all carry [illegible] but that instead of reporting to the Postmaster General the issue of an order that would prevent the delivery of mail or the payment of money orders to those concerns and would thus break up their business, Tyner and Barrett conspired to give them unobstructed use of mails in order that Barrett might profit thereby.

TWO CHUMS KILL THEMSELVES.

Officials Believe the Pair Planned to Die Together.

Indianapolis, Ind.—By shooting through the head, George B. Williamson, of Chicago, and Marvin Welch, of Janesville, Wis., clerks in the auditor's department of the Central Union Telephone Company, committed suicide. The two were brought here from Chicago four months ago, and were close friends. They killed themselves at their separate boarding houses. Officials believe the two planned the double suicide.

Political Paragraphs.

Rhode Island Democrats nominated the following State ticket: For Governor, L. F. C. Garvin; Lieutenant-Governor, Adelard Archambault; Secretary of State, J. J. Gilmartin; Attorney-General C. A. Aldrich; General Treasurer, Clark Potter.

The Democrats in Massachusetts renominated W. A. Gaston for Governor and named Richard Olney second for Lieutenant-Governor.

The Democratic City Convention in New York City nominated Congressman George B. McClellan for Mayor, Edward M. Grout for Controller, and Charles V. Fornes for President of the Board of Alderman.

Massachusetts Republicans renominated Governor John L. Bates and all the State officers on a platform declaring for Roosevelt and protection.

Die of Vaccination.

Two children died at Marion, Ind., as the result of vaccination. Laura McHugh, eleven years old, died of lockjaw. Physicians say that the tetanus bacillus was not in the virus used in the vaccination, but gained entrance through the open wound in the arm. Mark Hamaker, fourteen years old, died as a result of gangrene caused by vaccination.

Football Kills a Boy.

At Norwich, N. Y., as the result of an accident at football, Berkett Jeffrey, the thirteen-year-old son of Dr. Reuben Jeffrey, is dead.

Strike on in U. S. Capitol.

The fine marble partitions for the Senatorial bathroom and barber shop were being placed in position in the Capitol at Washington when three marble setters and three assistants went on a sympathetic strike with the cutters who are located out in the principal cities by the Association of Manufacturers. A member of the association has the contract to finish the the Senate toilet room with marble settings. It seems now the work cannot be completed before Congress meets.

USE DYNAMITE ON TRAINS

Northern Pacific the Victim of a Desperate Montana Gang.

[illegible] Demanded $50,000 [illegible] es, as They Threaten [illegible] If Not Paid.

Helena, Mont. [illegible] he failure of the officers of the Northern Pacific Railroad to meet the demands of the blackmailers who have been destroying its property with dynamite for the last few weeks was promptly met by the desperadoes when they planted dynamite at two points along the Northern Pacific lines [illegible] each case succeeded in partly destroying a train.

In expectation [illegible] some violence would follow the refusal to submit to the blackmailers' demand of $50,000 by a gang of train wreckers, with no claims of any kind on them, the Northern Pacific officials took every precaution to get [illegible] track of the perpetrators of the dastardly outrages.

[illegible] armed posses at point [illegible] the men in this State and trained bloodhound, within a few hours of [illegible] any specific spot, the blackmailers [illegible] evidently men of experience [illegible] of daring, got away after [illegible] two trains, injuring several trainmen, and damaging several thousand dollars' worth of property.

The most disastrous of the two explosions occurred at 9.30 o'clock, p. m., three miles west of Bonner station, which is eight miles west of this city. An extra train ground from approaching Birdseye ran into several sticks of capped dynamite which had been placed on the rails in such fashion that neither the locomotive nor a following train could brush them aside. There was a terrific explosion at once.

Several yards of rail were blown out, the [illegible] slight of the [illegible] were [illegible] and the [illegible] was [illegible] that all traffic [illegible] road was delayed [illegible] only slight injuries [illegible] the trainmen [illegible] anything else, [illegible] racle that the [illegible] were not killed.

[illegible] from Missoula [illegible] ht was blown [illegible] e was almost [illegible] crew escaped [illegible] injuries.

[illegible] were the work [illegible] kers is almost [illegible] Northern Pacific [illegible] every effort [illegible] to run up the desperadoes [illegible] men carrying an [illegible] bloodhounds [illegible] of the Birdseye [illegible] ter the report [illegible]

[illegible] of railroading in [illegible] been so [illegible]

[illegible] no [illegible] against it, but in [illegible] declines to quit blowing up tracks, trains and roadbeds until $50,000 has been deposited as a consolidated fund for them.

To grant such a demand is obviously impossible, and at no time [illegible] the Northern Pacific people [illegible] ered such a thing.

"LORD" KILLS TWO, THEN HIMSELF.

Coape, Long a Mystery, Shoots Wife, Her Sister and Commits Suicide.

Santa Fe, N. M.—Word has been received here that at Lumberton, twenty miles from here, Albert P. F. Coape, known for years in this territory as "Sir Albert" or "Lord" Coape, shot and instantly killed his wife and her sister, Miss L. Hernandez, and then blew out his own brains. The tragedy has removed one of the most picturesque as well as mysterious figures of the Southwest.

Tall, handsome, splendidly educated and with all the manners of an Englishman of the upper class, Coape appeared at Santa Fe twenty years ago. He was then twenty-five years of age and plunged headlong into the whirl of the early frontier life, drinking and gambling. He received at stated intervals the income of a trust fund in England.

After several years he married and became a hunter and trapper in the Rio Arriba country. He followed this life until 1895.

"Lord" Coape's first wife died nine years ago, and he married Miss Hernandez, member of a very respectable Spanish family. He gave up his hunting and moved to the settlements. He tried his hand at storekeeping, prospecting and finally saloon keeping at Lumberton. Of late years he drank periodically, his debauches lasting until he was a physical and nervous wreck. It was while he was in one of these debauches that the tragedy occurred.

While in town a month ago he said that since coming to this territory in 1884 he estimated his losses at cards to have been $100,000. He once lost $15,000 in two weeks.

Joseph Chamberlain's Successor.

Alfred Lyttleton was appointed Colonial Secretary to succeed Chamberlain in the rearrangement of the British Ministry. The Duke of Devonshire resigned from the Cabinet, Mr. Balfour expressing his disapproval of the step in an incisive letter.

Three Hours' Snow in Minnesota.

Snow fell at Fergus Falls, Minn., for more than three hours, several inches covering the ground. It was the first of the season and was driven by a high northwest wind.

125 1-2 Miles an Hour.

A speed of 125½ miles an hour was attained on fourteen and a half miles of the experimental railway between Marienfelde and Zossen, in Germany. All the passengers had previously procured special life insurance policies.

Says Bosses Lay Tribute.

Workmen at the National Tube Works, in McKeesport, Pa., said that the bosses laid regular tribute on the employes, having meeting places at which they collected hundreds of dollars every pay day.

LANGLEY AIRSHIP FAILS

Makes a Straight Shoot For the Bottom of the Potomac.

First Test of the Costly Aerodrome After Years of Work Proves to Be Faulty in Construction.

Widewater, Va.—Dismal if not altogether unexpected failure is the outcome of Professor Langley's elaborate and expensive experiment in aerial navigation. The famous aerodrome lies a total wreck, after having demonstrated not only its complete inability to fly, but the impossibility of alighting without self-destruction, even could it be so perfected as to make short flights. Carried swiftly forward by the impetus of the powerful launching catapult, the machine sped from the seventy-foot ways at an altitude of sixty feet, and gracefully sank into the Potomac, 300 feet from the launching track. It soon rose to the surface, where it was supported by the airtight cylinders provided for that purpose. When it came to the surface it was a total wreck, all the delicate machinery with which Professor Langley had attempted to imitate the soaring of a bird irreparably tangled and destroyed. Mr. Manley's application of Professor Langley's theory, after months of preparation, had proved a total failure in ten seconds, and $50,000 of the Congress appropriation for army ordnance and fortification improvements had been wasted, as well as a sum, the magnitude of which no man knows except Professor Langley, from the funds of the Smithsonian Institution.

Professor Manley at noon tested and examined every function and detail of the aerodrome. The motor was tried and found to work perfectly; the new propellors, braced with steel, withstood the strain of the preliminary tests, and everything pointed to success.

With propellors working at the rate of 1200 revolutions a minute, the spring catapult was released, and all witnesses held their breath as Manley and his aerodrome quickly disappeared beneath the surface of the Potomac. A more deplorable wreck than that which the several tugs hauled on board piecemeal and tenderly conveyed to the houseboat could not be imagined. The huge wings were limp and crumpled rags, and propellors and frame were torn and splintered scraps.

Manley appeared, for the time, chiefly concerned with getting into dry clothing, but later he made the following statement:

"It must be understood that the test to-day was entirely in experiment and the first of its kind ever made. The experiment was unsuccessful. The balancing upon which [illegible] the success of the flight [illegible] upon in [illegible]

Professor [illegible]

Omaha, Neb.—A [illegible] to [illegible] struck the Union Pacific machine shops, destroying a block of [illegible] recently erected and [illegible] A. F. Ratliff, a carpenter, and seriously injuring L. Pennington, a foreman, who were at work on it, and Joseph Leonard and Nat. Brown, laborers. Ratliff's home was at Lawrence, Kan., where he leaves a widow and several children.

The twister which struck the machine shops also struck the headquarters of the Union Pacific, the big building being badly shaken by it.

Emporia, Kan.—In tornadoes that raged at Hamilton, Greenwood County, and at Alleeville, Coffey County, three persons were killed outright, two fatally injured, and a score of others seriously hurt. The loss to buildings and crops is enormous. Alleeville, a town of 200 inhabitants, was almost wiped off the map.

TURN PIRATES AT MINDANAO.

Constabulary Officers Run Off With the Steamer Victoria.

Manila, Philippine Islands.—Inspector Hermann and Supply Officer Johnson, of the constabulary, have become pirates. They seized the thirty-seven-ton steamer Victoria at Mindanao and forced her to put to sea, using the men under their command for the purpose of intimidating the crew.

Shortly afterward they discovered that the Victoria's coal supply was short, and they forcibly detained an incoming steamer and replenished their bunkers from hers, after which they disappeared.

Meantime the act of piracy was reported, and an examination of the constabulary safe showed that $6000 had been stolen. It is supposed that the money is on board the Victoria. The constabulary despatched a fast coast guard steamer in pursuit of the pirates.

TERM FOR BANK OFFICERS.

John W. Newbury Gets $1000 Fine and Three Years in Prison.

Freehold, N. J.—John W. Newbury, president of the defunct Mercantile Co-operative Bank of Red Bank and Jersey City, was sentenced by Justice Fort to a fine of $1000 and a term of three years and six months at hard labor in the State prison.

Rudolph Newman, acting treasurer, who was connected with Newbury for conducting the banking business illegally, was sentenced to pay a fine of $500. The amount of surety required for the release of the men was $5000 for Newbury and $1000 for Newman.

RAILROAD BRIDGE BLOWN UP.

Men Who Are Trying to Blackmail the Northern Pacific Carry Out Threats.

Helena, Mont.—Northern Pacific Railroad officials have just received word that a bridge on the line near here has been blown up.

This is undoubtedly the work of the blackmailers who for two months have been demanding $50,000 from the road and carrying out their threats by wrecking trains and destroying property with dynamite.

COLORADO'S MINE WAR

Courts and Unions Arrayed Against Employers and Militia.

The Fight May Extend Over the Entire West—Each Side is Backed Up by a Fund of $1,000,000.

Cripple Creek, Col.—One of the most extraordinary struggles in history for supremacy between trades unionism and employers has been in progress in the gold fields of this section for many weeks. On the one hand is the Western Federation of Miners, supported in at least one phase of its contention by the courts; on the other side is arrayed the Mine Owners' Association, backed by Governor Peabody and the militia.

Directing the military with an iron hand, and bitterly hated by the labor element, is Adjutant General Sherman Bell, who was one of the Roosevelt Rough Riders. He is a close personal friend of the President, who has characterized him as "the gamest man of a game regiment." His chief lieutenant is General Chase, the active commander of the soldiers in the field, a man also of indomitable courage.

The Western Federation of Miners is said to be 48,000 strong, with a reserve fund for defense of more than $1,000,000. The mine owners have also a fund of more than $1,000,000, specifically for the great battle now on. The fight at present involves only about 4000 miners, but it bids fair to extend all over the West. The mine owners declare that they will not longer submit to the dictation of the union. The trouble may give the State to the Democrats at the next election.

Within a week the strikers announced that they would insist on unionizing every mine in the camp, with the result of the closing down of all the big producers. A nonunion miner at the Golden Cycle Mine was dragged from his home one night and shot in the back. The mine owners asked the Governor to send troops and agreed to pay all the expenses on condition that the warrants would be later honored by the State.

More than 1000 soldiers were distributed over the field, and armed guards surrounded all the large properties of the district. Cavalry squads were detailed to patrol the region.

A "bull pen" was established in the headquarters of the military, and men were arrested and imprisoned in it without being informed of the charge against them. Writs of habeas corpus were issued for four of the men, and made returnable before Judge Seeds. The courtroom was overrun with soldiers, the street in front of the Court House was filled with troops, Gatling guns were placed at different points [illegible] and sharp[illegible] were [illegible] roof of building. Judge S[illegible] [illegible] ordered that [illegible] [illegible] Gen[illegible]

MADMAN AT WHITE HOUSE.

Guards Overpower and Disarm Him After Desperate Struggle.

Washington, D. C.—Foiled in his attempt to reach President Roosevelt, Peter Elliott, a demented Swedish machinist, formerly of Minneapolis, engaged in a desperate battle with White House policemen, who intercepted his possibly deadly errand to the Executive Mansion. He was armed with a revolver, knife and a pair of scissors, and demanded an immediate audience with President Roosevelt. Before the visitor could be properly disposed of, he had given Policeman Ciscle and Parker, on guard at the main entrance of the White House, and Chief Usher Stone one of the liveliest tussles they have had in many a day. Ciscle preceded the madman to the hospital, where he had to have twelve stitches taken in his right arm, which had been cut so deeply as to sever an artery. Several scalp wounds had to be dressed for the crazy man. At not time did the affair involve the safety of the President, and he did not know of the occurrence until the man was safely out of reach.

No less than four "cranks," quietly arrested at the White House since the President returned from Oyster Bay, and without ado quickly pronounced insane, are now confined in the asylum at Washington. Two others were threatened with arrest if they returned to the grounds. A drunken discharged sailor insisted on seeing the President during the afternoon, but was persuaded to leave.

General Bradley T. Johnson Dies.

General Bradley T. Johnson died at the age of seventy-three years in Rock Castle, Goochland County, Va., the home of his son. He was a native of Maryland, rose to high rank in the Confederate army by gallantry, and was prominent in Richmond and State politics.

Killed By Moose in the Town.

A bull moose was killed a few miles north of Maine, N. Y., a few days ago, having been mistaken for a deer by a person not accustomed to do much hunting. The animal had doubtless left the Adirondacks in an endeavor to reach its old haunts in the Canadian woods.

Tornado Kills Three Women.

A tornado passed two miles southeast of Princeton, Ill., killing three persons and destroying a large amount of farm property. The dead are Mrs. Charles F. Sherwin, Mrs. Alvira Sherwin, her mother, and Miss Emma Welsh, of Tiskiwa, visitor at the Sherwin home.

Big Iron Works in Liquidation.

The Moselron Works, New York City, were placed in the hands of a receiver with $1,000,000 liabilities. Officers say the failure is due to a succession of unjustifiable strikes.

POPULATION OF THE OCEAN.

A Careful Computation of the Number Afloat on the Atlantic.

A German investigator named Boysen has issued at Berlin a pamphlet containing the result of patient and careful research regarding the curious problem of what is the human population afloat on the Atlantic Ocean. First he spent a long time collecting statistics from every port, showing the number of ships plying between the one Atlantic ports, the number sons aboard them and the number days spent at sea. He gathered attainable data on these points during an entire year, and by combination of his facts he [illegible] reach some interesting [illegible] though in the nature of [illegible] not attain a high degree [illegible] mate. He was unable, [illegible] obtain satisfactory [illegible] warships and the fishing [illegible] Atlantic, and so he left [illegible] out of his calculations.

Herr Boysen found that under investigation there [illegible] average of 3651 sailing vessels, with 44,899 men in their crews, [illegible] day also 1504 steamships, with [illegible] numbering 53,263, and 32,505 passengers were afloat on the Atlantic. This made a daily average for the year of 5155 vessels and 130,727 persons spread over the whole Atlantic surface.

The density of the ocean population was still more difficult to get at. Of course there are wide areas of the ocean which are seldom visited by vessels, and for the entire Atlantic Herr Boysen found that the average density of population for the year he investigated was only 0.002 per square kilometer (about three-fifths of a square mile), which is comparable with the extremely small density of population among the hunter and fisher folk of the northern half of North America. The density was more considerable, of course, along well traveled ocean routes, and Boysen found that between the British coasts and North America the mean density of this fluctuating population was 0.01 per square kilometer, which is about equal to the density of population along the Arctic Coast of Siberia, where there are a good many Yakuts and Chukchees; and upon the route from England to Gibraltar, the density was 0.025 per square kilometer, as in Patagonia and Tierra del Fuego. The most thickly peopled part of the sea, the English Channel, where the average density [illegible] is comparable with the population [illegible] tered over Yakutsk, Siberia.

Mountain Sickness.

M. Passtoukhof thinks he has discovered a cure for [illegible] sickness in [illegible] polling [illegible] but [illegible] whether the good [illegible] produced [illegible] sea or the [illegible] [illegible] [illegible]

BUCKSAW AND SAWBUCK.

Sawed Up the Wood and Kept the Old Ram Out of the Garden.

The Hartford Times the other morning gave this up uncomplainingly, and searchers in the Grab Bag are hereby rewarded:

An old farmer of Arkansas, whose sons had all grown up and left him, hired a young man of the name of Esau Buck to help him on the farm. the evening of the first day they d up a small load of poles for nd unloaded them between the nd the barnyard.

t morning the old man said d man, "Esau, I am going by and while I am gone, w up that wood and keep out of the garden."

old man had gone, Esau saw the wood, but when saw he wouldn't saw it, saw the saw, he saw that saw it with that saw. around for another saw, was the only saw he saw, so n't saw it. When the old man e home, he says to Esau, "Esau, id you saw the wood?" Esau said, "I saw the wood, but I couldn't saw it, for when I saw the saw, I saw that I couldn't saw with that saw, so I didn't saw it." The old man went out to see the saw and when he saw the saw he saw that Esau couldn't saw with that saw. When Esau saw that the old man saw that he couldn't saw with the saw, Esau picked up the ax and chopped up the wood and made a see-saw. The next day the old man went to town and bought a new bucksaw for Esau Buck, and when he came home he hung the bucksaw for Esau Buck on the sawbuck by the seesaw.

Just at this time Esau Buck saw the old buck in the garden eating cabbage, and when driving him from the garden to the barnyard Esau Buck saw the bucksaw on the sawbuck by the seesaw, and Esau stopped to examine the new bucksaw. Now when the old Buck saw Esau Buck looking at the new bucksaw by the seesaw he made a dive for Esau, missed Esau, hit the seesaw, knocked the seesaw against Esau Buck, who fell on the bucksaw on the sawbuck by the seesaw. Now when the old man saw the old buck dive at Esau Buck and miss Esau and hit the seesaw and knock the seesaw against Esau and Esau ck fall on the bucksaw on the saw- ck by the seesaw he picked up the to kill the old buck, but the buck saw him coming dodged the blow and count ered on the old man's stomach, knocked the old man over the seesaw on to Esau Buck, who was getting up with the bucksaw off the sawbuck by the seesaw, crippled Esau Buck, broke the bucksaw and the sawbuck and the seesaw.

Now when the old buck saw the completeness of his victory over the old man and Esau Buck and the bucksaw and the sawbuck and the seesaw he quietly turned around, and ate up the old man's cabbage.

WHAT IS LIFE?

A smile, a shadow, on the sky,
Alternate come and go;
A stifled stillness, then a breeze,
Breathing of mountain snow.
Come o'er the valley, each in turn,
Till shades of night fall low.

Through sheets of light the streamlet flows
Then shadows dense and wide;
Anon in peaceful measure sings,
Then, ere the song has died,
Wails loud o'er rocks, and at last
Lost in the sea's dark tide.

And so our span of life is passed—
A smile, a shade, a sigh,
Despairing calms and times inspired
By holy thoughts and high—
O'er stony ways, through peaceful glens,
Till we meet eternity.

A little waking, a little sleeping,
A little laughter, a little weeping,
And then—a long, long silence.
—Lilian C. Paschal.

When Sutton Forged to the Front.

SUTTON has never compared notes on the subject with the men of his acquaintance, but he often wonders if any of them proposed marriage on impulse, as he did. If so, he would like to know the circumstances. He is not thus curious through a desire for sympathy. He does not need sympathy. Mrs. Sutton is a woman of such infinite tact that she makes him think he is very happy. Still, when he falls into a mood at once retrospective and introspective, as he is wont to do when left alone, he puzzles over the complex existence of himself and neighbors.

Sutton is not an impulsive man by nature, therefore his actions between 3 and 4 p. m., on the 22d of June, 1897, were all the more inexplicable. At 3 o'clock on that eventful day he was writing a letter to his friend Hardy in Boston.

"I was forty-six years old yesterday," he wrote. "I celebrated the natal day by renewing my oath never to marry. Old bachelorhood may entail a certain degee of loneliness, but that is infinitely better than the domestic squabbles in which I see my married friends constantly embroiled. Women are well enough at a distance, but when it comes to taking one of them for a wife—"

Sutton stopped to study out the most convincing way to wind up his sentence. As he pondered, a woman came in, and he pushed the letter under the blotter.

"Hello, Ruth," he said. "How are you? I'm glad to see you. Won't you sit down?"

"Only for a few minutes. I am on my way to Brooklyn and thought I would stop in and see you as I passed. But I don't want to bother you. I see you are busy."

"Oh, no, I'm not," said Sutton. "Business is dull. I was just writing a letter to my friend Hardy, in Boston. I was telling him what I think of the ladies."

"Yes And what do you think?"

"That they are all angels. I wish I could marry them all"

"You might find that inconvenient. But if you really have such Mormonistic tendencies, you don't seem to be doing much to gratify them. You don't even make a start by marrying one."

Sutton grinned. "You needn't say anything," he said. "You're the last person in the world to find fault with a person on account of celibacy. When a charming woman like Ruth Decker skims through life to the age of thirty-four—"

"Forty," corrected Miss Decker "I was forty my last birthday."

"Well, then, forty, if you must have it so, and refuses to bind herself with conjugal ties, she has no right to rebuke an old sinner like me for plodding along in single harness."

Miss Decker leaned her elbow on the desk and rested her chin in her shapely hand. "But I can't help myself," she said.

"Neither can I," said Sutton.

"Yes, you can help it. You can ask somebody to marry you."

"And you can marry somebody who asks you."

Miss Decker brought her other palm to the support of her chin. "Nobody asks me," she said.

"That is because you give the fellows such scant encouragement. You shouldn't do it, Ruth, upon my word you shouldn't. A nice-looking girl like you ought to have married long ago. All nice girls ought to marry."

"Perhaps they would," remarked Miss Decker, "if they got a chance."

"Oh, that's all nonsense," returned Sutton. "They get the chance, all right. I don't believe the woman ever lived, no matter how ugly and uninteresting, who did not get at least one offer of marriage. At any rate, I never saw one."

"Yes, you have seen one," was the reply. "You see one now. Nobody ever asked me to marry him."

Sutton dropped his half-bantering air. He looked at his caller curiously. "Oh, come now, Ruth," he said, "you can't expect me to believe that. Why, you are an unusually popular woman. I don't want to give you any taffy, but facts are facts, and I hope you won't take offense when I tell you that you are the very nicest girl that I ever knew. You are pretty, you are bright, you are entertaining. Do you mean to tell me that a woman of your type never had a chance to get married? Why, I never saw you when you hadn't a pack of men at your heels."

Miss Decker sighed softly. "But they didn't mean anything," she said. "They liked me well enough up to a certain point, but they never wanted to marry me. It is a sober fact that nobody ever wanted to do that."

Sutton's guardian angel gave him a tremendous push and he fell forward precipitately. "You are wrong there," he said. "Somebody has wanted to marry you."

"He never told me so."

"What would you say if he should tell you?"

"I don't know. It would depend upon the man."

"What would you say if I told you?"

Miss Decker screamed in subdued tones. "You?" she said.

Sutton nodded. "Yes," he said, "I'm the fellow."

Miss Decker jumped to the half-way point between laughter and tears, and there she halted. "It seems so strange," she said. "I can hardly believe you mean it. We have known each other so long. We have been together so much. We have talked of so many things, but—we never talked this way before. You never did anything to make me think that—that you—"

Sutton took another unpremeditated leap. "That," said he, "was because I am such a slow-goer—such an idiot. I wanted to ask you all right, but I was too confoundedly backward."

Miss Decker spread her palms out on the blotter and left her chin to take care of itself. Sutton came to its assistance. "Now that I have forged to the front like a man," he said, "what are you going to say to me?"

"That I am glad you forged to the front."

At 4 o'clock Miss Decker resumed her journey to Brooklyn. Sutton escorted her as far as the elevator. When he came back he paused before his desk moodily.

"Well, sir," he said, "if this isn't the darnedest mess I ever got mixed up in."

Then he took Hardy's letter from beneath the blotter.

"'I celebrated the natal day by renewing my oath never to marry,'" he read. "And I wrote that just one hour ago. I can't send it now. I'll have to write another letter."

Then he wrote: "My dear Darnley: I have news for you. I am going to get married. I have got sick and tired of living alone. ['That's a lie,' he commented, 'but I'll have to let it go.'] I have decided to seek companionship in matrimony. I have been in love with my intended wife for many years [I honestly believe that is so], but have foolishly delayed my happiness until now. We are going to be married next month. I hope you will come on to the wedding."

"I'd like to know," said Sutton, as he reread the letter, "if I really have wanted to marry Ruth all this time, or if I felt sorry for the poor girl on account of her frank confession that she was the exception that proved my rule? Anyway, I hope it will turn out all right."

And it has turned out all right, but even so Sutton sometimes wonders if other men do the trick as suddenly as he did.—New York Times.

How Burr Saw His Sweetheart.

In January of 1779 Colonel Burr was given command of the "lines" in Westchester County, New York. It was at this time that he first met Mrs. Prevost, the widow of a British officer. She lived across the Hudson, some fifteen miles from the shore, but the river was patrolled by the gunboats of the British, and the land by their sentries.

In spite of these difficulties, however, Burr managed to make two calls upon Mrs. Prevost during the winter, both of them necessarily informal.

He sent six of his trusted soldiers to a place on the Hudson, and under the overhanging bank they moored a large boat, well supplied with blankets and buffalo robes. At 9 o'clock in the evening he left White Plains, mounted on the smallest, swiftest horse he could procure, and when he reached the rendezvous, the horse was quickly bound and laid in the boat.

Burr and the six troopers stepped in, and in half an hour they were across the river. The horse was lifted out, unbound, and with a little rubbing was ready for use. Before midnight he was at the home of his beloved, and at four in the morning he came back to the troopers, awaiting him on the river bank, and the return trip was made in the same manner.—Woman's Home Companion.

Servantless London.

London—what is London? To begin with, London is a conglomerate of 800,000 families—if we average five persons to a family—of whom 666,000 have no servants.

While only 95,000 families enjoy the luxury of a domestic servant 3,371,789 persons—men, women and children—wake every morning in London knowing that in the course of the day they will have to do all their own work with their own hands, while only 476,325, or eleven per cent. of the whole, are in a position to employ any of the 205,858 persons of the servant class.

Of these 3,371,789 of the servantless class nearly 500,000 are pigged together three in a room, while 376,000 have half a room each, 364,000 belong to the very poor, 900,000 to the poor.

The poor we have always with us to the tune of thirty per cent. The poor and the very poor outnumber all the men, women and children who find themselves on Sunday in church or chapel. There is no overcrowding in the house of God; but the houses of men are inconveniently full.—Review of Reviews.

Pawnbrokers in New York.

Pawnbroking is a lucrative business in New York. The annual license fee is $500, and each broker is required to give a bond of $10,000 as a guarantee of honesty. Such a bond is said to keep the unscrupulous out of the business. Those engaged in it are in close contact with the police, which accounts for the easy solution of many problems concerning missing jewelry.—New York Press.

The German Army Now Uses an Automobile Bakery -:-:-:

One of the things which cause no end of trouble in getting an army corps into the field is the commissariat. On paper and in times of peace everything is in apple pie order and the commissary department simply perfection; but the moment the drums beat for battle the bottom seems to fall out of all the arrangements and heartburnings and complaints come without end. There are few wars without commissary scandals.

The Emperor William fully recognizes that good food and abundance of it is as necessary to the success of an army in the field as good weapons and good powder, and that empty stomachs are poor supporters of enthusiasm, which means first class work. In no army, perhaps, is there so much attention paid to the commissary arrangements as in the German army, and the Kaiser himself takes a supervising interest in everything done.

Since bread is the staple of life, the baking of it is one of the absolute necessities of the commissary department, and now Emperor William has had rigged up a perfectly up-to-date bakehouse on wheels. It is an automobile bakery that will not have to depend on either horses or mules to keep up with the regiment, cavalry, artillery or infantry to which it is attached. We present a picture of this latest novelty.

THE AUTOMOBILE BAKERY.

William H. Taft, Who Will Succeed Elihu Root as Secretary of War

William Howard Taft was born in Cincinnati, Ohio, September 15, 1857, and was a son of Alphonso Taft, jurist, former Secretary of War and Attorney-General of the United States. He was educated at Yale, whence he was graduated in 1878, ranking second in his class. In 1880 he was admitted to the bar in Cincinnati, having been graduated from the law school of that city the same year. As the law reporter of the Cincinnati Commercial he gained journalistic experience. In succession he served as assistant prosecutor of Hamilton County, collector of internal revenue of the First Ohio District, judge of the Superior Court of Ohio, and Solicitor-General of the United States.

In 1892 he was appointed United States Circuit Judge of the Sixth District. In 1896 he became dean and professor in the law department of the University of Cincinnati. In 1900 he became Chairman of the Philippine Commission.

Food for thought sometimes results in mental indigestion.

Fully 2500 persons commit suicide in Russia every year.

The Protesting Sioux

Cyrus E. Dallin, the well-known sculptor, who for the past three years has had his home and studio at Arlington Heights, says the Boston Globe, has just completed his figure representing the protest of the Sioux Indians at the taking of the great Louisiana territory, which was formerly owned by the Sioux and Cherokee Indians. The statue is for the St. Louis Exposition, where it will be set up on one of the main boulevards in the central portion of the grounds.

The statue represents a full-blooded Sioux mounted on one of the famous Indian ponies of that tribe. The steed is drawn back on his haunches and the Indian's hand is raised in protest at the seizure of his lands. The Sioux is finely modeled, the expression of the face and the raised hand giving unmistakable emphasis to the sculptor's idea. The statue is to eighteen feet high.

THE PROTEST BY THE SIOUX.

An Ancient Giant.

The complete skeleton of a human giant has been found at Holbeach, England, a little Lincolnshire fen town between Lynn and Spalding, during excavations for the foundations of two new houses. Every bone was in perfect condition and not a tooth was missing. The skeleton measured seven feet two inches in length. A curious key, five inches long, with triangular handle, was found near the bones. Stukeley, the famous antiquary, who was born at Holbeach, records that at the spot where the discovery has just been made a Roman Catholic chapel, dedicated to St. Peter, formerly stood. Other human remains have been previously unearthed on the same spot.

Russian Forests.

Forests cover thirty-six per cent. of Russia's total area, or, in all, 464,500,000 acres. In other words, there are four acres of forest to every inhabitant of Russia.

WILLIAM H. TAFT.

$ The True El Dorado $

A Lake in the Andes Thought to Contain Much Treasure : :

Away up in the heights of the Andes, just north of the equator, some 9000 feet above the sea, lies in the plateau of Bogota the Lake Guatavita. This plateau is supposed to be the birthplace of the potato, which to this day is the principal crop. This lake is being drained by a joint stock company, with the consent of the Government of Colombia, and the purpose of its draining, sordid in itself, rests on a basis of quaint romance. It is a very strange tale which Mr. Benjamin Taylor tells in the English Illustrated, under the title of "A Quest for Sunken Treasure."

"This lake," says Dr. Zerba, "is the celebrated 'El Dorado.' Here, it is said, the Cacique of Guatavita was covered with a sticky substance, over which gold dust was strewn, which golden covering constituted his vestment when making the sacrifices. The term 'El Dorado,' it should be explained, means the Golden One, or the Golden Man, not the Golden City, as is commonly supposed."

The Cacique of Guatavita, who had an army of 30,000 men, used to rule there over 1,000,000 people.

This lake, between 9000 and 10,000 feet above the level of the sea, on the summit of a conical mountain, they regarded as the residence of their protecting deity, to whom they thought it necessary to make offerings twice a year. In consequence all the Cacique's subjects assembled at the stated times, with their gold offerings, and, forming in grand procession, advanced with music to the lake. Arrived there, the Cacique and the principal chiefs embarked on the lake in large canoes, by steps formed in the bank, and the people at the same time spread themselves all around the lake. On arriving at the centre of the lake the chiefs anointed the Cacique and powdered him over with a profusion of gold dust, hence the name of El Dorado—the Golden One.

LAKE GUATAVITA.
(Showing the tunnel made by the Spaniards in their attempts to drain the lake.)

Lesson to Bumptious Newspapers.

There is really no necessity for the New York papers to poke fun at the personal columns of their country contemporaries. It is quite as interesting for the readers of the Pineville Poker to learn through the columns of that valuable news medium that Peter Perkins is painting his henhouse green as it is for the patrons of the New York daily newspapers to be informed that Mrs. Vanderbilt has a new gown or that Mr. Astor is putting a new front on his Newport villa. The plutocracy of Pineville is just as important—to Pineville—as is the millionocracy of New York.

A Correct Obituary.

A country editor says: "A properly written obituary contains the age, name, relation, date of demise and time of funeral in the first paragraph, and the rest should be left to a kind Providence. An obituary fashioned after these simple rules is calculated to preserve the reputation for veracity on the part of a large number of editors who find the temptation strong to 'heap coals of fire on the head' of the departed."

William Penn's Compass

Innkeeper Showed Instrument Which Belonged to Colonizer.

Some time ago, while botanizing along the Osage River, in central Missouri, the writer stopped over night at Gladstone, a small town in the southern part of Morgan County. The loquacious landlord of the little inn, in his anxious endeavors to make the time pass agreeably, recited many war reminiscences, and incidentally dropped the information that an old surveyor's compass, with an interesting history, was a greatly prized relic of a family of that vicinity. Interest in the story was intensified when he further stated that the compass was once the property of William Penn, and that there was much tradition and some recorded evidence to prove that it was the identical instrument with which the nucleus of the present city of Philadelphia was first surveyed.

"The name of the family which owns this rare historical treasure," said the landlord, "is McNeal, and they live upon a small farm in the northern part of Camden County, six miles south of this place."

On the following day the pleasures of the botainal fields were forsaken, the McNeal home visited and the Penn compass, with its attending paraphernalia, carefully inspected.

WILLIAM PENN'S COMPASS.

The instrument consists of a block of walnut wood, about three and a half inches broad and nine inches long, hollowed into a box. The box is neatly lined with some white substance, and the degrees are printed across one end. A heavy steel needle is accurately balanced, and a glass top set in cement covers the compass. The movement of the needle is quite limited, as can be seen in the accompanying memory picture, the swing being through an arc of only about forty degrees. The compass, with the instruments with it, such as rulers, dividers, etc., bears the unmistakable marks of age.

The family in possession of this curious relic has resided in Missouri for many years. Among its numbers have been some of the pioneer Methodist ministers of the State, and also General John McNeal, a Federal commander.

According to the documentary history of the instrument, it is claimed that William Penn and his co-worker used the instrument in the survey of Philadelphia, and a few notes were given in the old document.

Whether the compass is a genuine relic or not could only be determined by comparing the historical data which accompany it with the old records of the city of Philadelphia, but the odd form and mechanical excellence of the instrument tend to inspire the casual inspector with confidence in the genuineness of its history.—Philadelphia Record.

Spanish Enterprise.

The shoemakers of Madrid, Spain, recently combined to encourage dancing with the object of wearing out as much shoe leather as possible. They hired several dancing halls and charged ten cents admission. Each admission ticket bears a coupon, twenty of which entitle the owner to a new pair of shoes free of charge at the union store.

The Scandinavians now have an enormous fleet of big steel tramp ships in serious rivalry with the British.

The development of the carborundu industry led to the manufacture of artificial graphite, which is now produced by passing the amorphous carbon through the electric furnace and obtaining a pure graphite with merely a fraction of one per cent. of ash. Even the direct graphization of anthracite coals has been successfully accomplished, a granular graphite being obtained which can be extensively used for lubricating purposes. The annual output is more than 2,000,000 pounds.

"Little has been heard of late," says the London Electrician, "concerning the Edison new storage battery, but Mr. Edison now says that he is making one set per day, and that he will soon be making two. It seems that all the machinery was ready for turning out the batteries in great numbers last winter, but that a method was found by which it was possible to reduce the time occupied for charging, and on this account all the machinery had to be remodelled. If, indeed, the new battery can make possible a commercial system of accumulator traction, so as to compete with petrol, Mr. Edison may have established once more his pos as a leader in the electrical ind —a position which, thanks large the exertions of his inventive fr on the lay press, he has almost l

In the order of production of co Pennsylvania ranked first, with 16,497,910 short tons, an increase over 1901 of 2,141,993 tons; Alabama came second with 2,552,246 short tons, an increase of 403,335 tons; West Virginia third, with 2,516,500 short tons, an increase of 232,805 tons; Virginia fourth, with 1,124,572 short tons, an increase of 1,237,442 tons; Colorado, fifth, with 1,003,393 short tons, an increase of 332,000 tons—the percentages of increase for these States being: Pennsylvania, 14.92; Alabama, 18.77; West Virginia, 10.19; Virginia, 23.97; Colorado, 49.47.

The Story of the Lotus.

If you wish to unlock the realms of poetry and romance you must turn to that famous lily of the East, the sacred Lily of the Nile, the lotus. There is hardly a tale in Oriental mythology where it has not a place. Buddha is called "The White Lotus of the Good Law," and is always shown holding a lily in each hand. In Egypt this flower was represented as the throne of Osiris, the god of day. The true Egyptian lotus is either blue or white; the pink variety was brought to Egypt in Roman times, and does not now grow there wild. It is a native of Southeastern Asia, and was cultivated in Egypt for food. The roots of the blue lotus are also edible, and this fact is said to have been made known by Isis to her worshipers. The buds and flowers of this species were often depicted on monuments as early as 3000 years before Christ. When the tomb of Rameses II. was opened in 1881, some of the petals of both pink and white lotus flowers were found. He reigned 1300 B. C., and these frail bits of a flower survived where monuments of stone and brass had crumbled to pieces. The lotus has been invested with many sacred attributes. On the Nile it meant fertility. The language of the lotus reads, "A tree whose fruit is so sweet that when foreigners once taste of it they forget their own country."—The Delineator.

What We Pay For Our Lives.

An authority on life-insurance matters has been gathering some striking statistics on the subject of insurance policies and payments. In 9333 cities and towns in the United States during the year 1902 the total distribution to policy-holders and their beneficiaries exceeded $320,000,000. In the distribution of this sum among the larger cities New York holds first place, $22,945,475 of the total sum having been distributed here in 1902. Philadelphia follows the metropolis with a record of receipts aggregating $8,626,008. Chicago holds third place with a record of $6,922,457. In each case these figures show an advance over those of the preceding year, which fact has led our authority into making some interesting prophecies. At the rate of distribution recorded for the past year, it is estimated that the life insurance companies of New York (exclusive of Brooklyn) are pledged to pay something like $400,000,000 to the citizens of Manhattan within the next twenty years; while Philadelphia will receive $180,000,000, Chicago $140,000,000, Brooklyn $120,000,000, and Boston $120,000,000. As more than ten thousand million dollars in policies are carried in this country at the present time, the rate of increase suggests astounding possibilities for the future.—Harper's Weekly.

Men Who Work Overtime.

By John Z. Rogers.

I HAVE been talking with a number of men who work hard in their various professions. The comedian of a stock company in a well-known New York theatre said: "To begin with, we have a new play every week. I am always at the theatre every afternoon at about 2 o'clock, and am often unable to leave till half past 6 or even later, especially on Mondays and Tuesdays, when the new play has not begun to run smoothly. Similar long hours prevail, of course, evenings. My mornings are taken up with rehearsals for the play that be put on the next week. This, with the time I have to devote to my lines, takes about fifteen hours a day. This is pretty hard, but alk, the other day, with a friend who had just come in from playing stands, I congratulated myself on having a comparatively easy

nary weekly routine of a prominent out-of-town clergyman with ced is as follows: "All day Sunday is taken up with the regular hurch work. Every night in the week there is some kind of a ich requires my presence. On Saturday I prepare my sermon. month or quarter come the conferences and other meetings at expected to be present. The church conducts an employment ee dispensary, a kindergarten, and other auxiliaries, all of which or twice a week. This, by the way, does not include meetings of , fraternal, political and other organizations for which I often prepare addresses; nor the calls on the 1100 members of my congre- ion. Last year some of my time was employed in marrying eighty-two uples, attending nearly 100 funerals, and making about 1000 calls."

I have a friend who is a schoolteacher, and he says that he earns every cent of his salary. "I average about twelve hours' work a day," said he, "and during my vacation I devote about half my time to special reading in connection with future school work. The introduction of supplementary work in the schools, the taking up of special subjects one or two hours a week, require extra reading and studying."

To many the newspaper reporter appears to lead a life of pleasure. But the reporter we see on the stage—the "journalist" with the notebook—is never seen in real life. Here is what one of the reporters on a big morning paper told me, and as I have been through the same experience I know it is substantially correct: "I get to the office at half past eleven, in order to read the papers half an hour before the noon assignments are given out. Soon after twelve I am sent out on a story. If it is not very important or is not far away I may have two or three to look after. Under ordinary circumstances I return to the office before six and write my copy. As soon as it is finished and I have my dinner, I start out on evening assignments, returning as soon as possible, for the earlier one gets his copy in the more 'space' he is paid for in the paper. No one can tell in advance when or where a news story will break out, and I always keep a packed grip at the office."

Even the wealthy work overtime, and most of them pay the penalty, sooner or later, in one way or another. It is said that George Gould is at his desk at 8 o'clock every morning when he is in the city.

The only recreation Russell Sage has is when he steals an hour for a drive. John D. Rockefeller has already bartered his stomach for his wealth by working long hours.

A prominent physician recently said to me: "Up to a generation ago the watchword was, 'Look out for your stomach!' Now it is, 'Look out for your nervous system.' An eight-hour union for professional men and men who work with their brains ought certainly to be seriously considered."—Harper's Weekly.

Accuracy" in Education

By President Woolley

THOROUGHNESS implies accuracy. Glittering generalities may have their place, but it is not in the class room. Dean Briggs thinks it "next to impossible to find a youth who can copy a list of printed names without mis-spelling," a result which might be expected when "we leave the straight and narrow way and wobble all over the flowery meadows." There is no more valuable result of training than the habit of absolute exactness, and no greater menace to life in any phase than its lack. Failure to grasp the exact thought of the speaker, to report exactly what has been heard, is a fruitful source of trouble wherever it occurs, and the world has a right to demand that our schools and colleges shall train their students to be accurate, if nothing else! Examination papers and unexpected tests often bring discomfiture in their train. "Mount Carmel is the place where Elijah sat when he was fed by a crow." "Galilee received its name from Galileo, who once wrote a history of Palestine," were the results of one student's reading of Hebrew history. A chance remark of a teacher that the desert life of the Semites gave time for reflection and bred seers and prophets, men of religious and philosophic thought, came back to her, at the next written test, in the somewhat startling declaration that "in the desert men had nothing to do, and so became philosophers." In this era of the eye and ear specialist, may we not hope for some discovery which shall lead to keenness of vision and clearness of hearing, that we may catch, not the mere words, but the thought underneath?—Harper's Bazar.

The Art of Getting to Sleep

By Harvey Sutherland

ALL conditions must be favorable to sleep. The bedroom should be quiet, dark and airy. In winter it is better to have the window away up than to shut it so that a knife-edged draught shall chill an exposed shoulder. The temperature of the bed should be agreeable. Getting to sleep when the feet are cold is as slow a job as getting to sleep when hungry. A hot-water bottle in one case and a piece of bread and butter in the other will help things. I leave it to you to decide which is for which. A warm bed in winter is easily got, but a cool bed in summer is not so simple a proposition. However, a sheet made of straw matting, interposed between the regular sheet and the mattress, will be found to mitigate sensibly the horrors of a hot night. It preserves the softness and springiness of the bed, and yet is pleasantly cool, without being too cool. Personally, I find that sleep comes soonest when I have no pillows at all.

The next thing is to relax utterly. Remember that the corner of the jaw is the citadel of tension. While that is clinched no sleep can come. But most important of all is the disposition of the mind so that sleep can come. The reason why we fail in this is the same as the reason why we fail in other things. We do not very genuinely want to succeed. As we lie stretched out after a busy day, there are so many thoughts that we want to chase after that we drop the notion of sleep, though we know that to-morow is another day on which we can think. It is all very well to say, "Dismiss these thoughts." How to dismiss them is the problem that each must solve.—Everybody's.

Locating a House

CONCERNING the choice of a site for a suburban or village home, experience shows that the nature of the soil, the exposure with regard to sun and winds, and matters of drainage, are important considerations. An exposure which insures sunshine in winter and breezes in summer, and at least a gentle slope away from the building, are considered favorable general conditions.

The locating of the house on the lot calls for some thought; more, perhaps, than is commonly given. The finished effect desired should be kept constantly in mind. Mistakes at the start are hard to rectify. On the one hand, closeness to the street means convenience of access and an opportunity to develop a garden or otherwise utilize the space at the rear. On the other hand, location back from the street affords more seclusion and the opportunity to give the house an attractive fore-court for a setting. The tendency in many cities and towns is to set the house or houses too near the street. The front piazza is often a usual sitting place through several months of the year, and the sense of retirement, with a pleasant foreground, at these times would be much appreciated, while at the same time one would not be shut off from the passing life. But much depends on the point of exposure, the immediate environment and the habits of the household.

The house, in design and arrangement, should be planned with special reference to the individual site and surroundings, including the adjacent buildings, and the effort should be to harmonize the design as far as possible with these. The effort sometimes made to secure a striking individual effect is generally to be deplored, and the most satisfactory results are usually obtained by making the house fit easily and naturally into its place and appeal to the sense of fitness.—Good Housekeeping.

CLEANING HOUSE.

Dolly's clothes are on the line,
Dolly's dishes fairly shine;
Dolly's house is swept all through,
Chairs and tables look like new.
Dolly's little mother, May,
Has been cleaning house to-day.

Picture books, a goodly row,
Such a pretty order show;
Games and blocks all put in place,
Pencils in the drawing case.
"I'm so tired," says little May,
"I've been cleaning house to-day."
—E. E. Hewitt, in Sunbeam.

A PEANUT PARTY.

Mrs. Carmichael was very fond of boys; she liked them all sizes and ages, no matter how rough and awkward they were. A boy's best side was always sure to turn uppermost before she had him in hand fifteen minutes. Perhaps for the reason that she had no children of her own she had a thorough love and understanding of other people's children, especially boys.

She always had a Sunday school class of boys, and there was one persistent member who refused promotion half a dozen times rather than submit to a separation.

Every year Mrs. Carmichael arranged some entertainment for her class, and there was no more delightful day in the calendar than that which the boys spent roaming over the beautiful grounds and winding up with some novel entertainment. Everything seemed exhausted. There had been charades, and tableaux, and potato races, and guessing games, and even tricks by a professional, among innumerable ventures.

"If I don't have something new my boys will lose their faith," she said at last, taking her "steady" Sunday school pupil into her confidence.

"Then I wouldn't give peanuts for them all," he declared.

Mrs. Carmichael clapped her hands.

"Peanuts!" she cried. "Samuel, you are an inspiration, and as a reward you shall stay in my class for another year. I shall give a peanut party."

This she proceeded to do without more delay; and for her purpose on the eventful day she bought the entire capital of a peanut stand in the neighborhood, securing about four quarts. Then she hid them one by one in every nook and angle she could think of; it was really wonderful how even that big house could have hiding places enough, but she finally stowed them all away, well out of sight.

"Now," she said, as the boys streamed into the house after a tour of outdoor inspection, "there's to be a big peanut hunt. I have four quarts of them hidden on this lower floor, which must be found in half an hour's time. Here is a paper bag for each of you. He who finds the greatest number of peanuts gets a prize. When the half hour is up I will stop the hunt and we will count trophies, after which, to be quite sure our four quarts are secured, we will prove it by this," and she held up a gayly painted quart measure. "Now, then, away with you! Go where you please, but be careful of bric-a-brac and china."

With a shout they were off and a livelier half hour was never passed. Each second furnished excitement, for the peanuts lurked in the most unexpected places, and boys found them with deafening whoops and yells that sent Mrs. Carmichael's hands to her ears.

At last time was called and the hunters came trooping in with their spoils. Little Will Vance, the baby of the class, secured the prize—a fine jackknife—because he was small enough to slip into impossible places, and it was found after careful measurement that four quarts exactly had been gathered in during the hunt.

Altogether the peanut party was a success and the boys went home with the firm conviction that Mrs. Carmichael was the very nicest and jolliest boy of them all.—Pittsburg Dispatch.

IN A PELICAN'S NEST.

With what satisfaction I recall my visit to Bird Rock, that famous resort for birds just within the passage between Newfoundland and Cape Breton! Audubon, in a wave tossed schooner, lay off the rock for hours in the vain hope that he might effect a landing; and one could therefore appreciate weather which permitted one safely to run a boat onto the hand's breadth of beach beneath the bird-inhabited walls towering more than a hundred feet above. The top was reached by means of a crate, a rake, and a windlass—apparatus subsequently found most useful in reaching points of vantage whence to photograph birds nesting on the face of the cliff.

I have not always been so fortunate, however, and a trip to study a small colony of white pelicans was attended by far from satisfactory results. Size and color combine to make these birds exceedingly conspicuous, and an opportunity to test a rifle upon them is rarely lost. Where man and gun are found, therefore, the birds nest in only the most isolated places. This particular group of about forty birds had selected an islet, or, locally a "reef," so far out in Shoal Lake, Manitoba, that it was wholly invisible from the shore. But reach them we must, and the trip of four or five miles was made in a twelve-foot punt, the bottom of which could be wisely trod on only with great caution. The reef was reached and the splendid white birds were found sitting on their nests of sand and gravel. At our approach they arose, and, with characteristic dignity of flight, disappeared far down the lake. In awaiting their return, concealed in a small patch of reeds, a sudden change occurred in the weather and soon we found ourselves prisoners in pelican land. Fortunately we had a tent-fly, which with a push pole, a pair of crossed oars and a camera tripod, would have made a passable shelter under ordinary circumstances. But in the end the circumstances proved to be extraordinary. The storm became one to date from. Not only were we forced to ballast our tent with boulders, but sitting in a pelican's nest, the only available, unflooded position, I passed a good portion of the night with my hands clasped around the ridge pole of our improvised shelter to prevent the whole affair from blowing into the lake. Eventually we reached the mainland, none the worse for the experience, but the pelicans, alas! refused to share their home with us, and in their absence their eggs were devoured by the western gulls that nested near them.

SWALLOW CHARACTERISTICS.

It is very easy to remember the barn swallow. Hay forks are used in the barn; this swallow has a very conspicuously forked tail. Remember also that the farmers get much hay down in the meadows; you often see barn swallows flying low over these meadows for insects. Keep in mind also that the under parts are of chocolate color.

On the upper edge of an excavated bank by the roadside there is a dark layer of soil and vegetation. There is a dark band across the breast of the bank swallow. That is easy to remember. The rough winged is much the same as the bank swallow, except that is has no dark band on the breast. The color is a sooty brown.

There is a steel lightning rod on the brown shingles of the old farmhouse; there is a bright steel-blue patch on the brown breast of the eaves swallow. The tail is almost as square as the end of the roof. The light spot on the rump you may also remember.

This swallow builds a queer gourd-shaped nest of mud hanging mouth downward under the eaves of the barn. This nest, made of pellets of mud, is very interesting, as it is nicely adapted to the slant of the eaves and to the boards or rafters on which it is fastened. It is also very interesting to watch these swallows on muddy shores rolling up pellets of mud.

Take your notebook and write in it a list of the principal members of a few of these confusing families. Against the name of each bird in the list put the chief characteristic as stated in any good bird book. Four families at least should be treated in this way—the swallows, the sparrows, the vireos and the warblers.—St. Nicholas.

M AND NAPOLEON.

From Marengo to Moscow was the long swing in the pendulum of Napoleon's life, the one the greatest battle out of which he came with his life, the other the abyss which engulfed him. J. M. Buckley, who is a literary expert on coincidences, points out how strangely the letter "M" played a part in the life of the great conqueror.

Marbos was the first to recognize the genius of Napoleon, at the Ecole Militaire. Melas opened to him the way to Italy. Mortier was one of his first generals. Moreau betrayed him and Murat was the first martyr to his cause. Maria Louise partook of his highest destinies. Metternick conquered him on the field of diplomacy.

Six marshals — Massena, Mortier, Marmont, Macdonald, Murat, Money —and twenty-six of his generals of divisions had names beginning with the letter "M."

Murat, Duke of Bassano, was the counselor in whom he placed the greatest confidence. His first great battle was that of Montenotte; his last was that of Mount Saint-Jean. He gained the battles of Moscow, Montirail and Montereau. Then came the assault of Montmartre. Milan was the first enemy's capital and Moscow the last in wh[illegible] entered.

H[illegible] Egypt [illegible]gh the blunders of M[illegible] and employed Miollis to make Pius VII. prisoner. Malet conspired against him, afterward Marmount. His ministers were Maret, Montalivet and Mollien. His first chamberlain was Montesquieu.—Indianapolis News.

Publishing the News.

People should understand that a newspaper is printed for the sole purpose of carrying the news of the day, says an exchange. It is a poor stick of a reporter or editor who will listen to personal grievances and permit himself to be influenced by personal friendship or family matters. The newspaper man who does not recognize news and who is influenced by any degree of sentiment to suppress what is news has no business to be engaged in the business.

The Funny Side of Life.

UNAPPRECIATED.

The song bird trills his heart away
Unnoted there upon the bough;
If he could but make people pay,
He'd have an audience, I vow.
—Washington Star.

CYCLONIC.

"They say all's fair in love."

"Don't you believe it? You should have heard the stormy time Charley had last night with dad."—New York Sun.

SHORTNESS.

I remarked, with a bitter smile, that poverty made a man endure any slight.

"It's a short worm that has no turning!" muttered Amsleigh, with a dark look.—Detroit Free Press.

PENANCE.

"Do you find that your new alarm clock is of any practical advantage?"

"Well," answered the sluggard, "it eases my conscience some. It keeps me from sleeping quite so peacefully."—Washington Star.

AN IMPRESSION.

"What are those impressionistic painters?" some one inquired.

"Well, so far as I can find out," replied the Philistine, "they're folks who've picked up an impression that they know how to paint."—New York Sun.

MILLIONS OF 'EM.

Kwoter—"Oh, there are as good fish in the sea as ever were caught, you know."

Newitt—"Better. Just think of the many enormous ones that just managed to get away from all the anglers."—Philadelphia Press.

POETRY AND PROSE.

"You used to sing 'Every morn I send thee violets,' before we were married," said Mrs. Brimkin, with a sigh.

"Yes," answered Mr. Brimkin, "but my devotion has taken a more practical form. Every month I pay the meat bill."—Washington Star.

CUMULATIVE HONORS.

"My mamma belongs to eighteen societies."

"Well, my mamma belongs to nineteen."

"Yes, but three of the societies your mamma belongs to are for the suppression of the same thing."—Life.

PHENOMENON.

Askit—"Why do you consider Blankerton the most remarkable man of the age?"

Knowitt—"Because he originated a get-rich-quick scheme that actually made all the investors rich."—New York Journal.

PRACTISING TO DECEIVE.

Mrs. T.—"What are you making those grimaces in the glass for, my dear?"

Mr. T.—"I'm trying to practise a look of astonishment. Some of my friends are going to make me a present to-night, and I am supposed to know nothing about it."—San Francisco Wasp.

ALAS! TOO LATE.

Kitty—"What did you do when he threatened to kiss you?"

Blanche—"I didn't do anything. Why should I? I just waited until he had committed an overt act."

Kitty—"And then?"

Blanche—"Why, then it was too late to punish him."—Boston Transcript.

SECOND NATURE.

"I fear," said his host next morning, "you didn't sleep well last night. Every time I woke up I could hear you thrashing around in your bed."

"I ought to have told you," apologized the guest, a man from Kansas City. "I've got so used to floods that I tread water in my sleep."—Chicago Tribune.

SETTLED.

"My brother is very much hurt that you should refuse to correspond with him," said Mr. Cheltenham's sister. "By failing to answer his many letters you wrong him, although perhaps you do not mean to."

"No," replied Miss Jilt, "I do not mean to wrong him; neither do I mean to write him."—Catholic Standard and Times.

SENSITIVE.

"We must not look down on any man because of his humble circumstances," said the broad-minded citizen. "Let us remember that some of our ablest statesmen started out as rail splitters."

"Yes," answered the man who is painfully precise, "I don't object to a rail splitter in statesmanship, but I must confess that an infinitive splitter annoys me."—Washington Star.

SAVED BY A DREAM.

Timely Supernatural Warning That Was Heeded.

Many years ago the wife of the agent of a land owner and mine proprietor in the north of England aroused her husband from sleep and told him she had dreamed that she saw a wooded lane above the river and some men hiding in bushes; she saw him riding along and the men shoot at him from behind and drag him, dead, into the bushes. The place in her dream she did not know, but it happened to be a desolate spot of country past which he would have to ride on the following day, when returning from the mines with his money. Twice more that night the woman dreamed the same thing again, and to appease her terrors her husband promised that he would chose a different route for his ride. The next night a murder was committed in the very spot which the woman had pictured in her vision. The victim was a young surgeon named Stirling, the most popular young man in the neighborhood, but desperately poor. He had nothing in his possession but a watch, and that the murderers took. His body was found in the bushes which the dreamer had described. The watch was traced to a pawnbroker's shop at Durham and the men who had pledged it were arrested. Their names may be remembered—Cain and Rain. Tightly clinched in the hand of the murdered man was a button of pink glass, fashioned in imitation of an amethyst. It exactly matched those upon the waistcoat of Cain. But sympathizers with the two men heard of this clew and scattered hundreds of similar buttons in the wood where the body was found. The men were acquitted, although everybody believed that they were guilty.

Sharpening Her Teeth.

Mrs. Samuel Sloane Chauncey, whose engagement to Lord Rosebery is rumored, was Miss Alice Carr of Louisville in her youth. Her sister, who was Miss Grace Carr, is married to Lord Newborough.

Lady Newborough sometimes tells a story about a Louisville maid servant employed by her family in her childhood. The maid, fresh from the old country, was very green. One day a guest of the family, a young woman, was late for dinner, yet she was in her room.

"Go to her room," someone said to the maid, "knock at her door, and find out why she doesn't come downstairs."

The maid departed, and in a little while returned. "The lady'll be down in a moment, ma'm. She's just sharpenin' her teeth," she said.

As Bad as That?

Everything goes in Pittsburg, except on Sunday. The injunction there is "Six days shalt thou graft, but the seventh shalt thou rest." It is said of them that "They keep the Sabbath day and everything else they can lay hands on."—Memphis (Tenn.) News.

North Plainfield Weekly Review.

Founded March 24, 1900.

An Independent Republican Newspaper published every Saturday at 33 Somerset Street, North Plainfield, N. J.

HARRY H. WEBB, Editor and Proprietor.

TERMS OF SUBSCRIPTION

If paid in advance $1 per year; if not paid in advance $1.25 per year. The REVIEW is delivered by carrier in Plainfield and North Plainfield, and is on sale at news stands.

Long distance and local telephone . . . 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, OCTOBER 10, 1903.

REPUBLICAN CONVENTION.

The Republican County Convention will convene at the Court House in Somerville, on Thursday, October 15, 1903, at 11 o'clock in the forenoon, for the purpose of nominating candidates for Member of Assembly and County Clerk and the transaction of such other business as may properly come before it.

The delegates elected at the Primary Election to represent the various townships and boroughs will compose the convention. The representation is as follows:

Bedminster	2
Bernards	5
Branchburg	2
Bridgewater	12
Bound Brook Borough	2
Franklin	4
Hillsborough	5
Millstone Borough	1
Montgomery	2
Rocky Hill Borough	1
North Plainfield Township	1
North Plainfield Borough	6
Warren	1

Joseph S. Frelinghuysen,
Chairman Republican County Com.

BOROUGH HIGH SCHOOL IN DANGER

It was to be expected that when the annexationists undertook to secure control of the North Plainfield Board of Education that the ultimate object of such a plan would tend toward the advancement of their pet annexation scheme, but it is hardly probable that the most far-seeing man in the borough ever dreamed that the combine would try and pick up the borough high school and present it to Plainfield, thereby compelling the borough children to depend upon the will and caprice of Plainfield office holders for an education, and at the same time rob North Plainfield of an institution of which she is naturally and justly proud—a high school second to none in the State.

But such is the fact, as will be seen in our news columns reporting the last meeting of the Board of Education, for all the men who voted for the resolution calling for the union of the borough and city high schools are pronounced annexationists.

We are proud of our borough schools and of the record they bear in sending out each year young men and young women who are a credit to any institution, and we should endeavor, by all means in our power, to sustain this record and improve upon it whenever possible or necessary, instead of closing up this school and transferring the honor to Plainfield where the people have no direct voice in the management of the public schools, and thus we would be at the mercy of Plainfield and compelled to pay any price it might stipulate, and in the future might choose to debar us entirely from such privilege, to say nothing of the minor difficulties of compelling the North Plainfield children to walk a long distance to the Plainfield school or pay carfare. It is, as was well expressed by Mr. Honeyman in in his argument before the Board last Monday night, "an outrage on the borough even to consider it."

There is still another view to take of the matter which it might be opportune to mention at this time, namely, that very many people have been attracted here solely by the reputation of our schools, and many will still be attracted by them. Close up the High School and disappointment would ensue to those who have thereby been influenced to make their home here and the result will be that others will not locate here.

Nevertheless, when the matter comes before the voters of the borough for a final decision (as come it must before the Board of Education will dare to carry out the proposed project) we are of the opinion that the majority of those who followed the leaders in an attempt to wrest the borough from Somerset county will be found on the side of those who are opposing this new scheme of destruction to borough interests.

We do not know, nor do we care, how the lines shall be drawn on this question as compared with the previous question. For ourselves, the REVIEW will have but one position to take, and that the upholding and betterment, not the pulling down, of our educational system.

Our borough school system has been a gradual growth for the last ten years or more. It has elicited praise from educators in other parts of the State. We have every reason to believe that it is carried on economically. The salaries paid are less than is paid in Plainfield, and the advantages as high or higher; in the matter of manual training, they are higher.

Our people like it, and if not carried on any time in a manner which meets with their approval, they can at any time elect a new Board of Education which would conform to their wishes.

What then is to be gained? Why close up the five school rooms and turn the children out of doors, saying to them, "if you desire more education you must go almost two miles further away to a High School with in another city?" Who calls for it? We are informed it is not possible to make this change with any more economy. But supposing it should cost less, will the borough be set backward or forward by such a movement?

The proposition ought to be squelched at its very inception, let the source of it be what it may.

BOLTERS WEAKENING.

It is getting to be almost as dangerous for politicians to play with boomerangs as it is for boys to fire toy pistols, although the effects of the two cases act somewhat differently the final result of each means death to those who use the weapons.

This thought was prompted after a perusal of an article in the Elizabeth *Journal*, of Thursday; and so apropos is it to the political situation in Plainfield that we are led to produce it herewith:

"Certain moves on the political chess-board in Plainfield have come to light since the Republican county convention, which promise to thwart the effect of the bolt of the fifteen Plainfield delegates from the convention. From present indications it seems that the bolt will not amount to much without rebounding as a boomerang on the bolters, and this will be a rather serious matter for them.

"They have a tax collector to elect and do not want to endanger his chances by encouraging a division of the local vote.

"Up to the time of the recent convention it was understood that the tax collector in Plainfield was an appointive one, and Frank H. Smith, the present incumbent, is candidate for re-election. He is a supporter of the bolting faction.

"A few days after the convention when the Plainfield Common Council asked Corporation Counsel Craig A. Marsh for an opinion on the law regarding the election of tax collector, the latter said the office in Plainfield is elective. This put a new look on the situation. Had this opinion been given before the convention the delegates would have thought it over a couple of times before bolting and it is probable there would have been no bolt. With the collector at the mercy of the voters, a split in the local vote is one of the most undesirable of happenings, for there are the Democrats to reckon with, and they want to elect a collector.

"At the time of the bolt, Collector Smith was believed to be safe, and the bolting delegates were figuring on directing all their efforts to defeat William T. Kirk for assembly and electing four councilmen, so as to keep the local governing body under their control as it now is.

"No greater surprise, therefore, could have come to the bolters than Mr. Marsh's opinion on the collector's office.

"The threat to cut Kirk is a knife that cuts both ways. If the bolters cut Kirk, the supporters of Kirk would in turn vote against Smith for collector, and vote for such other councilmen to be elected this fall as would be opposed to the bolting faction.

"Up to this time the bolting faction has been able to make no deal with the Democrats, although in a quiet way such a move has been suggested. The Democrats still maintain an attitude of indifference to the Republican disaffection, and have frowned down all suggestions of a deal, thinking to fare as well from the Republican factional disturbance and still be independent, as to go into a deal.

"In the City Democratic Committee in Plainfield a few nights ago a motion was made to appoint a committee to confer with one from the Republican City Committee to arrange a trade of the city candidates for county candidates, but the venturesome member proposing it was promptly squelched.

"Both factions in Plainfield will rally to the support of Dr. J. C. Anderson for coroner. He was on the regular ticket which the bolting delegates refused to ratify, but they will vote for him in order to bring out the full strength of the party, so as to get a new basis of representation in convention next year."

THE FORMAL opening of the new club house of the Republican Club of the City of New York will occur next Thursday. This Club is the most prominent political social organization in New York City. For years it has been the ambition of the Club to own its own home. The new house at 54-56 West 40th St., just opposite Bryant Park, occupies 50 by 100 feet, is 10 stories high, and with the additional land owned by the Club, has cost about $700,000. The Club is thoroughly national in character, and its membership roll is honored with the names of President Roosevelt, the Governors of several States, and leading Statesmen throughout the country. One of the aims of the Club is to provide entertainment for visiting Republicans.

THE MISSOURI "razor-back" hog will now hand over the palm it holds for contrariness to Langley's air ship.

THE COMMERCIAL treaty between the United States and China, by which the open door for American trade in the Chinese Empire is secured, was signed Thursday.

A CALL for the Republican county convention of Somerset has been issued for next Thursday, to nominate a member of the Assembly and a County Clerk [illegible] offices.

A Chicago Business Man Said:

"I advise any one, young men in particular, to take out Life Insurance at once, as it tends to encourage thrift and habit of laying by a certain sum for the future."

A Powerful Flash Light.

Germany claims to have the biggest thing in the way of flash lights. The new flash light erected by the Imperial Government on the island of Heligoland is not only the largest in the world, but the most unique. Special credit, it is claimed, is due to the German technicians who persisted in their efforts until they perfected their plans, for they had to do it in the face of warnings from experts in all parts of the world. About the middle of the month experts were sent to France by the Imperial Government for the purpose of studying flash lights. They stayed long enough to learn what was best in the system decided thereto by the scientific men of the country, and on their return they set to work at once by means of two mirrors erected upon a reflector's glass parabolic similar to those of France and Belgium. Experiments were then begun. They went far beyond the most sanguine had hoped for. The revolving reflector of the German apparatus was identical to the Frenchman's revolving light. As soon as the experts had demonstrated their point, work was begun on a light reflector or projector equal to the largest ever used. It was designed to represent 30,000,000 candle-power, and to last no longer than one-tenth of a second. The flashes must follow each other every five seconds. In normal weather they may be seen twenty-three sea miles. When the weather is favorable the beams go far beyond the limit. The central fires or light rays. On the first night that the new light was used its peculiar, flashing beams were seen by people standing on the mole at Busum, a distance of sixty-five kilometres, or a trifle over forty miles. The watchers in the lighthouse at Amrum, about the same distance, were able, in unfavorable weather, to see the same beams as they rapidly appeared and disappeared.

Elephants Stop Train.

Railway trains have often been stopped by curious obstacles, but probably, says the London Animal Life, no engine-driver has had a more surprising experience than that which recently befell one employed on the Ceylon line. He turned a corner suddenly and found himself just behind a group of savage elephants. The great creatures, evidently finding the iron road a pleasant path for traveling, had formed themselves across it, making such a considerable obstruction that the train was driven off the rails before the driver could bring it to a stop. Then ensued confusion worse confounded. Passengers, but still more elephants. Happily the latter were not badly hurt; the latter [illegible] in wild confusion, utterly terrified by an enemy they did not understand.

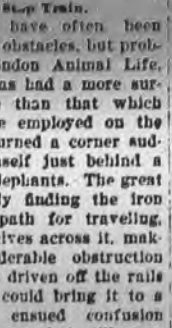
Bird Photography.

In the new method of the study and photography of birds, . . . [illegible] attempting to go to the bird, the bird is brought directly before the observer. The nest, young, branch, and all. The nest, whatever its original position, is moved with its supports to a favorable place for study. A green tent is then pitched beside it, and under this perfect screen the observer can watch by the hour and accurately record the shifting panoramic scenes of nest life. One might suppose that birds would desert their homes under such conditions, and thus promptly end the matter; but, instead, they forget the old home, adopt the new one, and defend it with all their customary vigor and persistence.—From "The Wild Bird by a New Approach," in the Century.

Wealth of Languages.

The English language, according to a German statistician who has made a study of the comparative wealth of languages, heads the list, with the enormous vocabulary of 260,000 words; German comes next, with 80,000 words; then Italian, with 75,000; French, with 30,000; Turkish, with 22,000, and Spanish, with 20,000.

ALL TIRED OUT.



The weary, worn-out, all-tired feelings come to every-body who taxes the kidneys. When the kidneys are overworked they fail to perform the duties nature has provided for them to do. When the kidneys fail dangerous diseases quickly follow, urinary disorders, diabetes, dropsy, rheumatism, Bright's disease. Doan's Kidney Pills cure all kidney and bladder ills. Read the following case:

Veteran Joshua Heller, of 706 South Walnut street, Urbana, Ill., says: "In the fall of 1899 after getting Doan's Kidney Pills at Cunningham Bros.' drug store in Champaign and taking a course of treatment I told the readers of the paper that they had relieved me of kidney trouble, disposed of a lame back with pain across my loins and beneath the shoulder blades. During the interval which had elapsed I have had occasion to resort to Doan's Kidney Pills when I noticed warnings of attack. On each and every occasion the results obtained were just as satisfactory as when the pills were first brought to my notice. I just as emphatically indorse the preparation today as I did over two years ago."

A FREE TRIAL of this great kidney medicine which cured Mr. Heller will be mailed on application to any part of the United States. Medical advice free; strictly confidential. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

NEW IDEAS in TOILETTES

New York City.—Capes or cape collars mark the season's simpler garments as well as those of formal wear. This stylish yet simple May Manton

MORNING JACKET.

morning jacket includes one of exceedingly graceful shape and is to be commended both from the standpoint of style and comfort. As shown it is made of blue challie, figured with black, and is trimmed with frills of lace beading, threaded with ribbon and fancy stitches executed in black corticelli silk; but the design is a simple one and can be utilized for washable fabrics as well as for the pretty wools and simple silks that are in vogue for garments of the sort.

The jacket consists of fronts, backs and side backs, and is finished at the neck with the wide cape collar. The sleeves are in bishop style and are gathered into straight cuffs at the wrists.

The quantity of material required for the medium size is three yards twenty-seven inches wide, two and three-quarters yards thirty-two inches wide or two yards forty-four inches wide with four and one-half yards of lace three and one-half inches wide for frills and one and three-fourth yards of beading to trim as illustrated.

made is voile, in the lovely shade known as mais or corn color, and the finish machine stitching with corticelli silk.

The skirt is made in three pieces and is laid in tucks at the sides and back which give a hip yoke effect. The fulness at the back is laid in inverted pleats and the flounce is seamed to the lower edge.

The quantity of material required for the medium size is twelve and three-fourth yards twenty-one inches wide, ten and three-fourth yards twenty-seven inches wide, nine yards thirty-two inches wide or six and three-fourth yards forty-four inches wide.

Sashes Will Be Popular.

Sashes will evidently be favorite accompaniments of the season's evening gowns, so many and so beautiful are the recently imported ribbons in six-inch and wider widths. These are printed in a variety of exquisite designs of flowers and leaves, and the colorings are of jewel-like beauty. A sash of heavy white satin ribbon has a narrow edge of black velvet, and an all-over design of vine leaves in several tones of gray velvet, shading from the most delicate pearl to stone color. The same ribbon is shown in green tones on a white satin foundation. A black taffeta sash has a design of shadowy gray ostrich plumes overlaid with pink roses. Holly berries and leaves in their natural colors on cream colored silk furnish a gay effect. In general, however, pastel and opal tones are preferred.

A New Material.

A new and popular material of the net class is tulle avaignee, a fine silk tulle with meshes forming symmetrical lace designs. It is much more durable than the ordinary tulle.

Colors That Find Favor.

Among colors other than blue and gray rich reds and browns will find favor during the coming season.

Woman's Tucked Coat.

Long coats that are tucked at both front and back are among the features of autumn styles and give just the long slender lines demanded by fashion. This one, designed by May Manton, is made of black satin faced cloth with trimming of Oriental embroidery, in dull colors edged with black velvet, but the design suits all cloak and suiting materials. The sleeves are specially noteworthy and smart, and, in addition to being among the latest shown, are ideally comfortable.

The coat is made with a blouse portion, that is fitted by means of shoulder and under arm seams, and the tunic which is joined to the blouse beneath the belt. Both portions are tucked and stitched with corticelli silk. The sleeves are made in two parts, the under portions being exceptionally wide and pleated to form the full puffs.

The quantity of material required for the medium size is five yards twenty-seven inches wide, three and one-half yards forty-four inches wide or two and three-fourth yards fifty-two inches wide.

FANCY WAIST, AND THREE-PIECE SKIRT LENGTHENED BY SHIRRED FLOUNCE.

Exceedingly Effective Costume.

Combinations of tucks and shirring are notable in many of the latest gowns and waists and are exceedingly effective in the fashionable soft materials. The very smart May Manton waist illustrated in the two-column picture is shown in white crepe de chine with yokes and trimming of Venetian lace, but is suited to washable fabrics as well as to silks and wools, and to the odd waist as well as the entire gown.

The waist consists of the fitted lining, with fronts and back of the waist proper. The lining is faced to form the yoke and the waist is shirred at the upper edge and tucked above the belt. It is gathered at the waist line and is slightly full over the belt. The closing is effected invisibly at the centre back. The sleeves are shirred at the shoulders, where they form continuous lines with the waist, so giving the desired broad effect, and the fulness is gathered to form soft full puffs at the wrists.

The quantity of material required for the medium size is five and three-fourth yards twenty-one inches wide, four yards twenty-seven inches wide, three and one-half yards thirty-two inches wide, or two and seven-eighth yards forty-four inches wide, with seven-eighth yards of all-over lace and two and one-eighth yards of applique to make as illustrated.

Skirts made with deep graduated flounces that are arranged in shirring at the upper edge are notable among advance models and will be greatly worn in all the thin and pliable materials which are so fashionable, including silk, wool, linen and cotton. The very graceful May Manton model illustrated in the large drawing includes wide tucks at the lower edge of the flounce and is shirred over heavy cords. The material of which the original is

TUCKED COAT.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE BY THE REV. DR. S. PARKS CADMAN.

The Distinguished Brooklyn Divine Delivers a Powerful Address Entitled "The Calling of Life"—Why We Must Offer to God Genuine Sainthood.

BROOKLYN, N. Y.—Dr. Samuel Parkes Cadman, pastor of the Central Congregational Church, occupied his pulpit for the first time Sunday morning since his vacation and his return from Europe. A large congregation had assembled. The sermon was upon "The Calling of Life," and the text from the First Epistle to the Corinthians i:2, "Called to be saints." Dr. Cadman said in the course of a strong sermon:

To-day we enter upon the fifteenth year of our church's existence and work. Behind us lies the honorable past, conferring obligation more than feeding pride, a holy prophecy in living deeds and a strong root of confidence that God, even the God of our fathers, who has reared this pillar to His name and glory, will not break it in the midst. So this year of jubilee is upon us, and these considerations make it a priceless possession which our stewardship must guard and increase.

These divisions of time are arbitrary, but influential. January 1 is but a moment's space from December 31, and yet the birth of a new year has witnessed in numberless instances spiritual and moral revolutions. A few hours separate Good Friday from Easter Day, but if near in time, how distant are they in meaning! These distinctions of the calendar arrest us. They break the crust of our conventionality, they recall us to our original work and purposes and they inspire us with the realities of vision and of hope.

Let us beware of blaming our surroundings for our weakness, our failure to instrumentally convert men and control the present world in the interests of the kingdom. The scant supply of living waters is too often caused by the choked pipe and its paucity prevents many from seeking it.

Pastors, teachers and workers of all churches should remember that the mighty tide of God's life and blessing finds its way to human hearts through their appointed agencies. And the greatest church among us is only like a port on the ocean's shore, dependent on it for increase and for strength.

Dredge deep the bar and cleanse away the silt of daily cares. Then, when the text is thus understood and obeyed, commerce with the unseen world shall bring us weather freights, and life, which now seems far away, and inland shall be lifted upon the resistless influence of blessing and brought back to God.

But sainthood is no passive movement, dependent on our inaction, hesitating when we are alert and shy of any effort we can make to secure its franchise. It absorbs into one flame of devotion altar and sacrifice. It insists upon the full employment of every capacity and new and better obediences. It bids you rise from the low grounds of despair and cease to say: "What might I not have made of Thy fair world had I but lived Thy highest." God's love and health are yours, willing to meet your readjustment of energy and of aim.

Lord Salisbury's favorite advice to those who pestered him about his world-compelling diplomacy bade them "Study larger maps." And the sweep of God's plan in your life and mine is wide unto the infinite, tender and wise and capable beyond our utmost imagination. When the apostle wrote these words he was conscious of their high supremacy, and yet they are but a faint reflection of the weight of glory God has chosen to give perfected character after the pattern of the Master.

If we see the excellency of this calling it should mean for us the objective point where the finest energies of the soul are constantly in service. The pity of it is that we are busy overmuch in trivial and immaterial things and struggle in the meshes of the commonplace.

Our soul's pace is liable to be set to permissible strains, where noble means are used for little ends. Strenuous life is wise when its aims are correspondingly high, but it was said of a noble Roman "Domitian is always busy—catching flies."

To be born a man and die—not a saint, defeats the central thought of our loving Creator. Manhood sacrificed to anything less than the Maker's purpose is manhood lost. We may pursue the petty round until high achievement and its possibility are paralyzed.

You naturally ask, What is sainthood? It is spiritual health and moral thoughtfulness. "It is," to quote a significant utterance of Dr. Arnold, of Rugby, "the inquiring love of truth sustained by the devoted love of goodness." It is wholesome, because it is holy, set about and adorned by the abiding beauty of holiness, rightly understood. It is practice, not theory; consecration, not perfection; a condition of character and not a theological definition. It is the kinship in willing and feeling of your spirit to the spirit of Christ, who was the very will and heart of God in human flesh.

Because it flows out of the fulness of God and is accepted by our belief, it is a catholic blessing, and there has been no more mischievous teaching than that which has limited it to a sect within the church. Being God's gift, its only condition of existence in you is your hearty love, and acceptance of the same, followed by constant effort to walk in Christ's way. Alike for all who profess and call themselves Christians, for brilliant but blameworthy Ephesus, for Sardis and Laodicea, with little more than a mere name to live; let none draw back from this divine election or declare the vision is not for them.

Many shrink from this term "saint" because it has been defamed by the charlatan and soiled by all ignoble use. Pharisaical sanctimoniousness and bigoted exclusiveness and false standards of the real measure and quality of sainthood have hindered its free range.

But, rightly known, it is the spirit of the heavens within the wheels of earthly intercourse.

Cardinal Newman reflected upon the churches of this birth that she failed to produce sainthood, and the Roman communion, he declared, was first and singular in this respect. How rudely he challenged American complacency some of us know. Capable of much, it was wanting here. Bishops, theologians, exegists, ecclesiastical statesmen it could and did afford, but saints, no. Bishop Kew, John Keble and Richard William Church are sufficient evidence to the contrary. And I only quote the cardinal to show how segregated ideals and types of sainthood may mislead a foreseeing spiritual genius.

The challenge Newman flung down we are bound to take up for ourselves. No more searching question than this can be brought to our fiftieth anniversary. How is this ideal of the New Testament being realized by the flock of God?

His we are whom we serve. He justly claims us for His own, elect and precious. And beyond our cautious Puritan temper and our dislike for the mystic and the esoteric all the heaven of His purpose awaits the sweep of our faith. I plead for abandon in the front of this gracious calling; for that sanctified recklessness which led St. Augustine to cry, "Give what thou commandest, then command what thou wilt."

Two main lines of Christian culture are open to us all. First, we can seek for a renewed, invigorated personal relation to God. Detached from minor entanglements, we may prove with the pure in all ages that the frontiers of a man's life are not the threshold. Remote, aloft and lonely is the summit of uncreated strength and goodness.

And second, from the mount to the multitude is but a step. Christ continually took it, meditating between the vigil of the night and the burden of the day.

What can I be? What can I do? Answer, oh, thou God of my people, thou Redeemer of my soul!

Neither of these methods of soul development should be without its partner. "Solitude is to character what space is to a tree." And alone with God, our hiding place is no cell where "we wind ourselves too high for sinful man below the sky," it is the sanctuary where strength and wisdom are nourished for the daily battle.

Service is to character what athletics are to the physical frame. And when all apologetics fail to halt the proud concourse of an alien world, duty well conceived and done can turn the wondering multitudes from their fruitless quest and make them ask, whence received these Gordons and Livingstones their warrant? The nameless saints who heal the wounds of the world and would blush to give their deeds a name, are the joy and crown of the Bridegroom and His Bride. Those who lay upon themselves the lowliest duties, who claim in modest retirement their alliance with the unseen but revealed One, are at this very hour the salt, the leaven, the preservation of God's cause upon the earth.

Both these methods of solitude and service centre in Jesus Christ. He is our unfailing supply, the Mediator of the covenant in all its branches. In Him the best, the real self of men is revivified and reinforced. And as we appropriate His life and His example we make our largest gains in the infinite, the eternal, the holy and the good. In Him we are commended, redeemed and called unto this fellowship.

When governing forces around us are brutal, when certain aspects of national existence are without a moral gleam, when practical infidelity displays its lures and vices catch the unwary, how should we order ourselves save by the light of this command the text enjoins? What humanity primarily needs is not a changed environment so much as a regenerated heart.

I noticed on our homeward voyage that the gianless steamship Cedric, because of her bulk, outrode the fierce Atlantic. By virtue of her increase the proud waves were stayed. How many men dread the sea of life with its adventure, because their size is unequal to the shock. So they tarry in the harbor till death's fog covers all, their work not done.

And in order that lynchings may cease, and justice be undefiled, and the fool and the knave plucked out of the seats of leadership, and the demagogue and the trickster cease to defraud labor communities, and defeat lawful enterprise, one radical and sufficient step must be taken, and the church must take it. We must offer to God and to society genuine sainthood. For its verities I am thankful, as for the different colors and scents of a garden of flowers. A St. Francis, a Cromwell, a Wesley, an Edwards; one loving devotional retirement, another political action, a third the flaming evangel, a fourth profoundest thought, but all in their different guise the fruit of the tree of life whose leaves are for the healing of the nations. These spell across a world's program the great words, God, the soul, immortality and honor.

Ingratitude.

Ingratitude in those who have helped in their desire to do better things will not injure you in the least particular, if you steadfastly refuse to allow it to stir up your feelings, and to make a way into your heart for anger, and what is born of it. You have had reward enough in being permitted to do the Christlike office of helping the unfortunate and the sorrowful. Take that gift and be glad.

The twinge you feel may be a reminder that your motives were not pure, but were mixed with something which you are not willing to admit to yourself in doing the good which you did, and that the ingratitude of which you complain is sent of God to make this revelation that you may have a further reward in getting to know what is in yourself. As much which profits you is from what is bitter, and as God is seeking to make the best possible use of you in this world, and to have you prepared for the glorious future to which you aspire, then thank God for the ingratitude you feel so greatly because of the hidden store of evil it shows you in yourself, and at once cooperate with God in getting rid of it. When this has been done faithfully, and you find that you are able to see such ingratitude with a smile of content, and thus realize that what you do for others is for Christ's sake, and not for other motives, you have reached a spiritual condition which is approximating what you are to be for ever when you are following the Lamb whithersoever He goeth in heaven. What we bear for Christ is as much an indication of His spirit being in us as what we do for Him and His cause. It is a great and consolatory truth that Christ is our burden-bearer, but it is also true that we are to follow Him in bearing the contradiction of sinners against our peace of mind with the same spirit He showed when in the toils of the wicked.—Presbyterian Journal.

How to Begin the Day.

I begin my day's work some mornings, perhaps wearied, perhaps annoyed by a multiplicity of trifles which seem too small to bring great principles to bear upon them. But do you not think there would be a strange change wrought in the petty annoyances of every day and in the small trifles that all our lives, of whatever texture they are, must largely be composed of, if we began each day and task with that old prayer: "Rise, Lord, and let Thine enemies be scattered?" Do you not think there would come a quiet in our hearts and a victorious peace to which we are too much strangers? If we carried the assurance that there is One that fights for us into the trifles as well as into the sore struggles of our lives, we should have peace and victory. Most of us will not have many large occasions of trial and conflict in our career, and if God's fighting for us is not actual in regard to the small annoyances of home and daily life, I know not for what it is available. "Many mickles make a muckle," and there are more deaths in skirmishes than in the pitched field of a great battle. More Christian people lose their hold of God, their sense of His presence and are beaten accordingly, by reason of the little enemies that come down on them like a cloud of gnats on a summer's evening, than are defeated by the shock of a great assault or a great temptation, which calls out their strength and sends them to their knees to ask for help from God.—John Watson, D. D.

The Rent Provided.

I was pastor of a small Western church and my salary was not very large. One Saturday afternoon wife and I found that we did not have enough money to pay the rent, which was due the next Monday.

We knelt in prayer and asked our heavenly Father to supply our need as He had promised to do. We prayed for $5. The next morning at Sabbath-school, a good brother who was a member of another church, came to me and asked if I needed $5. I said, "Well, to tell the truth, I do." He then said that during the previous night he awoke at midnight and the first thing he thought of was, "You give Brother —— $5." After thinking it over a few minutes he said, "All right, Lord," and went to sleep.

The next morning he approached me as above mentioned, and handed me the $5. The incident is the more remarkable because this brother was a heavy contributor to his own church in another city, and while he worshiped with us and helped with the incidental expenses, yet he had never been a contributor to the pastor's salary.—H. C. S., in the Epworth Herald.

Our Friend.

We have a friend who knows us better than we know ourselves, loves us better than we love ourselves, helps us when we cannot help ourselves, and in the midst of our deepest despair breathes into our heart the breath of a new and divine hope. —James Freeman Clarke

Animals as Sailors.

A French scientist has made some interesting observations as to the love of different wild animals for the sea. The polar bear, he says, is the only one that takes to the sea, and is quite jolly when aboard ship. All others violently resent a trip on water, and vociferously give vent to their feelings until seasickness brings silence. The tiger suffers most of all. The mere sight of a ship makes him uncomfortable, and when on board he whines pitifully, his eyes water continually, and he rubs his stomach with his terrible paws. Horses are very bad sailors, and often perish on a sea voyage. Oxen are heroic in their attempts not to give way to sickness. Elephants do not like the sea, but they are amenable to medical treatment.

One of King George's Ships.

The old British receiving ship Urgent, which has been used at Jamaica for a number of years by the English navy, has arrived in Norfolk harbor in tow of the tug Powerful from Bermuda.

The Urgent was at one time one of the best ships of the British navy and was one of those used by King George against the United States in the war of 1812. The old vessel has been purchased by a shipping firm in Boston and will be converted into a coal-carrying barge. Her timbers, made of wood raised in England, are almost as good to-day as they were the day she was launched.—Philadelphia Record.

The finger of scorn often has a wedding ring on it. N. Y. 41.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & Co., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by their firm.

WEST & TRUAX, Wholesale Druggists, Toledo, Ohio.

WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, Ohio.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c. per bottle. Sold by all Druggists.

Hall's Family Pills are the best.

Fall in Birth Rate.

The best calculation that can be made shows that the average number of children in the white native family a century ago in the United States was more than six; in 1830 it had fallen to less than five; in 1860 to less than four; in 1872 to less than three; in 1900, among the "upper classes" in Boston, to less than two.

One of Nature's Marvels.

That is the problem which frequently confronts everyone—especially parents with small children. A slight illness treated at once often saves a long period of sickness and expense—sometimes prevents death. The trouble is that so few people can think on the instant what treatment to apply, even if they have the knowledge necessary to recognize the disease and know what simple remedies are best. To meet this want at small expense the Book Publishing House, 134 Leonard street, New York City, is sending postpaid a doctor book on receipt of sixty cents in stamps. The book is illustrated, contains 508 pages, explains symptoms, causes and simple means of overcoming ordinary illnesses. It was written by the eminent J. Hamilton Ayres, A. M., M. D. It is a volume which should be in every household, as no one can tell what moment he may require the knowledge it contains.

The Bodleian library at Oxford is just three centuries old. It is the largest university library in the world.

Bilious?

Dizzy? Headache? Pain back of your eyes? It's your liver! Use Ayer's Pills. Gently laxative; all vegetable. Sold for 60 years. J. C. Ayer Co., Lowell, Mass.

Want your moustache or beard a beautiful brown or rich black? Use BUCKINGHAM'S DYE

No Hair?

"My hair was falling out very fast and I was greatly alarmed. I then tried Ayer's Hair Vigor and my hair stopped falling at once."—Mrs. G. A. McVay, Alexandria, O.

The trouble is your hair does not have life enough. Act promptly. Save your hair. Feed it with Ayer's Hair Vigor. If the gray hairs are beginning to show, Ayer's Hair Vigor will restore color every time. $1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

W. L. DOUGLAS $3.50 & $3 SHOES UNION MADE

You can save from $3 to $5 yearly by wearing W. L. Douglas $3.50 or $3 shoes.

They equal those that have been costing you from $4.00 to $5.00. The immense sale of W. L. Douglas shoes proves their superiority over all other makes.

Sold by retail shoe dealers everywhere. Look for name and price on bottom.

That Douglas uses Corona Colt proves there is value in Douglas shoes. Corona is the highest grade Pat. Leather made. Fast Color Eyelets used. Our $4 Gilt Edge Line cannot be equalled at any price.

Shoes by mail, 25 cents extra. Illustrated Catalog free. W. L. DOUGLAS, Brockton, Mass.

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

I PAY SPOT CASH FOR MILITARY BOUNTY LAND WARRANTS issued to soldiers of any war. Write me at once. FRANK H. REGER, Barth Block, Denver, Colo.

TARRANT'S SELTZER APERIENT. Used by American Physicians since 1846.

Cascarets

CANDY CATHARTIC

GUARANTEED CURE for all bowel troubles appendicitis, biliousness, bad breath, bad blood, wind on the stomach, bloated bowels, foul mouth, headache, indigestion, pimples, pains after eating, liver trouble, sallow skin and dizziness. When your bowels don't move regularly you are sick. Constipation kills more people than all other diseases together. It starts chronic ailments and long years of suffering. No matter what ails you, start taking CASCARETS today, for you will never get well and stay well until you get your bowels right. Take our advice, start with Cascarets today under absolute guarantee to cure or money refunded. The genuine tablet stamped C C C. Never sold in bulk. Sample and booklet free. Address Sterling Remedy Company, Chicago or New York. 508

Burglars at Bernardsville.

Several mysterious attempts have been made during the past few weeks to enter the residence of Charles E. Humphreys at Bernardsville. One night about two weeks ago the members of the family were aroused by a noise at one of the windows on the ground floor and on investigating the presence of two men crouching near the side of the house was detected. They were immediately ordered off the premises by Mr. Humphreys who discharged his revolver to speed them on their way.

Again on Sunday at midnight, in the absence of Mr. and Mrs. Humphreys, entrance was effected through a side window. The noise awakened the maid and children, who immediately called to neighbors for help, causing the invaders to hastily decamp without securing any booty.

Other residents in the same vicinity have been annoyed of late by suspicious characters, prowling around their premises, all of which has intensified the desire for police protection.

Valuable Property at Auction.

Of interest to boroughites Judge H. Hand wishes to call attention to sale by auction on October 28 next, of the houses and lots located at No. 5 Rockview avenue, 43, and 45 Prospect place—three very desirable residences, which will be sold to the highest bidder to close the Doremus estate.

The sale will take place at 2 o'clock p. m., beginning at 45 Prospect place, on the premises.

This will be a grand opportunity for some one to secure valuable property at a nominal price, as the sale is guaranteed *bona fide*. it

AMONG OUR ADVERTISERS.

If you need a stove for this winter why not call at the store of the Gayle Hardware Company, and inspect their large assortment?

Drs. Frank Fielde Wilcox and Nell Sigler Wilcox Osteopathic Physicians have removed from 132 to 108 Crescent avenue where they are permanently located.

Sattel, the piano dealer, is making a special sale of 1000 pieces of classical music at ten cents a copy, which means you can secure ten pieces of music for about the usual price of one.

Some of the most desirable building lots in the borough, situated on Westervelt avenue, between Grandview and Summit avenues, will be sold this afternoon at auction. See particulars in advertising column.

One of the most popular stores for all kinds of meat and sea food is that of Fred Endress. This week he calls special attention to his fine stock of home-dressed Jersey lamb, chickens for broiling, also fowls, Long Island Ducks, Jersey pork and sausage.

The rush for clothing, furnishing goods hats and shoes for this coming season has been greater than Manager Harry Feinberg, the popular-priced outfitter anticipated when he opened his store at 329 West Front street, six weeks ago. Fresh goods are arriving daily, from which he is constantly filling the wants of the people. His motto is "satisfaction guaranteed or money refunded."

Samuel Hollingsworth, a mechanical engineer, who has held the position of designer for the Campbell Printing Press and Manufacturing Company and for the Potter Printing Press Company, of Plainfield for the last seven years, has opened an office in the Babcock Building and has taken up a general engineering practice making a specialty of machine designing. Mr. Hollingsworth has the hearty co operation of his former employers and has already secured valuable contracts for the design of special machines.

LEGAL NOTICES

SHERIFF'S SALE.
IN CHANCERY OF NEW JERSEY.

Between Emma F. Hobbs, Complainant, and George M. Merrill et als. Defendants.—Fi. Fa. for sale of mortgaged premises.

By virtue of the above-stated writ of Fi. Fa., to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE SECOND (2) DAY OF NOVEMBER NEXT,

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit:

All the following tract or parcel of land and premises hereinafter particularly described, situate, lying and being in the borough of North Plainfield, in the county of Somerset and State of New Jersey, bounded and described as follows, to wit:

Beginning at a stone in the middle of the road and Warren st. and corner of Isaac Manning's land; thence along the middle of Warren st north (47½) forty-seven and one-quarter degrees west two chains and eighty-four links to a stone, another of said Manning's corners; thence north (42½) forty-two and one-half degrees east ninety links to a stone in David Coon's corner; thence south 47½° east two chains and eighty-four links to a stone in Pearl street; thence along said Pearl street south forty-two and one half degrees west ninety links to the point or place of beginning. Containing one-quarter of an acre of land, more or less. Being the same premises conveyed by Emma F. Gamberton, now Emma F. Hobbs, to George M. Merrill, by deed dated December 18 1901.

CALVIN D. McMURTRY, Sheriff.
JOHN H. O'CONNOR, Solicitor.
Dated September 21, 1903. (8.10)

Election Notice!

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the County of Somerset will hold their first meeting on

TUESDAY, SEPT. 1, 1903.

At 10 o'clock in the morning, at such places as may be designated by the Township Clerks of the respective townships of said county. Such boards shall organize according to law and then proceed to ascertain the names and residences of all the legal voters in their respective districts, by making actual inquiry at every dwelling house or habitation, or of the head of every family residing therein, and shall continue such enumeration of voters from day to day, on successive days, completing same on or before Friday, Sept. 4. (Sec 23 Election law.)

SECOND MEETING
AND PRIMARY ELECTION

Said Boards of Registry and Election will also meet on

TUESDAY, SEPT. 8, 1903,

At the same places from 1 until 9 p. m., for the purpose of transcribing and making up from its canvass books two lists of all persons entitled to vote in its election District, who shall personally appear before the board for that purpose, or be shown to its satisfaction by the affidavit in writing of some voter in the election district to be a legal voter therein.

On the same day between 1 and 9 o'clock p.m., the Primary Election shall be held in every election district in the County of Somerset.

THIRD and FINAL MEETING.

Said Boards of Registry and Election will also meet on

TUESDAY, OCT. 27, 1903,

At the same places, and between the hours of 1 p. m. and 9 p. m. for the purpose of revising and correcting the Original Registers, and for adding thereto the names of all persons entitled to the right of suffrage in such Election District at the next election.

Notice is hereby given to all Boards of Registry and Election in the County of Somerset that they are required to strictly observe Sections 24 and 32 of "An Act to Regulate Elections (Revision ('89 of 18' approved April 4, 1898, and that the County Board of Elections will be in session in Somerville on

Wednesday, Oct. 28, 1903,

For the purpose of receiving the registers and receipting for affidavits, etc.

General Election Nov. 3, 1903

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman.
J. H. MATTISON, Secretary.

...Willis, of New York delivered an interesting lecture on "The Human Face and What it Indicates" before the Plainfield Business College last evening.

On account of delay in the repairs which are being made in the First M. E. Church, Plainfield, no services will be held in the edifice until November.

Attorney Vincent W. Nash, Jr., of Plainfield, has been licensed to practice as a Solicitor of Patents before the Commission of Patents at Washington, D. C.

Members of the Young Women's Mission Band of Trinity Reformed Church, Plainfield will give an entertainment at the Y. M. C. A. Hall, Tuesday evening, October 20.

Miss Sarah Gibb Stell, of Westervelt avenue and Samuel Kirkpatrick Boyle, of Newark were married Thursday evening by Rev. Peter Gibb, pastor of the Baptist Church at Millington.

Miss Carrie Pangborn, daughter of William N. Pangborn, of this borough, who was in the Westfield wreck last January, has received $2100 from the Reading Railroad Company for injuries sustained.

Rev. Dr. J. A. Chamblias, of Orange will preach at the First Baptist Church tomorrow, and commencing November 1, will continue to occupy the pulpit until a successor for Rev. Dr. D. J. Yarkes has been chosen.

Walter Carpenter, who was struck by a Royal Blue Line flyer on the tracks of the Central Railroad last ... died Monday night in Muhlenburg Hospital. Carpenter was a printer and lived in Lancaster, Pa., where he leaves a widow.

Dayton Mellick, of Oak Tree, while suffering from intense pain caused by a carbuncle on his wrist became temporarily insane, shot and killed himself Thursday morning. The funeral services will be held from his late home at 2 p. m. today.

The Union Bible Class tonight by Rev. D. M. Stearns will meet at the Y. M. C. A. Hall on Tuesday afternoon next at 2:15 o'clock. Mr. Stearns will this season take up studies in Genesis and Revelations, in additon to the International Sunday School Lesson. All are invited.

Members of the Reform Club have been holding meetings all this week. Interesting speakers such as George White, of Jersey City, of the Crittenden Mission of that place and James Johnson, of the National Florence Crittenden Association of New York City have given some very stirring talks on temperance.

Rev. George Bowers will address the Y. M. C. A. meeting Sunday afternoon at 4 o'clock. Douglas Lane, basso, of the Mendelssohn Club, of New York, will be the soloist. Mr. Bowers is a favorite speaker in Plainfield and Mr. Lane will be remembered as one of the soloists in the oratorio of the Messiah that was given a few years ago in the Crescent Avenue Church.

Jenkins—Cooley Nuptials.

Miss Eleanor Clifton Cooley, daughter of Mr. and Mrs. Justus H. Cooley, of Westervelt avenue, this borough, and Henry Carpenter Jenkins, of Brooklyn were married in the Friends' Meeting House last Wednesday at 1.30 p. m.

The marriage vows of the bride and groom were pledged in the presence of the committee of overseers, Mrs. Anna Rice Powell, Mrs. Cornelia A. Gavett, William Angell and William D. Williams, and the relatives and friends of the family.

The bride, who was daintily and becomingly gowned in peau de crepe and point lace, wore a veil and carried a bouquet of lilies of the valley and bride roses with white ribbon bows and loops artistically interwoven. She was attended by her sisters the Misses Agnes and Marjorie Cooley and Miss Elizabeth L. Haviland, of Bellefontaine, Ohio. Howard W. Jenkins, brother of the groom was the best man and Howard W. Drake, of Brooklyn and Walter K. Cooley, of Mount Vernon, N. Y. were the ushers.

An informal reception was held at the home of the bride's parents, where a wedding luncheon was served to a few immediate relatives and friends and the bridal retinue.

The newly wedded couple endeavored to escape from the house unnoticed, by taking a carriage at the side door and driving to the Westfield station, but they were followed by friends in another carriage.

Upon the return of Mr. and Mrs. Jenkins from Massachusetts, where they will spend two weeks, they will make their home in Brooklyn.

The bridal presents were handsome and numerous, among which was a substantial check from the firm of Goesbeck & Company, Wall street brokers, with which firm the groom is connected.

A Coming Borough Wedding.

Miss Elsie Giles, daughter of Mr. and Mrs. Isaac R. Giles, of Grove street will be wedded by William Sebring, Jr., Monday evening, October 29. Rev. J. W. Richardson, of Stamford, Conn., formerly pastor of the Park Avenue Baptist Church, Plainfield, will tie the nuptial knot.

The Baldwin Will Case.

The litigation in the Supreme Court over the will of Mrs. Mary F. Baldwin, involving an estate valued at $100,000, has been disposed of by the dismissal of caveat, which Hugh C. Baldwin, of Plainfield, a son of the testatrix, filed against the probate of the instrument. There were five other beneficiaries, beside himself, named in the will.

It was alleged that the will had been executed as the result of undue influence practised upon Mrs. Baldwin. The court however, has held that the provisions of the instrument are valid, and that the son if he desires to share in the property must come in equally with the five other beneficiaries, as provided in the will.

William B. Wadsworth, of Plainfield, and Henry C. Niles, who were named as executors of the estate in the will, were given letters testamentary by the court.

Freeholders Financial Report.

The Somerset County Board of Freeholders met last Tuesday. Resolutions for improvement of roads from Davidson's bridge to Blazure's corner, from Far Hills to the Morristown line and Mountain avenue were passed.

The County Collector was authorized to borrow $20,000.

The Finance Committee reported expenditures to date as follows:

Courts			$5,565 77
County Jail			761 02
County Buildings and Grounds			3,029 69
Lunacy			5,090 05

Elections			1,694 69
Armory			80 00
Roads			19,835 67
Total			$54,479 86

An auction sale of valuable borough property is advertised on last page—a genuine bargain for some one.

The entertainment committee of the Woman's Guild, of the Church of the Holy Cross will hold a cake sale this morning in the parish house.

The funeral services over the late John Johnson whose death occurred last Monday evening, were held Thursday afternoon. Rev. Cornelius Schenk officiated. Interment was made in the North Plainfield Cemetery.

SUBURBAN NOTES.

WATCHUNG.

The road between the trolley terminus and Wilson's stone crusher is in a very bad condition after the storm, and nothing has been done toward bettering it. It is time that the committeeman responsible for the condition of this road should get a hustle on himself.

The storm did considerable damage in this vicinity to roads and private property. A stone wall belonging to Dr. Chas. Moldenke was undermined and toppled over. Cellars were flooded, but nothing more serious.

Rev. Dr. Chas. Moldenke will preach at the German Lutheran Church on Grove street, Sunday morning. As he is a very interesting speaker it is hoped a large number will be present from here.

George Williams our genial storekeeper, is all smiles over the arrival of a little son at his house.

* * *

LIBERTY CORNER.

Mrs. Froehling is visiting friends at Bedminster.

Mr. and Mrs. Wilcox, of Somerville, visited W. O. Allen, on Sunday.

Mr. and Mrs. J. M Dean, of Brooklyn, were guests at the parsonage on Sunday.

A supper will be held in the Presbyterian Chapel on Tuesday evening, October 27.

Misses Emma Woods and Mary Cross are delegates from our Christian Endeavor Society to the State Convention which is in session in Orange this week.

* * *

DUNELLEN AND NEW MARKET.

The family of Wyckoof Voorhees has returned home after a week's visit with Mr. Voorhee's relatives who reside in Trenton.

Rally day will be observed in the Presbyterian Church next Sunday, but there will not, in all probability, be any services in the evening.

George Blair has resigned his position in the L. & G. Steel Works to take charge of a baker route which he has purchased from Lerme Merle. Mr. Merle purchased it from William S. Smith.

Mr. and Mrs. Robert Giddes, of Philadelphia, spent Sunday with the former's parents, Mr. and Mrs. Isaac Giddes, of the borough.

It's a boy, and it came on Sunday evening to gladden the hearts of his parents, Mr. and Mrs. Mahlon Dayton.

Mrs. Thomas C. Bodine will be one of the delegates from the borough to the State W. C. T. U. Convention to be held at Morristown next week.

It was Michael Moynihan and not John, as was reported, whose train killed Miss Louise Matthews, at Bound Brook, on Tuesday morning. They are brothers but the latter lives here and the former resides in Bound Brook.

The L. & G. Steel Works are very slack at present on account of inability to procure sufficient iron to complete their contracts. They have been compelled to lay off the majority of their help indefinately.

There is a report of the serious illness of Dan Moody, who is at present in Newport News, Va., but there has been no authoritive statement as yet.

Rev. N. J. Sproul will preach his farewell sermon to the congregation of the Presbyterian Church Sunday morning, as he has accepted a call from a church in Boston, Mass., where he will have a much larger field to work in. Mr. Sproul deserves great credit for the faithful work done here as shown by the church in the past three years, increased membership and also the lifting of the Church debt. He has the many well wishes of the entire community.

Miss Frances Hayes passed away at the home of her parents, Mr. and Mrs. Hubbell Hayes, last Saturday. The funeral services were held Tuesday afternoon, Rev. N. J. Sproul and Rev. Mr. Cubberly officiated. Miss Hayes was very popular in this place and Plainfield where she resided several years. Last fall she contracted a cold which resulted in her death last week.

The fire bell was received on Monday and also the tower work is being rapidly pushed so as to have everything complete before Saturday.

Miss Annie Egany was married on Wednesday morning to William Stein by Rev. Father Francis at St. Johns Church a large number of friends being present. They will reside in Lincoln.

It is reported that a local foot ball team has been organized with "Jack" McMahon as captain. Jack has thus far appointed Ernest Peters, Chas. Lake, Kormie Cople, Lewis Churchill and a few other professionals.

A little boy at the home of Mr. and Mrs. Ed. Ayers.

A. G. Nelson will open his doors to all those who wish to patronize the dime social which will take place next week under the auspices of Christian Endeavor Society of the First Baptist Church.

SOMERSET COUNTY REPUBLICANS.

Convention Nominates A. G. Anderson for Clerk, Chas. M. Dolliver for Assembly, W. H. Toms, for Coroner.

The Republican convention had a very harmonious meeting and nominated the following ticket:

For County Clerk, A. G. Anderson, of Somerville; for member of Assembly, Charles M. Dolliver, of North Plainfield; for Coroner W. Howard Toms, of Warren.

The meeting was called to order by Jos. S. Frelinghuysen, chairman of the County Executive committee. Jas. A. Metz, Jr., was selected temporary secretary, both of whom were made permanent. John C. Cooper read the call.

With few exceptions all the regular delegates answered to roll call, and there being no contests, very little preliminary work was necessary.

The following committees were selected:

CREDENTIALS—Chas. E. Van Nuys, Edwin S. Voorhees, Ditmar Van Nostrand, A. H. Conyne, J. L. Moore.

PERMT ORGANIZATION—John Frost, Samuel Davenport, Jacob Woodruff, J. H. Fisher, W. H. Higgins.

RULES—L. T. H. Shaefer, J. S. Frelinghuysen, John C. Cooper, J. Bradford Opie, James Q. Dolliver.

RESOLUTIONS—Frederick Prout, A. C. Clark, L. C. Mack, Thomas Douglass, Dr. Henry.

After hearing the reports of the committees, adjournment was taken for luncheon, and reconvened at 12:45 when the business of nominations was immediately taken up.

A. G. Anderson, of Somerville and Alfred Gibbs, of Bernards, were nominated for County Clerk. Anderson received 36 votes and Gibbs 5. [illegible] made unanimous.

For member of Assembly, Charles M. Dolliver, of North Plainfield, was nominated. No other nominations being made, Mr. Dolliver was chosen by acclamation. Robert Clark, Jr., chairman of North Plainfield delegation, in seconding Mr. Dolliver's nomination, distinguished himself by a most enthusiastic, patriotic speech which called forth great applause Mr. Clark has a most pleasing voice. Those present who heard him speak for the first time were astonished at his eloquence. Mr. Clark stated that the Republican party always chose men of character as its representatives, and on this occasion, they had selected a young man whose ancestors were born in New Jersey and who were part of Somerset county; a man whose character and ability were well known, a man who was a fitting representative of the party.

Henry DeMott, of North Plainfield, and W. Howard Toms, of Warren were nominated for Coroner.

As North Plainfield had already received the assembly nomination, the Chairman of the North Plainfield delegation withdrew the name of Mr. DeMott and Mr. Toms was the unanimous choice.

The candidates for Clerk and Assembly were introduced and made a few well chosen remarks. Mr. Dolliver after thanking the convention said:

"I can assure you that I am not committed to any faction, but that I am a Republican, and if elected I will look out for the welfare of the people of this county and the interests of the Republican party."

Mr. Frelinghuysen and Mr. Smalley were called for and responded with short speeches.

The County Committee now consists of the following, who will meet next Saturday afternoon at 2 o'clock at Crawley's Hotel for the purpose of reorganizing:

BEDMINSTER—Chas. Wyckoff, Jno. Frost.

BERNARDS—L. T. H. Schaffer, Robert Kay, Thomas Douglass, Fred Prout.

BRANCHBURG—Henry Baird, J. L. Schenck.

BRIDGEWATER—C. H. Bateman, Frederick A. Pope, J. S. Frelinghuysen, H. F. Galpin, G. W. Hope.

BOUND BROOK BOROUGH—David Hastings.

FRANKLIN—J. H. Fisher, Ditmar Van Nostrand, Geo. Wolf.

HILLSBORO—Jno. S. Ammerman, Jno. Saums.

MILLSTONE BOROUGH—P. V. De Van Doren.

MONTGOMERY—Jno. E. DeHart.

NORTH PLAINFIELD TOWNSHIP—Dr. R. Moldenke.

BOROUGH NORTH PLAINFIELD—N. B. Smalley, Robert Clark, Jr.

ROCKY HILL—Edwin S. Voorhees.

WARREN—Jno. C. Cooper.

SUCCESS WELL DESERVED.

RAPID RISE OF POPULAR OFFICIAL.

The qualifications of the individual who achieves success in this day and generation, form an interesting and absorbing study to those who watch with interest the swiftly moving current of events, and it is plainly apparent that if one man achieves marked success above his fellows that this man must of necessity possess the qualifications, knowledge, tact and diplomacy which go to make his services of superior value to himself if he is a merchant or manufacturer or to a corporation if his duties fall in that direction.

Any one who can by his individual exertions rise in the railroad service from a clerk to be vice-president and general manager of a great railroad system in fifteen years is a remarkable person, and such a man is W. G. Besler, vice president and general manager of the Central Railroad of New Jersey.

Mr. Besler comes from a family of railroaders. His father, J. D. Besler, is a railroad official of wide experience and from 1885 until quite recently, when he was advanced to a higher position in the service of the Chicago, Burlington and Quincy, was general superintendent of that road with headquarters in Chicago.

The present head of the New Jersey Central was born in Galesburg, Ill., March 30, 1864, where he attended the public schools and college in that city. He afterwards took a course in the Massachusetts Institute of Technology, in the class of 1888, after which he served in various capacities, including clerk, yardmaster, trainmaster and division superintendent of the C. B. & Q., until 1898, when he accepted service with the Reading as division superintendent of the main line. A year later he was advanced to the general superintendency of the system and in the following year, when the control of the New Jersey Central passed into the hands of the Reading, he was made general manager of that system and early in the current year was advanced to his present position.

Of the numerous requirements which enter into the make-up of an entirely [illegible] railroad official, the EMPLOYEE has always contended that one of essential importance is his ability to so shape the policy of the corporation as to create good feeling and harmony of relation between the working force and the corporation, and in this respect Mr. Besler has proven himself one of the strongest and ablest managers in the American railroad service.

It is a well-known fact that when Mr Besler took charge of the affairs of the New Jersey Central, the service of that corporation was in the chaotic state, the men in all departments were demoralized and disheartened, and it required a manager of more than ordinary ability to bring about that harmony of relationship through sensible discipline which alone insures the safe, satisfactory and the consequent profitable corporation. All of this Mr. Besler has accomplished. He has surrounded himself with advisers who, like himself, are practical and sensible railroad men, not dreamers and theorists, with the result that on no other line in America does there exist a more perfect harmony of relation between the the rank and file of the service and the management than on the New Jersey Central.

Another distinguishing characteristic of Mr. Besler is his knowledge and thorough mastery of detail. In the line of his duties nothing is to unimportant to claim his attention. He applies "horse sense" in his dealings with his subordinates, not "red tape" and theory.

Mr. Besler is in short a thoroughly practical railroad man who understands every detail of his profession, and whose future progress in the railroad world will be watched with interest by those who are interested in and who understand present conditions in the railroad world. —From a recent issue of the *Railroad Employee*.

Train Kills Bound Brook Girl.

While crossing the Jersey Central tracks at Bound Brook Tuesday morning, Louise Matthews, fourteen years old, was struck by an Easton express and instantly killed. Her body was badly cut and bruised, and schoolbooks which she carried were strewn about the tracks. The dead girl was on her way to visit her aunt, Mrs. Louise Fisher, proprietress of the Fisher hotel. She was a daughter of the late E. B. Matthews.

Duke Estate to be Beautified.

James B. Duke, of Somerville, has planned to make his estate the peer of all others in the country. For this purpose he has engaged James Buckingham, an English landscape artist, who laid out the Pan-American Exposition grounds, for a period of five years at a salary of $5,000 a year. With assistants, Buckingham will lay out the estate in all manner of drives, lakes, stretches of lawn and with beautiful trees and shrubbery.

Big Day for Somerville Firemen.

Next Thursday will be a gala day for Somerville when the Fire Department of that town will have a big parade. Practically all arrangements have been completed and with some of the fine weather for that day similar to that which has been vouchsafed us this week, success for the affair is assured.

The line of formation will be as follows:

Chief and Assistants.
Ex-Chiefs and Visiting Chiefs.
Invited Guests in Carriages.
Veteran Firemen.
Good Will Band, New Brunswick.
Bound Brook Department.
Crescent Military Band, Raritan.
Raritan Department.
Citizens' Band, Dover.
Vigilant Engine Co., Dover.
Somerset Cornet Band.
Lincoln Chemical Engine Co.
Liberty Drum Corps, Elizabeth.
Warren Engine Co., North Plainfield.
Independent Fife & Drum Corps.
Central Hook & Ladder Co.
Voss' Band, Newark.
Independent Hose Co., Morristown.
Flemington Band.
Somerville Engine Co.
Æolian Band.
Union Hose Co., Cranford.
Liberty Band, New Brunswick.
West End Hose Co.

At 2:45 p. m. line will be formed on High street, right resting at Mercer. The march will be up High street to Doughty avenue, South street, to Division street, to Main, to Maple, to High, to Mountain avenue, to West End avenue, to Middagh street, to Cliff, to Bridge, to High, to Grove, to Main, to Warren, to Franklin, to Bridge, to South, to Doughty avenue, to Main street, down Main to the court house and counter-march past the fountain and disband.

Col. Wm. H. Early, proprietor of the Somerset, has the contract for taking care of the firemen's appetites. There will be between 800 and 1000 men.

Financial Statement of Teachers' Retirement Fund.

At the recent meeting of the Board of Trustees of the Teachers' Retirement Fund, held in Trenton, the report of the State Treasurer showed that the year which ended June 30 was the most prosperous in the history of the enterprise, as will be seen from the following comparative figures: Receipts for 1901-02, $20,254.38; for 1902 03, $28,437.75. Disbursements, for 1901-02, $15,528.82; for 1902-03, $16,969.33. Surplus for 1901-02, $4,396.56; for 1902-03, $11.469.43. Since the organization of the fund in 1897, seventy-six aged and invalided teachers have been retired on annuity. Of these fifteen have died, and there are now in force 61 annuities, averaging $315.70 and aggregating $19,257.73. The total net surplus of the fund invested and in cash is something above $75,000.

Annual Convention of Epworth League.

The thirteenth annual convention of the Elizabeth District Epworth League was held Thursday in the First M. E. Church, Plainfield. Rev. Dr. W. C. Snodgrass made the address of welcome which was responded to by R. F. Fenno, the president.

The officers chosen for the ensuring year were: President, C. A. Titus, St. James Church Elizabeth; vice president B. F. Dewey, Flemington; corresponding secretary, W. H. A. Clark, Clark Street Church, Elizabeth; recording secretary, Miss Mary B. Smith, First M. E. Church, Plainfield; treasurer, A. H. Stiles, First M. E. Church Plainfield; superintendent Junior League, Mrs. E. L. Lillibridge, Roselle Park.

An Interesting Speaker.

Prof. A. E. Willis, of New City, an author and lecturer, has been giving some "talks" in some of the public and private schools of Plainfield, on "Physiognomy."

The subject as treated by the speaker is brim full of practical suggestions to young people; knowledge which they can apply to their every day life, no matter in what occupation they may be engaged. It is likewise a very strong moral uplift, because the Professor makes it clear to the minds of his audience that people to a great extent make their own facial expressions by the force of thought and habit. Considerable information was given on the art of reading character by the forms of features, colors of eyes, hair and skin, facial expresion, the walk laugh and hand shake. Some useful hints were also given along the line of diet and the general care of the body. Such lectures set people thinking and observing along new lines that cannot fail to be ennobling to the indiviul character and a benefit to the community at large.

Prof. Willis will address the High School pupils Monday.

Somerset County Doctors to Meet.

A regular meeting of the Somerset County District Medical Society will be held at the Ten Eyck House, Somerville, Thursday, October 19 at 3 p. m. Dr. A. H. Dundon of this borough will read a paper on Eclampsia and its treatment.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

Dr. Francis L. Patton was formerly installed as president of the Princeton Theological Seminary last Thursday morning. Dr. Patton entered the Seminary as a student just forty years ago.

Dr. J. E. Hurff, of Blackwood ... presented with a land turtle, on which the doctor carved his initials in 1873. The turtle was recently found on the farm adjoining the one owned by the doctor. He again carved on the shell "1903" and let the turtle go near the spot where it was freed in 1873.

The celery farms along the Newark and Hackensack meadows are so damaged by the flood last week that the owners believe the crop must be ruined. The loss may have an appreciable financial effect on the price of Thanksgiving celery, as the early and best supply for the New York market comes from the northern part of this State.

Mrs. Jemima Davis died yesterday at the home of her granddaughter, Mrs. Abbie J. Hennion, in Caldwell, ninety-five years old. In her youth she was a neighbor of Isaac Van Wart, one of the three captors of Major Andre, who refused his offer of ransom for his liberation. One of "Aunt Jemima's" aunts reached the age of 103 years. Mrs. Davis was proud of the fact that she had two granddaughters who are themselves grandmothers. One of her great-great-granddaughters had two grandmothers, four great-grandmothers, and one great-great-grandmother living.

One of the most pitiable cases of misery developed by the storm last week was in Hoboken, where the body of Daniel Redden lay in an apartment in the tenement at 218 Park avenue, which was flooded with water. A sick wife and six children were unable to leave their beds as the pallbearers in long rubber hip boots removed the coffin. The undertaker took the little ones in his arms, and, wading through six feet of water on the floor, carried them to the side of the coffin and permitted them to look upon their dead father before the body was removed. Mrs. Redden was hysterical under her burden of woes, and had to be carried out of the house.

A strange disease, said by some to be spinal meningitis, for a month past has been killing off horses along shore. From Forked River south to Tuckerton it is said that from forty to fifty horses have died from this disease. Some veterinarians say that the disease is a kind of tetanus, as lockjaw is invariably one of the symptoms developed. An authority gives the opinion that the disease is spinal meningitis, and that it is supposed to come from a fungus growth of some kind on hay or grain fed the horses, and that it is not contagious. Dr. Perry, of Lakewood, states that the disease resembles diphtheria and tetanus combined. The first symptoms are dullness and loss of appetite, then stiffness of the limbs and weakening; then, after thirty-six hours, the animals are attacked with spasms, intermittent and occurring every little while, and death results in from two to four days.

Paterson has been singularly unfortunate of late. The present flood marks the fourth time the city has been scourged in less than two years. Fire devastated a large part of the town on February 9 of 1902, entailing a loss of $8,000,000, and destroying, besides nearly 150 other buildings, the beautiful post-office that the citizens were wont to boast about as the finest Federal structure in any city of the same size. The fire came on a Sunday. Exactly three weeks later followed the memorable flood. The Passaic River overflowed its banks, tore down bridges, inundated several square miles of the city and drove from their homes more than 2,000 men, women and children. On July 22 of this year a tornado swept over the city, killing four persons, seriously injuring fifteen more and hurting more than 100 others. Six buildings were wrecked and more than 200 damaged. Last week came the storm which flooded over one thousand houses, and many of the mills, rendering thousands of people homeless; destroying bridges and causing at least the life of three people.

Miss Grace Agnes Crane and Hugh Morgan Smith, were married at the home of the bride's parents, Mr. and Mrs. C. B. Crane, Plainfield, Thursday evening by Rev. E. M. Rodman.

Dr. George R. Boston, osteopathic physician, has removed to 515 Madison avenue. See his advertisement elsewhere in the REVIEW for the days and office hours when he may be seen.

HAVOC WROUGHT BY FLOODS

Entire Atlantic Seaboard Damaged by Rain's Aftermath.

PATERSON IN GREAT DISTRESS

Caring For the Sufferers by the Fourth Great Calamity That Has Befallen the City—Losses Estimated at $2,000,000—Railroads Blocked, Factories Compelled to Shut Down and Many Homeless.

New York City.—As the details of the record-breaking storm are learned the extent of the damage wrought is shown to be appalling. Over an area bounded by Portland, Me.; Nantucket, Atlantic City and Oswego, N. Y., the torrential rains have fallen in vaster volumes than ever in the history of the Weather Bureau. Accounts of damage sustained reach into the millions and lives have been lost in many places. High winds prevailed over almost all this region.

Following the accounts of flood and hurricane winds come warnings of other ills. Several communities have had their water supply cut off by bursting dams and broken flumes. Scarcity of food exists in Paterson and some of the villages nearby. New York suffered a curtailment of its milk supply. Fever and privation are threatened in the wake of the receding waters.

Thousands of persons are homeless, and in a dozen communities the storm sufferers are being housed in public buildings until better provision may be made for them.

Paterson, N. J., suffered enormous damage. Several millions will be needed to rehabilitate this sorely stricken city. Thirteen of the twenty-one bridges that spanned the Passaic River have been swept away. Food supplies are dangerously low and the city was isolated. The gas houses are surrounded by water. Dynamite was placed in position to blow up the reservoir wall if the flume that supplies the city with water should give way. This was to be done to save the big factory buildings.

Between two and three thousand persons are homeless and whole sections of the city, like Riverside, are converted into islands. The flood rose two feet higher than the flood of March, 1902.

The devastation and destruction wrought in Paterson by the flood are terrible and incalculable. Estimates of the property loss are frequently put at over $2,000,000, but figures will be lacking until the waters have subsided. A number of buildings on the banks of the river have been destroyed. Immense washouts on the streets and railroads have stopped all travel on trains and trolley cars. Great damage has been done to factories and their machinery along the river.

The flood had reached Fair street early in the day and threatened to wipe out the business portion of the city. The city almshouse was completely cut off. The whole of the First Ward, comprising Totowax and Haldeu, is completely isolated and surrounded by water.

The first death reported was that of Morris Riley, a lineman employed by the gas and electric light company. Riley was on the top of a pole fixing some wires, when the flood undermined the pole and it fell with a crash in the basin of the falls, sixty feet below, hurling Riley to instant death. He sank underneath the raging water and never came to the surface.

The body of Nellie Hartley, who was swept from a bridge over the Oldham Brook at Haledon, was found tangled in a wire fence on the meadows off Monroe street.

The Straight street bridge, the largest and most substantial in the city, collapsed early. It had withstood the storms of twenty-five years, and was thought to be as strong, if not stronger, than the more recently built structures. The Hillman street bridge was carried away shortly after 9 o'clock. The wreckage of the town was carried against the Moffit and Wagarom bridges, carrying them away. A little later the Hudson River Trolley Company's bridge collapsed.

On the railroads the case is hardly less serious than in Paterson itself. The Erie system is completely tied up, and but a partial service is installed on the Delaware, Lackawanna and Western road. The Susquehanna road has suspended its service, and railroad men, like city officials and merchants, wait upon the mercies of the ever-rising river.

The work of relief was pushed during the day as rapidly as possible, and some scores of persons of the contingent whose dwellings had been washed away were temporarily provided for at Apollo Hall, where a subscription started in the morning hours reached several thousand dollars by nightfall.

Paterson, fire swept, tornado swept and now for the second time, flood swept, has had plenty of experience in caring for the victims of its disasters, and is taking the present situation philosophically. There is no bustle or confusion in organizing relief committees. They seem to be standing bodies. However, the city is sheltering and feeding 1500 homeless persons. It is estimated that 5000 persons have been made temporarily homeless, but more than two-thirds of them are being cared for by their friends.

While the most spectacular damage was done at Paterson there was great loss by floods at other points. A higher tide in the Delaware than has been recorded for thirty years flooded the Philadelphia and Camden river fronts, interrupting ferry traffic and submerging piers and business places on Delaware avenue from Vine to Dock streets.

Owing to the flooding of the tracks of the Pennsylvania Railroad in Trenton, just north of the new Delaware River bridge, traffic on that line between Philadelphia and New York was wholly suspended for twelve hours.

A severe northeast storm raged on the Atlantic coast all day, and at Atlantic City about $75,000 damage was done by wind and waves. Shipping and other property all along the coast from Norfolk northward also suffered.

From the Schuylkill, upper Delaware and Susquehanna valleys reports come of high water and resulting damage.

Wrecks were reported from coastwise cities from Rhode Island to Virginia. The wind was sixty miles an hour at Block Island. At Woods Holl three men in a catboat were blown out to sea. The revenue cutter Gresham went after them, but had to return to port for repairs.

At Atlantic City the board walk was torn and washed away, including 500 feet of Young's pier. At Townsend's Inlet the big hotel was undermined. The Delaware and Schuylkill rivers overflowed their banks and Fairmount Park, in Philadelphia, was seriously damaged, particularly along the river driveway.

Several tugs and coasters were reported as missing at Norfolk and the life savers reported vessels ashore near Cape Henry.

Passaic, N. J., suffered grievously. Wallington, Duttonville and Garfield in the suburbs were submerged, houses floating in the flood and dozens of persons being cared for in engine houses, town halls and other public buildings. The loss sustained in Passaic and environs is expected to exceed $1,000,000.

Along the Passaic and Ramapo valleys, Rutherford, Athenia, Ridgewood and Lyndhurst are practically submerged. The Athenia mills, under construction, were demolished. At Rutherford the dam restraining the water supply of the McKenzie bleachery, burst and inundated the tracks of the Erie Railroad. Nothing but the roofs of the houses is visible in Lyndhurst.

At New Brunswick the temporary bridge erected by the Pennsylvania bridge contractors was torn to pieces. All the factories along the river front are flooded.

Three men lost their lives in the flood at Port Jervis, N. Y., when the Barrett suspension bridge was swept away. One of those drowned was Father Anronin, a Franciscan monk from Callicoon Depot, N. Y., who was on his way to take a train for his home. Another who was hurled into the water was a cripple. He had an exciting struggle, but managed to grasp a piece of the bridge timbers and was floated inshore when he struck an eddy.

The Erie was unable to run trains from its Jersey City terminus more than twenty miles in any direction. The Lackawanna was as badly crippled, and abandoned its Sussex branch entirely. The Pennsylvania system was tied up from midnight Friday till noon Sunday, as was the Philadelphia and Reading.

Beside the widespread destruction in Prospect Park and throughout those residence sections of Brooklyn where the ground is low, there was great anxiety expressed at the Brooklyn Navy Yard for the battleship Massachusetts. She is lying in dry dock No. 3, and the sides of the enclosure showed signs of caving in. Heavy timbers were used to shore up the weak places, and an extra guard was kept at the critical spots.

Hobart, N. Y.—Several iron bridges on the Ulster and Delaware Railroad between East Meredith and Phoenicia were carried away by the storm. Several trains were held up in the gorges of the Catskills, and the passengers completed their journeys or stopped at farmhouses. Morgan Olmsted, a Grand Hotel employe fell into Birch Creek at Pine Hill and was drowned. One of two men who tried to save some property from a floating barn near Delhi was drowned. The other spent the night in a tree. The loss to farmers, who are unable to ship milk to New York, will amount to thousands of dollars.

Kingston, N. Y.—Great damage from floods is reported from all sections of this country. The Ontario and Western Railroad has lost 900 feet of track between Kerhonkson and Port Hickson on the Ellenville-Kingston Branch, which will be closed for several days. Rondout Creek, which empties into the Hudson River here, is higher than it has been in years. Wharves have been under water all day. The railroad shops and the electric power plant were compelled to suspend on account of high water in the streets along the water front. While gathering driftwood at her doorstep at Ellenville a young woman named Rosekranz slipped and was drowned.

Schenectady, N. Y.—The works of the General Electric Company and the American Locomotive Company, which together employ 18,000 hands, were obliged to shut down on account of the floods. Both plants were submerged, as were the Westinghouse Agricultural Works and the Alpha Knitting Mills. The entire western end of the town along the river front is under water, which rose twenty feet. The losses are conservatively estimated at from $150,000 to $200,000.

Geneva, N. Y.—The rainfall of the past three days and the wind which preceded it have resulted in no small damage to late peach and apple crops in the Seneca Lake region. Fruit grown in this section is in demand at all times, and the storm will cause a rise in the prices. A large quantity of peaches and apples has been blown from the trees, and the heavy rains have made it impossible to harvest it, so that no small quantity will rot. The drop in temperature has also damaged the grape crop.

Utica, N. Y.—Rain fell continuously for sixty hours in this vicinity, the greatest rainfall in fifty years. The lower business sections of the city have been under water, and much damage has resulted.

Indict Twenty-two For Lynching of Negro.

The Grand Jury of Moore County, Tennessee, has returned a joint indictment against twenty-two members of a mob charged with lynching the negro, Allen Small, on the night of September 24.

His Shortage $8000.

A shortage of $8000 in the accounts of Jules Stein, Treasurer of the National Casket Company, of Rochester, N. Y., has been uncovered by expert accountants.

Plot to Free Convicts.

During an investigation into counterfeiting in the Eastern Penitentiary, of Philadelphia, it was discovered that a plot existed to free the thousand convicts within its walls.

Extra Session Program.

It was finally determined that the extraordinary session of Congress next month would be devoted exclusively to legislation making effective the Cuban reciprocity treaty.

WAR CLOUD IN THE EAST

Russia Prepares For Crisis With the Japanese.

WARSHIPS RUSHED TO KOREA

England Fears Being Drawn Into Manchurian War—Germany's Possible Support of Russia is a Menace—Japan Flags Warily—Believing Conflict is Inevitable, She Seeks Alliance With China

London, England.—Though no overt act of war has been reported from St. Petersburg or the Far East, the unmistakable manner in which Japan and Russia are preparing for military and naval action leaves no doubt that the beginning of the contest is at hand.

The gravity of the situation is not underestimated by the members of the British Cabinet and the representatives of the Powers who are now in London. On every side fears are expressed that, owing to the peculiar attitude assumed by Germany with respect to the coming contest for supremacy in the Far East, England may be drawn into the strife.

More Russian warships have been dispatched from Port Arthur to Ma-San-Pho, and the principal military and naval commanders of Japan and Russia no longer pretend to conceal the fact that they are preparing to take the field. The war spirit is running high in both countries, and the leaders of conservative opinion appear to have abandoned all hope of averting a war that now seems to be inevitable.

A report from Chefoo says that the Japanese have occupied Ma-San-Pho, Korea, and the officers of the Japanese and Russian fleets that are now lying in Ma-San-Pho harbor were hourly expecting that war would be declared.

It is reported from Port Arthur that the Tokio correspondent of the Novul Krai, the leading Russian newspaper in that town, has sent to his paper a dispatch which indicates that Japan is prepared to begin the conflict without further delay. He says that the Japanese press is pointing out that if Japan engages in war with Russia it will not be on account of the Russian occupation of Manchuria, but because Japan is determined to establish her position among the Powers.

BEAT YOUNG BOY TO DEATH.

Degenerate German Gets Light Sentence and Angry Crowd in Court Room Riots.

Bayreuth, Germany.—Andreas Dippold, a teacher, was found guilty here of manslaughter in having caused the death by ill-treatment of a boy who had been intrusted to his care. Robert Koch, President of the Deutsche Bank, placed his two sons, fourteen and twelve years old, in care of Dippold during the summer, while Herr Koch and his wife were in Paris.

Dippold treated the boys with the greatest brutality, tying them by their hands and feet to the bed at night and otherwise maltreating them. The elder boy ultimately died from disusage. The prisoner was sentenced to eight years' penal servitude and ten years' deprivation of his civil rights.

Medical experts who examined him testified that he was sane, but was a moral degenerate. They said that he was afflicted with a mania for blood, which could only be satisfied by inflicting torture.

The mildness of the sentence, which was apparently the heaviest that could be demanded, excited the spectators to fury. Men and women rose from their seats and cursed and threatened the prisoner.

The little boy, Joachin, said Dippold had told them that their parents believed they should be thrashed. The tragic picture of the boys, believing themselves abandoned by their parents to the fiendish malignities of Dippold, moved almost everybody to tears. The parents, who were present, covered their faces and sobbed.

KNELT BY ROADSIDE AND DIED.

Woman Exhausted Within 100 Yards of Her Home.

Norristown, Pa.—Kneeling as in prayer, Mary, wife of James Young, of Bridgeport, was found with her face buried in a bank of soft earth, by an early morning milkman. She was dead. On one of her rigid arms there was a basket filled with provisions for the next day's dinner. Less than 100 yards away, at her cheerful home on Prospective avenue, were her husband and children, asleep and unaware that the wife and mother was dying of exposure in the street.

Mrs. Young went to the store during the evening and the members of her family, supposing she was asleep in the room, retired. Her death was due to heart disease and exposure.

RACE WAR IN LABOR UNIONS.

White Hod-Carriers Set Out to Down Colored Element.

Chicago, Ill.—White hod-carriers, numbering 9000 and including all nationalities, are determined to crush the negro union with its 300 members. The war has been going on for two years and has reached the Courts.

The white union is enjoined from interfering with the negro union, but there is no protection from the "educational committees," who argue with sandbags and brickbats, and the assaults have become so frequent and the feeling so bitter that union labor leaders have decided the negro union must disband and the members seek other employment.

Prince Cupid Coming.

Prince Cupid Kalaninnaole, the new Congressional delegate to the United States Congress at Hawaii, and his wife, left Honolulu on their way to the United States on the steamship Siberia.

Missionary Slain in China.

The Rev. C. W. Kennedy, who graduated from Ohio Wesleyan University last June, has been killed by boxers in China, whither he went some months ago as a missionary.

TO DISCHARGE 20,000 MEN

Railroads Retrench, Owing to Falling Off in Traffic.

Big Systems Begin to Reduce Forces to the Lowest Possible Limit Because of the Industrial Situation.

New York City.—Several railroad companies have announced reductions in the working force, and it is expected that between now and November nearly every railroad in this country will discharge some of its employes.

Such action, it is explained, is not unusual this time of the year, but a larger number of men will be dismissed this fall because the railroad companies have been working abnormally large forces since early last spring. A natural falling off in traffic is the reason generally assigned for these railroad dismissals.

Basing their estimates on the reductions already announced experienced railroad men say that between 15,000 and 20,000 men will probably be laid off by the railroads throughout the country this fall. There are about 1,250,000 railroad employes in the United States.

Vice-President Brown, of the New York Central, thinks that about 2500 men may be dropped from the payrolls of that system this month. The greater proportion of the dismissals will be from the car shops. Notices of discharge have already been served on 800 men in Albany, Syracuse and Buffalo.

About 1500 shop men, train men and track men will be discharged on the Pennsylvania system. Vice-President Pugh says that most of the men to be dismissed will be recent employes who were hired during the rush period of last spring. Few, if any, of the old employes of the Pennsylvania system are to be discharged, and no important work of improvement is to be suspended.

The Atchison, Topeka and Santa Fe operating department will lay off about 1500 men this month, and such improvements as can wait will be deferred until next year. The managers of the Atchison system believe that all kinds of heavy work can be done more cheaply next year than now.

Not less than 3000 employes will be dispensed with on the Union Pacific and the Southern Pacific systems between now and December 1. These dismissals, it is said, are to be made because the work for which the men were hired is completed. It is probable that all of the transcontinental lines will cut down their working forces some after the crop shipments are over. The falling off in ore shipments has caused some of the Western roads to take off about ten per cent. of their freight trains.

The Illinois Central will curtail its operating force anywhere from 600 to 1800 men, and the Chicago and Alton will also make a small reduction.

President Ingalls, of the Cleveland, Cincinnati, Chicago and St. Louis system, says that at present there is a volume of traffic over his lines, but he expects that it will be necessary to let some of his employes go as soon as the present rush slackens. The Lake Shore will dismiss nearly 1000 men this month, and the Michigan Central about half that number. About 300 of the Lake Erie and Western employes will be laid off on November 1.

The Erie management has already dismissed several hundred men from the repair shops and the operating force, and there will be a still further reduction between now and December 1. The West Shore will lay off about 300 men, and the Boston and Albany an equal number. A gradual reduction in the operating force of the New York, New Haven and Hartford Railroad is now under way, and before the pruning knife is laid away about 1000 employes of this company will be out of work.

The Missouri Pacific and other Gould lines will reduce their working forces slightly, but there is to be no cessation in works of extension and improvement. The Wabash expects to increase rather than diminish the number of its employes on Pennsylvania improvements.

The Rock Island and the Frisco systems will lay off between 1000 and 1500 men this month and next.

GAVE $91,000 FOR MISSION WORK.

Sermon Scoring Christians Followed by Rich Harvest of Sheckels.

New York City.—At the twenty-first annual convention of the Christian and Missionary Alliance, held here, the missionary offering in cash and pledges amounted to $91,107. The Rev. A. B. Simpson, who preached the annual missionary sermon, asserted that for every man, woman and child in the United States $40 is spent annually for liquor and tobacco, while forty cents was the average contribution of each Protestant Christian in this country.

DESERTED THE MAINE IN BUNCHES

United States Battleship Loses Over One-Quarter of Her Crew.

Washington, D. C.—During the eight months ended September 1 there were 129 desertions from the battleship Maine, which carries a crew of 504 men. This unusual record is attributed to the fact that the Maine spent months in dock undergoing repairs after her trial trip, and that the crew were anxious for a cruise.

Most of the deserters were coal passers and landsmen who had never been on the water before they enlisted in the Navy.

Nields a United States Attorney.

The President appointed John P. Nields, an anti-Addicks man, United States Attorney for the District of Delaware.

Ohio Monuments Now National.

The ten Ohio monuments on the battlefield of Antietam, including one to President McKinley, were presented to the Government, Governor Nash, of Ohio, made the presentation speech, and Robert Shaw Oliver, Acting Secretary of War, accepted the monuments for the Government.

Damage Caused by Landslide.

Part of a mountain slid into a river near Birchingham, Canada, killing cattle, destroying canal locks and doing other damage.

LAW ON FAITH HEALING

Pierson's Guilt Affirmed by the Court of Appeals.

ACTION WAS CRIMINAL NEGLECT

Upholds Conviction of White Plains Man Who Failed to Give His Sick Child Medical Aid—Reader Stetson and the Quimby Family, Christian Scientists, Also Indicted, May Now Be Tried.

Albany, N. Y.—A decision was handed down by the Court of Appeals in the case of People vs. Pierson, declaring dependence upon faith-healing in case of sickness to be criminal negligence.

J. Luther Pierson lives at White Plains, and early in 1901 was sentenced to $500 fine or 500 days' imprisonment for criminal neglect in failing to provide a licensed physician to attend his sixteen-months' old adopted daughter in a case of pneumonia, which afterward proved fatal. The conviction was secured under the Penal Code, which holds that "a person who omits without lawful excuse to perform a duty by law imposed upon him, to furnish food, clothing, shelter or medical attendance to a minor, is guilty," etc.

Justice Bartlett, in the prevailing opinion in the Appellate Division, held that the "medical attendance" referred to in the statute does not mean exclusively the attendance of a medical practitioner in the general sense of the term. The Appellate Division reversed the conviction.

In its opinion, written by Judge Haight, the Court of Appeals says: "It would seem that the legislative intent is reasonably clear, although possibly more precise language could have been employed. The section of the code under which the indictment was found contemplates that there are persons upon whom the law casts a duty of caring for minors.

"We are aware that there are people who believe that divine power may be invoked to heal the sick, and that faith is all that is required. There are others who believe that the Creator has supplied the earth, nature's storehouse, with everything that man may want for his support and maintenance, including the restoration and preservation of his health, and that he is left to work out his own salvation under fixed natural laws.

"There are still others who believe that Christianity and science go hand in hand, both proceeding from the Creator; that science is but the agent of the Almighty, through which He accomplishes results, and that both science and divine power may be invoked together to restore diseased and suffering humanity.

"But, sitting as a court of law for the purpose of construing and determining the meaning of statutes, we have nothing to do with variances in religious belief, and have no power to determine which is correct. We place no limitations upon the power of the mind over the body, the power of faith to dispel disease, or the power of the Supreme Being to heal the sick. We merely declare the law as given by the Legislature. We find no error on the part of the trial court that called for a reversal."

The Pierson case was regarded as in a measure a test case. Some time after the Pierson case came up the case of the Quimby family, several members of which were allowed to die without medical attendance, was reached in the same court. With the Quimbys, who were Christian Scientists, John Lathrop, a reader connected with the First Church of Christ, Scientist, was indicted. They may now be tried.

FOUR FORGED PARDONS.

Military Prisoners at Alcatraz Released by Crime.

San Francisco.—James H. Darling, Joseph White, Cornelius Cokes and John L. Moore, military prisoners of Alcatraz, have been released on pardon papers which it is now discovered were forged. These fraudulent pardons were sent through the ordinary course, bearing the regular seals and stamps, and approved by the President, but by whom and by whose assistance the forgeries were perpetrated are questions not yet solved.

The four prisoners were sentenced to five years' imprisonment, and had more than two years to serve. They were set at liberty October 7.

The official stamps of the Department of California headquarters and of the Judge Advocate's office appear. The letterhead on which the pardon is typewritten seems genuine.

TO WATCH FOR CRANKS.

Giant Detective and Big Policeman Now on Duty at White House.

Washington, D. C.—Besides the two or three Secret Service men, uniformed policemen and civilian guards always on duty in the executive offices, a detective in plain clothes has been assigned to the waiting room. He is a giant, and is expected to make short work of cranks, for whom it is his particular duty to watch.

A six-foot policeman in uniform now stays very close to the north door of the White House, where most of the cranks call.

Anarchists in Porto Rico.

Socialists and Anarchists attacked the police in San Juan, Porto Rico. Forty arrests were made and several of the rioters were sentenced to terms of imprisonment.

Oppose Sympathetic Strikes.

Samuel Gompers, President of the American Federation of Labor, issued a statement opposing sympathetic strikes and urging members of the building trades to accept the employers' arbitration plan and go to work.

Boston Americans the Champions.

The Boston Club, of the American League, won the deciding game with the Pittsburg Nationals for the professional baseball championship of the United States.

KILL AMERICAN RENEGADE

Desperate Fight in Small Boat With Filipinos.

Natives of Negros Vanquish American Buccaneers in a Terrific Battle, Lieutenant Johnson Meeting His Death.

Manila, Philippine Islands.—Inspector Hermann and Supply Officer Johnson, of the Philippine Constabulary, who embezzled funds of the Mindanao Government and started to be pirates, were attacked one night last week by six Filipinos, the crew of a native boat of which the pirates had taken forcible possession. The encounter took place off the west coast of Negros.

Johnson was killed at once. Hermann was stabbed in the neck and a native deserter of the name of Fuentes was also stabbed.

Hermann fought ferociously and killed four of the attacking party at the closest range.

The struggle took place in a narrow boat, and the remaining two of the attacking party, who were covered with blood, jumped overboard. It is not known whether they escaped or were drowned.

In the meantime Hermann bandaged his wound and navigated the boat to the shore. There he abandoned the craft and escaped to the mountains from a point near the former landing place of the pirates at Bayauan. From there he sent his carbine to the presidente by a friendly native and then disappeared. He was last seen last Saturday, when he was suffering severely from his wounds.

The constabulary recovered the boat, a rifle, two revolvers and a portion of the stolen money. They also found Johnson's body in the heap of dead sailors. The deserter Fuentes, who had been stabbed, was still alive when the constabulary arrived on the scene. The body of Johnson was buried on October 7 by the villagers of Nabulao.

Johnson and Hermann were Pennsylvanians and enlisted in the United States Army in Philadelphia. They had good records while in the regular service.

MONTANA LYNCHING.

Convicted Murderer Taken From Cell and Hanged.

Hamilton, Montana.—Walter Jackson, the convicted murderer of Fonnie Buck, a six-year-old boy, was taken from the county jail here late at night by a mob and lynched.

Shortly before midnight seventy-five men, armed with rifles or shot guns, forced their way through the rear of the jail and overpowered Jailor Stephens, who was able to offer but slight resistance. Jackson was found cringing in the darkest corner of his cell.

The prisoner pleaded piteously for mercy, but was rushed into the street, where the mob had already provided a rope. This was quickly thrown over an electric light pole, and the noose placed about Jackson's neck. He was asked if he had anything to say, but only pleaded for mercy.

The mob pulled the man into the air and left his body hanging. They quietly dispersed. Not a shot was fired.

The murder of Fonnie Buck caused intense excitement. The boy's body was found horribly mutilated.

ROB BANK AT LEISURE.

Four Men Hold Citizens of Berwick, Ill., at Bay and Secure $28,000.

Peoria, Ill.—Four men drove into the little town of Berwick, eight miles west of Abingdon, and picking the lock on the front door of the Farmers' State Bank, drilled the door of the vault and forced the combination, securing $28,000. A number of residents, awakened by the explosion, appeared on the scene, but were held at bay. The robbers loaded their booty in their rig and escaped.

Pitcher Doheny Wildly Insane.

After felling his nurse with a terrific blow over the head with a stove poker, at Andover, Mass., Edward Doheny, the Pittsburg National League baseball pitcher, for more than an hour held a score of neighbors and several policemen at bay. Finally he was overpowered, and, after an examination by two physicians, was adjudged insane, and committed to the asylum at Danvers.

Indianapolis Democratic.

Unofficial returns in the Indianapolis city election give Holtzman, Democratic candidate for Mayor, 20,594; Bookwalter, Republican, 19,656; Hitz, Prohibition and Independent, 5470; Holtzman's plurality, 938. Edward W. Little, Democrat, is elected Judge of the Supreme Court over Thomas C. Whallon, Republican, by a plurality of from 600 to 800.

Banquet in a Big Drain Pipe.

In a huge drain pipe, made brilliant with long strings of electric lights and banks of flowers, delegates to the annual meeting of the Iowa League of Municipalities, at Waterloo, Iowa, were entertained at a banquet. The "Sewer Banquet," as it was called, was the special feature of this year's convention of the league.

Noted Rabbi Dead.

The Rev. Marcus Jastrow, Rabbi Emeritus of the Synagogue of Rodef Shalom, Philadelphia, Pa., died, aged seventy-three. He was one of the oldest prominent rabbis in America.

Schwab Accused.

At the Shipbuilding Trust hearing in New York City Daniel Le Roy Dresser declared that Charles M. Schwab wrecked the concern.

Mob Wrecks Newspaper Office.

A mob entered the office of the Journal at Kensal, North Dakota, spilled several cases of type in the street and wrecked the interior of the office. The editor, C. L. Allen, in his paper, has been fighting a lawless element, and it is believed that the members of that gang committed the outrage.

Business Section of Town Burned.

The business section of Shaw, Miss., the principal town in Sunflower County, was burned. The loss is nearly $50,000, with little insurance.

OCTOBER CROP REPO

There Are Better Indications Corn and Spring Wheat.

Total Yield of These Grains Comput the Basis of Oct. 1 Conditions—F gures on Rye and Other Crops.

Washington, D. C.—The mon port of the chief of the Bu tistics of the Departme ture shows the condi October 1 to have b pared with 80.1 one October 1, 1902, 5 ing date in 1901 age of 77.7.

The preliminar erage yield per a 14.4 bushels, sub the final wheat average quality as compared wit

The preliminar oats crop of abo or an average of as compared with 34. ago, 25.1 in 1901 and a age of 27.8.

The preliminary estimate o per acre of barley is 26.4 against 29.0 one year ago, 24.7 and a ten-year average of 23.8. average for quality is 85.4, against 8 last year and 89.2 in 1901.

The preliminary estimate of yield p acre of rye is 15.4 bushels, against last year, 15.1 in 1901, and a ten-ye average of 14.8. The average for qu ity is 88.4, against 91.8 last year an 89.4 in 1901. The average condition rye on October 1 was 90.6, as compare with 93.6 one month ago and 92 on Au gust 1, 1903.

The average condition of buckwhea on October 1 was 83, as compared wit 91 one month ago, 80.5 on October 1902, 90.0 on the corresponding date 1901, and a ten-year average of 79.7.

The average condition of flax on Oc tober 1 was 74, as compared with 80. one month ago and 80.3 on August 1903.

The average condition of potatoes o October 1 was 74.6, against 84.3 on month ago, 82.5 on October 1, 1902, a on the corresponding date in 1901, an a ten-year average of 73.1.

The average condition of tobacco October 1 was 82.3, as compared w 83.4 one month ago and 82.9 on Au 1, 1903.

On the basis of the condition o given by this report, and u figures last furnished by th ment of Agriculture as to sown, 89,800,000 acres, the yield of corn is 2,307,860,000 This compares with an indica by the Government report of 2,288, 000 bushels, and an indicated yiel the August 1 report of 2,245,00 bushels. It also compares with a tual corn crop last year of 2,523,04 bushels, and an actual yield in when there was a partial crop fail of 1,522,519,891 bushels.

On the basis of the spring w yield per acre—14.4 bushels—re by the department the indicated c of spring wheat is 248,501,000 bushe which compares with a yield indicate by the crop report of August 1, the la previous Government crop report to fer to spring wheat, of 289,872,0 bushels. The actual yield of spring wheat last year was 258,274,342 bushels, while in 1901 it was 280,625,717 bushels.

No report is made by the Department this month as to winter wheat, but, assuming the August 1 indication as unchanged, the total indicated wheat crop is 659,028,000 bushels, which compares with 669,841,000 bushels, the total crop indicated by the Government return of September 1, when the combined wheat condition and yield per acre—spring and winter—was reported. The actual total wheat crop last year was 670,063,000 bushels, and the actual crop in 1901 was 748,460,218 bushels.

BROUGHT IN CAPTOR DEAD.

Boy Prisoner Thought That Deputy Sheriff Had Merely Fainted.

Athol, Mass.—While driving from Petersham to Athol, Mass., with a fourteen-year-old prisoner, Carroll Archibald, of Petersham, charged with larceny of two cabbages, Deputy Sheriff Roswell P. Doane, of Athol, toppled over dead from heart disease.

The young prisoner picked up the reins and drove three and a half miles to a livery stable in Athol, where he asked assistance to revive Doane, who he thought had fainted.

Chief of Police Jacques, of Athol, after hearing the boy's story, ordered him removed from the lock-up to a hotel, where the lad, who was much unnerved, was given comfortable quarters.

TROLLEY MAGNATE OUT.

Stock Market Crash Causes W. B. Given's Loss of Fortune and Traction Leadership.

Lancaster, Pa.—William B. Given, President of the Lancaster County Railway and Light Company, has tendered his resignation as President, and with this comes the charge that discrepancies amounting to $100,000 or more have been discovered in his accounts, which are now in the hands of experts.

Mr. Given has been regarded as a man of large wealth, and has been noted as an operator on a very extensive scale in the stock market.

The recent slump in the market, it is said, caused him such heavey losses that he was unable to meet demands for margins.

Municipal Ownership Defeated.

At a special election the proposal to issue $710,000 municipal bonds for the purchase of the Geary Street Railroad, to enable the city of San Francisco, Cal., to operate the road, was defeated by 14,481 yeas to 10,745 nays. A two-thirds vote was required.

Homestead Mills Close Down.

Notices were posted in the thirty-five and forty-inch mills at the Homestead (Pa.) Steel Works announcing a shutdown of both these mills for an indefinite period. They employ over 2000 men. It is believed that several of the furnaces will have to close unless these mills reopen within a couple of weeks.

Nominated in Rhode Island.

Rhode Island's Republican State Convention indorsed Roosevelt for President in 1904 and nominated Colonel Samuel P. Colt for Governor.

Versatile American

By H. C. Merwin

THE Englishman has none of that all-around mental activity which distinguishes the American. He knows only one thing—that by which he earns his living; and he does not desire to know anything else; far less is he ashamed of not knowing it. A London policeman, if you ask him about some distant street or building will reply civilly, but unabashed, "I can't tell you, sir; that is not in my beat." An American policeman would know the fact, and if he did not know it, he would feel called upon to apologize for his ignorance.

In a Maine village there was recently some occasion for a plumber, and one was forthwith improvised from a carpenter. Such a thing impossible in England. Many a New England farmer can build a house, paint and plaster his house, "tinker" his mowing-machine, doctor his cow, break his colt, row or sail his boat, "butcher" his sheep, skin a fox, track a deer, hive bees, serve as guide or fiddle, solve a problem in arithmetic, make a good speech and do a hundred other things beside. There is probably no one who can do half so many things. The American is more general intelligence and information, and is therefore a workman.—Harper's Magazine.

Discipline

Edith Kingsmill

THE public has acquired a general impression that the unruly child, who in the old days was whipped into order and obedience and industry, is now subdued by his teacher talking sweetly with him in private and appealing to his better nature. This opinion is not correct. The average boy is not slow to detect what he calls "preachin'" and "fancy talk." Long before he leaves the primary department he will have none of it. Of course, we do find in our schools an occasional child who responds readily to such appeals; there are such children, but not many.

Let us consider a typical case of discipline as now administered in New York City, Chicago and some other American cities.

Ralph is an ordinary boy, not vicious, but a little lazy. He has been inattentive at school, and has neglected his lessons at home. At the end of the month he must take home his report card, on which his teacher has written "Inattentive," "Progress unsatisfactory," "Deficient in arithmetic and history." This card must be signed by one of Ralph's parents and brought back to the teacher. In Ralph's home a keen interest is felt in his progress. The coming of the monthly report is an important event. When it is good, there is great joy in the household, but when it is unfavorable, Ralph is made to feel that he has done a serious wrong, which must be rectified by the excellence of his report next month. If the monthly report is not sufficient, a "conduct book" is provided in which the teacher writes, at school-close each day, what Ralph's conduct has been that day. This book must be shown at home every evening, signed by the father and returned to school the next morning. By this means there is established between the teacher and Ralph's parents daily communication, which is kept up until his work is satisfactory.—Good Housekeeping.

Annual Waste From Forest Fires

By H. M. Suter

IN the United States forest fires destroy annually at least fifty million dollars' worth of timber, buildings, and other property. This is a conservative estimate, based on the opinions of persons who have given the subject long and close attention. This estimate, large as the figures are, take no account of the indirect, and often the most serious losses resulting from forest fires—losses which are, by their very nature, not easily reduced to terms of dollars. Among these results may be counted the destruction of young trees which must furnish the timber supply of the future, and the destruction of the forest floor, which has been centuries in forming, with the resulting liability to periodic floods and a reduction of the water supply either for cities' use, for power, or for irrigation. The forest soil, with its spongy composition, holds moisture in suspension and gives it off gradually. Other losses, intermediate between the far reaching and the immediate, follow from the fact that even where forest regeneration takes place after a fire, the new growth is, in many cases, of inferior scrub species, or "weed" trees; and there is a great industrial loss in future products, wages, or to the tourist and hotel business, which in Maine and the Adirondacks is no small item.

It must be understood that fires such as those which have recently burned in the New England and Middle Atlantic States are not of rare and spasmodic occurrence. They are visitations of perennial regularity, two annual fire seasons being easily recognizable. These occur in the spring and the fall, and are the results of dry weather such as that which has lately prevailed in the east, and it is noticeable that fires at this season do their greatest damage in the East and the South. The great fires of the fall, more severe than the spring burnings, extend over a period of time from the middle of August to the first of November, and have their geographic range in the middle and extreme West, and in the South.—American Monthly Review of Reviews.

Love is the Mainspring

By the Rev. Lyman Abbott

POLITICAL economists have told us that self-interest is the mainspring of industry. It is not true. Love is the mainspring of industry. It is love for the home and the wife and children that keeps all the busy wheels of industry revolving, that calls the factory hands early to the mill, that nerves the arm of the blacksmith working at his forge, that inspires the farmer at his plow and the merchant at his desk, that gives courage to the soldier and patience to the teacher. Erskine was asked how he dared, as an unknown barrister, face a hostile court and insist on his right to be heard. "I felt my children," he replied, "tugging at my robe and saying, 'Here is your chance, father, to get us bread.'" It is this vision of the children, dependent on us, that inspires us all in the battle of life. It is for our homes and our children we maintain our churches. Whether we cultivate a farm, or operate a factory, or manage a store, or build and conduct a railroad, or paint pictures, or write books, or preach sermons, or enact and enforce laws—whatever we do, the end of our activity is the nurture and training of children in this primary school, which we call life, in preparation for some life, we know not what, hereafter.—Atlantic.

A Canyon Wren.

I had been in Tucson nearly a week when one cold morning after a cold night (it was February 7) I went down into the Santa Cruz Valley and took the road that winds—where there is barely room for it—between the base of Tucson Mountain and the river. Steep, broken cliffs, perhaps a hundred feet high, were on my right hand, and the deep bed of the shallow river lay below me on my left. Here I was enjoying the sun and keeping my eyes open, when a set of loud, clear bird-notes in a descending scale fell upon my ears from overhead. I stopped, pulled myself together, and said, "A canyon wren." I remembered a description of that descending scale. The next instant a small hawk took wing from the spot on the cliff when the notes had seemed to fall. My mind wavered, but only for a moment. "No, no," I said, "it is not in any hawk's throat to produce sounds of that quality;" and I waited. A rock wren began calling, but rock wrens did not count with me at that moment. Then, in a very different voice a wren, presumably the one I was in search of, began fretting, unseen, somewhere above my head; and then, silence. I waited and waited. Finally I tried an old trick—I started on. If the bird was watching me, as likely enough he was, a movement to leave his neighborhood would perhaps excite him pleasurably. And so it did; or so it seemed; for almost at once the song was given out and repeated: a hurried introductory phrase, and then the fuller, longer, more liquid notes, tripping quietly down the scale.—Bradford Torrey, in the Atlantic.

Making Magnificent Library.

The large collection of Bibles and objects illustrating the Bible donated by Mr. S. Brainard Pratt to the Congregational Library is still being increased by his efforts. The library is steadily becoming enriched by books, manuscripts and documents of importance.

New York City.—Kimonos appear to have taken as firm a hold on the Western woman as upon her Oriental sister. This May Manton one shows one

SHIRRED KIMONO.

of the latest variations and adaptations and is charmingly graceful as well as comfortable. The model is made of figured Japanese crepe with bands of plain colored Habutai silk, but all the materials used for negligees are appropriate. Simple cotton crepes, lawns and the like are always pretty, while the many light weight French and Scotch flannels, cashmere and albatross are admirable for the garments of colder weather. The pointed sleeves are eminently becoming and more delightful lines and folds, but the round ones, shown in the back view, can be substituted if preferred.

The kimono is made with fronts and back that are shirred and arranged over a foundation yoke, and falls in soft folds from that point to the floor. The sleeves are cut in one piece each, and they, with the neck and front edges, are finished with bands.

The quantity of material required for the medium size is eight and three-fourths yards twenty-seven inches wide, seven yards thirty-two inches wide or four and a half yards forty-four inches wide, with three and three-eighth yards of silk for bands.

MISSES' COAT WITH CAPE. HANDKERCHIEF KIMONO.

Two Effective Garments.

Long coats with capes are exceedingly smart for young girls as well as for their elders. The one shown in the large picture is cut in the latest lines and includes one of the new pointed capes with full sleeves. The model, designed by May Manton, which makes part of a costume, is made of mixed tan colored cheviot, with the band collar of pale green cloth embroidered with wools of rich warm colors, and is finished with stitching in corticelli silk; but the design suits the general wrap equally well. Cloths of all sorts, cheviot, homespun and all cloak and suit materials are appropriate.

The coat is made with a blouse portion, that is fitted by means of shoulder and underarm seams, the cape, sleeves and skirt. The cape is seamless and falls in a deep point at the back and over each sleeve. The sleeves are full and ample and are finished with pointed flare cuffs. At the neck is a band collar that is extended to finish the front edge. The skirt is laid in inverted pleats at the centre back and is seamed to the blouse beneath the belt.

The quantity of material required for the medium size is three yards forty-four inches wide or two and three-fourth yards fifty-two inches wide.

Handkerchiefs as material from which garments of various sorts can be made are only now fairly appreciated. The charming negligee illustrated in the large picture shows one of their latest developments, but it is so planned that it can be made from material by the yard, the effect being gained by judicious use of trimming. The model, designed by May Manton, is made of figured silk handkerchiefs with striped borders, the points being turned over to give the finish at the neck, but lawn, cotton crepe, India silk and all of the light weight materials used for negligees are appropriate, the trimming being banding of any sort.

The kimono is made of five handkerchiefs which are joined at indicated lines and is held at the front by ribbon ties. When material by the yard is used the trimming is applied over these lines and over the edges, so giving much the same effect.

The quantity of material required for the medium size is five handkerchiefs twenty inches square or three and one-fourth yards of twenty-one, twenty-seven or thirty-six inches wide or two yards fourteen inches wide, with twelve and one-fourth yards of banding.

A Belt Fad.

Belts of old coins connected with links, with the coins arranged in pendant fashion in front, will be a favorite with the smart girl this autumn. The old copper two-cent pieces, which used to be as common as the penny, are now being collected and used for these coin belts. And a belt of two-cent pieces is really much more artistic than you would think. Just try it, and see.—Woman's Home Companion.

Poke Bonnets For Little Girls.

Little girls will wear granny poke bonnets, elaborately trimmed with ribbon rosettes and ostrich tips. A ruby red bonnet is composed of folds of felt cloth, and is faced with shirred chiffon of the same color. The only trimming is a wreath of natural holly and rosettes of velvet ribbon. Strings of the velvet are made to tie in a small bow under the chin, allowing the long ends to fall beneath.

Ideal Theatre Dress.

A princess dress in a light tint of broadcloth is an ideal theatre dress.

Make an Effective Hat.

Doves' breasts combined with one long, twisted fold of black velvet, held in place with buckles of cut steel, makes an effective hat. The breasts, with their delicate shadings of gray and white, form the body of the hat, which is almost flat in shape, with a wide, irregular brim, and the velvet fold forms a sort of crown, which would otherwise be missing on the hat.

Must Not Be Fussy.

A good bit of trimming may be used, but it must not look fussy.

Shirred Triple Skirt.

Triple skirts are exceedingly effective worn by the women to whom they are suited and can be relied upon as correct both for the present and for the coming season. This one, designed by May Manton, is made of champagne colored voile with trimming of lace, and is exceedingly handsome, but various trimmings can be used with equally good effect and all the pliable materials suited to shirrings are appropriate.

The skirt consists of the foundation, cut in five gores, the two flounces and the skirt. The foundation is carefully shaped and is fitted snugly about the hips, but flares freely below the knees. The flounces are gathered at their upper edges and the skirt is shirred to form a yoke and is closed invisibly at the back.

The quantity of material required for the medium size is eleven yards twenty-one inches wide, or six and one-fourth yards forty-four inches wide,

SHIRRED TRIPLE SKIRT.

with six and three-fourth yards twenty-one inches wide, or four and one-half yards thirty-six inches wide for foundation.

SCIENCE & MECHANICS

Sir W. Ramsay and Professor Soddy have found distinct evidence of the presence of helium in the spectra of gases emanating from radium bromide. Present observations, therefore, indicate that radium shines largely by the light of the rare gas helium which it evolves.

A public analyst of London reports the finding of a notable quantity of arsenic in a sample of candy sent him from the Isle of Wight. The poison occurred in small, apparently chocolate colored, sugar cubes. As a matter of fact, however, the dark brown coating was not due to chocolate, but to oxide of iron, which almost invariably contains traces of arsenic. Mr. Hehner, the analyst, also refers to finding the same dangerous coloring substance in such food substances as bloater paste, anchovy sauce, and chocolate powders.

An English paper says that the British Consul-General at Coburg states that a simple process has just been invented for manufacturing petroleum briquettes, very similar in appearance to those made from coal. A mixture of 150 grammes of soft soap, 150 grammes of resin, and 300 grammes of soda lye are added to one litre of petroleum and the whole heated and well shaken. The briquettes can be used within an hour or two of being manufactured. By the addition of sawdust and sand the briquettes will be more solid and at the same time cheaper. From experiments said to have been conducted on tugs the inventor claims it to have been clearly shown that these briquettes give out three times as much heat as ordinary coal.

Mr. Edgar R. Waite, of the Australian Museum at Sydney, in support of Mr. Henschel's account (recently given in this column) of the duet which his bullfinch and canary used to sing, cites a somewhat similar feat performed by two magpies. The first one had been taught a simple little song, which he piped very often and accurately, even maintaining it exactly in F, the key in which it was first given to him. A second magpie was purchased, and this bird soon learned the tune from the other one. When the first bird commenced its song the newcomer immediately came to attention, and with half-open beak awaited a certain note, at which point the other bird stopped, and the song was finished by the second singer. No matter how far separated, if the birds were within hearing distance of one another, the duet was always sung in this way.

The most reliable method to determine the steam consumption of an engine is to make an evaporation test; that is, to measure the water fed to the boiler in a given time and delivered to the engine in the form of steam. This method, however, entails considerable trouble and expense. So engineers often figure out the water consumption from indicator diagrams. The terms water consumption and steam consumption are here used indiscriminately, for a pound of water will produce a pound of steam at any pressure. Figuring that way can never be wholly accurate, because the data requisite to insure results are not thus procurable, states the Mining and Scientific Press. That is, the amount of water accounted for by the indicator is always less considerably than it ought to be, because of cylinder condensation, valve and piston leakage, to the extent that it might be that only fifty per cent., or at best not more than ninety per cent., of the water passing through the cylinder would be accounted for by the indicator. But if the cylinder were properly steam-jacketed, or if superheated steam were used, and there was no leakage of steam from valves and pistons, the water consumption could be closely calculated from an indicator diagram.

Bacteria in Stale Milk.

It is a recognized axiom among medical men that "the greater the distance and time between the cow and the milking and the child and the drinking" the greater the danger of germ infection. The time element is important, for nothing yet has been discovered which will retain the nutritive properties of milk. Every hour after the milk comes from the cow lessens the power of the nutrients. You can imagine, then, how much better off we are than our English cousins, who drink milk shipped from Holland, France and Norway. A fine mess of microbic bonny-clabber that must be that comes all the way from Australia. Keep on kicking about the way you are packed, jammed, smashed and squashed in the surface and "L" cars, but thank your stars for your new milk.—New York Press.

Higher Education in Siberia.

The University of Tomsk is well supplied with buildings including a very large one for clinics. The museum is amply stocked in every department, being specially rich in its archæological relics and its anatomical specimens. The library, of over 100,000 volumes, received at the outset a most valuable collection of books, engravings and original designs and sketches, contributed by Count Storoganoff. Some of these volumes would be counted rare treasures in any European capital. The chemical and physical laboratories are specially fitted up to meet the demands of the numerous mining industries of the region, while the botanical garden is scarcely excelled in Europe in the variety and completeness of its collections.—George Frederick Wright, in The Chautauquan.

A. G. ANDERSON,
of Somerville.

FOR MEMBER OF ASSEMBLY:
CHARLES M. DOLLIVER,
of North Plainfield.

FOR CORONER:
W. HOWARD TOMS,
of Warren.

MUNICIPAL AFFAIRS.

The question of municipal government, divorced from politics, is attracting widespread interest all over the country. Several municipalities in New Jersey have taken the bull by the horns and organized leagues for the purpose of securing better government in their towns and boroughs. The objects of such leagues are set forth in their platforms about as follows:

1. A city government free from politics.
2. A union of citizens aiming to cultivate civic pride and secure the election of city officials who will hold duty to the taxpayers paramount to the interests or demands of any political party, and administer city affairs on strict business lines.
3. No appeal to the political bias of voters in a city election, leaving the voters and city officials free to participate in County, State and National politics according to their choice and convictions.
4. Maximum service—minimum taxation.

That such an ideal government is worth striving for, all honest men must agree, and that a determined organization on these lines will surely lead to that realization, is proven wherever the right has been made.

One of the hardest fought battles we have record of has been made at East Orange by the Citizens' Union of that place, and in no better way can we illustrate our statement at the beginning of this article than by showing what that league has accomplished, which is set forth in the following report made on September 14, last, by Archer Brown, President of the Union, namely:

PRESIDENT'S REPORT.

The Citizens' Union has completed the first year of its history, and while the purposes of the organization have not all been achieved (perhaps never will be wholly achieved) there is abundant evidence that it has brought in a new era in the administration of public affairs in East Orange. What did we start out to do?

First of all, to introduce the principles of non-partisanship in the management of the business interests of the municipality, a principle announced by the chief executive of the nation, and now generally recognized by careful students of public questions. We conceived that it was to the good of East Orange that the great interests affecting public health, public utilities, public education, public franchises, improvements streets, parks, etc., should be administered, not by a political machine, centered in another city, publicly charged with using the power and prestige of a great party to forward the interests of rich corporations, but by business men according to business methods. That this feeling was widespread among our citizens and tax payers was evidenced by the spontaneous way in which the movement was originated and carried through the campaign of last fall, when about one-half of the voters, and as we believe, fully three-fourths of the taxpayers of the city supported it at the polls. We may be excused therefore for feeling that the principle, at least, has been endorsed by this community, however inadequately it may have been presented.

Next, the Citizens' Union started out to quicken interest in public affairs, and awaken the public conscience. It was not contended that the city was in the hands of a corrupt ring or that stealing of public funds was going on. It was, however, felt that through long domination of a single faction of one political party, a low standard of administration had come to be accepted as a matter of course, that public questions of far reaching importance, such as the disposition of valuable franchises, etc., were dealt with behind closed doors, and with little apparent regard to the rights of tax payers or the future interests of the community. In some quarters it was counted as subversive of party discipline to question any of these methods, and previous efforts in that direction had met with derision and defiance. The formidable uprising of a year ago showed that the people were becoming very tired.

The weapons used against us were, first, contempt, then misrepresentation, then intimidation and finally, as derision changed to alarm, the heavy artillery of the party in state and nation was brought to bear upon us. The town was stirred as it had not been for years, and the twenty odd hundred citizens who asked for business methods in spending city money were publicly read out of their party (if Republicans) and denounced as defamers of the city's fair name. Never before, perhaps, did petty political autocrats have to deal with an insurrection of such huge and respectable proportions. But out of all the uproar came just what the Citizens' Union was aiming at—a livelier and more intelligent interest in public affairs. And to this was added the discovery that a local peanut dynasty is not necessarily invincible because it has been intrenched for a quarter of a century, and is backed by a powerful coterie in a neighboring city, doing a highly profitable business under a great party's name. Further than this, there is ample evidence that the two Citizens' Union members injected into the City Council have proved to be the leaven that was needed in that lump. So again we may be excused for feeling that the main thing we fought for was achieved, even though we did capture all the offices.

Since the smoke of that battle has lifted, it is discovered that the relative position of the great political parties in New Jersey has not been changed; that a good Republican, for instance, can have ideas about the streets and parks and schools which he pays for without being a "traitor"; that men can actually take an interest in such things without being suspected of a desire for office, or any other motive than the public good; that capable and honest men can be found to accept public office if assured that they are not going to be run over by a highly organized machine the lever of which is pulled by a non resident boss, and lastly, that small men, whether honest or dishonest, who owe allegiance to some other power than the tax paying public, can no longer be safely put up for responsible positions. Is there any doubt on this latter head? If you think so, glance through the wards in the recent nominations for office. But one of the late dynasty renominated!

It has been suggested by our critics, and in some instances by our friends, that the Citizens' Union, having thus aroused the public conscience and, in a measure, cleaned the municipal house, has fulfilled its function and should disband or stay quiescent. In this connection we are reminded that we are soon to enter upon a presidential year, when men of both parties will want to line up under their regular standards, and will not want to engage in any movement which could in any degree disturb the political equilibrium in state or nation. Most of us are loyal party men, and I am pretty sure will strive at all times to keep business questions and political questions clearly distinct. Republicans and Democrats of our organization will struggle mightily between themselves on national issues but unite solidly as neighbors and citizens and tax payers on questions of how to get the most out of our money at home, and how to make East Orange the cleanest, healthiest and most beautiful residence city about New York. All this we conceive to be perfectly logical and consistent. Nothing would suit so much our friends who are tagged, and who jump when the wire is pulled from Newark, as to see the union go out of business. But every student of municipal affairs knows that persistent watchfulness is the price paid for official virtue; and that unless such watchfulness is organized it is very little feared by bosses and machines. It is not necessary to be always fighting, but it is necessary to be always ready to fight if occasion demands.

Further than this the history of the Citizens' Union for the past year, the record of its work as graphically set forth by the secretary, proves how broad and useful a field it can occupy in enlightening the public by lectures and other methods on political and social questions affecting civic life. If we concede (what most of us believe) that the only motive of outside party managers in fighting for control of our local boards is either to facilitate favors to great corporations or to promote the personal ambition of some rich man for a high office, then I do not see why all citizens, without regard to party, should not join the Citizens' Union and further its work.

AS TO TRADING STAMPS.

The trading stamp question is receiving considerable attention by New Jersey merchants, who are very generally opposed to the scheme—for scheme it is, as it only benefits the stamp concerns.

At Morristown, and other places, the merchants are "getting together," and seem to be making an earnest effort to do away with the stamp scheme.

The argument used by the stamp concerns is that the people want the stamps, will have them, and hence it is a good thing. The same argument could be used for free coal, free bread, or any other necessity, if the merchants should adopt any such plan of giving premiums.

Most people would prefer to get the value of their money in the article purchased, without being compelled to pay for something else every time they made a purchase.

How much longer do Plainfield merchants propose to give up hundreds of dollars weekly to these outside schemes?

HOW ABOUT THE ICE TRUST?

If we are not mistaken there was something like an ice trust in operation around here last summer. If it was not a genuine trust, it was very much akin to one. The people were quite willing to buy their ice, but the trust doubled on its price and squeezed down on the weights, thinking that the people would be obliged to purchase whether or no.

But the people said no; we will get along without ice, and they did; so now the ice dealers have plenty of ice left over; the people have learned to economize on the quantity of ice, and ice people are the losers.

Probably next summer it will be different; but if the ice dealers have not yet learned their lesson, the people can hold out still longer. It is not always wise to reckon without the people, as certain politicians and the ice men have (or may) learn to their sorrow.

AT ELIZABETH, Thursday, Union County Democrats, in convention, nominated for Assembly, Joseph H. Gunn, of Springfield; Joseph T. Hagen, of Elizabeth, and Charles L. Moffett, of Plainfield. With regard to this latter nomination considerable opposition was manifested, although it was recognized that Moffett was the strongest candidate that could be named. All sorts of rumors are afloat to account for the opposition, as it was against the wishes of Mr. Moffett and the Plainfield delegation that his (Moffett's) name was presented, but the rest of the county were determined to have him, and no one else.

THE legislature of New Jersey met in special session Thursday in pursuance of a call from Governor Murphy. It was agreed that the only question to be considered was the educational legislation. This will come up today.

Now that Tillman has been acquitted, South Carolina can go ahead and inaugurate a few more local feuds to add zest to the people and attract immigration to that otherwise delightful State.

Not the CHEAPEST place in PLAINFIELD
But the VERY BEST for
Groceries, Meats, Vegetables, Butter, Bread, and Other household provender,

that can be purchased, at as low prices as consistent with quality.
A specialty of vegetables and fruits.

THE CRUCIAL MOMENT.

The Fly in the Ointment of the Lady Content.

Some years ago a prominent English bishop paid a visit to America. He was entertained by the wealthy families of his church wherever he went, and very much honored a cultured lady of Boston by accepting her invitation to make his home at her house during his stay in that city. She was naturally exultant at her ...ess in getting this religious lion, ...ought anxiously to make his most pleasant. In England are styled "My Lord," and ...tood uppermost in the lady's ...ry one in the family was ...lled as to their mode of all fell into line except ... of exemplary industry ...n, but possessed of a ... weakness—he would ... up a message in a very ...ner, and for this reason ... in the ointment of the It was inevitable that ...at some time, accost the ...hat he would make a bull ...ained a certainty.

...n began a most careful drilling. ... boy was coached for days before ...e advent of the Bishop until it really seemed that he had mastered the problem. He tried hard, and would be seen approaching a post with the most reverent demeanor several times in a day, and gravely address it as "My Lord."

The crucial moment arrived when it was necessary to send the boy up to the Bishop's room the morning after his arrival, to inquire if he wanted anything. The boy had been through a most drastic drill the night previous, and he had repeated his query, "The boy, my Lord," which was to be his reply to the Bishop.

Early the next morning the Bishop was awakened by a tremulous knock at his door.

"Who is it?" he asked.

He was astounded to hear as a reply in quavering tones:

"The Lord, my boy."—Ireland's Own.

Knew His Rights.

The two newsboys had quarrelled over the possession of 6 cents, of which the smaller boy insisted he had been defrauded.

They proceeded to fistcuffs and the ... smaller boy was whipped.

"You licked me all right," he said, ...g his bloody nose on his ragged ... sleeve, "but I'll fight ye agin if we don't fork over 2 cents o' dat money."

"What fur?" demanded the other boy.

"Dogyone ye, I got a right to claim de loser's end o' de purse, hain't I?"—Chicago Tribune.

Due Later.

"Has my wife alluded to me as a buried treasure yet" queried the man who had materialized at the seance.

"No," replied the medium, "she hasn't yet found her second husband."—Chicago News.

It Was a Success.

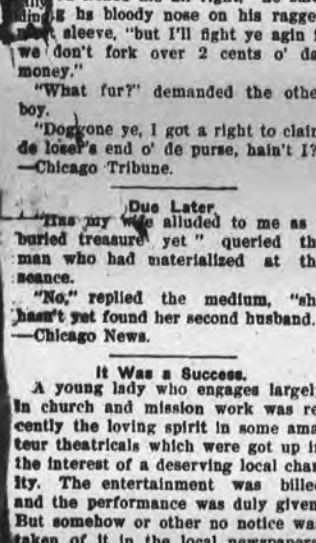
A young lady who engages largely in church and mission work was recently the loving spirit in some amateur theatricals which were got up in the interest of a deserving local charity. The entertainment was billed and the performance was duly given. But somehow or other no notice was taken of it in the local newspapers. A few days later a friend met the young lady in question, when the conversation turned to the theatricals.

"Was the entertainment a success?"

"I should think it was," replied the lady, with a smile. "Why, we got over $100."

"Is that so?" said the friend. "Then you must have had a large audience?"

"Well, no," she replied. "We only took $1.50 at the door, but father gave us a check for $100 if we would promise never to do it again."—St. Joseph Evening Press.



"Mother, mother; we wrote with ink for the first time to-day."—Fliegende Blatter.

The Doctor's Advice.

At a dinner party one night Sir Andrew Clark noticed that the lady sitting next to him at table passed a dish ... which he helped himself plentifully.

He asked if she did not like it, as it was excellent.

"Oh, yes, I like it, but my physician forbids me to eat it," she explained.

"Stuff and nonsense," said Sir Andrew "it could not hurt any one. Who is your physician?"

To which the lady, whom the medical magnate had forgotten, answered, with a demure twinkle in her eye:

"Sir Andrew Clark!"—London Spare Moments.

NOTICE

Dr. G. D. Herring, Osteopath, has removed from 212 West Front street to suite 309, 10 and 11 Babcock building, where he will receive his patients in the future, and will welcome at all times others interested in the science of Osteopathy.

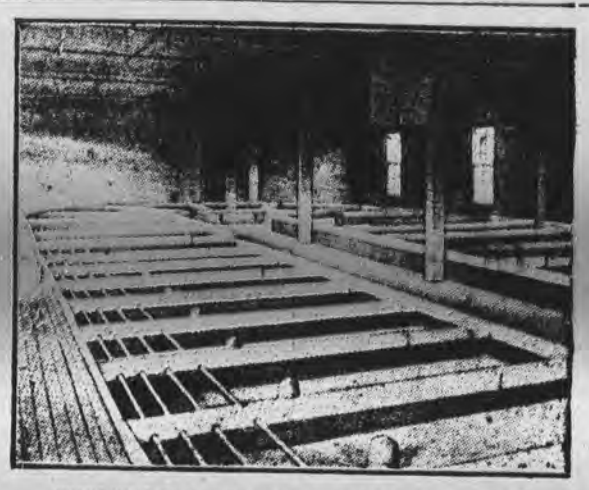
SCIENTIFIC POULTRY RAISING

THE tremendous growth during recent years of the poultry and egg industry, which, in point of value of the product, now ranks as one of the leading American wealth producing activities, has resulted in the introduction of modern scientific methods, which are quite as markedly in contrast to former practices as the advances in any other progressive field of endeavor. Indeed, to present-day achievements in this direction must be attributed the recent development of the American export trade in eggs, which has recently invaded markets as far distant as the Orient.

Perhaps the most convincing demonstration of what scientific methods are accomplishing in the poultry industry is afforded by the unique poultry farm at Sidney, Ohio, which ranks as the largest in the United States, and probably in the world. The buildings which comprise the plant consist of two main structures and a number of smaller inclosures. All are of brick construction, with slate roofs; and more than $100,000 has been expended in buildings and equipment, exclusive of the cost of the site, which comprises 140 acres.

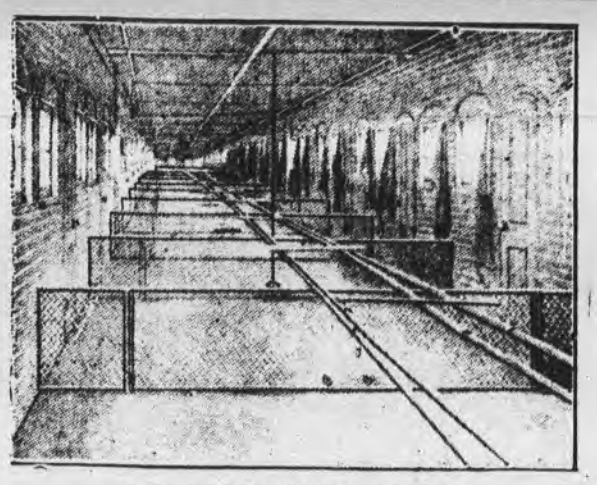
The hatchery, or broiler plant, is 480 feet in length. The main portion

THE EGG HOUSE AND HATCHERY AND BROILER BUILDINGS.



THE NURSERY FOR NEWLY-HATCHED CHICKS.

of the building is built in the form of the letter U, and has a periphery of 840 feet. In the basement of the other part are thirty incubators, each containing 300 eggs, so that there is a total of 9000 eggs daily in a state of incubation. The filling of the machines is so timed that one incubator will discharge its brood each day, and thus the plant may be said to have a daily hatching capacity of 300 chickens. From the incubator cellar, the small chickens are taken to what is known as the "nursery," which constantly shelters about 6000 young chickens, ranging in age from one to thirty days. When the chickens have attained the aged of thirty-one days, they are lowered by an elevator to the ground floor and put in the U-shaped part of the building, which is divided into sixty pens. The chickens advance one pen each day, so that at the end of two months they have completed the circuit and are ready for transference to the shipping department. It may be noted in this connection that the U-shaped portion of the building is constantly tenanted by about 21,000 chickens, ranging in age from thirty to ninety days. The egg house at the Sidney plant is 537 feet in length, and similar in construction to the building above described. It is bisected lengthwise by a four-foot aisle, on each side of which are thirty pens containing fifty hens apiece. The 3000 high grade Leghorn fowls produce daily 200 dozens of unfertile eggs for culinary purposes. The eggs for the incubators are produced by 900 high grade Plymouth Rock fowls.

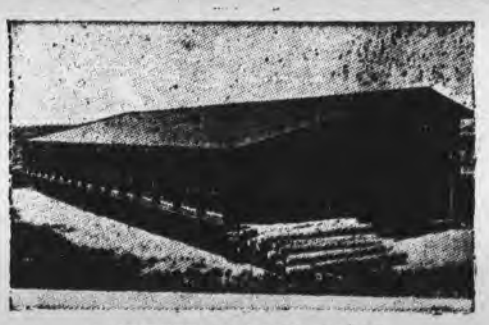


PENS IN THE BROILER BUILDING.

As indicating the proportion of loss, it may be stated that out of every 450 eggs which go into the incubators, an average of 300 perfect broilers are obtained. Connected with the egg house is an egg washing and marking room, where the date is stamped upon each egg sent to market.

One of the notable advances which have been made by the scientific poultry farmer of the present day is found in the practice of herding chickens. Instead of allowing the hens to run at large as formerly, mingling freely and picking their food from all kinds of refuse, they are now divided into colonies of not more than thirty hens. Each colony has its own reservation, maintained in the highest state of hygienic cleanliness, and each group of hens is separate and isolated at all times from the others. This also facilitates the use of feed calculated to insure the greatest possible productiveness—a subject to which the United States Department of Agriculture, as well as progressive poultrymen, have of late years given great attention; and, as an indication of what has been accomplished in this direction, it may be pointed out that the average yearly yield at these scientific poultry farms is in the neighborhood of 200 eggs from each hen, whereas under the old conditions the average yearly yield per hen did not exceed forty eggs.

Another advantage of this new policy of segregation is found in the fact that, should a chicken become sick or



A MODERN POULTRY HOUSE.

breed vermin, the trouble cannot spread beyond the one reservation without detection; and thus there is obviated the danger from epidemics such as have frequently in the past resulted in serious loss to poultry raisers. Another new adjunct is found in the automatic nest, which preserves the eggs free from the taint of incubation. No degree of incubation is possible, because, by means of these new nests, the egg is removed immediately after it is laid. The automatic nest has a hole in the bottom, beneath which is a revolving disk that receives the egg as soon as it is laid and moves it away from the nest.

The growth of the poultry business, as conducted on a large scale, could find no more significant criterion than the recent marvelous development of the incubator industry. The centre of the incubator manufacturing business is found in the middle West, and one town in Illinois turns out more than 50,000 incubators every year. It is estimated that not less than 500,000 incubators are now in use in the United States. Many of the large poultry farms have incubators with a capacity of 1000 eggs each, and from which there may be hatched 10,000 chickens a year, the loss varying from five to twenty per cent. From a scientific standpoint probably the most interesting incubator plant is that erected by former Vice-President Morton, at Ellerslie on the Hudson, although ex-President Cleveland has a high class installation on an experimental farm at Princeton, and President Diaz of Mexico has a costly incubator built especially to his order by an American manufacturer.

Even in the testing of eggs, improvements have been made in the prevailing method. The most effective way of testing an egg is to subject it to the light, but under the old plan, when the egg was held close to the flame of a candle, it almost invariably happened that the shell was blackened. The use of electric light has, however, rendered conditions perfect for a thorough test of the eggs and the utmost speed in handling.—Scientific American.

A Sign of the Times.

It is a healthy sign to see the press associations of the different States taking action on the asinine and antediluvian libel laws, declares Newspaperdom. Too long have the newspapers stood idly by and let Legislature after Legislature adopt measures which were diametrically opposed to our much vaunted free press, and too many times have the papers helped reelect the very men who deliberately passed the law curbing the power of the press. It is high time the matter was given serious consideration and decisive action taken. The trouble is that each paper has felt that it need have no fear of any kind of a libel law no matter how drastic. But now they have had their little expensive experiences and are able to see that any newspaper, no matter how carefully edited, may be injured under a foolish, inconsistent or unconstitutional libel law. Let us all realize this and keep pounding until the good effect is evident. Let all remember, too, that it is much easier to prevent the passage of unliberal libel laws than to change them after once passed.

Fear.

Fear is of two kinds, logical and illogical.

Illogical fear is where a man stays in the house because, say, there is a lion without.

But where a man stays in the house lest if he venture out a mosquito bite him and give him malaria, that is logical fear.

It is clearly more humiliating for the former to contract tuberculosis by reason of his confinement than for the latter.—Detroit Free Press.

The Nemesis of Boodlers.

Joseph W. Folk, the young Circuit Attorney, of St. Louis, whose earnest work in sending to prison the boodlers

JOSEPH W. FOLK.

who have disgraced the fair name of the Missouri Commonwealth, has placed him in the front rank of public officials who believe in literally living up to his oath of office.

CHILDREN'S DEPARTMENT.

THE BABY FLOWER.

Just a little baby blossom, it grew and smiled and grew,
Just as happy in the rain-time as when skies were bright and blue;
And the rain that bathed its petals was as kindly as the sun,
And the wind was just as kindly when the daylight was all done.

This was how the blossom viewed it, the little baby-flower,
So it smiled and grew the sweeter with every passing hour;
And all the little fairies, in moonlight, dusk, and dawn,
Rejoiced and sang around it on the dew-besprinkled lawn.

Just suppose, do, children, that the baby-blossom bright,
Had fretted under rain-drops, or bewailed the sun's bright light!
I've known little child-flowers do this—but perhaps they didn't know
That all kinds of times are needed to make flowers—and children—grow.
—Chicago Record-Herald.

BATTLE OF THE BUTTONS.

There were forty of them, twenty Reds and twenty Blues, marching in long straight lines across the carpet, with the rubber ruler at their backs. You might have thought that they were only buttons, but Willie could have told you better, for he knew that they were two armies at war and that the blue button with the gold rim was the captain of the Blues and the red button, twice as large as the others, was the captain of the Reds, and that the fighting was going to begin very soon.

The Blues were on the table-land made by the rug before the grate and the Reds were in the valley, where there came the bunch of green leaves and purple flowers in the carpet. They would have liked to reach the table-land, too, but the Blues would not let them, and that was how the battle started.

Two Reds had come close under the edge of the table-land when a Blue sharpshooter saw them.

"Bang!" came the rubber ruler down upon one of the Reds, and it was the end of him, for he turned square over on his little red stomach.

Then his comrade fired back.

"Bang!" came the rubber ruler down upon the Blue sharpshooter, and he never fired again, but turned square over on his little blue stomach.

And then the Reds came running up to help their man, and the Blues came running up to help their man (only he was dead), and there was a steady "bang! bang! bang!" until six Reds and seven Blues had rolled over on their little stomachs and been taken from the field.

It was just about this time that the captain of the Blues noticed most of the Reds in a long, straight line and shouted (or Willie shouted for him): "Boys, see there. Give 'em grape and cannister."

So the rubber ruler came down. "Boom!" along the whole line at once and three of the Reds rolled over all at one time.

That was a dreadful thing and in a second the captain of the Reds shouted (or Willie shouted for him): "Scatter, boys. Spread out. Don't let him do that thing again."

So they spread out, and right there was the turning point of the battle.

One of the Reds (he had a little white spot of him) crawled close up to the table-land again and took deadly aim straight at the captain of the Blues.

"Bang!" he fired, but it was no use. That captain only bounced—he never turned over at all.

"Bang!" fired back the Blues, but that white-spotted Red never budged.

"Bang!" he fired once more, but this time the captain of the Blues jumped straight up in the air and fell over the edge of the table-land and rolled down among the Reds and was captured.

The white-spotted Red saw the discouraged Blues retreating and with all his might he shouted (or Willie shouted for him): "Bring the bridge! Bring the scaling ladder."

And when three men had brought the bridge, which was a stiff, white sheet of paper, they set it against the table-land, and all those Reds went marching up.

The Blues by this time had rallied and begun to fire again, but it was too late. The Reds had already climbed to the table-land and—

And just then little Ruth came running in and tripped over the table-land and sent every soldier flying into the air, and when they came down every one of them was rolled over on his stomach, excepting that white-spotted Red.

"And what happened then?" asked mamma, when she had comforted little Ruth and taken up her mending once more.

"Well," said Willie, "the Reds were just going to beat, but there came an awful, awful earthquake and it killed every man of 'em but one."—Frederick Hall, in Chicago Record-Herald.

THE ROMANTIC BUGLE.

Ralph D. Paine was one of the adventurous buccaneers of the Three Friends, the famous filibustering craft of the Cuban war. The grim yet humorous study of his adventures is in Outing. Says Mr. Paine:

"Jack Gorman, the cavalry bugler, had refused with scorn the new Mauser rifle offered him by the leader of the expedition, but had brought along an old Springfield. He explained several times each day that the Cuban Junta in New York had promised to pay him $1000 for each Spanish officer he should shoot. Gorman had 150 pounds of Springfield ammunition in his haversack, and considered himself already possessed of a fortune of exactly $150,000. It was as safe as money in the banks. 'One hundred and fifty officers at $1000 each.'

"In the haversack was also a battered bugle mouthpiece, treasured as a souvenir of the fight with the United States Cavalry at Wounded Knee. In the middle of the skirmish with the gunboat Gorman opened fire with the Springfield from the afterdeck, shooting with the same earnestness and deliberation to be imagined if he had been bowling over his $1000 with every cartridge. He became really and unexpectedly effective when he ceased firing, pushed the bugle mouthpiece into the muzzle of the Springfield, threw open the breech block and began to blow the calls he knew from 'Boots and Saddles' to 'Assembly.' The extemporized bugle was a triumph. The sound of it seemed to transform the Three Friends into a war vessel. It was learned later from Havana that the officers of the Spanish gunboat were alarmed by this indication that the vessel they had attacked was an armed and disciplined gunboat with a naval equipment. The bugle calls made the disreputable Three Friends a formidable foe in the darkness. Having blown his musical repertoire through the barrel of his rifle, Gorman pulled out the mouthpiece, jammed a cartridge into the other end and resumed his fire at the wide, wide world."

WHY RUN FROM RAIN?

"Do you know," said the Observant Citizen, according to the Philadelphia Press, "the habit of running through the rain is based on a definite fallacy? It is a common habit. But does it tend to minimise the amount of water falling on a person exposed to the rain? I am convinced that it rather aggravates the situation. By experience, in passing the distance of a block, running one time and walking the other, and at times when the rainfall was about the same, I found that my clothes picked up more water and were consequently damper when I covered the distance in a run than they were when I walked it.

"There seems to be a good reason for the rather curious fact. Rain falls irregularly. Sometimes there is a space of five or six inches between the falling drops, as we have noticed on smooth surfaces, like a stone flagging, and again only the fraction of an inch will separate the drops. Water occasionally falls in sheets, but this is not usual. But while the fall is irregular, considered with the respect to the perpendicular lines described in the descent, looking straight ahead and through the lines we will find before us a sheet of water that is well-nigh solid. We can understand that running against this sheet of water will have very much the same effect wind would have if its direction forced the rain in our faces. We simply pick up the water, and the fact that the spaces between the drops perpendicularly considered are greater than the spaces in any given direction horizontally will explain to us the fallacy of the whole thing.

I will put it in another way. Suppose you stand perfectly still in the rain for a space of sixty seconds, then you run through the rain for the same period of time. Is it not reasonable to assume that you will pick up more water in your flight than you will in your stationary attitude? I think so. I have tried it, at any rate, and have found the fact to be that way."

MOUNTING LARGE ANIMALS.

At one time or another in his life, every boy who is a boy has been fired with a desire to "stuff" an animal of some sort—either a favorite dog which has met with an untimely fate, or an unfortunate cat, or some wild animal which has fallen into his hands. As a rule, however, something has gone wrong with the operation; either the skin has been ruined in removing it, or it has been spoiled by insects after it was removed; or, if both of these difficulties were gotten over successfully, the result has looked so awkward and shapeless that it has soon been thrown away.

This is not surprising when it is understood how much skill is needed to properly mount an animal, large or small, and how thorough a knowledge of its anatomy is required to make it look lifelike.

Nowadays small animals are modelled in plaster of paris almost as if they were intended for statuettes, and then have the skin drawn over them carefully, while the frames of large animal are constructed of wood, covered with laths, over which quantities of excelsior are fastened, or with wire netting, over which plaster is carefully molded to fit the animal.—Crittenden Marriott, in St. Nicholas.

Few Theological Students.

The number of theological students in Germany has diminished gradually from 4267 in 1830 to 2149, or less than half, although the population has doubled since 1830.

THE GREAT STRENGTH OF INSECTS

Fr. de Zeltner in La Nature—Translated and Condensed For Public Opinion.

Every one in a general way knows of the astonishing muscular power employed by insects, and of the real tours de force which they execute either in the pursuit of prey or in defending themselves against their enemies. At the same time one rarely has a precise idea of the strength of these insects because there are few standards of comparison, although nothing is simpler than to make a correct valuation of their strength.

The wing strength of insects is known because of the work of Felix Plateau and De Lucy, who showed that these little creatures could not raise a weight much heavier than themselves, no matter what the surface of their wings. During the course of these experiments a very interesting fact was discovered, namely, that the size of the wing decreases as the weight and size of the animal increases, a fact which explains the slow heavy flight of the beetle and the swift, light movement of the gnat.

The case is entirely different, however, where the creature moves on a solid surface where its six feet may obtain points of support. In this case we can approximately calculate the force exercised. Take, for example, a fly by the wings, leaving the legs free so that they may seize and raise a

DIAGRAM ILLUSTRATIVE THE STRENGTH OF INSECTS.

match, as shown in figure 1. If a man wished to perform relatively equal labor he would have to raise a beam 24½ feet long by 14½ inches square. The earwig of figure 3, harnessed to a small chariot, drags without difficulty eight matches, which for a large percheron horse would mean dragging 330 beams as long and thick as himself. The man who leaps the 300 meters of the Eiffel tower is merely repeating the action of the flea which can leap 200 times its own height. Finally the Hercules in figure 5 is obliged to raise eighty large locomotives to equal the relative strength of an oyster, which in closing its valves exercises a force of fifteen kilograms. Thus it is a much more simple thing to calculate the strength of insects than to equal it, and our modern athletes have yet a long road to travel before they can compete with animals occupying very humble positions in the living world.

AIDS PRIVACY IN TELEPHONING

A simple arrangement is shown here for those who desire secrecy and privacy when telephoning. It is a slender metal frame covered with muslin

or canvas. Drawn over the head, it insures the greatest ease in hearing as well as privacy in telephoning, after which it is simply folded up.

Medical Bubbles.

Doctors have intented a new form of bubble. Neuralgia, sciatica and lumbago are known to be affectations of the ends of the nerves which lie just under the skin of the painful region. It has been discovered that by injecting air under the skin the ends of the nerves are lengthened and the pain relieved. The bubble of air is pressed by the fingers and caused to move about until all parts are relieved. In dislocations, fractures and bruises the same treatment has given relief.

Two million of London's inhabitants never go to church.

The average depth of the ocean is about two miles.

The Funny Side of Life.

THE SINGLE EXCEPTION.

Where some unlucky man falls down
It seems like jolly fun,
Unless (and then there comes a frown)
You're the unlucky one.

Such intolerance was hideous enough, though it was based in part upon strength of conviction.*

To-day the pendulum has swung to the other extreme. We are in a day when mischievous moral malaria steals subtly into the fiber of strong endeavor. The age is drunk with materialism, the south wind blows softly, and multitudes are enervated by its soothing touch. Some would seem to think that in this day the towers of a lofty Christian life and character and of the great splendid structure of the kingdom of God are going to leap up in the night like Jonah's gourd; that we are going to wake up some fine morning to find the building miraculously finished, without our endeavor, to the ...rst-stone. Understand me, the heart of the church still beats strong and true, but great masses of nominal Christians are in a lethargy-eating atmosphere, listless, idle, unaccomplishing.

Toleration is a long advance from intolerance, but toleration easily becomes indifference, and both are utterly inadequate to express the ideal relationship between bodies of Christ's followers. Tolerate? Endure? Be indifferent? Shame on those who would thus cruelly the Christ afresh! "Like a mighty army moves the church of God," shoulder to shoulder, heart beat answering to heart beat, steps swinging in time to the martial music of the church militant and the church triumphant, "Like a mighty army moves the church of God." No regimental sacrifice of conviction, but above the flag of the regiment, the flag of the army above the standard of the denomination, the white banner of the Captain of the host, the Commander of the armies of the faithful, the King, omnipotent and eternal! Not intolerance, not toleration, not indifference, but fellowship, is the rallying cry, and we may believe that it finds a sympathetic chord in every heart of this great company.

A good beginning has been made. Federation is fellowship put into practice. Federation of churches and of Christian workers has ceased to be a dream. It is far from uncommon to-day, in single communities, in counties, in States. Let me indicate a very few of the lines which have been suggested and actually followed in this federated work. A religious census of a given community, resulting in a religious directory, showing church and Sunday-school membership and attendance; Christian citizenship efforts, including those against the localized saloon and against the desecration and annihilation of the day of rest, a bulwark of our national life now thrown down and trampled in the dust—our brethren under other national flags are not free from the bitterness of this assault; a campaign looking for the preservation or the securing of an ideal public school system; where it can be done a wise direction of denominational enterprises in the way of the founding of new churches, thus tending to economy of effort and wise stewardship of resource, but chiefly, chiefly, consecration in the vital, invaluable work of the church universal in evangelization, this above everything else—the joining hands of those who believe that the world is lost without Jesus Christ in harmonious and loving fellowship of action for the world's salvation. In all of these endeavors we may work together, one heart beating as one in our common love and loyalty to our common Lord.

Let me suggest two thoughts which may strengthen us in our fellowship.

First—The enemies of Christ and His followers are neither dead nor sleeping.

Luther said, as a representation of the church in his day: "Who would paint a picture of the present condition of the church let him paint a young woman in a wilderness, or in some desert place, and round about her let ten figure lions, whose eyes are glaring upon her and whose mouths are open to devour her substance and her beauty." That is the natural condition of the church. When the church is at ease, in this age, in any age, is truly alive, and is fulfilling her destiny, she will find about her, as of old, men more cruel than ravenous beasts. The gospel means battle. It is rightly on the offensive, not the defensive. The gospel divides, when it is manifested in a disciple whose embodying of the gospel is strong enough to divide anything. The block will bear almost unmarked the edge of an axe handled by the feeble fingers of an infant, but the axe goes cleaving through the wood when the edge comes down under the sweeping power of a strong man's arm. To-day, multitudes of nominal Christians live on most amiable terms with the world, and know next to nothing of any tribulation or opposition occasioned by their profession of Christianity. But that is not because there is any real alteration in the consequences of close union with Jesus. It is because their union is so very slight and superficial. The world loves its own, and what can it find to hate in the shoals of people whose religion is confined to their trousers mostly and has nothing to do with their lives? It has not ceased to be a hard thing to be a real and thorough Christian.

To be sure, opposition finds different foes to-day than in some other days. You know to what lengths it has gone. The Inquisition, the massacre of St. Bartholomew, the reign of Philip II. of Spain, the Duke of Alva with his satanic deeds in the Netherlands, the fires of Smithfield, these are not so far in the past that mists of oblivion have shrouded them. But let us understand, my fellow Christians, that the world and the flesh and the devil are against Christian building and Christian living still, just as they always were.

I do not believe in people looking for trouble, searching for some one who will consent to persecute them, but I have an idea that the sting of Smithfield fires and the wrenching of Torquemada's rack, if those experiences could be repeated, might correct some vagaries of modern theology. The thundering summons of the enemy at the door might be a wholesome antidote for some conditions in our churches of to-day. There is something in the call to battle, battle for a cause which is righteous and supremely worthy, which stirs the deepest and the best in us. Is it true that there is to-day little of the heroic in religion to appeal to men? Alas for us if that be so.

The statement comes from some of our theological seminaries that there is some dearth of candidates for the ministry. Why? Why is it that the ministry does not appeal to every stalwart, able, earnest, unselfish Christian man in his college days? It does to some. A part of the product of our seminaries to-day was never surpassed. But why does not the claim of this great vocation press upon every such an one until it is soberly settled one way or the other? It is not because young men are afraid. There was no difficulty in filling up the ranks of the Rough Rider regiment, though every man knew that he was taking his life in his hands when he volunteered. There was no lack of volunteers for service when the Merrimac was to be sunk at the mouth of Santiago harbor, though it meant a voyage into the jaws of death. Eight men were needed; you know the response to the call for volunteers.

I will not believe that there is among our young men a lack of courage, a lack of willingness to suffer. Can it be that young men have made up their minds that with the present spirit in the church there is little demand for the heroic in her ministry? They say that a minister makes his church. He does leave his stamp upon the church, but it is no less true that the church makes the ministers. And the minister will not go far beyond what the church requires, or at least he will not go far beyond the point to which the church will follow him. If the church of the living God is to any considerable degree honeycombed with indifference, permeated with the dry rot of lethargy, if the heroic element in the church is dying, then the church may hold itself responsible for any diminution in number, and for any lessening of stalwart efficiency in its leadership. No man of strength and self respect is going to commit to being regarded merely as a convenient adjunct to weddings and funerals, as a kind of family pet to be coddled and fed with sweetmeats. If the church wants much that is heroic in her leaders, she must have much that is heroic in herself. There must be a recognition of the fact that the foes of Christ and of His followers are neither dead nor sleeping; that eternal vigilance, eternal self-sacrifice, everlasting and strenuous struggle, are the price of progress and of victory now as always.

Second—The insistent call for service has not ceased. Dean Frederick W. Farrar, who has but recently passed from among us, has said: "Is not this fatally true, that the lives of very many are frivolous, useless, egotistical; that the lives of very many are wasted and self-ruined by their own vilest passions; that the lives of some are like a mere poison and pestilence to all around them; that it is the lives of few only which are noble and generous, brave and unselfish, merciful and just, pure and true? And the main curse of most lives is that they think only of self and live only for self." I hope that the words contain an exaggeration. I can but believe that each of us knows in his own circle lives which, though they be hidden from public view and knowledge, are "brave and unselfish," "pure and true." But the words of the great churchman are a challenge and an appeal. The insistent call for service has not ceased.

Thank God, history shows that the call has not been in vain. In the social stream of the life of this world it is good to think of men and women who have not pleased themselves, but have gone about doing good, great souls who in their stubborn devotion to the truth, in detestation of falsehood and lies, have faced a lying world and the hatred of the base and the storm of weak and cowardly criticism, not holding their lives dear unto themselves.

I hear some one say, "We have no such call as they," but we have. The only call they had we have—the call of the need. We might, the humblest of us, be useful. Perhaps very few eyes will be wet for us, and they not for long, while others, with less of opportunity than ourselves, have gone down to the grave amid the benedictions of the poor. Ah, the insistent call for service has not ceased. Can we not strive to rise, to rise unitedly, to rise in ever strengthening fellowship, into such a life as is described by the words spoken of our blessed Lord, "He went about doing good."

The great Methodist leader, John Wesley, the bicentenary of whose birth has just been celebrated throughout the Christian world, twice said: "I desire a league, offensive and defensive, with every soldier of Christ." So say we. Let it be repeated in ever increasing volume until the earth shall be full of the knowledge of the Lord as the waters cover the sea. "We desire a league, offensive and defensive, with every soldier of Christ."

Two Kinds of Sympathy.

Sympathy is a word set over from the Greek, and means "suffering with." Hence one who sympathizes with another suffers with Him. In our careless use of the word we do not put so much meaning into it. As generally employed, it means that one has a gentle touch of pity for another who is in trouble. In order to have it signify anything worth while we should put its full meaning into it when we use it.

There are two kinds of sympathy, says Wellspring. There is a so-called sympathy that is simply depressing. If one is in trouble it makes his trouble seem greater and harder to bear. It weeps with me, but not in a comforting way. On the contrary it makes one feel that he has indeed reason to weep, and that there is no real solace for him. If one is cast down because of his faith, it makes him give up all his hope. The sympathy of his friends Job had sympathetic groaners was justified in saying to them "miserable comforters are ye all."

The other is a sympathy that puts heart, hope, manhood into one. If one is cast down it leaves him cheered. Afterwards the obstacles do not look so formidable or the clouds so black. In our despondent words we magnify our troubles; helpful sympathy enables us to see them in their true proportions. This kind of sympathy not only weeps with those who are sorrowful, but speaks a comforting word. It does not merely pity the unfortunate, it puts out a hand to lift him up. If one really sympathizes—suffers with—another, he will do something besides condole, if something besides condolence is needed.

Sympathize with others, as you would like to have others sympathize with you.

Subjects of Thought.

Behavior is a mirror in which every one displays his own image.

Originality blazes a new track while eccentricity runs on one wheel in an old rut.

It is better to suffer wrong than do it, and happier to be sometimes cheated than not to trust.

Some men stand on principle and some others probably would if they had it to stand on.

When you step up on one promise you will always find a higher and a better one before you.

A laugh to be joyous must flow from a joyous heart, for without kindness there can be no true joy.

The art of saying appropriate words in a kindly way is one that never goes out of fashion, never ceases to please, and is within the reach of the humblest.

The domestic man who loves no music so well as his kitchen clock and the airs which the logs sing to him as they burn on the hearth, has solaces which others never dream of.

God is in our souls, as our souls are in our bodies. He never ceases to speak to us, but the voice of the world without and the tumult of our passions within bewilder us, and prevent us from listening to Him.

My heart is fixed firm and stable in the belief that ultimately the sunshine and summer, the flowers and the azure sky, shall become, as it were, interwoven into man's existence. He shall take from all their beauty and enjoy their glory.

Do You Travel on Good Roads?

Good roads are a matter of religious as well as of national life. We must learn that the amount we can carry depends not so much on the weight of our burdens as on the road over which we try to carry them. A man can haul three tons over a good macadam easier than he can draw a hundred weight through a mudhole. So a man can carry great burdens who is upheld on the rock of God's providence, who would stumble and fall as he tried to flounder on through the mires of the world's discouragement and discontent. As Thomas a Kempis said, "He rideth easily enough whom the grace of God carrieth." John Kitto was a poor boy, deaf and dumb, and brought up in a workhouse—a lot hard enough to cast down many lives, but he trusted in God, he thought and wrote of God's kingdom, and he wrought great things before he died. It does not matter so greatly what we have to bear, or what genius or gift or power we have to bear it with, as it does over what roads of doubt or fear and irefulness, or of faith and courage and singing, we try to bear our burden.—Sunday School Times.

Where Love Abounds.

Dr. James G. K. McClure gives the following beautiful description of the heart where love abounds: What strength and joy and nobleness would characterize men if in every soul that now has some love, that love should "abound." When warmth "abounds" in a heart no room is left for coldness. Our world would become unspeakably sweet and helpful if in all Christian hearts loving kindness abounded "yet more and more." The most attractive lives would become even more attractive.

ADMIRAL SCHLEY ENDORSES PERUNA.

Pe-ru-na Drug Co., Columbus, Ohio:

Gentlemen:—"I can cheerfully say that Mrs. Schley has taken Pe-ru-na and I believe with good effect."—W. S. SCHLEY—Washington, D. C.

ADMIRAL SCHLEY, one of the foremost, notable heroes of the nineteenth century. A name that starts terror in the heart of every Spaniard. A man of steady nerve, clear head, undaunted courage and prompt decision.

Approached by a friend recently, his opinion was asked as to the efficacy of Peruna, the national catarrh remedy. Without the slightest hesitation he gave this remedy his endorsement. It appeared on later conversation that Peruna has been used in his family, where it is a favorite remedy.

Such endorsements serve to indicate the wonderful hold that Peruna has upon the minds of the American people. It is out of the question that so great and famous a man as Admiral Schley could have any other reason for giving his endorsement to Peruna than his positive conviction that the remedy is all that he says it is.

The fact is Peruna has overcome all opposition and has won its way to the hearts of the people. The natural timidity which so many people have felt about giving endorsements to any remedy is giving way. Gratitude and a desire to help others has inspired thousands of people to give public testimonials for Peruna who heretofore would not have consented to such publicity.

Never before in the annals of medicine has it happened that so many men of national and international reputation have been willing to give unqualified and public endorsements to a proprietary remedy. No amount of advertising could have accomplished such a result. Peruna has won on its own merits. Peruna cures catarrh of whatever phase or location in the human body. This is why it receives so many notable and unique endorsements.

Address The Peruna Drug M'f'g Co., Columbus, Ohio, for free literature on catarrh.

A Jig and a Cripple.

An old fiddle and an Irish reel recently wrought a remarkable cure in Norristown, Pa. Ann McKenzie two years ago fell and broke her leg. The injury left her lame and on crutches. At Mrs. McKenzie's new home in Moore street many of her friends assembled to give her a house warming. With crutches at her side, she became an interested spectator as the dancing warmed up the boys and girls, and when the wielder of the bow struck up "The Irish Washerwoman," to the surprise of the assemblage, Mrs. McKenzie sprang to her feet, and was soon in the centre of the room, dancing like a youngster. She now goes about without the aid of crutches, and is receiving congratulations on her recovery.

A Match For the Cockney.

A story reaches me of a stockbroking "sportsman" who had gone to the Highlands with a shooting party. Thinking, with Cockney assurance, to take a rise out of an old Highland shepherd, he said:

"You have a fine view from this mountain, Donald."

"Tere is, indeed, a grand view," replied Donald, impassively.

"I'm told, Donald, you can see America from it."

"America!" echoed Donald, "far ayont America! We can see te moon."

The Cockney subsided.—London Free Lance.

The Bones of the Three Kings.

Cardinal Ferrari, who attended the German Catholic Congress, took back with him to Milan as a present the bones of the three kings, Melchior, Gaspas and Balthasar, which were the most famous relics in the Cologne Cathedral. The legend is that the relics were taken away from a Milan church by Frederick Barbarossa's men, and the gift is intended as a restitution.

Half the novels printed in France are exported. N. Y.—42

My Lungs

"An attack of la grippe left me with a bad cough. My friends said I had consumption. I then tried Ayer's Cherry Pectoral and it cured me promptly."
A. K. Randles, Nokomis, Ill.

You forgot to buy a bottle of Ayer's Cherry Pectoral when your cold first came on, so you let it run along. Even now, with all your hard coughing, it will not disappoint you. There's a record of sixty years to fall back on.

Three sizes: 25c., 50c., $1. All druggists.

Consult your doctor. If he says take it, then do as he says. If he tells you not to take it, then don't take it. He knows. Leave it with him. We are willing.
J. C. AYER CO., Lowell, Mass.

A Champion Truant.

Berlin lays claim to the distinction of having the champion truant of the world. He is a boy of ten. Nothing could make him attend school, and it finally became necessary to send him thither each day in charge of a policeman. This lasted for a week or so, and then he began to run away from home at night so that the policeman could not find him in the morning. To stop this practice he was locked up. One night he jumped from the window in the room where he was confined and landed in the street, thirty feet below, with his skull and most of his ribs broken.

A Large Egyptian Dictionary.

The large Egyptian Dictionary about to be published by the Berlin Academy of Sciences is being put together on the basis of a distribution of slips, of which no fewer than 280,000 have been sent out. In this way, says the London Standard's correspondent, by far the largest portion of the Egyptian language has already been covered. The work is going on under the direction of Professor Erman.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free. Dr. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa.

A Sermon in a Sentence

If you are morose, moody or despondent; if you have a habit of worrying or fretting about things, or any other fault which hinders your growth or progress, think persistently of the opposite virtue and practice it until it is yours by force of habit.—O. S. Marden, in Success.

Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free. F. J. CHENEY & Co., Toledo, O.
Sold by Druggists, 75c.
Hall's Family Pills are the best.

More Snuff Used Now.

The snuff users of the United States have increased in number about six per cent. a year for several years, taking the annual consumption of snuff as the basis of calculation. The aggregate weight of pinches of snuff taken last year was 18,000,000 pounds.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c. a bottle

Twenty-four persons living in County Tipperary, Ireland, are centenarians.

Piso's Cure is the best medicine we ever used for all affections of throat and lungs.—WM. O. ENDSLEY, Vanburen, Ind., Feb. 10, 1900.

A new lighthouse costing over $2,500,000 is in course of erection at Folkestone.

PUTNAM FADELESS DYES do not stain the hands or spot the kettle, except green and purple.

A Petrifying Man.

Andrew Buchler, a patient at St. Joseph's Hospital, St. Paul, is becoming petrified. His stomach and intestines are so hardened that they resist every effort of medicine and are almost impervious to instruments. Buchler comes from northern Minnesota and was a very strong man. Some months ago his digestive organs refused to perform their functions and he sought treatment at his home. He could get no relief and came to St. Paul. He has been at the hospital for six weeks. He is kept packed in ice and artificial digestion is employed to keep him alive. He gets no solid food, existing on ice water and milk.

New Use For a Husband.

There is a very ingenious woman living near Meeker, who says that her liege lord and master does not and has not furnished the water to mix the bread for fifteen years. He is always lying around doing nothing. Two weeks ago he went to bed with a very slow fever and his wife got an idea that she could make an incubator of him. She put 100 eggs around him, but he is getting cross and uneasy and she is afraid he will quit the nest as he never has stuck to any job three weeks. If this should prove a success it will nearly destroy the helpful hens' summer vacation.—Chandler (Okla.) News.

LET THIS COUPON BE YOUR MESSENGER OF DELIVERANCE FROM KIDNEY, BLADDER, AND URINARY TROUBLES.

It's the people who doubt and become cured while they doubt who praise Doan's Pills the highest.

Aching backs are eased. Hip, back, and loin pains overcome. Swelling of the limbs and dropsy signs vanish.

They correct urine with brick dust sediment, high colored, pain in passing, dribbling, frequency, bed wetting. Doan's Kidney Pills remove calculi and gravel. Relieve heart palpitation, sleeplessness, headache, nervousness, dizziness.

TAYLORVILLE, Miss.—"I tried everything for a weak back and got no relief until I used Doan's Pills."
J. N. Lewis.

Worthy to Receive Pension.

A certain charitable organization in the city had a request the other day from a young Italian threatened with consumption who wanted help to get back to Italy in the hope of saving his life. An agent was sent to investigate, and, as usual, asked the young man's mother for a list of the members of the family. The blanks furnished for this formality have nine spaces left for children. The agent filled up one blank and still the list went on. She filled two blanks without a word, the list of children stopping at eighteen. When she turned in her report it embraced the following official recommendation: "That the boy be sent to Italy, and that the mother be recommended to President Roosevelt for a pension."—New York Times.

The total incomes of all American farmers last year was about $5,500,000,000.

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

F. M. Moore et ux to W. H. Shotwell, $1.

John H. Van Winkle to Abram M. Vail, $3,200.

Ada M. Grant and husband to Laura M. Kline, $500.

Adelaide B. Ketcham and husband to Chas. C. White, $6,000.

Concerning Proctor's Theatres.

Patrons of the F. F. Proctor's theatres during the past Summer have noticed with pleasure that in several of the houses a daily distribution has been made of souvenirs. In this case the souvenirs took the shape of a handsome little gold-bowled coffee spoon, bearing the well known Proctor emblem—the seven-armed wreath grasped in a strong hand. It will probably surprise many of those who were fortunate enough to obtain the souvenirs, that between May and October nearly 200,000 of these little spoons were given away gratis to the auditors. It would seem to be pretty expensive advertising, at first glance, but when one stops to think that each of the pretty tokens is now carefully preserved, to adorn some "souvenir spoon "cabinet,then it is tolerably certain that Mr. Proctor has made a very shrewd investment.

In far-away Paris—the city of Eternal Gayety—there is a wizard of photography whose fame is slowly but surely penetrating to the farthermost corners of the inhabitable globe. His name is Georges Melies. His work is done in the little Houdin Theatre on the Rue Chambord, where the exhibition of moving pictures forms the entire evening's entertainment. But these motion pictures are by no means the conventional series of reproductions of everyday sights and scenes now so familiar to vaudeville patrons. On the contrary, the Melies' pictures are absolutely novel in their way. They run without interruption for nearly 1,200 feet, and they tell a complete story, usually of some weird or grotesque kind, that is simply wonderful in its different phases. "The Trip to the Moon" and "Robinson Crusoe" have already become familiar to the patrons of Proctor's theatres, but neither of these approaches in vividness of effect the latest Melies' triumph is "Fairyland." This picture has been exclusively secured for the Proctor houses, and is now being shown at all those theatres. Moreover, Mr. Proctor has just enterd into a contract with M. Melies, by which all that clever photographer's works will be first seen in America at the Proctor playhouses.

A Marvellous Charm.

From the moment one steps from the train at Lakewood he is conscious of entering a different atmosphere. The scent of the pines prevails and the quiet aristocratic surroundings are impressive. The roadway in front of the station is thronged with fashionable turnout, and with out noise or confusion the visitor is whisked away to his hotel, than which there are none finer in the land. At these vast abodes there is none of the cold,chilly atmosphere so often found at resort hotelries; instead the spacious reception rooms are cheery with great log fires;tone is added by the charming decorations, and the courtliness with which the guest is met, places an assurance on the whole, while the service in every respect is such that the guest remark it. Lakewood's cottage settlement is now of considerable proportions and Mr. George J. Gould has built a magnificent estate at Lakewood which he makes as his home for a greater part of the year.

There is nothing undignified or trashy regarding Lakewood; its streets are of macadam, broad,well kept,and shaded by towering trees,and the prevailing sport is driving, for the roads in every direction are excellent Golf and Polo are likewise popular and the facilities for each are exceptional.

The New Jersey Central is the only road reaching Lakewood, and its train service from New York or Philadelphia is fast and frequent. If you are interested in Lakewood send for Lakewood Brochure to C. M. Burt, G. P. A., New Jersey Central, (143), N. Y..City. The book is free for asking.

LEGAL NOTICES

Election Notice!

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the County of Somerset will hold their first meeting on

TUESDAY, SEPT. 1, 1903.

At 10 o'clock in the morning, at such places as may be designated by the Township Clerks of the respective townships of said county. Such boards shall organize according to law and then proceed to ascertain the names and residences of all the legal voters in their respective districts, by making actual inquiry at every dwelling house or habitation, or of the head of every family residing therein, and shall continue such enumeration of voters from day to day, on successive days, completing same on or before Friday, Sept. 4. (Sec. 23 Election law.)

SECOND MEETING
AND PRIMARY ELECTION

Said Boards of Registry and Election will also meet on

TUESDAY, SEPT. 8, 1903,

At the same places from 1 until 9 p. m., for the purpose of transcribing and making up from its canvass books two lists of all persons entitled to vote in its election District, who shall personally appear before the board for that purpose, or be shown to its satisfaction by the affidavit in writing of some voter in the election district to be a legal voter therein.

On the same day between 1 and 9 o'clock p.m., the Primary Election shall be held in every election district in the County of Somerset.

THIRD and FINAL MEETING.

Said Boards of Registry and Election will also meet on

TUESDAY, OCT. 27, 1903,

At the same places, and between the hours of 1 p. m. and 9 p. m. for the purpose of revising and correcting the Original Registers, and for adding thereto the names of all persons entitled to the right of suffrage in such Election District at the next election.

Notice is hereby given to all Boards of Registry and Election in the County of Somerset that they are required to strictly observe Sections 21 and 32 of "An Act to Regulate Elections (Revision of '98)" approved April 4, 1898, and that the County Board of Elections will be in session in Somerville on

Wednesday, Oct. 28, 1903,

For the purpose of receiving the registers and receipting for affidavits, etc.

General Election Nov. 3, 1903

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

ch of the Holy Cross will be 1 Sunday.

unsellor, Winfield S. Angleman, has appointed an examiner in Chancery Chancellor Magie.

The fifty-eighth annual meeting of the New Jersey Historical Society will be held next Wednesday at Newark.

The annual dance of the Retail Clerks Association will take place in the Casino, Wednesday evening, November 4.

The annual reunion of the Eleventh Regiment, N. J. Vol. Vet. Association will be held at Rockaway, N. J., Tuesday.

The Original Florodoras will hold their third annual masquerade ball in Bound Brook Hall, Thursday evening, November 12.

Rev. Charles E. Herring will address the Y. M. C. A. meeting on Sunday afternoon at 4 o'clock. A strong musical program will be provided.

The ninth orchestral concert of the Y. M. C. A. will be given on Thursday, October 29, at 8:15 p. m. Tickets may be obtained free at drug stores.

Mr. and Mrs. Harry J. Northrop, who were recently married at Lambertville, returned from their bridal trip Thursday and will reside in Plainfield.

The Japanese entertainment and sale announced for Thursday night at the First Presbyterian Church has been postponed and will be given November 5 and 6 instead.

Miss Olive Newell, daughter of Mr. and Mrs. B. D. Newell, of Westervelt avenue, and William Stevens Slape, of East Sec-

[redacted]

ond street, were married Wednesday evening at the home of the bride's parents, Rev. Dr. Richards officiating. The bride was attended by Miss Ethel Slape, sister of the groom, and Mr. Newell, brother of the bride, was best man. The ushers were Frank Hall and Frank Bennett. The bride was handsomely attired in white silk and carried bride roses. The ceremony was performed under a floral bell. After the ceremony a reception was held at the home of the bride's parents. Mr. and Mrs. Slape left on a wedding trip to Niagara Falls and Canada. On their return they will reside in Plainfield.

The production, the performance of "The Last Days of Pompeii" to be given by the Dramatic Club, under the auspices of the local lodge of Odd Ladies, will be postponed until November 2.

Dr. Justus H. Cooley has removed all of the patients from Pinewood Sanitarium, on Westervelt Avenue, to Brookside Sanitarium, on Somerset street near the Watchung mountains, as the former place will be closed for the winter.

Mr. and Mrs. Chas. Frey were arraigned before the Recorder Tuesday night charged with being disorderly. They were given their choice of serving sixty days in the lock-up or moving out of the borough. They decided to move.

Plainfield journeymen carpenters have notified the bosses that they want an increase of six cents an hour for an eight-hour day after April 1. They also demand Saturday half-holidays. They now receive thirty-seven cents an hour.

Miss Clara Florence Moore and Dr. Edgar Holden, Jr., of Newark, were married Tuesday evening at the residence of the bride's mother, Mrs. Emma E. Moore, of Central avenue, by Rev. Dr. William R. Richards, of New York City.

Dr. J. B. Probasco, entertained the Plainfield Clinic Society, Tuesday evening, at the Hillside Golf and Tennis Club. An interesting paper on the "Treatment of Some Common Stomach Lesions," was read by Dr. R. H. Halsey, of New York.

Invitations are out for the marriage of Viola Irene La Maire, daughter of Mr. and Mrs. Lawrence Fahn, Belmont avenue, this borough, to Frank Ivison Leivers, at the home of the bride's parents, Wednesday evening, November 18, at eight o'clock.

Edward Hoey, a brakeman on a local freight train, was badly crushed between the Bound Brook station platform and a freight car yesterday morning. He was brought to Plainfield and taken to the Muhlenburg Hospital. He is badly injured internally.

Mrs. Louis G. Blume, of New York City, is suing her mother-in-law, Mrs. Geibelhouse, of Plainfield, for $25,000 charging her with alienating her husband's affection and wilfully depriving her of the aid, society and love of the said Louis G. Blume.

The twenty-sixth annual meeting of the Women's Synodical Society of Home and foreign Missions for the Presbyterian Church of New Jersey was held in Trenton last Wednesday. Mrs. W. E. Honeyman of this borough was re-elected president. There were 200 delegates present.

Opening entertainment of the Y. M. C. A. Boy's Department Course occurs Monday October 26th at 8 p. m. Prof. Rosani of New York a noted Manipulator and Juggler will perform. Fred and William Van Eps and Wm. McClymetic Banjo and Piano Trio will play. This entertainment is open to the public.

Miss Edith F. Clapp, of this borough and Frank D. Bennett, of Gloucester, Mass., were united in marriage Thursday evening, at the home of the bride's mother, Mrs. John Clapp, of Mercer avenue, by Rev. J. P. Taylor assisted by Rev. W. M. Downey. Mr. and Mrs. Bennett will reside in Gloucester, Mass.

At a meeting of the directors of the First National Bank in Plainfield, C. Frank French, of this borough, was elected director to succeed Edwin S. Hooley. Mr. Hooley was head of the Stock Exchange firm E. S. Hooley & Co., which failed last July, for about $3,000,000. Since the failure he has resigned from the directory of both the Plainfield First National Bank and the Plainfield Trust Company. In the latter Herbert M. Case was appointed his successor.

Mutual Aid Society Elected Officers.

The quarterly meeting of the Potter Press Company Mutual Aid Society was held last Saturday evening when the following officers were elected for the ensuing year: President, Thaddeus C. Smith; vice president, William Reinman; secretary, Samuel E. Humpston; treasurer, David J. Krymer. Finance Committee, Thaddeus C. Smith, William Reinman, Harry Shirley, Arthur Case and Edward Mosher.

Praise Service Tomorrow Evening.

The following is the program for the praise service at the Crescent Avenue Presbyterian Church tomorrow evening, by Rhys Thomas, tenor and choir master: Prelude, Festival March in D, Smart; anthem, "It shall come to pass," Tours; alto solo, "Thou, O Lord, art my Protector," Saint-Saens; tenor solo, "With overflowing hearts," Barnaby; anthem, "O come, every one that thirsteth," Mendelssohn; offeratory, "Send out thy light," Gounod; postlude, "Coronation March," Meyerbeer. Arthur G. Drake will be the organist.

CANDIDATE FOR ASSEMBLY

CHARLES M. DOLLIVER.

Charles Marwin Dolliver, Republican Candidate for Assembly, son of Garret Q. Dolliver and Kate S. Van Zandt, was born at Roycefield, Somerset county, at the old Van Zandt homestead, January 10, 1878. The first four years of his life were spent on a farm, then moved to North Plainfield, where he has resided ever since. At the age of six he entered the North Plainfield Public School, and in 1894 was graduated therefrom. Next two years at Plainfield High School. He was graduated from there in 1896, among the second honor pupils; also took the Second Mathematical prize. Next year he

CHARLES M. DOLLIVER.

attended the North Plainfield High School, which was then established, and took graduate course in languages. In the meantime he studied stenography and entered the law offices of Codington and Swackhamer in the Fall of 1897, where he remained as a stenographer and law student until the first of June, 1899. When in order to obtain a law school course, he decided to take up railroad work and accepted a position as stenographer in the office of the Master Mechanic of the New Jersey Southern Division of the C. R. R. of N. J. at Lakehurst, New Jersey, and continued in the employ of that company until the Fall of 1900, when he registered as a student at the [illegible] Law School, New [illegible] graduated in June [illegible] admitted with [illegible] Swackhamer, where he completed his preparation for the Bar Examination and was admitted as an attorney at the November term, 1902. He opened an office for the practice of the Law, February, 1903, in the Vanderbeck Building, 221 Park avenue, Plainfield, New Jersey.

Mr. Dolliver is a member of Trinity Reformed Church; Freedom Castle No. 42, Knights of the Golden Eagle, also District Secretary Union County Sunday School Union. He is a second cousin of Senator J. P. Dolliver, of Iowa.

Independent Fife and Drum Corps Fair a Success.

The Fair of the Independent Fife and Drum Corps of Plainfield, held last week in Saengerbund Hall, proved to be one of the most successful fairs ever held in the hall. Dancing was one of the main attractions. A boxing exhibition and various vaudeville numbers made up part of the entertainment of the evenings. Prof. Suhr's Imperial Ochestra repeated its success of last season. The orchestra made especially big hit with music from the "Runaways," "Prince of Pilsen', and "Under Cover." On Wednesday night, Warren Engine Company visited the fair in a body, escorted by the Liberty Fife and Drum Corps of Elizabeth. The company was put through a short drill and received loud applause from the delighted spectators.

Gospel Temperance Work at Reform Hall.

Another week of great interest has been manifested at the Reform Hall. Ex-policeman, Edward S. Brown, of New York City, who conducted the meetings this week has been persuaded to remain here another week. Mr. Brown will be present at the meeting tomorrow afternoon at 4:15 o'clock when Charles White, a redeemed drunkard, and his wife, of Jersey City will speak. Mr. Brown will have charge of the meeting Sunday evening. Tuesday evening Mr. Brown will bring "Joe", the converted Italian.

It is very seldom that Plainfield people have an opportunity to listen to such eloquent and interesting speakers and to all such who are interested in this gospel temperance work, and to all those who desire to throw off the chain of intemperance and become sober, honest and upright men, a most cordial invitation is given you to be present at these meetings.

Dramatic Club Elect Officers.

At a meeting of the Dramatic Club Tuesday evening, the following officers were elected: President, William Jeffery; treasurer, F. M. Slater, Jr., secretary, Mrs. A. E. Willard; business manager and coach, A. E. Willard; vocal director, Miss C. J. Meare; musical director, C. D. Mead, of New York.

Plainfield's Republican and Democratic Municipal Tickets

At the Plainfield Republican Convention held in Reform Hall Monday night the municipal ticket [illegible] was as follows: William S. Bullock, Clarence L. Murphy and J. Stephen Higham were named for councilmen-at-large; Frank H. Smith, for tax collector and E. M. Cave, for school trustee.

When nominations for councilmen-at-large were made W. S. Tyler named James F. Buckle. Mr. McMurray, although not a delegate to the convention opposed the nomination by asking Mr. Tyler to withdraw the nomination giving as his reason for the request that he did not like to see Mr. Buckle defeated so soon after being refused an assembly nomination. A vote was taken which resulted as follows: Bullock 18; Higham 18; Murphy 17, Buckle 4. Mr. Tyler then moved that the three nominations be made unanimous.

The Democrats at their convention selected J. V. F. Dilts as their candidate for tax collector, A. H. Atterbury, a New York lawyer; L. G. Thompson, a rent collector for the Astor estate, and J. P. Homan, a local manufacturer, were nominated for councilman-at-large, while Rev. Erskine M. Rodman, rector-emeritus of Grace Episcopal Church, was selected as school trustee.

Somerville Firemen Entertain.

Local and visiting firemen came pretty near owning Somerville Thursday afternoon and evening, it being the occasion of their annual parade and festivities.

Early in the day the visiting firemen began to flock into Somerville, and on up to 2 p. m. They came from New Brunswick, Raritan, Dover, North Plainfield, Morristown, and Cranford.

The town was beautifully decorated with flags, banners and bunting, and presented a handsome appearance.

The parade started about three o'clock and was viewed by thousands of admiring spectators.

In the evening there was a banquet served in the woolen mill building, where seats were provided for 800 guests.

Prominent [illegible] speakers was S. Swackhamer, [illegible] borough.

Somerset County Detective Secures Witnesses in Canada.

County Detective George D. Totten secured the four Italians who are wanted in the Polobizio murder case and has them now in Somerville.

Polobizio was killed by his brother-in-law, Pelino Debacco, near Gladstone, last August. There was a terrible bout with knives between the two men in the presence of a gang of Italians in a stone quarry. Polobizio was literally cut to pieces, but not until he had badly slashed Debacco, who, it is alleged, sought him out for the purpose of killing him on account of an old grudge.

The Mafia is said to be strong among the Gladstone Italians, and the Somerset County authorities experienced great difficulty in obtaining witnesses. The men who were reported to have been eye-witnesses to the murder suddenly disappeared.

Detective Totten traced four of the men to Canada and apprehended them in Montreal. They consented to return to this country as witnesses under the States protection, and are now detained here.

Debacco is confined in the Somerset County jail. He will be placed on trial before Justic Garretson on Monday.

A Political Scheme?

The following article appeared in the Newark *Advertiser* this week, and has attracted considerable attention among North Plainfield politicans:

Charles M. Dolliver, of North Plainfield, who has been nominated by Somerset County Republicans for the assembly to run against his law preceptor Samuel S. Swackhamer, Democrat, if elected, will be the youngest Assemblyman in the state. Dolliver is not yet 23 years old, and looks like the average college boy.

In the factional fight between Somerville and North Plainfield, brought about through the annexation question when it was planned by Senator Chrales A. Reed, Mayor Newton B. Smalley and other Republican leaders to annex North Plainfield to Plainfield, in Union County the Reed and Thompson factions have been at loggerheads for years. The Republicans were at a loss to name an opponent to Assemblyman Swackhamer, who although a Democrat, promises to poll a heavy vote.

Dolliver was named as a dark horse. The warring faction came together and promised their support to Dolliver, in the hopes of crushing Swackhamer at the next election.

Dolliver has been practicing law less than a year, having graduated from the Columbia Law School and admited to the bar as a practicing attorney during the November term, 1903. It is generally believed here that he was named by the Republicans to carry out their scheme to overthrow the repeal of the annexation bill, rushed through two years ago by Reed, and which was repealed last spring.

SUBURBAN NOTES.

WATCHUNG.

Arthur D. Stout, owner of the Washington Valley Poultry Farm, is a hustler, and the effect of his enterprise is noticeable on every side. He has introduced up-to-date scientific methods into every department, and the farm presents a very busy appearance.

Wm Wyckoff, Sr., has moved into the Kliner property on Somerset street near the trolley terminus.

Dr. Richard Moldenke was suddenly called to Pittsburg, Pa., this week.

Mrs. Jno. L. Shank, who has been suffering for a long time with trouble in one of her knees, was taken to a hospital at New Brunswick where a successful operation has been performed which it is hoped will be the means of restoring her to health.

A SAD CASE.

A particularly sad case that is attracting much comment in the township is that of William Dutton, the fifteen year old son of George Dutton.

About two years ago Mrs. Dutton, the wife of George Dutton, died in extreme poverty, leaving the husband and three children, two of whom, younger than William, became charges of the Township, and were sent to the State Guardian's Home. William entered the employ of the late W. G. Smith, the quarryman. He left there in a short time and engaged with a carpenter in North Plainfield. After a short service with this man he was engaged by another business man in the borough, where he made his home and remained until last Saturday night, when he was taken to the Township by his father and left with an old colored family who were living in a shanty near Mrs. Koch's residence, the father stating that the boy was suffering with a severe cold. It afterward transpired that the boy was seriously ill with scarlet fever in one of its worst forms, and the long tramp, last Saturday night, from the end of the trolley line to this shanty, with the rain falling in torrents, may prove fatal to the lad.

On Sunday Doctor Dun[illegible] borough, was called to the c[illegible] at once pronounced it scarlet [illegible] notified the township authorities. The colored people immediately forsook the the boy, the woman taking all that she could carry with her.

[illegible]rmaster M. J. Duffy worked faithf[illegible]n securing a nurse and doing whatever else demanded immediate attention. As this duty was not in the line of work required of him as poormaster, Mr. Duffy is deserving of great praise in his endeavors to relieve the suffering of the lad. For three days Mr. Duffy worked very hard before everything was satisfactorily arranged.

The colored man, it appears, was induced to return and help care for the patient, but would not remain under quarantine, and although warned by Health Inspector Fangborn of the borough, not to come here, did come, and was arrested and taken before Justice Mattison, who sent him to jail for sixty days.

Dr. Dundon reports the case as very serious, and fears the boy cannot live, and is particularly severe in his denunciation of the manner in which the boy was exposed to the heavy rain storm of last week.

* * *

DUNELLEN AND NEW MARKET.

Mrs. Joseph Maier entertained her mother over Sunday.

Commencing tomorrow, evangelistic services will be held in the First Baptist Church every afternoon at 3 o'clock and every evening at 7 30. Mr. Lawrence Greenwood, the singing Evangelist, will conduct the meetings and also assist the Union choir.

The new fire alarm is now in order, having been tested and found to be in perfect condition. The subject now uppermost in the minds of the committee and which will be taken up at the next meeting is the installation of a few alarm boxes.

On account of the slight attendance at the Whist Club meeting at Harry Piddington's, Thursday evening of last week, there has been, so far, no definite arrangement made as to where the next meeting will be held.

Rev. N. J. Sproul preached his farewell sermon last Sunday evening to a very large audience. Mr. Sproul expressed deep regret in having to leave his people whom he thanked very heartily for the kind manner in which they had treated himself and family since they had taken up their residence in the borough. Mr. Sproul and family left on Tuesday morning for Quincy, Mass., where he assumes the new pastorate.

Asa Bush is having a two room extension built on his house by Geo. Hummer.

Ernest Peters has been engaged to play football with the Norwood Club, of Plainfield.

The Rev. L. E. Livermore, of the Seventh Day Baptist Church will occupy the pulpit of the Presbyterian Church on Sunday.

Last Saturday night George Doty was quietly married to Miss Nellie Watkins by the Rev. N. J. Sproul.

Two attempts at burglary were made last week. On Tuesday evening the home of A. F. Samson was chosen but their efforts were frustrated by Mr. Samson's dog. This is the second time within a short period this has been tried, but met the same result each time. The other time was Monday night at the home of T. C. Bodine. Nothing of value was secured.

On Monday evening the Rev. N. J. Sproul united in marriage Miss Ella Dorland and Mr. Fred Wrage.

Thomas Dowd, who was employed in the L. & G. Steel works left for Philadelphia last Monday where he will reside with his parents.

Mr. Samuel C. Luckey is reported to be lying critically ill at his home on Prospect avenue.

Miss Cora Gaskill entertained out of town friends on Wednesday.

Mrs. G. Harrison is slowly recovering from an attack of blood poisoning.

Henry Weidenhaupt has secured a position with Roth & Co.

Mrs. Isabel Carpenter will take up her abode after this week in Plainfield.

Clarence G. Harrison spent Wednesday in Plainfield visiting friends.

"Mayor" Bill Smith received his automobile on Tuesday and it presents a very attractive appearance he having had a top placed on it.

The weekly dances conducted by Jesse Ayers are growing more popular every week. On Wednesday evening a very large crowd was present and all expressed their satisfaction.

Charles F. Dayton, who has resided for some time past at the family homestead moved to Plainfield on Thursday.

Herbert Taylor and family spe[illegible]nday at Boonton visiting his grandp[illegible].

St. John's Church closed its [illegible]

[redacted]

watches. The gentleman's watch was won by Michael Moynihan and the lady's was won by Miss Catherine Gallagher.

* * *

LIBERTY CORNER.

Rev. C. H. Van Glahn, of Bernardsville spent Monday with William I. Hayes.

Mr. and Mrs. Richard Layton, of Somerville, spent Sunday with Mr. and Mrs. Ten Eyck.

Clifford King is all smiles; it is a boy.

Mr. and Mrs. James Woods, of Bayonne, are happy over the arrival of a little girl.

Mrs. Anna Irving and Mrs. David Irving, of Cranford have been guests of Mrs. William I. Hayes.

Mr. and Mrs. Geo Zimmerman, their daughter, also their mother, Mrs. Lyman C. Halsey, of Martinsville, were the guests of Mrs. C. C. Ackor last Sunday.

Don't forget the supper to be held at the Chapel on Wednesday evening, October 27.

A Literary Club was organized by our young people last Monday night.

Mrs. Alex. Annin and daughter, Edythe, spent several days last week with friends at Martinsville.

Ernest Lambert, of Brighton, England, spent Sunday at Mrs. A. E. Annin's home.

End of Somerville Trolley War.

The war between the Somerville Board of Commissioners and the Middlesex and Somerset Traction Company, arising from alleged violations of the town ordinance on the part of the company, has been declared off.

Since the mandate issued to the traction company by the commissioners last week to replace its wooden poles with iron poles in the town, to increase the headway of its cars at night and to conform with the requirements of its franchise to the letter, the manager, of the traction company, has been trying to effect a settlement.

At a special meeting, held between the commissioners and traction officials this week a compromise was effected by which the traction company is allowed to retain its wooden poles and the present headway of its cars by binding itself to sell reduced rate tickets between this point and other towns for one year.

The tickets are to be sold by a special agent, who will be stationed at Somerville to supply the public demand at all times.

The first train since the storm of a week ago passed over the meadows at Bridgeport yesterday and went through to Pennsgrove. This washout tied up the train service longer than any storm since the road has been in operation, although in 1887 there was a big washout.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

Fourteen tons of peanuts have been raised by Christopher Sharp, of Cecil, this year.

William Mounce and John Smith of Bridgeport, killed 109 muskrats in one day on the meadows during the flood.

A lap robe made of thirty-four skins of fox.s and 'coons caught in the vicinity of Williamstown is owned by Joseph T. Wood, of that place.

Dr. Sarah F. Mackintosh, who died recently at Asbury Park, at the age of 67, is said to be the first woman physician in this country admitted to membership in a medical society. In 1871 she joined the Passaic Medical Society. She was born in New York and was the daughter of A. F. Fonda.

E. M. Lyman, proprietor of the Chestnut Ridge poultry farm in Mt. Vale, has just forwarded an order from the Governor of South Africa for a sample lot of fancy bred poultry. Great care was taken in the preparation for shipping the fowls, and special arrangements were made with the steamship company to insure the safe delivery of them.

Charles and Leopold Mutler, who recently in Paterson saved a number of persons in the flooded district, fitted up a ferry across Passaic street, and did a rushing business one day, taking people across for five cents apiece. They strung a wire across the river and by a pulley line drew a boat back and forth. Landing rafts are at both ends.

[illegible]under the old platform at the down[illegible]

[illegible]foundations for a new depot. For [illegible] quarter of a century [illegible] others in a hurry to tak[illegible]e dropped coins, which roll through the cracks between the pla[illegible]s. The workmen finding there was more pay in the dirt than their wages, stopped work to scramble with the boys for the money. One boy, the first on the scene, got $18. He was soon joined in the "graft" by others.

One of the incident of the recent flood at Lambertville now receiving considerable attention was the action of Miss. Olive Phillips, a clerk at the Lambertville postoffice. After 5 o'clock Saturday evening, when all the other routes for taking the mail from the city were impassable, Miss Phillips volunteered to carry the bags across the river bridge to the Reading station in New Hope. The floor of the bridge by that time was badly broken by the flood and was partly covered with water. She made the trip in safety, however, and the Lambertville mail reached its destination on time.

In the centre of a plot of ground at the rear of the business owned by Wallace I. Corriell, of Rahway has a beautiful bed of nasturtiums and other flowers, in full bloom, directly over what was the receiving vault of the Society of Friends, but which has not been opened for perhaps nearly a century, and was only discovered when Mr. Corriel dug down into the soil to make the flower bed. Another hidden vault lies a few yards to the northwest of this one; also sealed up. There have been no burials in the plot during the the last century, so far as can be ascertained. The old meeting-house still stands, but is used for residence and business purposes. There are no tombstones remaining to mark the graves, if there still are any.

Arrangements for celebrating the 200th anniversary of the first Protestant Episcopal service held in Elizabeth have been completed by the rector and vestry of St. John's church, which as the oldest here, has taken the initiative in commemorating this event. The exact date of the anniversary, November 3, being election day, services will be held on the octave of that day, November 10. Holy communion will be celebrated in the morning at 7. Morning prayer will be said at 9 and 11, with a second celebration of holy communion and addresses by the rector, Rev. Otis A. Glazebrook; Bishop Scarborough and Warren R. Dix, who will deliver the historical address. A collation will be served in the chapel and the exercises will be concluded by a musical service in the evening, with a sermon by Rev. Alexander Mackey-Smith.

The Republican Club Answers McMurray

The Republican Club of Plainfield, issued an address to the local voters Thursday, which attacks James T. McMurray and the other fourteen delegates who bolted the Republican convention of Union County. It presents facts and figures in answer to declarations made by the McMurray followers that Plainfield has never received its dues from the party in the county, and strongly appeals to the voters to support the straight Republican ticket.

Somerset Democratic Nominations.

As Somerville, last Saturday, the Democrats met in convention and nominated the following ticket:

For Assembly, Samuel S. Swackhamer, of North Plainfield; for County Clerk, John L. Anderson of Bridgewater; for Coroner, John C. Somers, of Franklin.

A Successful Entertainment.

A large audience was present Tuesday evening, at the Y. M. C. A. Hall, to listen to Mrs. Minnie Marshall Smith, in a number of readings and recitations. Mrs. Smith was assisted by a male quartette and by Miss Zella Frost, violinist.

The entertainment was given under the auspices of the Young Women's Mission Band of Trinity Reformed Church.

The Human Face.

This was the subject of an address by Prof. A. E. Willis, of New York City, delivered to the pupils of Plainfield High School last Monday morning. The discourse was highly entertaining and held the individual attention of the students from the beginning to the close. It was one of those well worded and carefully thought out discourses that cannot fail to be a great and lasting benefit to all who heard it.

A lecture that has for its foundation many years of travel, study and research must of necessity contain much valuable and practical information. There were many useful hints given to the students calculated to help fit them for their future occupations, whether in business or professional life.

The Social Chasm

By Charlotte Teller

THERE is more significance in the appearance of "The Woman Who Toils" than in the recital of the facts given between the covers. To be sure the two young women who laid aside their accustomed luxuries and went into the factories, mills and shops to see for themselves the lives of the working women, picture the conditions they found with ruthless honesty and without exaggeration, but the strongest element of the book lies outside what is written.

This book appears after nineteen centuries of teaching that all men are brothers, and it is in itself evidence that men are strangers and, unconsciously perhaps, enemies. Human beings move in groups, which know little of each other's life, although speaking the same language, obeying the same laws and recognizing the same flag.

Miss Van Vorst knew of this social chasm before she undertook her work, for she says: "Any journey into the world, any research in literature, any study of society demonstrates the existence of two distinct classes, designated as the rich and the poor, the fortunate and the unfortunate, the upper and the lower, the educated and the uneducated—and a further variety of opposing epithets."

Those who would know something of the life of the "other" group, if they have been born into the group which is "rich, educated or fortunate," must step down and out and, for a time, at least, become as near as possible like those who live in the class which is known as "poor, uneducated and unfortunate." So well did the two authors understand this that they made, first of all, a change in their dress. One of them laid aside a costume whose total cost was $447, and put on one which cost only $9.45, but this contrast in clothes faded as nothing before the other contrasts between leisure and toil, between the homes and hopes of the two great classes of the rich, or well-to-do, and the poor.

America is a democracy, yet in its realities there are as great contrasts as in any monarchy, where title and rank of birth make the class distinctions. Two children may sit side by side in school, and then go out into lives so different that after a few years they no longer know each other's circumstances, and the fortunate one has to change her habit and manner if she would know of the other's life.

To those who have not seen the life and read its story in the faces of young girls, pallid and tired, and in the eyes of older women left unspurred by hope, the book will be a revelation—it may even stir such readers to a desire for change.

But wherever there is a man or woman to whom it seems a revelation there is one who is separated from the human family by a chasm. Better, even could nothing be done, that each person should know something of all, than that this ignorance longer exist. Better that the suffering which comes from knowledge increase, than the chasm of class indifference grow wider.

There is no need, however, that any one suffer in silence. Let every one who reads cry out against the conditions of modern industry which make such books possible. If there be any one who fears to take up the fight for change after learning the facts in this life of toiling women, such a one is either without mercy or a coward.

The strongest protection to be given to the modern slavery is the protection of silence.—New York American.

Modern Cowards

By the Editor of Youth's Companion

A RECENT story is the study of a character of a man who from youth has a conviction that he is born to some extraordinary experience. As he grows older the idea becomes more sharply defined. The experience is to be painful and tragic, and is to remove him from the plane of ordinary life. The idea takes possession of him and dominates his career. He undertakes nothing of importance, since it may be interrupted by catastrophe. He does not permit himself love—he scarcely ventures on friendship—because he believes himself marked for disaster.

One woman, to whom he confides his secret, shares his apprehension. At

[redacted]

acquire any habit of life other than the tremulous and unachieving one. He ... own hid... lack of feeling and of will by the sight of the sor... face of ... n who has sounded the depths of human pain, and ... ev... ore to ... er than the shallows of apathy.

The sto... is ... ...ven for an age as active as ours. We are not free from the ban... ... ...ear lest feeling shall outrun mere pleasure. The girl who will not love a pet ... she should lose it, the man who will not permit himself any share in religious enthusiasm ... he should "lose his head," the woman who will undertake no social reform for fear she become too much involved in it for her own comfort—these are some of the cowards of our day.

Along with their lack of courage there often goes a subtle egotism, which they fancy sets them apart from "the common herd," but which is almost sure to meet its final defeat in the discovery that those powers which were believed to be above the average were really below it, and that obscurity is the only catastrophe likely to fall upon so ignoble a nature.

Phases of a Model Husband

By the Rev. J. William Lee

THE successful business man keeps close watch of his contracts to see that they are fulfilled. Husband, how long has it been since you have looked at your marriage contract?

A model husband is a man of good memory. He remembers how the introduction to his future wife set his heart fluttering. He remembers the walks together, arm in arm, side by side. Therefore he does not get half a square ahead after marriage and then bawl out: "Susan Jane, for heaven's sake, why don't you hurry?"

A single rose perfumed with love in life is worth more than a dozen wreaths on a casket lid.

My model husband doesn't wait until his wife dies to give her flowers.

Remember the kind, loving words before marriage. Give her a few now. When you go home put your arms around wife and tell her how sweet and beautiful she is. It may be stretching the truth, but God will forgive you, and your wife will be happy.

If you have discovered your wife's faults keep your eyes closed. Remember how blind you were before marriage.

When you think less of your wife and more of another's, the breakers of hell are before you.

My model husband doesn't serve God by proxy. He doesn't send wife to church and stay home poring over his ledger. A wife who goes to church for both will go to heaven for both.

Our Daily Work

Woe to Him Who Does Not Find Healthful Joy in Hard Labor

By the Editor of the Century Magazine

HARDLY any one who comes in contact with affairs can fail to notice as a sort of corrollary to the enervation which comes to men of wealth through luxury, an increasing laxity of view among workingmen concerning labor, a tendency to regard the daily task as something greatly to be regretted and hastily to be escaped from. In some minds an air of sentimentalism pervades the whole labor problem, as though the millennium only waited upon large wages and short hours. The old-time love for one's work and the old-time pride in it as one's best reason for existence have yet to find any widespread and active propaganda in the conventions of labor. So far as we have observed, no labor leader has taken upon himself the conservative office of preaching to his followers the virtue of good work well done, not only as a duty to the employer, but as a service and inspiration to the workingman himself. The theories even of those who lead most wisely aim at the elevation of the individual through the class rather than the reverse. The general trend of the workingman seems to be away from hard work and good work. It is time that there was less preaching of rights and more of duties. Perhaps it would be easier to get the rights by a little more conscientious devotion to the duties.

As a matter of fact, and not of theory, no man can do worse service to another, whether rich or poor, than to deprive him of the absolutely healthful joy which there is in hard work. Woe to him who does not like his daily work; for if one cannot have the work he likes he would better learn to like the work he has.

FATAL WORK TRAIN WRECK

Track Laborers in Cars Mowed Down Without Warning.

FRANTIC SURVIVORS VENGEFUL

Men Employed to Repair Flood Damage on Pennsylvania Railroad Maimed and Mangled on Their Way to Work—Sixteen Lives Instantly Crushed Out and Nearly Two Score Persons Badly Hurt.

Trenton, N. J.—The lives of sixteen men were snuffed out in the twinkling of an eye near Summerset by a rear-end collision of work trains on the Belvidere division of the Pennsylvania Railroad. One unfortunate fellow survived his injuries a few hours and expired in St. Francis' Hospital, this city. Besides the dead thirty-five are injured. All of the killed and injured were track laborers, nearly all of them Italians, and identifications have been difficult. The dead identified are:

Bertrand Buroughs, colored; Joseph Brown, colored; James Horns, Francesco Beneditto, Natale Crea, Guiseppe Santino, Francisco Freccia, Guiseppe Falcono, Vincenzo Beneditto, Benigno Sacidi, Edward Harris, Graeamo Ferraute, Soveno Chiappino, Thomas Rogers.

There are three bodies, those of two Italians and a negro, that have not been identified.

The repair train which was wrecked consisted of two passenger coaches, in which were crowded more than a hundred laborers, a derrick car and a flat car. It was at Washington's Crossing awaiting orders for passing a southbound train. Running behind it was a gravel train that left this city about 7 o'clock a. m. There was a drizzling rain which obscured the vision of Engineer August Conlon of the gravel train, which was running at fair speed. It is said that he had not been notified of the stopping of the repair train. He failed to see it in time to even slow down, and his engine crashed through the flat car and the derrick car and telescoped the passenger coaches with their living freight.

None of the crews of either train was hurt, but their efforts to rescue the injured were seriously interfered with by the laborers who had not been hurt. The Italians, half frenzied by fright, were too dazed to assist their fellows. They seemed to think that the trainmen were to blame for the catastrophe. The feeling of resentment grew to such an extent that the trainmen were in fear for their lives, and not for some time could the work of rescue be begun. Then the dead and wounded were carried out. A relief [illegible] a corps of physicians, Cor... trainmen was sent to the ... wreck from this city, re... ually with the dead and

BOY PREVENTS TRAIN HOLD-UP.

Brave Operator, Locked in by Robbers, Wires Engineer Not to Stop.

Butte, Montana.—Two masked men rode up to the little station at Welch's Spur, twenty miles east of this city, on the Northern Pacific, and covering the operator with their revolvers, drove him inside his office and locked him in. They turned the signal light so as to stop the North Coast Limited, which was due in half an hour.

The operator, F. K. Law, a boy of twenty, threatened with death if he moved, crawled on his hands and knees to his telegraph key, and reaching from under the table, wired the operator at Homestake to tell the engineer of the North Coast not to stop, as the bandits meant to hold up the train at Welch's Spur.

The train went through the latter place at forty miles an hour, and the bandits then rode off.

FIRST SHOT ACCIDENTAL.

Then Young Hunter, in Agony, Put Bullet in Head.

St. Louis, Mo.—Crazed by the pain of a terrible wound in his leg, caused by the accidental discharge of his shotgun, George Schwigler, Jr., twenty years old, of Kahoka, ended his life with a revolver.

Young Schwigler was spending the day with his uncle at Alton. They went out in the morning for a day's hunting and fishing on the Missouri side of the Mississippi. In some manner his shotgun was discharged, and the wound caused him such agony that he begged his uncle to kill him.

The uncle ran to get their boat ready to take him back to Alton, and had scarcely turned his back when he heard a revolver shot. The young man had fired a bullet into his head.

POSTAL CASE DISAPPOINTING.

The Failure to Convict Miller and Johns Annoying.

Washington, D. C.—Administration leaders and officials who have been interested in the prosecution of the postal cases were disappointed at the disagreement of the Cincinnati jury in the conspiracy case of Daniel V. Miller and Joseph M. Johns. While a new trial will be demanded, it will have to go over to the next general term, and unless new and stronger evidence is obtained against the two accused men it is likely that the case will be not prossed and both will escape punishment. As this was the first of the postal cases to come to trial, it is feared that the failure to get a conviction may have a deterrent effect on other juries when the cases are taken up.

$5000 Loot in Old Mine.

While digging for coal in an abandoned mine near Brave burg, Pa., Daniel Sorg and two brothers discovered $5000 worth of clothing, which the police say has been secreted by a band of thieves that has been operating in the Monongahela Valley for a year.

Early Snow Fall in New York State.

Northern New York had its first snow storm of the season. The mountains about Lake Placid, Lake Loon, Chateangay and Lake Titus are white with snow.

SUICIDE IN CONFESSIONAL

Girl Student at Lincoln, Neb., University Drinks Poison.

Daughter of a Prominent Milling Man Kills Herself—Act Attributed to the Influence of a Hypnotist.

Lincoln, Neb.—Miss Pansy Ballard, an eighteen-year-old student at the State University, [illegible] swallowed a dose of carbolic acid [illegible] kneeling at the confessional in [illegible]'s Pro-Cathedral. Stagger... to her feet a few minutes later ... whispered to the waiting priest ... she had poisoned herself. Ten m... utes later she was dead.

The girl was the daughter of Elias E. Ballard, a former banker at Wilber, but now engaged in extensive milling and wheat interests in Dodge City, Kansas. She and her sister came to Lincoln a few weeks ago to attend the State University. The girl was a devout Catholic and was desirous of obtaining an education at the convent here. Her father was insistent that she go to the university. She first went to the convent and then to the university. For this she is said to have been chided by the sisters and urged to break away from the university. She was to have had another interview with the mother superior during the afternoon, but rather than face it took the poison.

For the last four years Miss Ballard had been of a morose disposition. This was attributed to the fact that several years ago in a spirit of girlish bravado and while accepting a dare from a companion she placed herself under the influence of a traveling hypnotist, who gave an exhibition in her native town.

The girl left no note, nor did she tell any one of her intentions or threaten at any time to end her life. She left her boarding house without eating any breakfast, and going down town purchased the acid. She repaired to the church, and after spending an hour in prayer and meditation, walked to the confessional and drank the poison. The first intimation the listening priest had of anything wrong was when the ear he held to the aperture caught the sound of a fall and a moan.

BETTER PAY FOR ENLISTED MEN.

General Funston Says They Are Underpaid—Faults of the Uniform.

Washington, D. C.—Brigadier-General Funston, commanding the military department of the Columbia, makes appeal in his annual report for better pay for enlisted men. He thinks privates should get $18 a month on first enlistment, corporals $30, sergeants $45 and first sergeants $90, with increases for length of service. "If these men are not worth these rates of pay," he says, "they are not worth any [illegible]." [illegible] General Funston thinks, as [illegible] there is not enough encouragement to induce the right sort of man to enlist. "There is no disguising the fact," he says, "that recruits are obtained with difficulty, and that the most of them are not of satisfactory quality. Very few men re-enlist after the expiration of their terms of service, while the number of desertions and of dishonorable discharges is phenomenal. To get and keep a good class of men there must be a radical increase in the pay of the rank and file. The wonder is, not that so few men enlist, and that so small a percentage of them re-enlist after three years, but that we obtain and keep so many really good men as we do."

General Funston recommends the abolition of the chapeau and epaulets for general officers.

OLD P. O. OFFICIAL A THIEF.

Haff, Superintendent of Foreign Mails, Trapped.

New York City.—Alexander Haff, Superintendent of Foreign Mails and for twenty-four years a postoffice employe, was arrested for stealing money from the mails. There is no means of telling how much he has stolen, but it is believed the amount is not large. Postoffice Inspectors Boyle and Myers made the arrest. Boyle has known Haff since he started working in the postoffice, the two having been clerks together years ago, and there was an affecting scene when Boyle made Haff a prisoner. Haff refused to make any statement, and the inspectors are at a loss to explain what he did with the money, as they say, he has no vices.

RENEGADE AMERICAN CAUGHT.

Herrmann and Part of the Stolen Funds Found in Negros Island.

Manila, Philippine Islands.—Inspector Herrmann, who stole funds of the Mindanao Government and turned pirate with Supply Officer Johnson, has been captured by the constabulary. Johnson was killed by the crew of the native boat which the pirates had taken from the steamship Victoria, which they had seized, had been grounded by her crew. Herrmann killed four of the six members of the boat's native crew, brought the boat to the shore and, although severely wounded, escaped to the mountains of Negros. The constabulary also recovered 170,000 pesos in money from Herrmann.

Ohio Stops the Sale of Toy Pistols.

The Ohio State Board of Health adopted a resolution by which their secretary is directed to [illegible] steps to prevent the sale of "toy pistols and other explosive appliances." The resolution recites that 600 persons were killed [illegible] and 4000 others [illegible] on the last Fourth of July. The board therefore declares it to be the duty of health authorities to abolish the evils attending the celebration of Independence Day.

A Million-Dollar Fire.

Fire swept through Aberdeen, Wash., and destroyed 150 buildings, besides causing the death of four persons and a loss of $1,000,000. Ten blocks in the business portion of the city, including the opera house, two hotels and two banks and a hospital were destroyed. In order to stop the progress of the flames dynamite was used on several of the buildings. Aberdeen is situated on Gray's Harbor, and has about 5000 inhabitants. The chief industry is lumbering.

ALASKAN VICTORY OURS

Formal Decree Gives United States Disputed Territory.

THE CANADIANS ARE RESENTFUL

Lower Alaskan Gold Fields Belong to United States—Canada Gets One Waterway — Dyea, Skagway, Chilkoot and Whole Juneau Territory Under the Stars and Stripes.

London.—Alaskan boundary tribunal's official decision just made public, grants main contentions of the United States, gives this country two strategic islands in the entrance of the Portland Canal, which latter goes partly to Canada. The Canadian commissioners refuse to sign the decision, and the public meeting was abandoned. The Canadians, in a formal statement, charge that their country's rights have been sacrificed.

As affecting the Portland Canal the award gives the United States two islands, Kannaghunat and Sitklan, commanding the entrance of the Portland channel and the ocean passage to Port Simpson. This destroys the strategic value of Wales and Pearse islands, which are given to Canada.

The mountain line adopted as the boundary lies so far from the coast as to give the United States substantially all the territory in dispute.

The line completely clears all the bays and inlets and means of access to the sea, giving the United States a complete land barrier between Canada and the sea, from the Portland Canal to Mount St. Elias.

Around the head of the Lynn Canal the line follows the watershed, somewhat in accordance with the provisional boundary established by the modus vivendi.

The Canadians feel very sore over the outcome. They almost openly accuse Lord Alverstone of partisanship. When the latter presented them to King Edward, at Buckingham Palace, his Majesty vainly endeavored to induce Messrs. Jette and Aylesworth to say they were satisfied or that they accepted the situation. But the two Canadians declined to express in any way acquiescence with this view. They simply shook hands formally and bowed.

WASHINGTON PLEASED.

Foster Sends Synopsis of the Alaska Boundary Award.

Washington, D. C.—Secretary of State Hay received a telegram from former Secretary of State John W. Foster, the agent of the United States before the Alaska Boundary Tribunal in London, containing a synopsis of the boundary [illegible] grants practically [illegible] of the Unite... must be regarded [illegible] for this country.

The valuable Porcupine River gold fields are to remain in American territory. Great Britain does not get access to the sea by way of any of the so-called canals or estuaries which are nearest to the Klondike and the other British mineral region in the vicinity of the Yukon. One of the most important features of the award is that the boundary line of the strip or listere of Alaskan territory which separates the British Northwest from the Pacific is so placed as to include White and Chilkoot passes within American jurisdiction. The British Government, under the modus vivendi for a provisional boundary arranged in 1899, maintained custom houses at these passes, which are north of Duryea and Skagway at the head of Lynn Canal. The dispute over what was the Stikine River boundary was settled by adherence to the present modus vivendi line on the Stikine.

Disappointment in Canada.

Montreal, Que.—A general feeling of disappointment and resentment prevails here over the Alaskan decision. The feeling is freely expressed that Canada's interests have been sacrificed

TWENTIETH VICTIM A MANIAC.

Engineer Was Powerless to Stop Short of Determined Suicide.

Auburn, Pa.—Still laughing like a madman as the locomotive bore down upon him, George Hain, of Milton, a middle-aged man, deliberately knelt before a passenger train on the Reading Railway here and awaited his death. He was ground to pieces before the engineer, who saw the act, could stop the train.

In the pocket of Hain's clothing were a ticket from Allentown to Lewisburg and a slip of paper, upon which was written "Good-bye all; forgive every one. I am crazy." Also a brief note addressed "Mother," which related to a check. His body was forwarded to the Morgue of the county.

This was the twentieth fatality in which Engineer Sharp, of this train, had figured.

TWO DEAD OF DOG'S BITE.

Farmer Takes Home Strange Pet, With Terrible Results.

Guthrie, Okla. Ter.—William Lamunion, living on a farm between Carrier and Enid, died a few nights ago in a series of convulsions following the bite of a rabid dog. The previous night one of his children died in terrible agony from the same cause. Lamunion was in Enid and took the dog home with him.

At home he turned it loose in the yard, and when two of his children approached it the dog sprang at them, biting them severely. In his efforts to protect the children Lamunion suffered his own fatal injury.

The New Jersey Legislature Adjourns.

The special session of the New Jersey Legislature ended at Trenton after the passage of the school bills and the making of provisions for the flood commission. No other business was transacted.

Fire Ruins Town in Indiana.

Fire, supposed to be of incendiary origin, destroyed five business blocks and the railroad station, besides damaging several other buildings at Galveston, Ind. The loss is estimated at $75,000.

BIG BEQUEST TO BRYAN

Sealed Packet P. S. Bennett Left Gave Him $50,000.

Widow Contests the Legacy—Bryan Says "Neither I Nor My Family Shall Profit by It Unless Mrs. Bennett is Willing."

New Haven, Conn.—William J. Bryan came to New Haven from New York, and appeared as a bearing in the Probate Court in reference to the request of $250,000 which the late Philo S. Bennett had made to him. The bequest was made through the medium of a sealed letter mentioned in the will and opened by order of the court. The provision of the will which makes the gift to Mr. Bryan will be contested by Mr. Bennett's widow, who will, it is said, allege undue influence upon her husband by Mr. Bryan, who is an executor of his estate, and by Mrs. Bryan.

Witnesses at the hearing stated that the will was drawn by Mr. Bryan and typewritten by Mrs. Bryan, after an interview with Mr. Bennett at Lincoln, Neb. The testimony showed that the Bryans did not see Mr. Bennett sign the document, although they were asked to witness the last will.

The envelope mentioned in the will has been a mystery until the court examination, when it was sent to the hearing by its custodians, the Mercantile Trust Company, of New York City. The court took official cognizance of the document and ordered that it be torn open, giving counsel an opportunity to read its provisions. In the document Mr. Bennett, in addition to making the above mentioned bequest, requested that Mr. Bryan give Mrs. Bryan $10,000 of the sum received and the Bryan children $15,000.

Ever since the will was filed for probate in New Haven comment has been rife as to Mr. Bryan's part in its execution, the impression prevailing that it was he who drew up the document and then received for himself and Mrs. Bryan so much authority in the disposition of the estate.

According to the terms of the will they had the disposition of $200,000 among colleges and poor students of both sexes.

Philo S. Bennett was killed last August in a stage coach accident in Idaho. He was a member of the wholesale grocery firm of Bennett, Sloan & Co., of New York City, and had a home in New Haven. A. P. Sloan, of this city, a member of the same firm, was an executor of his estate with Mr. Bryan.

Before the hearing was adjourned Mr. Bryan announced in court after a sharp cross-examination by the widow's counsel and the publicly declared intentions that Mrs. Bennett would stubbornly contest the provisions in the sealed letter, that he would not accept a cent for himself, but that he maintained his right to spend the $50,000 for educational and charitable

[redacted]

possible to prevent it.

W. J. Bryan is reported to have declared that he was ready to make an attested statement, to be introduced as evidence, that he would not accept the gift for himself should such action be contrary to Mrs. Bennett's wishes.

DIES IN FOOTBALL GAME.

Player Drops Dead in Contest With the Annapolis Naval Cadets.

Annapolis, Md.—In the progress of the football game here between the midshipmen and the Baltimore Medical College team, Robert E. Lewin, a player on the latter team, whose home was in Plainfield, N. H., was seized with an attack of heart trouble, and probably died almost at once, although every means was taken to preserve his life, and he was not pronounced dead for over half an hour. The incident took place toward the close of what would have been the first half of the game, but the contest was ended by order of the Superintendent of the Military Academy as soon as the serious nature of the accident became known.

MISSOURI MAKES 18.05 KNOTS.

Battleship Beats the Record of Her Sister Ship Maine on Her Trial Trip.

Boston, Mass.—The new first class battleship Missouri had her official trial trip over the Cape Ann course and made the uncorrected average speed of 18.05 knots an hour. When the usual allowances are figured out her official speed will be 18.22 knots.

The average speed of the battleship Maine, sister ship of the Missouri, is 17.38 knots, and the builders of the latest battleship feel elated. The highest speed made attained by the Missouri was about 18.7 knots an hour. The Missouri steered perfectly and turned in from twenty to twenty-five seconds.

Marshall Field Sues Dowie.

Marshall Field, of Chicago, has brought suit against John Alexander Dowie for $5000. The summonses in the suit were served on him in his mansion at Zion City on the morning of his departure for New York. The matter had been kept quiet, as Mr. Field was one of the creditors whom Dowie boasted would give him unlimited credit.

Speculated and Forged.

J. E. Leimer, cashier of the Princeton (Wis.) State Bank, who is in jail there charged with forgery, says speculation got in gain caused his downfall. State Bank Examiner Marcus G. Bergh stated that Leimer had confessed that his forgeries amount to $20,000. The Princeton Bank is closed and the Montello State Bank, of which Leimer is Vice-President, was ordered not to open its doors.

More Postal Frauds.

A dispatch from Washington says that Postmaster-General Payne has summarily dismissed M. A. W. Lenz, superintendent of supplies; Louis Koppner, chief of the registry division; C. H. Terry, a clerk in the supply division, and Otto Weis, a clerk in the New York postoffice.

Harriman Predicts Continued Prosperity.

E. H. Harriman, railway magnate, in an interview at Chicago, declares he has unbounded faith in the country's future business.

EXTRA SESSION CALLED

Congress is Directed to Assemble on November 9.

SUBJECT TO BE CONSIDERED

Cuban Reciprocity the Sole Duty Named For Extra Session — President Roosevelt's Proclamation The Commercial Treaty Will Be Up For Consideration.

Washington, D. C.—The [illegible] ued a proclamation calling eighth Congress in extraordinary session, on November 9, at 12 proclamation states that of the session is to consider commercial convention between States and Cuba, which [illegible] approval of Congress.

Following is the text of the proclamation:

"By the President of the United States of America:

A PROCLAMATION.

"Whereas, By the resolution of the Senate of March 19, 1903, the approval by Congress of the reciprocal commercial convention between the United States and the Republic of Cuba, signed at Havana on December 11, 1902, is necessary before the said convention shall take effect; and

"Whereas, It is important to the public interests of the United States that the said convention shall become operative as early as may be;

"Now, therefore, I, Theodore Roosevelt, President of the United States of America, by virtue of the power vested in me by the Constitution, do hereby proclaim and declare that an extraordinary occasion requires the convening of both Houses of the Congress of the United States at their respective chambers in the city of Washington, on the 9th day of November next, at 12 o'clock noon, to the end that they may consider and determine whether the approval of Congress shall be given to the said convention.

"All persons entitled to act as members of the Fifty-eighth Congress are required to take notice of this proclamation.

"Given under my hand and the [illegible] of the United States, at Washington, 28th day of October, in the year of [illegible] Lord one thousand nine hundred and three, and of the independence of the United States the one hundred and twenty-eighth.

"THEODORE ROOSEVELT.

"By the President:

"JOHN HAY, Secretary of State."

It is well understood that this [illegible] of the President and of the party leaders is that holding this extra [illegible] session. There will be no general legislation of importance at either session of Congress.

The President's message for the extra session will deal only with the Cuban commercial reciprocity question. Mr. Cannon, who is to be the Speaker of the next House, will name no committees until the regular session except that on Ways and Means, which must deal with the Cuban reciprocity question, and those on Rules and Accounts and Mileage.

STEAMER PORTLAND LOST.

Vessel Struck on Cape Blanco Reef and Sank—Many Passengers Drowned.

Marshfield, Oregon.—The steamer South Portland, which sailed from Portland, Oregon, loaded with wheat for San Francisco, struck on Blanco Reef during a heavy fog. The vessel carried a crew of twenty-two and fourteen passengers. Of these the following have reached shore:

James McIntyre, captain; John Weimer, a sailor, of San Francisco; Emanuel Pasominos, chief cook; William L. Baker, Alameda, Cal.; Guy Bent, a boy of twelve years, of Nova Scotia; Albert Bailey, of North Dakota, passenger; Charles Bruce, first officer; James Ward, chief engineer; T. Pizzano, second assistant engineer; John McKeown, oiler; J. Driscoll, oiler; W. Hughes, seaman; W. Robertson, lifeman; James Atwood, seaman; H. Weber, engineer; C. Johnson, seaman.

Charles Buzon, the first engineer, died of exposure as they were taking him off the life raft. Seventeen persons are yet missing and are probably lost.

The South Portland struck bow on going at a speed of about seven knots. Immediately she began to settle astern, and in a minute or two slid off the reef and began to sink. Captain McIntyre, seeing there was no hope of saving the ship, had the boats lowered, one of the boats, with part of the crew and some of the passengers was capsized as soon as it cleared, and when last seen was floating away in the fog without a living soul aboard.

The captain's boat with about eighteen aboard was also capsized, and only seven were able to get back to the boat. They consisted of Captain James McIntyre, John Reimer, Emanuel Pasominos, W. L. Wilson, L. Baker, Guy Bent and Albert Bailey. They reached Port Orford.

A lifeboat on which the other survivors embarked succeeded in reaching shore.

"No War in the East," Says Barrett.

John Barrett, the new United States Minister to the Argentine Republic, an authority on the situation in the Far East, believes that there will be no war between Russia and Japan.

Killed by His Friend.

Irving A. Kimball, of Newton, N. H., is dead in Kensington, having been accidentally shot by his friend, Joseph Osgood, who became unconscious after the shooting. It is feared Osgood will become insane.

Colombia in Straits.

The Minister of the Treasury at Bogota, Colombia, has announced at a secret session of the House of Representatives that the national revenues are 30,000,000 pesos, in paper currency, less than the expenses.

NEW GAME.

...ders had come up to ... spend a week, writes ...ell Loomis in the St. ... had been there just ... having come the night ... had already been classi...nboled by the Goodrich ...untry cousins, whom he ... He couldn't climb a tree; ... swim; he threw a ball like ...he delights of using a sling ...nknown to him; and he had to ... bed at half-past seven. As he ... a year older than the twins, who were eight, this last stamped him as a molly-coddle.

After breakfast the three boys went out to the barn, where the twins ran up ladders and walked the narrow crossbeams thirty feet above the floor as unconcernedly as if they were on the ground.

Percy caught his breath. "Oh, I wish I could do that! I'd love to do all those things, but mam won't let me because it makes me dizzy."

"Oh, it's as easy as pie. See me fly." And Albert took a flying leap of fifteen feet into the hay, followed by his brother.

Then they compared muscles, and found that Percy's were "awfully flabby." Their own were like iron. But showing off soon palled on all three boys, and they began to wonder what they could play.

"I made up a game the other day," said Percy, in the slow, sober tones that had struck the twins as so curious. They chattered as fast and as shrilly as monkeys themselves, in spite of their mother's hourly protests.

"Did you?" said Albert.

"Out of your own head?" said Her...

"Oh, it's easy. I often make 'em ..." said Percy, delighted to have ...e an impression on these athletic ... who could do so many things ... he could not, although he was ...h older.

"...us how you play it," said the ... together, eager for some nov...

"...ell, it's a kind of tag. I'll be it. ... I'll start to run after you, just ... [illegible] ... spoke, the twins, who had been lying in the hay, jumped to their feet and ran out of the barn. "Hold on," said Percy, "I must tell you something about it first. As I run after you I holler out a letter of the alphabet, like C, and then if you think of an animal whose name begins with C, and shout it, I can't tag you; but if you don't shout, then I tag you, and you're it, and must run after the others and holler out a letter. It must be some animal, or if you choose you can call out flowers. But it must be either animals or flowers or countries or fruits; you mustn't mix 'em up in the same game. Now you start and I'll follow."

"I hope he says the same letter again, because I've got a bully animal all ready," said Herbert to Albert.

The boys had not run fifty feet before they found that, whatever else Percy could not do, he certainly could run. He was almost upon Herbert before he shouted, and then he yelled "C!" as before.

Herbert waited until Percy reached out his hand to tag, and then he shouted, "Seal!"

"Tag!" said Percy, with a burst of laughter.

"That's no fair," said Herbert. "I said 'seal' before you touched me."

"But seal doesn't begin with a C; it begins with an S," said Percy, soberly.

"How about sealing? Isn't that c-e-l-l-i-n-g?"

"The plaster one is, but hunting the animal isn't," said Percy, with authority.

"He's right, Bert," said Al, who had run up. "You're it, fast enough."

"Very well," said Bert. "Ready!" And the two fled before him. He pursued Percy, who ran fleetly out into the road. After a long chase Percy stubbed his toe and Herbert gained enough on him to call out "G!"

"Gnu!" yelled Percy. But, with a derisive laugh, Herbert closed on him and tagged him.

"I didn't say N—I said G."

"And I said gnu—g-n-u," said Percy, simply.

"Say, a fellow needn't ever get caught if he spells that way," said Bert, angrily. "G-p-o-n-y, pony. That's dead easy." But again Al came up and declared that Percy was right.

They played the game for over an hour. Sometimes even Percy did not think fast enough or run fast enough to avoid being it, and after a while they gave a variety to the game by changing to flowers; and there they rather got the best of Percy, who was not familiar with as many varieties as the country boys were. Bert made laughable mistakes in spelling, and Al gave "phlox" as an F flower.

At last, when they grew tired of the sport, they all went up in the hayloft together. The twins helped Percy up the ladder. They tumbled into the hay.

"You're all right," said Al. "You can run fine, and that's a bully game."

"And you can spell 'out of sight,'" said Bert.

"I'd rather be able to climb a tree, like you fellows, than spell any word I ever saw," said Percy, modestly.

"Come on out then and we'll teach you," said the twins, in unison.

JOE, OF THE JUNGLE.

One day, about a week after our sport with the elephant, two of the gorillas left home and were gone for half a day. Of course, I could not tell where they went, or what for, but when they returned there was a great jabbering and chattering, and I understood that something was going to happen. That evening, instead of climbing to our nests in the trees, we set out through the forest to the west. I was going to take one of the spears along, but a gorilla took it from my hand and gave me a club instead. They seemed to understand that I could not see at night as well as they could, and one walked on either side of me and gave me his hand.

We walked fast for two hours. We met many hyenas prowling about, and once a lion roared close to us, but we had no fear of the wild beasts. By and by we left the forest and jungle behind us, and stood in the open. I could make out huts and paths, and presently I understood that we were close to a native village. The people were all asleep in their huts and they had no dogs to warn them of our coming. What the gorillas meant to do I could not guess, but after making sure that no one was awake, we went ahead until we reached a field of maize.

The gorillas didn't want to kill any one, but they owed the people "a spite," and took their way of paying it off. When there was nothing more to be picked up or destroyed, the big gorilla called us all together for a talk. I can not tell you what he said, but all the others understood it plain enough.

When we were ready the big gorilla cried, "Hu! Hu!" and we dashed into the huts and seized a sleeping man or woman. The three of us got hold of a big, strong man, and, though he was greatly surprised at thus being attacked, he kicked and struck and bit and made a good fight of it. We got him out of the hut however, and one of the gorillas picked him up and ran to the bank of the river and flung him in with a great splash. Four other natives were treated the same way.

The gorillas were thrown into a great rage and wanted revenge, but they did not know how to get it until I showed them the way. I cut several vines and made slip-nooses, as I had done to catch the lion, and then I had the gorillas go back to the water and pretend to be drinking. It was not long before another crocodile rushed out, but they were on the watch and darted away, and while he rested on the bank, wondering where his dinner had gone to, I threw three of the slip-nooses over his head. Then we all got hold and drew him far from the water, and when we had beaten him with clubs we made him fast to a tree and left him to die.—St. Nicholas.

OLDEST LIVING CAT.

G. Leslie Nye, commonly called "Pretty" or "Purt," and the property of Mrs. F. A. Nye, of Galien, Mich., is the oldest living cat in the world, having just celebrated his nineteenth birthday, and despite his great age shows every sign of possessing good health.

He came to his mistress nineteen years ago, when as a frolicsome kitten, he was considered one of the most conspicuous and interesting of the many wedding gifts received on that occasion.

He is a beautiful orange cat with white markings, and, Mrs. Nye has a life sized pastel made of her famous pet.

Notwithstanding his advanced age, he is in perfect health, and the fact that he has lost most of his teeth does not cripple him as a ratter, as he holds the rodent with both paws and worries it to death by twisting its head until its neck is broken.

Mrs. Nye raises a thousand chickens every summer, and for years this remarkable feline has assumed the responsibility of protecting them from cats, dogs and rats.

Even the wily weasel is no match for G. Leslie Nye, who catches and kills every one who visits the chicken ranch. His only affliction is with the family cow, which allows him to ride bareback fashion when she is grazing in the pasture.

He is an epicure—loves a good brand of coffee and dotes on raspberry pie. Also squash, corn, cabbage and tomatoes, but his chief delicacies are fish, oysters and game. He is perfectly indifferent to yellow legged chickens, but wants his milk served in a pink saucer, and insists on having it warm and foamy from his friend, the bossie.

There are now on the Witwatersrand 125,777 colored laborers, 20,000 of whom are domiciled in the Transvaal. The total population of the Transvaal amounts now to about 620,000.

Six hundred men are regularly employed on the new steamship Kaiser Wilhelm.

The Emperor of Japan.

With Japan confident that she can whip Russia, the Czar's empire equally confident of her ability to destroy her little rival, and with Russia's peculiar conduct of the Manchurian difficulty as a moving cause, it is not surprising that the press should be filled from time to time with reports that war between these two powers is imminent. Yet there are so many reasons why war would be disastrous to both nations that conservative observers do not look for actual hostilities in the near future. The careful men on both sides would naturally do all in their power to prevent such an issue, and not the least of them the Emperor of Japan, who is regarded as a man of the highest statesmanship and loftiest patriotism.

Mutsunito, 121st Emperor of Japan, was born November 3, 1852, and succeeded his father February 13, 1861. He is tall for his race, of dark complexion, possessing fine open features and a high forehead.

Edwin Markham, Poet.

Experiments With a War Balloon

A new type of war balloon has lately been experimented with in the artillery branch of the Spanish Army. The photograph reproduced above shows the balloon at the beginning of its ascent on its first trial.—Harper's Weekly.

Pluck and Adventure.

NERVE ON THE GALLOWS.

SOME time ago a Russian criminal was executed in St. Petersburg. He had during the last two years murdered twelve persons, the last one being a priest. The law did not show this monster any mercy, but speedily condemned him to death.

Stebljanski was the name of the wholesale murderer, and he hoped to the last for clemency. When the death warrant was read and the keeper informed him that he had but six hours to live, he raged and swore to revenge himself in the most terrible manner. After being left alone in the cell the first thing he did was to break his lamp, and, procuring some matches, he set fire to the oil. In a moment the flames broke through the window and the entire building was for a time threatened with destruction. Fortunately, the fire was discovered in time and got under control before much damage had been done, but in the meantime a terrible struggle ensued between the keepers and the criminal, who had fortified himself with an iron bar taken from his bedstead. The first man to enter the cell was knocked senseless, and it was only after being almost suffocated with smoke that the prisoner was finally overpowered. Next morning the execution took place. The condemned man ascended the scaffold with much bravado, made a thorough examination of the same, and finally declared the rope too short.

"I cannot get my head in the loop," he said, "and, though it will cause me some inconvenience to wait, I will smoke a cigarette while you are having it attended to."

He lighted a cigarette and, turning to the executioner, made a speech, pointing out the detestable in his profession and as a condemned criminal in Russia has certain rights, no one dared to interrupt him.

The executioner, who was really a tender-hearted man, become visibly affected by the moralizing words of the murderer, and, turning to the crowd assembled before the scaffold, declared that his conscience did not allow him to proceed or to take a fellow man's life, and he then and there resigned his position and departed amid the shouts of the assemblage.

This caused great confusion among the representatives of the law, for where could they in a hurry get another executioner? The question was, however, solved by the condemned man, who declared that he would execute himself as soon as he got through smoking. He started an interesting conversation with the priest during the five minutes or so which he had left, and recommended Count Tolstoi's book, which contains striking remarks about the relation of capital punishment to the teachings of Christianity. He then threw a kiss to a pretty girl among the spectators, stuck his head in the loop and kicked away the trap beneath his feet.—Washington Evening Star.

HIS SHIP HIS PRISON.

A decidedly unusual but uncomfortable and dangerous experience was that of the master of the steel sailing ship Ernate, which was recently related in the Maritime Court at Dantzig, Prussia. He left Mamel, a port on the Baltic, with a cargo of planks on April 18 for Oldenburg. Captain Engellandt, who also is the owner, remained at the wheel during a gale which overtook the vessel next night and at 4 o'clock in the morning went to his cabin to change his wet clothes.

He had just got into dry underclothing when the vessel tipped over and he found himself standing on the roof of the cabin, of which the sea had hermetically closed the door. By loosening the board of what was now the floor he got into the hold, which contained only loose sails. Fortunately some shelves of a high cupboard standing in the cabin remained intact and from them he collected two tins of condensed milk, three pounds of prunes, some rice, sugar and sausage. He also found a hammer.

For twelve days the man lived in his prison, eating as sparingly as possible and drinking sea water, which appears to have had no ill effect. He spent his free time in hammering on the steel bottom of the ship to attract the attention of chance passing vessels and slept quite well at nights, for after the first few days the sea was smooth. He knew when it was day, for a dim light penetrated the water.

On the twelfth day the Norwegian steamship saw the wreck and sent a boat to take it in tow. Engellandt had fallen asleep, but hearing footsteps over his head, he began knocking with his hammer and shouting. The Aurora's men turned to their ship for tools and bored a hole through the wreck's keel, where they heard the knocking. When they drew out their borer a man's finger followed, and they soon learned that Engellandt had food for four days more and wished to be towed to land, for it was impossible to release him in the open sea. He also desired to have the hole plugged again, as he was afraid that the loss of air would cause the ship to sink lower in the water.

The Aurora towed the wreck safely to Neufahrwasser, where with considerable difficulty it was attached to a huge crane, a plate was loosed and the imprisoned captain freed. Engellandt was perfectly conscious, and even able to walk alone. He is thirty-two years of age and married. He had no idea what became of the three men constituting his crew.—Chicago Chronicle.

IN A VERY TIGHT PLACE.

Upon another occasion, in northern Michigan, I was trout fishing in company with a veteran timber cruiser, a man who knew everything about the rough bush-life, says a writer in The World's Work. In time we reached a bend in the stream where a lot of small logs had jammed during the spring freshet. My comrade unconcernedly ventured upon the logs, and before I could follow, by some mischance, he stepped upon a loose one and instantly disappeared. Had I not been looking at him it is likely I should have imagined he had crossed and gone into the brush upon the farther side. One fog of all the mass was rolling and a hand showed at one side of it. To dart across and seize the hand occupied very few seconds, but, to my horror, I could not pull him up through the narrow space through which he had slipped. To set a foot upon the log either side the opening and shove with all strength was the only hope. For seconds I clung to the wrist and strained mightily. Slowly the logs separated and up he came till he was able to twist upon his stomach across a log. Half drowned as he was, he had not lost his nerve: "Do—don't let 'em squeeze back on me!" he gasped, and a moment later he was on his feet. Most men would have weakened then, but he was iron. He had swallowed a lot of water, had been check by jowl with an awful death, yet he had no idea of proving false. The logs were slowly slipping father apart and I was standing like a certain large gentleman of Rhodes, and unable to stand much more spreading or to spring to either side, while, of course, to slip into the water meant to enter the trap he had just escaped. In a few seconds he seized my hand and one quick haul carried me to firm footing. The logs at once closed like a gigantic trap. When he reached solid ground my comrade almost collapsed, and for half an hour he was a very sick man. Later he said: "I held my breath as long as I could, calculatin' you might try to get me, an' needner. I'll never forget that little turn. I reckon I was in a mighty tight place."

DREAMED OSTRICH ROBBED HIM

Hunting yarns were in order, and it was up to the African explorer for his contribution.

"I was trekking along the southern coast of Africa a few years ago," said he, "and had spent most of the day shooting pheasants, spring boks, viek boks, duyker boks and other kinds of 'boks' with which the country abounds, when I was suddenly confronted by the biggest ostrich I ever saw. As he stood before me, intently regarding me, he looked to be six feet tall, and for the moment I lost my presence of mind. Then I backed away, intending to shoot the big bird, but to my utter dismay found that the magazine of my gun was empty. Then I remembered hearing that the legs of an ostrich turn pink when he is angry and I looked at his limbs. They were not only pink, but almost red, and, as he started toward me, I threw myself flat on the ground, this being admittedly the best way to escape death or injury from the blows of one of these birds when infuriated.

"The ostrich came close to my side, and, after intently regarding me for a moment, poked his bill into the pocket of my waistcoat, abstracted my watch and calmly swallowed it with a look of intense satisfaction. Next he explored the pockets of my trousers, and, finding my knife, gulped that down with an expression of gastronomic delight. My bunch of keys followed suit, as did everything in the way of metal or glass I had about me. Then, having made a sumptuous meal of my personal belongings, he stalked majestically away, leaving me unharmed. I got up finally, and went through my pockets to see if he had left anything, when, to my utter surprise, I found my watch, knife, keys and everything else in their proper receptacles. Then it dawned upon me that I had dreamed a bad dream, and I resolved never again to take a nap on the veldt."

A GALLANT RESCUE.

Not long ago, during a gale on the Banks, Henry George, of the crew of the Newfoundland schooner Pioneer, was swept overboard by a wave. A comrade, Joseph Mooney, grabbed a bait plank as a support and sprang after him. Cumbered as he was with his oil clothes and sea boots, Mooney first worked off his footgear and then his coat, and swam for his chum. George was floating unconscious on the surface of the water, having been thrown against the bulwark and hurt as he was flung over the side. After a long struggle Mooney reached him and gripped him by the collar with one hand while with the other he held the frail plank in position between them. In this perilous plight the two men remained for three hours, until the schooner was able to beat back to them. The sea was running mountain high and it was feared a dory would not live in it. To lessen the risk for the skiff and the men in the water, the schooner had to be run down almost sheer upon the latter, and then a dory with two men in it was launched bodily by a mighty heave of the rest of the crew, and in the "lull" created under the sheltered lea of the craft the rescue was soon accomplished. Mooney was at the last gasp. He had not only suffered the buffeting of the waves and the chill of the cold, but beside the effort of keeping his comrade on the plank he found that the board could not support both their weights, and consequently he had to swim himself most of the time. He fainted when he was dragged into the boat, but his grip was so tight on his companion's collar that his fingers had to be prised open with a marlinspike.—From Off the Banks, in Leslie's Monthly.

A. G. ANDERSON,
of Somerville.

FOR MEMBER OF ASSEMBLY
CHARLES M. DOLLIVER,
of North Plainfield.

FOR CORONER:
W. HOWARD TOMS,
of Warren.

POLITICS AND SCHOOLS.

ONE of the most serious menaces to North Plainfield—second to that of annexation—occurred when the management of our borough schools was delivered into the hands of politicians last spring.

One of the results of this change was witnessed recently at a meeting which was made public through the columns of the REVIEW. Whether this plan will be carried out or not will probably be decided at the Board meeting next Monday evening.

Whichever way this important question is decided, the fact remains and goes to prove that it is dangerous to let politicians have a hand in the management of public schools.

Appropos of this we give below an editorial from our neighbor, the Morristown *Chronicle*, namely:

Morristown has been blessed for years with good public schools. The Board of Education has been and is composed of some of Morristown's best men and they have been above criticism. Politics has been as far removed from the school board as is a prohibitionist from a drunkard. The children of Morristown have been provided with educational advantages such as the children of few communities enjoy and one of the greatest mistakes ever made by any man or body of men was to try to do away with the school system that we have enjoyed here for over thirty years.

From the above we infer that the politicians of Morristown have been trying to secure a hold on the public schools of that city.

To further emphasize this subject we add an editorial from the Newark *Evening News*:

An illustration of some of the dangers of permitting the politician to get his grip on the control and management of the public schools is furnished by Philadelphia, where the political machine controls them, and about everything else in sight. It is now engaged in levying a 2 per cent. tax on the school teachers' salaries for election expenses. The teachers are notoriously underpaid; the inadequate accommodations for pupils are keeping many thousand of children out of the schools, and several of the politician members of the Board of Education are serving sentences in the penitentiary for crimes committed in connection with their official work. It is not a far cry from such a condition to the complete ruin of the public school system in the city. And politics is responsible for it all.

It is not the purpose of the REVIEW to unnecessarily alarm its readers on this subject, but we do desire to make an earnest and emphatic protest against the proposed annihilation of our High School here and to bring the subject before our readers that they may realize the danger which now threatens the very foundation of our public schools.

If the people once awaken to a realizing sense of the situation they can always be depended upon to remove the dange . The only fear is that the people may not realize this great danger until it is too late. *Now* is the time to *think* about this subject and next April she time to *act*.

It needs no argument or proof to convince the most skeptical that the North Plainfield public schools are very nearly, if not quite; controlled by politicians. The last public meeting, held in the spring of this year, was "packed" and controlled by some of the most notorious politicians in the county, and this coterie had things their own way, and succeeded in electing men on the Board who have since endeavored to ruin a school system which it has taken many years to build up to its present high standard by the best men of the borough—men who have freely given their time and talents, to the work for years, with the result that today our school system stands out prominently in educational circles among the best in the State.

Not only have our leading and influential citizens given their time, but they have given their money also. To the generosity of one man in the borough who donated a large amount of money for the purpose, we are indebted for our manual training department, which is now accomplishing practical results that are of immense benefit to every pupil fortunate enough to enjoy the privileges. In this respect North Plainfield is ahead of the city of Plainfield.

Many of our leading citizens who have been educated and graduated therefrom are proud of their Alma Mater. That this High School can be set aside simply by the will and caprice of a few politicians, the taxpayers having no voice in the matter, does not seem possible, yet such is the law, and the only hope left is that these politicians will not deem it wise to go against the wishes of the people and deprive them of this institution.

THE TWO PLATFORMS.

Below will be found the platforms adopted at Somerville last week at the county conventions. They are both interesting and instructive documents and will no doubt be read with more or less pleasure by all our readers.

REPUBLICAN

"We, the representatives of the Republican party of Somerset county in convention assembled hereby declare adherence to the party principles enunciated in the platform adopted at the last Republican state convention and pledge our united efforts to further their advancement.

"We endorse with pride the firm, fearless and statesmanlike administration of National affairs under the leadership of that conscientious and patriotic American citizen, Theodore Roosevelt. Suddenly called to the Presidency under trying circumstances, by his unswerving allegiance to the Republican principles as outlined in the policies of his great predecessor, William McKinley, and by his vigorous and broad-minded statesmanship he has proven himself worthy of the fullest confidence of the American people.

"We especially endorse his policy of regulating those gigantic combinations of capital commonly called trusts which seek to destroy free competition and create monopoly, and which are using their unlawful powers for unlawful purposes.

"We congratulate the citizens of the Fourth Congressional District upon election of so capable and efficient an officer as our honored representative in Congress, William M. Lanning.

"We lament the sad death of our late County Clerk Frank W. Somers, smitten down in the midst of an active career. We feel that the Republican party has lost a wise counselor, Somerset county a courteous and efficient officer, and the state a useful citizen. We mourn his loss.

"We commend to the voters of New Jersey, the clean, business-like and economical conduct of state affairs in the successive administrations of John W. Griggs, Foster M. Voorhees and Franklin Murphy, under which the revenues of our state have been materially increased thereby permitting the application of surplus revenue to the state school funds, and relieving the people of burdensome taxation, and under which our state government has been purged from the political corruption and scandals of Democratic misrule. We promise a continuance of the policies which have accomplished such admirable results and confidently appeal to the people for their endorsement.

"We pledge our enthusiastic support to the candidates of this convention."

DEMOCRATIC.

The Democratic party of Somerset county, in convention assembled, do resolve:

That we commend the action of our representatives in the state Legislature at the last session respecting the attempt of the Republican party to dismember our county, and, if re-elected, we pledge their hearty opposition to all future attempts of the Republican party in that direction.

We believe in a rigid enforcement of the laws of the State designed to regulate its financial institutions, and in the adoption of such measures as will insure the protection of the depositors and investors therein.

In order that the taxpayers' burden shall be confined to municipal necessities and progress, and not for the filling of the pockets of unscrupulous and high-salaried officeholders, we urge the observance of the Democratic doctrine of economy in the management of public affairs.

We especially condemn the act of the Legislature known as "The Supervisor Law" applicable to townships having a population of 4500, and also the enlargement of Township Committees. The working operation of that law tends to create unnecessary expense, thereby increasing taxation, and, in addition thereto, prevents the farming community from working out their taxes, as they have been accustomed to do from time immemorial.

We lay at the door of the Republican party the responsibility for laws which have made possible the existence of trusts and combinations of capital to such an extent as to prevent competition by persons of moderate means, and which force the laboring man to yield to the imperious will of the corporate powers.

We especially condemn the action of the Republican Legislature at the last session in railroading through laws especially designed to benefit corporations; in burying in committee measures beneficial to taxpayers, and their bungling and careless manner of transacting the important business for which elected thus necessitating the calling of two extra sessions within the year at great expense to the taxpayers.

We pledge our hearty support and that of our party to the candidates nominated at this convention.

FOR COUNTY CLERK.

The nomination of Alexander G. Anderson for County Clerk was done by the unanimous vote of the Republican convention and is giving great satisfaction. The selection is a good one and Democrats as well as Republicans recognize the fact.

Mr. Anderson has been identified with the party from his birth, and has been an active business man in Somerville for years.

Mr. Anderson was born in Liberty Corner and is 57 years of age. His youth was spent in the county, but at the close of the Civil War he went west and engaged in the lumber business in Kansas and Michigan. Since his return 25 years ago he has been in the lumber and coal business in Somerville, the firm being A. G. Anderson & Co., until recently when Mr. Anderson retired from active business management.

Mr. Anderson has always been an outspoken Republican, but has never pushed himself forward for the political prizes. There is not a question as to his capability for the office of county clerk, nor is there any doubt in the minds of his friends, that he will lend dignity to this most important position which has a five year term attached to it.

Mr. Anderson has served as warden in St. John's Episcopal Church, and has for many years been an active member there.

PRESIDENT ROOSEVELT has issued a proclamation calling Congress in extraordinary session on November 9. The purpose of the session is to consider the commercial convention between the United States and Cuba, which requires the approval of Congress.

A Chicago Business Man Said:

"I advise any one, young men in particular, to take out Life Insurance at once, as it tends to encourage thrift and habit of laying by a certain sum for the future."

To CONSUMPTIVES
The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address.

SHERIFF'S SALE,
IN CHANCERY OF NEW JERSEY.

Between Emma F. Hobbs, Complainant, and George M. Merrill et als. Defendants.—Fi. Fa. for sale of mortgaged premises.

By virtue of the above-stated writ of Fi. Fa., to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE SECOND (2) DAY OF NOVEMBER NEXT,

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville,

the following tract or parcel of land and premises hereinafter particularly described, situate and being in the borough of North Plainfield in the county of Somerset and State of New Jersey, bounded and described as follows

Beginning at a stone in the middle of the road at the northeast corner of Isaac Manning's land; (1) thence along the middle of Warren st north seventy-one and one-quarter degrees west one hundred and eighty-four links to a stone, Manning's corners; thence north seventeen and one-half degrees east ninety links to a stake in David Coon's corner; thence (2) along Coon's land south seventy-two chains and eighty-four links to the middle of Pearl street; thence along said Pearl street south seventy-two and one half degrees west one hundred and eighty-four links to the point or place of beginning. Containing one-quarter of an acre of land, more or less. Being the same premises conveyed by Sarah F. Gamberton, now Emma F. Hobbs, to George M. Merrill, by deed dated December 18 A. D. 1901.

CALVIN D. McMURTRY, Sheriff.
JOHN H. O'CONNOR, Solicitor.
Dated September 21, 1903. [8.19]

SHERIFF'S SALE
IN CHANCERY OF NEW JERSEY.

Between John D. Kirch et al., Ex'rs, etc., complainant, and Walter P. Lindsley et al., defendants.—Fi. Fa. for sale of mortgaged premises.

By virtue of the above stated writ of Fi. Fa. to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE TWENTY-THIRD (23) DAY OF NOVEMBER NEXT.

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit:

All that tract or parcel of lands and premises, situate, lying and being in the township of North Plainfield, in the county of Somerset and State of New Jersey:

Beginning at a stone planted for a corner in line of other lands of Elias Allen and being the southeast corner of lands this day conveyed to said Elias Allen by Aaron Allen, and running (1) thence along the line of other lands of the said Elias Allen in a magnetic course of north sixty-seven degrees and four minutes east (N. 67° 04' E.) a distance of one hundred and twenty-three and no tenths (123.0) feet to a cedar stake where formerly stood a white wood tree; (2) thence (—) along the line of other lands of the said Elias Allen north fifty-nine degrees and forty-five minutes east (N. 59° 45' E.), a distance of one hundred and ninety-eight and thirty-six one hundredths (198.36) feet to a stake and stone heap by a cedar tree; (3) thence along the line of lands of George Demler, crossing the valley and the road, north eighteen degrees and twenty-five minutes west (N. 18° 25' W.), a distance of thirteen hundred and eleven and twenty-three one hundredths (1311.23) ft to an angle point; (4) thence still along the line of land of said Demler up the mountain north no degrees and forty-five minutes west (N. 0° 45' W.) a distance of two thousand and one and seventy-eight one hundredths (2001.78) feet to a point and corner; (5) thence along the line of lands of formerly Dr. Corra Osborn on the northerly side of the second mountain south eighty-nine degrees and twenty minutes west (S. 89° 20' W.), a distance of eight hundred and ninety-five and ninety-five one hundredths (895.95) feet to a stone planted for a corner in line of lands of formerly said Osborn, said stone being the northeast corner of lands this day conveyed to Elias Allen by Aaron Allen. (6) thence along the line of lands this day conveyed to Elias Allen by Aaron Allen, running first over and down the mountain (through lands of the grantors), making and establishing a division line for property of Aaron and Elias Allen, south no degrees and nineteen minutes west (S. 0° 19' W.), a distance of thirteen hundred and fifty and no tenths (1350.0) feet, more or less, to a stone planted for a corner; then second along the the edge of woods north eighty-nine degrees and forty-one minutes west (N. 89° 41' W.) three hundred and twenty-five and ninety-five one hundredths (325.95) feet to a stone placed for a corner at the northerly end of the old lane; then third south five degrees and thirty-eight minutes east (S. 5° 38' E.) down the old lane six hundred and three and three tenths (603.3) feet to a stone planted for an angle point; in the old lane, then, fourth, south twenty-eight degrees and fifty-three minutes east (S. 28° 53' E.) across the valley road and the valley, a distance of eighteen hundred and ninety-seven and thirty-seven one hundredths (1897.37) feet to the first above mentioned stone and place of beginning. Containing 76 68-100 acres, more or less.

Being the same premises conveyed to the said Walter P. Lindsley by deed of Elizabeth D. Turney (single, bearing date April 10, 1902, and recorded in Somerset County Clerk's office, in Book S No. 9 of Deeds for said county, on pages 202, etc.

Timothy, the Timid.

By Cromwell Galpin.

THE first day of Timothy Farnham at the Los Angeles high school was distinctly uncomfortable, and the other days of the week were no less unpleasant to the boy. Timothy's father and his family had recently arrived "from the East," which in Southern California means from some portion of the United States east of Denver; in Timothy's case it referred to Southern Kansas, where the waters of the shallow streams grow warm early in the summer and stay warm till late in the fall.

Timothy found the Western boys of his own age no more than his equals in school work, and hoped to gain standing and make friends among them, as he had done among schoolmates in the "East."

In the middle of the morning session of the first day Timothy saw on his desk an envelope addressed to him. He opened it and drew forth the enclosure. Something flew out as the folded cardboard unclosed, and Timothy struck at it, uttering a shriek worthy of the most nervous girl in the room.

Then he discovered it was a "kissing-bug;" that is to say, a hairpin and a piece of rubber so twisted together as to unwind with a buzz when taken from the envelope. Timothy had been startled even more than the maker of the kissing-bug had hoped, and there was smothered laughter among the boys and giggles among the girls.

As the teacher in charge turned toward Timothy, William Peters rose.

"I put a kissing-bug on Mr. Farnham's seat," he said. "I thought he would open the envelope before the class was called to order, and, really, I didn't know that Timothy was so timid." And the force of the teacher's reproof was lessened by the smile he could not hide.

If the matter had ended there it would have been forgotten very soon. But at noon Will, who was a leader of the boys inclined to athletic sports, declined to allow Timothy a place in the line-up for a practice football game, and Timothy made such remarks as wit and ill nature suggested, the result being that two boys [illegible] good friends [illegible] the other boys of the [illegible] cined to follow Will's lead.

Three of his friends, Alf Johnson and Joe and George Brown, were especially ingenious and persistent in inventing alliterative variations of "Timothy, the Timid" and "Timorous Timmy," which the other boys took up and repeated till it seemed that Timothy's name was never mentioned without an adjective implying cowardice. As the days passed, even the little fellows in the classes below joined in the sport, greatly to Timothy's discomfort. Thinking over the matter, he sensibly concluded to do nothing until something seemed certainly the right thing to do; and he made no answer to galling remarks.

Schoolboys as a rule soon tire of any game steadily pursued, and Timothy's plan of non-resistance would in time have secure immunity from persecution at worst only half ill-natured. But his patience was not put to test.

On Saturday Will and his three friends rode down to the beach on their bicycles, reaching the seashore at 8 o'clock in the morning. Timothy also decided to go swimming. So, taking the electric car for Santa Monica, he entered the bathhouse from the shore side as the clock struck 10. He undressed, donned a bathing suit and went out on the beach.

Many people sat on the benches, and more on the sand, but there were no bathers in the water. The sea was like a vast mirror. Five or six hundred feet from the land the shining water rose slowly, green and graceful, as a heavy ground swell swept shoreward. Half way in flecks of white foam appeared on the crest of the little mountain of water; all the top grew white as the wave became perpendicular; then the mass toppled upon the sand with a tremendous slap that woke the echoes in the bluffs till all other sound was drowned in the roar of surf as the wave broke on the beach.

With both the sights and sounds Timothy was familiar, having spent a month along the sea before school began. Tumbling walls of water six feet high more than tempt the bather to stay ashore. Timothy sat down on the sand, just out of the reach of the waves, listening to people who spoke low when the hissing water receded, or who shouted in vain attempts to make their voices heard as the waves broke.

Generally four or five waves could be seen, that nearest the shore a roaring mass of foam, the next growing white along the crest as the front assumed the perpendicular, while those farther seaward were hills of green, lower as the distance increased, seeming smooth, as if cut from solid glass. No two waves were ever alike, so one wave kept its form a second, but distances between them seemed not to vary by a hand's breadth as the surges, miles in length, swept toward the shore.

A quarter of a mile from the beach, well outside the breaks and little affected by the swell, was a small boat with a big sail, carrying four people in bathing dress, evidently men, as they were bareheaded. Timothy watched them, wondering idly why they had hauled the sheet aboard while sailing dead before the wind. As he looked the helmsman put the tiller down and the little craft rounded up to port and heeled over as the breeze caught the sail, still hauled close.

"What do you suppose he thinks he's trying to do?" laughed a man sitting near Timothy.

Slowly the boat straightened up as the man at the helm put her before the wind. Still he kept her close hauled, and shifting his helm again, he jibed her over. As before, the sheet was held fast; but this time a puff of wind caught the sail and the boat turned over. The four persons who had been aboard made a good deal of splashing as they found places by which to hold on to the overturned craft.

A ripple of laughter ran along the shore. At Santa Monica a tip-over is not considered serious, for everybody who goes out in a sailboat rather expects a wetting. Even the fishermen change their ordinary clothes for bathing suits before going through the surf.

At high tide the surf is so high that no small boat can live in it, and then a start can be made and a landing effected only at one of the pleasure wharves or at the Long Wharf of the Southern Pacific Company, four miles below town, those structures extending seaward beyond the surf line.

So when this boat turned over the crowd looking on laughed, and exchanged good-naturedly contemptuous remarks concerning the skill of the boatsmen as they waited for the crew to right the craft and take to the oars to work her out to sea, for the wind was driving her toward the breakers.

But the men made no attempt to right the boat. Clinging to the almost submerged sides, they seemed to be waiting to drift ashore.

"If they let her get into that surf," said the man sitting near Timothy, "that boat'll go to pieces like an egg in an ore crusher."

One of the men clinging to the boat waved his hand to the people on the [illegible] and the surf goes down."

Timothy was a swimmer, and inured to surf work by his month at the shore. Although he had never battled with waves so heavy as those before him, he felt little doubt of his ability to make his way through them.

He walked slowly seaward, following a receding wave and meeting another coming, and dived into greenish-brown water seeming as steep and high as the wall of a house. He had taken a good breath and needed it all before he had another opportunity to breathe; but he caught the undertow and felt himself scraped against the sandy bottom as he was swept seaward. He came to the surface a few seconds later thirty yards from shore and in the middle of the trough between two waves; thus he had time to empty his lungs and to fill them again before the next roller was upon him.

He dived again, and again the undertow swept him from the shore, and again he rose in the trough of the sea, well in advance of the oncoming wave. He shook the water from his eyes, and then straightened out to take as deep a breath as he could force into his lungs. The wave before him was a "double-header," and even a stronger swimmer than Timothy might admit that he was afraid without exposing his courage to suspicion.

A double-header is only half as high as the waves series of which it is an irregular member, but its menace to the swimmer is much worse. Between two ordinary waves is a trough of flat water, allowing the swimmer a chance to breathe; between the halves of a double-header there is also a trough, but it is filled with lather and foam much too thick for breathing, yet too thin to support the swimmer. He must either take a deep breath and hold it—if he can—lying still till the wave passes over him, or he must take a breath equally deep, dive and swim—if he can—under water till the increasing light tells him he has passed under the stretch of sea which is boiling and frothing like a horrible great caldron. Timothy preferred to dive.

As he went down he had some fear that he might never come up again, together with a feeling of thankfulness for the two seconds of grace that had allowed him to go down with his lungs well filled with air.

The distance under a double-header is four times that under other waves running at the same time, and the undertow offers no aid to the swimmer, for instead of a current running strongly seaward, it is a mere tangle of swirling water, running nowhere. Timothy dived deep, striking out strongly but carefully, and opening his eyes.

Under an ordinary wave the light is blue-green; under a double-header there is no light, for water lashed into foam is opaque as a plank ceiling. Salt water hurt Timothy's eyes, and he kept them open only long enough to make sure that he was in the dark.

The pressure on his lungs became intolerable, and he let out some of the air in them, immediately wishing he had tried to save it a few seconds longer. He opened his eyes, saw no sign of light in the black mass above him, and struck out again, fear clutching at his heart as he felt how ineffective had been his stroke, and realized that repetition of even such weak effort was beyond his power until he might breathe again. Then he felt himself trying to laugh at the remarks those fellows in the boat would make about him when they got ashore, and he wondered half stupidly if this was the beginning of the delirium that comes to the swimmer who has made his fight and lost.

A sort of frenzy seized him, and he struggled wildly to reach the surface. Only for a second. "You haven't got me yet!" Savagely defiant the word seemed to form themselves and to find some strange method of utterance. He lay without movement, strange lights flashing before his eyes, a great roaring filling his ears, an unmeasurable weight oppressing his chest.

He floated slowly to the surface, so nearly unconscious that he hardly knew enough to be glad when he felt the sunshine on his face. His lungs had emptied themselves, and he rolled over on his back to draw breath as a mountain of solid green water advanced toward him from the ocean.

But the sometimes relentless sea is sometimes strangely merciful. The big green wave lifted the exhausted boy tenderly, passed under him, breaking just beyond, and swept roaring to the shore.

Three good breaths restored Timothy's senses and revived his courage; he had not been near enough to drowning to lose his strength. There were still more waves to be passed before the boy was beyond the surf. But there were no more double-headers, and some of the waves did not break till they neared the shore. Timothy swam on, soon finding himself beyond the rollers and among vast waves that rose and fell, but did not break.

Then he heard a cry: "Help! Help!" It was a strident voice, but weak, as of one too frightened to fill his lungs for a good, honest shout.

As Timothy raised himself in the water and turned his eyes in the direction when the sound seemed to come, he saw the boat he had watched from the shore, and recognized in the persons clinging to her sides Will Peters and the three boys who had so persistently nicknamed him Timorous Timmy.

The boat was right side up, but full of water; the mast, stepped through the bow thwart and without stays, had been unshipped, and with the sail was dragging astern. The wind was light, but the boat was driving slowly shoreward, and the boys clinging to [illegible] slightest ef- [illegible] th they [illegible] they at- [illegible] ugh the heavy surf the destruction of the boat was certain and their death by drowning inevitable.

"Hello!" shouted Timothy. "Keep her off! Keep her off till the surf goes down!"

As he called, a vagrant wave broke to seaward of the prevailing surf line. Timothy dived, rising close to the overturned boat and seeing three boys wildly clutching for more secure holds in the wreckage.

Within arm's length of the boat, but having altogether lost his hold, Will Peters was thrashing about, arms and legs out of the water half the time and head under all the time. He was not a swimmer.

Timothy with his left hand reached for the gunwale of the boat, and with his right seized Will, who put both arms around Timothy's neck, almost instantly to released his hold and attempt to climb into the boat, which promptly turned bottom upward.

"Hold on!" shouted Timothy. "You can't keep you feet dry here. Hang on to the side and help tow her out!"

Under Timothy's direction the boat was righted and her bow turned away from the shore. Two boys could not swim, and they simply hung on; two could swim a little, and they gave Timothy such aid as they could in working the boat farther from the surf line. They they bailed her out with a tin pan tied to a thwart to guard against loss under just such circumstances, climbed over the side, pulled the mast and sail aboard, and got out the oars for a pull to Long Wharf, where the boat had been hired and where the boys had left their clothes. Nobody suggested an attempt to raise the sail.

As they dipped the oars for the first stroke another boat drew alongside, manned by four fishermen.

"Don't you fellows know enough to keep your boat out of the surf? Want any help?" asked one of the fishermen.

"We do," said Timothy, taking it up himself to answer both questions; "but we didn't at 10 o'clock this morning. We've been in the water long enough to get pretty cold. One of you get in here and give a hand down to Long Wharf; let me get into your boat and put me ashore at Arcadia Wharf."

"I'll pay you for your trouble," said Will, speaking for the first time since he had called for help.

The suggested changes were soon made, and in due time the sailing party reached Long Wharf.

The boys went ashore, dressed, settled with the fishermen and the boat owner, and rode their bicycles to the bathhouse, where they expected to see Timothy, but did not. They spent some time looking for him, and then regretfully took the bicycle path for home.

Timothy had left the fishermen's boat at the Arcadia Wharf, gone to the bathhouse, where they expected to see thirty-five cents necessary to pay car fare, he then took the bicycle path for a sixteen-mile walk to his home. Four or five miles out a wheelman passed him with a rush, but stopped a few yards beyond. It was Joe Brown, and behind him came the others of the boating party.

"Who's afraid of wet feet?" shouted Joe, as he came running back.

"Timothy Farnham's four friends!" bawled the others in chorus, as if practicing a new class yell.

"Into whose heads has some sense soaked?" sung out one of the others.

"Heads of Tim Farnham's four friends!" shrieked the chorus.

"Say, Tim," said Will, "when you've risked your life to save ours, you needn't"—

"Oh, cut it short! It's all right," said Timothy.

"Yes, it's all right," answered Will. "But if you'll ride my wheel home, or ride by turns, I'll take it as an honor; if you'll teach me to swim I'll be a burro long enough to carry you home on my back. And," rather sheepishly, "we won't talk any more about Timothy's timidity."

And the promise was faithfully kept. —Youth's Companion.

The Future of the Mule.

Honor the mule. His father, the ass, and his mother, the mare, may be more aristocratic, but the mule has worked his way in the world, and has been worthy of his hire. Like the ass and the goat, he has been among the firm animals, positive in character. Moreover, "forty acres and a mule" is a landmark in history, a cry as famous as "forty-nine forty or fight." Now this picturesque, historic beast is threatened with extinction. As he is an artificial product, like the apricot and quince, and not even reproductive, as soon as he is not worth the trouble of manufacture he will cease to be. What threatens his foooting is the zebrula, child of the zebra and the horse. The opening up of Africa, especially the eastern part, has discovered large numbers of zebras, an animal deemed nearly extinct; a United States Consul has reported their merits to our State Department; and Hagenbeck is expected to undertake their production and distribution. The zebrula, with his inheritance of brilliant stripes, is prettier than the mule. He is immune to certain diseases, which gives him an advantage in the tropics. Probably he is inferior in stubborness, length of ear, and power to kick. These traits are not valued by commerce, but they help create an animal as picturesque as any in the world. Perhaps the zebrula will not extirpate the mule entirely. He may find certain climates unbearable. Ours may be one of those climates, and all may yet be well. There are better animals, but none that we should be more loth to lose.—Collier's Weekly.

English Country Houses.

In England the first thought of the landholder is for privacy, writes Frank Chouteau Brown in Good Housekeeping. For this purpose he sets his house well back from the street and protects it by high walls or hedges. The real face of the house is toward the garden at the rear, and here transpires most of his family life. He lives in his country house through most of the year. The American goes to his for a short period in the summer and considers it more of a camp where he may "rough it" during the summer months than a residence where he expects the comforts and niceties of his city life. We have a further large population that lives throughout most of the year in a suburban house situated between the city and the country and combining the requirements of both, and so located that the man may attend his business in the city in the daytime and return easily to his house at night. In England no parallel of this phase of American life exists to any such marked degree, although there is a tendency latterly to somewhat adopt this American custom, at least in part. Therefore, for the American suburban house we must go more immediately to the English farmhouse, if we wish to adapt to our own purposes any of the feeling or spirit of the English country.

Weather Wisdom.

A very curious method of making weather predictions has been discovered by an old French farmer.

"On Christmas eve," he says, "when the bells begin to ring for midnight mass, take twelve onions and place them in a row on a table. The first onion will represent January, the second February, and so on. Next make a large slit in each onion and pour some salt into it. If at the end of an hour you find that the salt in the March onion has melted, you will know that there will be much rain in March, and, on the other hand, if the salt in the April onion is not melted, you may be certain that April will be a dry month. Moreover, if the salt in any onion is melted at the top, but not at the bottom, the first fortnight of the month will be wet and the second fortnight dry."

Days For Weddings.

According to a Berlin paper, Saturday is the most popular day for weddings, possibly because for the working classes the "free" Sunday will allow a second day of jubilation. Friday is obviously considered an unlucky day at Berlin as well as elsewhere, for fewer weddings are held on it than any other day of the week. This, of course, tallies with the widespread idea that it is unlucky to start on a journey, or, for a sick person to leave his bed for the first time, on a Friday.

Curiously enough, the ancient Teutons, like the ancient Greeks, considered Friday a most lucky day. The most popular day for weddings, next to Saturday, is Tuesday; then follows Thursday, and Wednesday comes last.

The Ascent of Mount Whitney

By ASAHEL CURTIS

ONE of the most interesting organizations in the Western States is the Sierra Club, of California. Believing that the beauties of the great Sierras had not been fully appreciated even by mountain lovers, the members of the club a few years ago determined to attract popular interest to the mountain ranges of California by conducting annual outings among the highest peaks.

Success quickly rewarded the efforts of these amateur mountaineers, the number of those who joined their annual outings steadily increasing, until this year the party numbered 110.

The club's outing this season was to Kern River Canyon and Mount Whitney. Camp equipage and supplies sufficient for five weeks were transported 100 miles across high mountain passes into the heart of the region of peaks, reaching altitudes of from 10,000 to 14,000 feet. The country traversed was but little known, maps were useless, so the mountaineers added a feat in exploration to that of climbing one of the highest mountains in the United States.

After a two days' stage drive, from Visalia to Mineral King, the party walked twenty miles across the divide to their camp in Kern Canyon, one of the glacial gorges whose beautiful domes and walls still bear the scars of the flowing ice that formed it. Here a week was spent in tramping and fishing, thus getting the party in physical condition for the trip to the base of Mount Whitney.

The eighth day was spent in preparing for the eight-day trip to come. Shoes were renailed with heavy hobnails, and the strongest wearing apparel was selected. Every unnecessary article was left behind, for only fifteen pounds of baggage was allowed, including sleeping bag or blankets.

Thus equipped, the party crossed the Kern and ascended Volcano Creek to its source, near the main divide between the Kern and Owens Valleys, and followed this divide, at an altitude of between 8000 and 10,500 feet, to the base of Mount Whitney. During the entire trip every one slept in the open air, rolled up in blankets or sleeping bags. No rain fell and there was no dew, so one had only to find a dry place in the sand, wriggle into a comfortable position, and sleep.

On the morning of the ascent the party breakfasted at half-past three, and were on the march a little after 4. The five miles to the base of the mountain was quickly covered, with frequent short rests to prevent overexertion, dangerous at this altitude. The real climbing on Mount Whitney begins at Langley's camp, at an altitude of 11,625 feet, and continues until the broad crest of the mountain is reached, at about 14,000 feet. For 800 feet great granite bowlders were encountered, and over these the party made their way, switching back and forth across the mountain in order to gain elevation until the base of a "chimney," or rock gorge, was reached. Here the way led upward over bowlders, between two sheer walls of granite blocks. For 500 feet we toiled up this gorge with hands, feet and elbows in action, finally coming to the slope that leads to the summit, which was reached before 9 o'clock.

The most striking feature of Mount Whitney is the tremendous abyss on the eastern face. Approaching the monument on the eastern rim of the summit, one sees only the ragged rocks around its base, and, beyond, the farms and orchards, 10,000 feet below. It is like a world seen from a balloon, and the height makes one dizzy. The members signed the club register, which was left in the monument, and then explored as far as possible the base of the peaks, which, on every side except the east, rose in chaotic masses, their summits all over 14,000 feet, seamed and scarred by chasms and gorges. Geologists have found here splendid examples of the action of glaciers during the Ice Age.—Collier's Weekly.

The First Man in the Russian Empire After the Czar

BY his appointment as president of the committee of ministers Sergius de Witt becomes the actual premier of Russia, the first man in the empire after the Czar. His career has been a remarkable one. Born in 1849, from parents unknown in Russian officialdom, and of insignificant social position, he has placed himself on the highest rung of the ladder by sheer force of merit and in the face of the most determined opposition from the strongest party in Russia, including on the one hand M. de Plehve, the reactionary Minister of the Interior, and on the other M. Pobiedonostzeff, the chief procurator of the Holy Synod; Prince Imeritinsky, and General Vannoffsky, who have taken a leading part in trying to defeat his projects. It has been reported that scenes of extraordinary bitterness have occurred in the Council Chamber itself. The reactionaries denounced de Witt as a Socialist, a Communist, a revolutionary, because he insisted that Russia must cease lagging behind in the race of civilization and progress.

The "War Party" was perhaps more bitterly antagonistic to him than any other faction, for he on more than once occasion convinced the Czar that Russia was absolutely forced to live at peace with her neighbors, since she had not the means to carry on a war. It has even been said that had it not been for de Witte's counsels Russia and Japan would have been at war over their differences before to-day.

M. de Witte has passed nearly half his life in obscurity. He spent some years at the University of Odessa. When he left Odessa he obtained a post in the State Railway Department, becoming an employe at an insignificant railway station—an assistant station master and bookkeeper.

It is said that it was the war with Turkey which gave him his chance. His chiefs in the railway department lost their heads completely under the strain of transporting troops to the front. De Witte quietly did what his superiors ought to have done, working out various schemes for the transportation of troops into Turkey. T proof of forethought created a se tion in official circles. When the was at an end his reputation had made.

Since 1878 de Witte's promo been rapid. In 1879 he was s to St. Petersburg to take p work of the great Railwa sion, and it was he who r the commissioners their was then appointed d Southwestern Railway of the State Railway 1892 he became Min nications, and in the f took M. Wyschnegrad Finance Minister.

Immediately after he became head of the finances of the empire M. de Witte began the work of completely reorganizing them. He declared that the ever-recurring deficit was "intolerable," and he proceeded first to reform the monetary system, then to reorganize the system of taxation, and then to negotiate the commercial treaties by which Russia's foreign trade was greatly increased. He encouraged the introduction of capital from France, did everything possible to establish new enterprises, and imported machinery where the Russians were not able to make it.—The Commercial Advertiser.

Intelligence of a Dog.

A striking instance of canine intelligence is reported from Paris. A male school teacher named Dillaz was on Thursday evening waylaid near Charenton bridge by two roughs, who set upon him, and, after rifling his pockets, flung him into the Seine. A collie dog that happened to be near, without being encouraged to do so by any person—indeed, there were none who saw the circumstances—at once plunged into the water, and, catching the man by the coat, aided him to keep afloat until the river police, attracted by his cries, arrived to his assistance. M. Dillaz was subsequently able to furnish the police with a description which led to the arrest of his assailants.

Automobile building gives employment to 20,000 persons in France.

M. DE WITTE, THE NEW PREMIER OF RUSSIA.

NEW IDEAS in TOILETTES

City.—Coats made in style are among the latest are exceedingly smart. One is made of plum

PRINCE ALBERT COAT.

colored zibeline simply stitched with corticelli silk in tailor style and makes part of a costume, but the coat is also appropriate for the separate wrap.

The coat is made with fronts, underarm gores, and side backs that are cut off below the waist line, full length backs and skirt portions. The fronts are fitted by means of single darts and closed with buttons and buttonholes. The skirt portions are seamed to the body and are laid in pleats at the side back seams. The sleeves can be plain ones in coat style with roll-over cuffs or the full ones shown in the view as preferred.

The quantity of material required for the medium size is two and seven-eighth yards forty-four inches wide, two and one-half yards fifty-two inches wide.

A Seasonable Costume.

Long coats are much in vogue and gain favor with each succeeding week. The May Manton one shown in the large drawing is made in Russian style and is well adapted both to the entire suit and the general wrap. The model is made of black taffeta stitched with corticelli silk, but all coat and suit materials, both silk and wool, are equally appropriate.

The coat consists of a blouse portion, that is made with applied box pleats at front and back and is fitted by means of shoulder and underarm seams, and the skirt which is attached thereto beneath the belt. The skirt includes applied pleats that form continuous lines with the bolus and is laid in inverted pleats at the centre back, which provide graceful fullness. The right front laps over the left to close in double-breasted style beneath the edge of the pleat. The sleeves are box pleated from the elbows to the shoulders, so providing the snug fit required by fashion, but form full puffs at the wrists, where they are finished by flare cuffs.

The quantity of material required for the medium size is six and one-half yards twenty-seven inches wide, four yards fifty-two inches wide, four yards forty-four inches wide or

Skirts that just clear the ground are among the latest decreed by fashion and can be relied upon as correct both for the present and the season to come. The very excellent one in the large picture provides a graceful flare about the feet and is available for the entire range of skirt and suit materials, but, as shown, is made of Sicilian mohair stitched with corticelli silk.

The skirt is cut in five gores, which are so shaped as to fit with perfect snugness about the hips, while they flare freely and gracefully below the knees. The fullness at the back is laid in inverted pleats and can be stitched as illustrated or simply pressed flat as preferred. The upper edge can be finished with a belt or cut in dip outline and under-faced or bound.

The quantity of material required for the medium size is six and one-fourth yards: twenty-seven inches wide, three and three-fourth yards forty-four inches wide or three and one-fourth yards fifty-two inches wide when material has figure or nap; three yards forty-four or two and three-fourth yards fifty-two inches wide when material has neither figure nor nap.

Popular Color For Hats.

A very striking hat, an importation, is made of that vivid dark blue color which is so popular this season. There is a rolled brim of the blue, and the top of the crown repeats the color. The sides of the crown and the edge of the brim consist of rows of bright red, white, and flax-blue braids. The hat tilts well over the face of the wearer, and is lifted behind with a bunch of cherries and leaves. It has no other trimming.

Picturesque Scarfs.

Veils continue to grow in length and breadth as well as thickness with the coming of cold weather, and the latest "automobiling veils" are really picturesque scarfs, passing completely around the head and tied in an artistically careless knot on the left shoulder that can be accomplished only by a study of the model, considerately placed upon the veiling counters of the leading department stores.—New York Mail and Express.

A Handsomely Trimmed Waist.

A dinner waist of tucked cafe au lait crepe de chine is trimmed with straps of brown velvet, ending in gold and amber buttons. It has a vest of Cluny lace over ivory silk. The bolero is fastened by bows of brown velvet tied through small round buckles of gold and amber. The collar and cuffs are of silk embroidery in delicate Persian colors.

RUSSIAN COAT AND FIVE-GORED SKIRT.

Rain Coat.

Coats that afford perfect protection against the rain are essential to every woman's health as well as comfort. This one is adapted to covert cloth and all the materials used for coats of the sort, but is shown in Oxford gray cravenette cloth and stitched with black corticelli silk.

The coat consists of the fronts, backs and side backs. The fronts are without fullness, but the back is drawn in at the waist line and held by means of the belt. Over the shoulders is a circular cape and the neck is finished with a shaped and stitched collar. The sleeves are the ample ones of the season and are finished with straight cuffs pointed at their ends.

RAIN COAT.

The quantity of material required for the medium size is five and three-fourth yards forty-four inches wide or five yards fifty-two inches wide.

A SERMON FOR SUNDAY

A DISCOURSE ENTITLED "LIFE'S YIELD TO THE MORAL CONQUEROR."

The Rev. T. R. Williams Urges Us to Spend Our Few Brief Years Fighting Sin and Serving Man Until We Pass to the Great Beyond—An Uplifting Discourse.

BROOKLYN, N. Y.—The Rev. T. Rhondda Williams, pastor of the Greenfield Congregational Church, Bradford, England, preached in Plymouth Church Sunday morning. There was a large audience. The Rev. Dr. Newell Dwight Hillis introduced Mr. Williams. Earnest attention was given to his thoughtful sermon. The subject was "Life's Yield to the Moral Conqueror," and the text was from passages in the Apocalypse. Mr. Williams said:

Each one of the messages to the churches of Asia closes with a promise. They contain threats and warnings and commandments, but at the close stands the promise like a distant hill in sunshine, seen through the storm, to lure on over the worst-beaten to the better things of God and man. The messages lay down the moral task without compromise, but they close with the assurance that

"The toppling crags of duty scaled
Are close upon the shining tablelands,
To which our God Himself is moon and sun."

There is here a twofold aspect of life which every morally earnest man is acquainted with. He knows that its conditions are stern, that there is vigor in it, but he knows also that the vigor is blended with tenderness, that all its struggle is permeated by promise. We might indeed say that moral earnestness and hopefulness go together. Stand loyally under the bower of duty, and you will hear the bird of hope sing. Unfaithfulness to the moral ideal breeds pessimism of the worst kind; fidelity, while it does not encourage cheap and lightsome optimism, does inscribe in the heart of the be[illegible] duty the shining word of the coming [illegible] has so made us that enfolded in [illegible] of loyalty lies the assurance o[illegible] the good.

Now, it is this lo[illegible] good, this fidelity to the moral ide[illegible] severing attitude, which I take to be [illegible]ated in the word "overcoming" or "conquering." Every promise is made to him who "overcometh" or who "conquers." Not, mark you, to him who has overcome, or who has conquered in any full or final sense. These promises are not of gifts to be bestowed at the end of the course, but of experiences to be realized in going on, so long as you go on in the right way. Now, is it a fact—for it is no use preaching theories away from the facts of life—that the promises made to those Asian churches in the name of Christ, sent to them by John as direct from Christ, are to be regarded as promises made to us by God? For myself I cannot regard them so, except so far as they contain truths attested by the experience of men. Indeed, the messages given to the churches of Asia are not entirely from Christ as He was, not from Christ as we understand Him to-day, but from Christ as John understood Him. When we read the promises of the moral life we read not only the facts of our moral experience, but also a certain interpretation given by more than one bias, such as the personal bias or the national bias. The future we depict may be in essence guaranteed by the universal laws of the moral life, but the depiction may bear personal or national colors, which must fade; personal and national elements which must be eliminated. John was a Christian, but he was also a Jew. Like every man, he had a temperament, both the [illegible]nality and the personality would affect [illegible]is vision [illegible]Christ never [illegible]akes ab[illegible]ession of [illegible]our very [illegible]of Him has some mix[illegible]it, which is not in Him. [illegible]overcometh and keepeth My word will I give power over the nations, and he shall rule them with a rod of iron, as the vessels of a potter shall be broken to shivers, even as I received of My Father." Here are words attributed to Jesus which none of us would like to think of Him as speaking. We could not find in Jesus any promise of authority over nations to rule them with a rod of iron, as the vessels of a potter are broken to shivers; nor do we think of Him as claiming to have received such from His Father. That is not our way of thinking of Christ to-day. Then how did John come to hear Christ say that? Because John had been reared in the atmosphere and fed upon the sentiments of Psalm ii. His Jewish teachers had taught him to regard Psalm ii as Messianic. And what was the Messiah to do? The Lord said to Him, "Ask of Me and I will give thee the nations for thine inheritance and the uttermost parts of the earth for thy possession. Thou shalt break them with a rod of iron; thou shalt dash them to pieces like a potter's vessel." Some Jews sometimes believed that that was one of the things the Messiah would do. When a Jew came to believe that Jesus was the Messiah you would think that he would at least throw off that old notion. Jesus had said, "Come unto Me all ye that labor and are heavy laden," etc. "I am meek of heart, lowly." "Blessed are the meek," etc. "Other sheep," etc. The general character and teaching of Jesus was the very opposite of the Psalm ii conception of Messiah. Yet the Jew who believed that Jesus was the Messiah carried over with him a good deal of the old national conception and attributed it to Jesus. That is what John does here. It was not Jesus speaking, but his own nationalism that was representing Jesus. This is not very surprising when you remember that Christians even yet take the Psalm ii to refer to Jesus. Nothing could be more unlike Jesus of Nazareth than the description of the Messiah in Psalm ii. It is high time to protest, as Cheyne does, against the habit of "finding Christ" in passages "unrelated to Christ and His religion." "I fear," says Canon Cheyne, "that our unmitigated adoption of the Psalter as it stands may counteract that spirit of love which is one-half of Christianity." The fear is too well founded. What did the great St. Bernard say long ago regarding the wars of the Crusades upon the Mohammedans? These are his words: "They are ministers of God to inflict His vengeance. For them to give or receive death is not a sin, but a most glorious deed; the Son of God delights to receive the blood of His enemies; He is glorified in the death of the pagans." It is most astounding that Jesus could have been conceived as the incarnation of God's redeeming purpose and love and yet as One who could delight in the blood of His enemies. The Messianic interpretation of many psalms undoubtedly tends to undermine the value of the revelation of God in Christ. In a Christian magazine of some time ago one article is entitled "The Tenderness of Jesus" and the next is "The Imprecatory Psalms Vindicated." I always maintain that there is a severity in the law of life, that divine love is not softness, nor mercy a license to indulgence; pain, suffering, retribution are here; there was a severity in Jesus because Jesus was true to life's law, but the Spirit of Jesus was not the spirit of the imprecatory psalms, and the Messiah of many psalms is quite unlike our Christ. So far as we are under their influence we need to excorite ourselves and clear our vision.

But this promise is colored not only by John's nationalism, but possibly also by certain traits of his personal character. It was John who saw a man casting out devils in Jesus' name and forbade him, because he did not follow with them—there was a strong party spirit in him. John was one of two who wanted the chief places in the kingdom. He, too, wanted to call fire from heaven upon the Samaritans. The portrait of John in most people's minds, as the loving disciple, rests upon the Christ's Gospel and the Epistles, but the temper sometimes displayed in the Apocalypse fits with the indications of the synoptic gospels.

What does the man who is faithful find? What does he get to feel sure of? He finds the very best there is in life. He tastes life at its best. "I will give him to eat of the tree of life, which is in the paradise of God." There is a very common notion that though goodness may be a safe track to some far-off celestian city it is a considerable sacrifice of the content of life here and now. Naturally enough not a few decide to take what they can in the present and leave the struggle for goodness alone and chance the future. Well, the truth is that only in a worthy character, in the ascendancy over evil, in the mastery of impurity and of egoism in all its forms, on the higher levels of special cultivation, does a man really get the core of life now, get the very best there is in it. In fact the old Eden story comes true again and again in the lives of men. Get your pleasure, satisfy your desire in illicit ways, in defiance or in neglect of the divine order of life, it simply means paradise lost. You turn yourself out of the best by so doing. Loyalty to goodness is the way of blessedness. There is no happiness like that which comes from simple goodness.

What does the victor find? He finds the unseen reserves from which he may draw sustenance and power to his own surprise and that of the world. "To him that overcometh I will give to eat of the hidden manna." In the winning struggle you find the soul sustenance hidden from you before and still hidden from the world. New confidences, new assurances, new faiths arise in the soul; new visions break upon it, new voices speak to it and in it; new communions with unseen powers enrich its inner solitudes, and the man gets by and by to understand what Paul meant when he spoke of being "strengthened with might in the inner man." The truly earnest man who perseveres in the life of the good is constantly surprised at the reserve of power upon which he draws. Dead seas which looked as if they meant certain death have been safely crossed, and the song of triumph rang up to God on the other side.

Difficulties which seemed insurmountable have been successfully overcome. This is why the man says: "Hitherto hath the Lord helped me." He cannot understand himself by himself, and so he builds an alter to a higher power. In life's victories we discover life's forces; in the onward march we discover the enrichment of the way, come to one after another of the wells of salvation, hidden from all who do not march that way. And, remember always, that the larger our conquest in life, the more abundant will be life's sustenance; it is the conqueror who feeds the manna. In a sense, everything is hidden from us, and all growth is a discovery. It is so in the intellectual sphere. You discover treasures as you conquer difficulties. You must conquer the alphabet and the spelling book to discover the sentence; conquer the sentence to discover the paragraph; conquer every paragraph to know the treasure of the book. And so all the way up. Many cannot read a book that is at all difficult; the food there is in it they cannot appreciate. Why? because their conquests are too small; they have not overcome ignorance and superficiality sufficiently, so the manna there remains hidden.

The same is true in the moral and spiritual sphere. There are people who are quite incapable of understanding the highest kind of affection and the holiest kind of love because they have not themselves overcome the vulgarity and coarseness of human nature's lower levels. All noble souls have "meat to eat" which the world knows not of;" they have no affections which the world would always dilute with base ingredients, and aspirations which it would always tarnish with the stains of earth. Be sure of it, your discovery of life's best things will depend upon your conquests. As you wrestle with every victory you shall eat hidden manna and be strengthened for victories yet to be achieved. The successful struggle constantly discovers supports hidden from him before, and still hidden from lives which do not know the loftier reaches and the more earnest endeavors. What does life yield to the victor? Here is one of the finest of the promises: "I will give him the morning star." What is this gift of the morning star? It is the feeling that life is sweet and pure, fair and fresh with the touch of morning. It is the feeling that life is full of promise, that day is coming on; that the best is yet to be. It is the power to be oneself a sweetening, freshening influence in the world, a living prophecy of its betterment. Now, friends, there is nothing like moral purity to keep the touch of morning on life; compromise your morality and it is marvelous how soon everything is stale. There is an indescribable sweetness in the air of early morning when the world is as God makes it; when it is indeed in the process of His remaking before we light our fires and emit our smoke and beat up the dust of our noisy, turbulent life. Something like that sweet freshness of morning belongs to the soul that is pure and comes to it always in its hour of victory over sin. As long as your affections are clean they are fresh; you never tire of pure feelings or holy loves.

Again, what does the moral victor find? It is promised that Christ will write upon him God's name and the name of God's city, and his own new name. In our language this means that life yields the victor the consciousness that he really belongs to God; that he belongs to the new society; that he belongs to Christ. In other words, the spiritual universe owns him, and he knows himself as a vital part of it, even as a pillar in the temple of God, an upholder of the sacred things of life; one of those who have a real permanent life in the sanctuary, among the sanctities of God—yea, who share the spiritual sovereignty of life with God, with Christ and with all the good: "He shall sit with Me on My throne," etc.

Oh, you who are fighting sin, take courage; with every triumph you are mounting the steps of the throne of God, and ever nearing the time when your life shall be fixed in the truth which knows no turning, and the righteousness which is forever.

Lay hold on the thought of God as your Helper, and believe that if you work with Him all will be well. I invite you to no superficial optimism that has never sounded the depths of life's woe, nor seen into the hearts of its tragedy. There is no power and no healing in that. I heard it once given out from a Christian platform. It denounced gloominess of every kind; it slashed the pessimists in every direction; it declared that all things were going on exceedingly well; even the slums were not so bad as some made out, and the war in South Africa—well, it would come to an end some time.

So much of this was dealt out that I felt that such optimism was the shallowest of lies, and that to ventilate it in the name of Christianity was to forget the tragedy of Gethsemane and to blot out the memory of the cross. No, no; if you are to be a serious man, in earnest for the highest ends of life, for yourself and for society, you have a battle to fight; a hard, stern battle; a hundred things are wrong with the world, which you must help to put right. Look the evil in the face and do not call it light. But when you have done that, I ask you to realize a larger fact, viz., that the Alpha and Omega of all this life is the love of the good God. Because that is the beginning, that is also the end, and let it, therefore, be our

"Hope a sun will pierce
The thickest cloud earth ever stretched,
That after last shall come the first,
Tho' a wide compass round be fetched."

With that thought of God let us spend our few brief years fighting sin and serving man, till we pass "to where beyond these voices there is peace."

Now unto the God of all grace, who hath called us unto His eternal glory by Christ Jesus, be glory and dominion forever and ever.

HARD TO BEAR.

J. W. Walls, Superintendent of Streets of Lebanon, Ky., living on East Main street, in that city, says:

"With my nightly rest broken, owing to irregularities of the kidneys, suffering intensely from severe pains in the small of my back and through the kidneys and annoyed by painful passages of abnormal secretions, life was anything but pleasant for me. No amount of doctoring relieved this condition, and for the reason that nothing seemed to give me even temporary relief I became about discouraged. One day I noticed in the newspapers the case of a man who was afflicted as I was and was cured by the use of Doan's Kidney Pills. His words of praise for this remedy were so sincere that on the strength of his statement I went to the Hugh Murrey Drug Co.'s store and got a box. I found that the medicine was exactly as powerful a kidney remedy as represented. I experienced quick and lasting relief. Doan's Kidney Pills will prove a blessing to all sufferers from kidney disorders who will give them a fair trial."

A FREE TRIAL of this great kidney medicine, which cured Mr. Walls, will be mailed to any part of the United States on application. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

The Fountain of Youth.

Like pretty much everything else, this matter of having children has two sides to it. As a great many children are failures and as children are the joint product of heredity and environment, both elements preponderantly under parental control, it would seem more sensible to say that there were too many people undertaking parental responsibilities instead of too few. And further, parenthood has many cares and sorrows and evasperations. Still, when all is said, how many persons who found themselves childless at forty-five have been able honestly to congratulate themselves?

Children have a use as an assurance against destitution and loneliness in old age. They are satisfactory to the vanity for family immortality. But more than these and all other advantages is the advantage of prolonging one's life. Growing children will keep any proper man or woman young in spirit and in mind, will retard the development of that sour yet complacent cynicism which curses old age both for one's self and for those about one.

The man or the woman—again, the right sort of man or woman—who has children drinks every day a deep draught of the fountain of youth.

It is a strange and startling fact that, according to the latest available figures, the proportion of the blind to the sighted in India is one in every 600, so that, allowing for the usual native reluctance to enter into bodily defects in the census reports, it shows that more than a half million people in that country are deprived of sight.

Diseases of the organs of sight have for ages been a peculiar feature of Eastern lands. Among the causes are the continual glare of the sun, the prevalent dustiness of the air, the lack of cleanliness and due care of the eyes of the young. It is a common sight to see the eyes of babies one mass of flies and dirt, which the ignorant, careless mother is too indifferent to drive away.

This peculiar Oriental affliction has long engaged the attention of philanthropists in India, and several societies are turning their endeavors to the mitigation of the evil, as well as to providing books for the blind, and make more adequate provision for their needs in every way.

Heating Water by Sun Power.

Solar heat is being utilized for heating water for various household purposes. The apparatus for this purpose is absurdly simple, merely a sectional boiler of thin blackened copper, exposed on the sunny side of the roof under a glass cover very like a hotbouse frame, and suitably piped for supply and demand.

An hour's exposure to full sunlight raises the water to a temperature from thirty degrees to sixty degrees Fahrenheit above that of the air, and as the heaters actually in use contain from forty to 120 gallons, according to size, there is an ample supply of hot water through the hours of daylight. Solar water heaters of this kind have been installed on the roofs of many houses in Southern districts. They work admirably, and even in less favorable places have been found useful.—Cassier's Magazine.

"What Shall I Do?"

That is the problem which frequently confronts everyone—especially parents with small children. A slight illness treated at once often saves a long period of sickness and expense—sometimes prevents death. The trouble is that so few people can think on the instant what treatment to apply, even if they have the knowledge necessary to recognize the disease and know what simple remedies are best. To meet this want at small expense the Book Publishing House, 131 Leonard street, New York City, is sending postpaid a doctor book on receipt of sixty cents in stamps. The book is illustrated, contains 598 pages, explains symptoms, causes and simple means of overcoming ordinary illnesses. It was written by the eminent J. Hamilton Ayres, A. M., M. D. It is a volume which should be in every household, as no one can tell what moment he may require the knowledge it contains.

Nature Thoughts.

Leaving the shore, I walk among the trees. A cloud passes, and the sweet short rain comes, splashed with sunbeams and flower-scented air. The birches sing among the fresh green leaves of the beeches. Beautiful it is, in summer days, to see the wheat wave, and the long grass foam-flecked of flower yield and return to the wind. My soul of itself always desires; these are to it thought. I know that there is something infinitely higher than deity. The great sun burning in the sky, the sea, the firm earth, all the stars of night are feeble, all, all the cosmos is feeble; it is not strong enough to utter my prayer-desire. My soul cannot reach to its full desire of prayer. I need no earth or sea or sun to think my thought. If my thought-part—the psyche—were entirely separated from the body and from the earth, I should of myself desire the same. In itself my soul desires: my existence, my soul-existence is in itself my prayer, and so long as it exists, so long will it pray that I may have the fullest soul-life.—Richard Jefferies.

A Canary That Talks.

A Blackburn man has a remarkable canary which never sings, but can "talk" as fluently and distinctly as any parrot. It reels off quite articulately sentence after sentence, such as: "Pretty Polly dressed in green, coming home to see the queen." "Polly's sick; run for the doctor, quick." "What do you want here?" These are only a few samples of the linguistic attainments of this wonderful little bird, which is certainly the feathered marvel of the age, and is believed to be the only authentic instance of a talking canary known.—Chicago Journal.

The New Visitor.

The summer days are over
Now autumn rules the land;
We see the Master painter's
Great work on every hand.

We notice Madame Nature
Has changed her summer dress.
Ere long "Jack Frost" will strip her
Of all her loveliness.

'Tis sad to see earth's glory,
Wither, fade and die,
But 'tis the old, old story
Beneath the fair blue sky.

In this the heart rejoices,
There'll be no chilling frost,
No storm to mar the glory
On Canaan's sunny coast.

With our Advertisers.

Hezekiah Hand, auctioneer, will expose for sale the properties at 43 and 45 Prospect Place and 5 Rockview avenue, Wednesday, October 28. The property belonged to the estate of Francis J., and Rhoda Doremus. See advertisement elsewhere in this paper.

The sale of clothing, furnishing goods, hats and shoes by Harry Feinberg, the popular priced outfitter for men and boys, has met with so much favor by the people of this community, that he has decided to make a still greater sacrifice and it will be to the interest of the shrewd buyer to avail himself of this special offer which will begin today at his commodious store, 329 West Front street, opposite Grove street, and last until the end of the month. See his advertisement on fourth page.

A Sussex County Snake Story.

A belated snake story has just been told by the Blairstown correspondent of the Sussex Herald which breaks the record for such tales this season. There are no frills on the way in which the incident is related, as follows:

"On Wednesday, September 2, Jabez Ogden, who lives near Hardwick Township line, locked up his house, and, with his wife, went to the sesqui-centennial at Newton. They returned home between 6 and 7 o'clock in the evening. As Mrs. Ogden entered the house and turned to the sitting room from the hallway she was horrified to find that the door which was open leading into the dining room was barricaded and had disturbed her greatly. entered the room she he could not bliev[illegible] the other side of the room. If the matter had ended there it would have been forgotten very soon. [illegible] stitch[illegible] marks as wit and ill nature suggested, the result being that two boys [illegible] ey[illegible] ed to follow Will's lead[illegible] ile to move. Three of his friends, Joe and George B[illegible] choking it to cially ing [illegible] missing door knobs venting a excitement, which was very othy, the serpent was killed by Mr. my." carried out of doors, where an repeaton was made—a sort of post-mam Three door knobs were found a serpent's throat, all undigested. It a been unable to swallow the fourth. The snake had evidently crawled through a window that had been left open, and the theory is that it had mistaken the knobs for eggs. This is probably correct, for there were a number of other knobs, attached to other doors in the house, all of which were of a dark brown color, and none of which the snake had touched. Mr. Ogden has the four white knobs on exhibition, and any one who doubts the incident can examine them for himself."

LEGAL NOTICES

Election Notice!

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the County of Somerset will hold their first meeting on

TUESDAY, SEPT. 1, 1903.

At 10 o'clock in the morning, at such places as may be designated by the Township Clerks of the respective townships of said county. Such boards shall organize according to law and then proceed to ascertain the names and residences of all the legal voters in their respective districts, by making actual inquiry at every dwelling house or habitation, or of the head of every family residing therein, and shall continue such enumeration of voters from day to day, on successive days, completing same on or before Friday, Sept. 4. (See 23 Election law.)

SECOND MEETING
AND PRIMARY ELECTION

Said Boards of Registry and Election will also meet on

TUESDAY, SEPT. 8, 1903,

At the same places from 1 until 9 p. m., for the purpose of transcribing and making up from its canvass books two lists of all persons entitled to vote in its election District, who shall personally appear before the board for that purpose, or be shown to its satisfaction by the affidavit in writing of some voter in the election district to be a legal voter therein.

On the same day between 1 and 9 o'clock p.m., the Primary Election shall be held in every election district in the County of Somerset.

THIRD and FINAL MEETING.

Said Boards of Registry and Election will also meet on

TUESDAY, OCT. 27, 1903,

At the same places, and between the hours of 1 p. m. and 9 p. m. for the purpose of revising and correcting the Original Registers, and for adding thereto the names of all persons entitled to the right of suffrage in such Election District at the next election.

Notice is hereby given to all Boards of Registry and Election in the County of Somerset that they are required to strictly observe Sections 24 and 32 of "An Act to Regulate Elections (Revision of 1898) approved April 4, 1898, and that the County Board of Elections will be in session in Somerville on

Wednesday, Oct. 28, 1903,

for the purpose of receiving the registers and receipting for affidavits, etc.

General Election Nov. 3, 1903

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

All Saints' Day.

of the I. C. T. Club are plan- old a fair through the first week ecember.

Dr. P. J. Zeglio, of this borough has been elected a director in the First National Bank, of Plainfield.

Members of the Retail Clerks' Mutual Aid Association will hold a dance in the Casino, Wednesday night, November 4.

Engineer Casey, the great evangelist, will address Rescue Mission at 4 o'clock Sunday afternoon. All are invited.

Under the auspices of Mizpah Lodge, No. 1, Odd Ladies "Last Days of Pompeii" will be given at the Casino, Monday, November 2.

The repairs made in the interior of the First M. E. Church, Plainfield have been completed and the church will be re-opened tomorrow.

Under the auspices of the local Women's Christian Temperance Union a three day fair was held this week in the Babcock building.

The Democrats of this borough have ned headquarters at 79 Somerset . The rooms will be opened until election Tuesday.

William G. Graham, superintendent of branch of the Metropolitan In- ce Company, gave an oyster supper uesday night to his agents.

A dramatic entertainment will be given in the Casino on Thursday and Friday nights, November 5 and 6 for the benefit

Last Wednesday ... to C. Pope bought the property at 45 Prospect place, and William A. Woodruff the property at 43 Prospect place and at 5 Rockview avenue.

The season for rabbit, quail, partridge, grouse, ring necked pheasant, and gray, black and fox squirrels opens November 10. Many farmers are posting their lands to keep city hunters from carrying away game. Trespass notices, printed either on cloth or paper, can be obtained at the REVIEW Office.

The K. O. G. Club of Plainfield ran their first monthly reception in the Fanwood Fire House last Friday evening. The affair was a very successful one, about fifty couples being present. The music for the occasion was furnished by Prof. Suhr's Imperial Orchestra. At midnight there was an intermission during which refreshments were served. It is the intention of the club to run one every month the rest of the season.

Mr. L. B. Greenwood, who was associated with the Rev. B. Fay Mills, in an evangelistic campaign in this city some years ago, will speak and sing at the Y. M. C. A. meeting on Sunday afternoon at 4 o'clock. The Bowery Mission Male Quartette will sing and give their testimony. The circular of the quartette contains strong testimonials from F. H. Jacobs, Dr. J. Wilbur Chapman and others. All men, as usual, are invited to attend this meeting.

Red Men's Anniversary.

Members of Wetumpkah Tribe, No 229 Impraved Order of Red Men of Plainfield, observed the third anniversary of its organization Wednesday night at the Casino. The program composed of recitations, fancy dancing, solo and quartette singing, violin duetts, ventriloquism, and in conclusion a one act farce entitled "Hector" was heartily enjoyed and applauded.

The entertainment was followed by a dance.

Barn Destroyed by Fire.

The barn of C. W. Miliken, of 1810 West Front street, was burned to the ground late Wednesday evening. The Dunellen Fire Department as well as the Plainfield Department responded to the alarm sent in from box 89 but the fire had gained too much headway before it was discovered. As the barn was filled with paint and varnish it is another supposable case of spontaneous combustion. The loss is estimated at $400.

DeBacco Acquitted.

Pelino DeBacco, who has been in the county jail since July 19 charged with causing the death of his brother-in-law, Liberatto Pelobizzio, was acquitted last Monday, the trial only lasting one day.

For Public Inspection.

One of the provisions of the new tax act which goes into effect December 20, next, is that the assessors must make two copies of the assessment list, one of which is to be filed with the municipal clerk. This is to be open for inspection and any one has a right to go over it and see whether he is taxed more than his neighbor or not.

Park Club Increases Its Membership.

At a special meeting of the Board of Governors of the Park Club Tuesday night twenty members were elected. The following announcement of committees was made:

Refreshment—Mrs. Henry A. McGee, Mrs. Nelson A. Miller, Mrs. F. H. Ball, Augustus Van Deventer; billiards and pool—J. L. Watson, Walter M. McGee, Ralph T. Willis; special committee of women to look after furnishing fund—Mrs. Samuel Townsend, Mrs. Henry A. McGee, Mrs. E. H. Ladd, Jr.

Century Celebration.

Aunt Ann Betts, whose 100th birthday occurred October 6, will hold a reception at Speer's chateau during the afternoon and evening of November 2, the birthday of her nephew, Alfred Speer. He will be eighty years old on that day. Aunt Ann is a descendant of the Van Emburgh, the Kingsland and the Yearance families, many of whom live in Paterson, Newark, Plainfield, Orange and Arlington.

Out of Politics (?)

The report that the "Reed and Thompson factions of the Somerset Republican organization have gotten together this fall" is exaggerated. Mr. Reed is out of politics and is devoting his abilities to playing golf. It is gratifying to the *News* and his other friends to learn that he is not a foozler on the green such as he has been in the political arena. He captured first honors in two golf events last week, indicating that he has at last struck his true career.—*Newark Evening News.*

Bremmer—Hermann.

Miss Margaret Hermann, of Stirling, ... Bremmer, of North Plain ...

Death of a Nonagenarian.

Israel C Mundy, 91 years of age, of Somerville passed away Thursday. Funeral services will be held from his late home, 33 Third street, at 2 o'clock this afternoon. Interment will be made in the family plot at Bound Brook.

Ellis—Pangborn Marriage.

Miss Carrie Slater Pangborn, daughter of Mr. and Mrs. William N. Pangborn, of Linden avenue, this borough, and Oscar Wells Ellis, of Plainfield, were married Wednesday evening, at the home of the bride's parents. Rev. A. H. Lewis performed the marriage ceremony.

Mr. and Mrs. Ellis will reside in Plainfield.

Sebring—Giles Wedding

Miss Elsie Runyon Giles, daughter of Isaac R. Giles, of Grove street, this borough and William H. Sebring, Jr., were married Thursday evening at the home of the bride's parents. Rev. J. W. Richardson, of Stamford, Conn., formerly pastor of the Park Avenue Baptist Church, Plainfield performed the ceremony that made the twain one. Mr. and Mrs. Sebring will reside in Brooklyn upon their return from a trip in the South.

To Prevent Stony Brook Overflowing its Banks.

A special meeting was called recently by the street committee at which Dr. Justus H. Cooley was present. Property owners near Johnson's Drive complained that the dam maintained by Dr. Cooley in front of the Brookside Sanitarium grounds caused the water of Stony brook to overflow its banks every heavy rainstorm, and washed off the top dressing on Somerset street, and they wanted the dam removed.

Another meeting was held Monday and Dr. Cooley agreed to straighten the course of the brook through his grounds and to erect a wall five feet high on the Somerset street side from the dam to the embankment beneath the bridge.

Must Erect Fire Escapes on all School Buildings.

The first movement of the department of factory and workshop inspection in the State law relative to fire escapes on schools, factories and other buildings throughout New Jersey was made last Friday morning when notice was served on the Trenton Board of Education that the schools in Trenton must be provided with fire escapes.

According to law the notice gives the Trenton school board four weeks in which to place a fire escape on one school, and to repair one already in place on another school.

This activity is to apply to all of New Jersey, and inspections in line with it have been made and are being made throughout the State. The State Board of Education is aiding the factory department toward the full enforcement of the law as far as schools are involved.

BOROUGH BOARD OF EDUCATION

Important Matters Before the Board for Settlement.

The regular monthly meeting of the North Plainfield Board of Education was held last Monday evening, all the members being present.

In the routine business a communication was received from the Borough School Physician, Dr. Albert Pittis, wherein he recommended that a nurse be employed to see the parents of any pupils suffering from contagious skin diseases and that they be properly instructed in the use of medicines and advised that the children should be looked after.

In the discussion which followed it was stated by Samuel Townsend, chairman of the Board, that some of the children who were given to truancy, rather encouraged such disease in order to keep out of school. It also developed that some of the children would return to school before recovering, and thus spread the disease among other pupils.

There was some doubt as to the proper person responsible for looking after such cases, and it was thought the employment of a nurse would remedy the matter.

It was referred to the proper committee for investigation.

Superintendent Wightman reported that some of the parents did not understand the printed vaccination blank sent out by the school physician, and kept their children at home. The object of the blank simply states that the child has not been vaccinated and that the parents should see that it was done. Some of the parents get an idea that smallpox is prevailing; others that a general vaccination of all children is to occur. It was thought advisable to discontinue the use of the ... furnish their own tools, and that many were debarred from taking the mechanical drawing course on a count of not being able to purchase the tools which were quite expensive. For this reason Mr. Burtis thought it a good idea for the school to purchase a few sets which could be loaned to those who did not wish to purchase sets of their own. A motion to that effect was made and carried.

President John Valiant introduced the resolution which was lost at the previous meeting. The resolution is as follows:

"The policy of duplicating accommodations, efforts and expense by maintaining a separate High School organization in North Plainfield has frequently been questioned, but up to the present time no other course has been open to us. We would now, however, respectfully invite your attention to make a proposition offering a practicable basis for a union of the two High Schools. Inasmuch as such an arrangement, if consummated would relieve our pressing needs for a new primary building, we would value an early reply."

Mr Burtis asked the President if the resolution would delay the making of necessary school accommodations? Mr. Joy replied that it would be necessary to have more accommodations at any rate.

Mr Honeyman stated that he had been led to think that the resolution would not be brought up, but inasmuch as it had been he would offer an amendment to the effect that Plainfield would make us a proposition to cover a term of years. This amendment was lost. Ayes, Honeyman, Cooley, Overton and Fountain.

Nays: Valiant, Townsend, Burtis, Joy, Wolruff.

Mr Honeyman said in favor of the amendment, that unless Plainfield would make some such proposition that we would be at their mercy. That after we had given up our schools and sent the children to the city, if for any reason Plainfield wished to cancel the contract, they could do so and we would be helpless. Many things might transpire to bring about such a result: Plainfield might have more pupils of her own than she could accommodate.

Mr. Honeyman introduced another amendment calling for a public meeting and vote of the people of the borough before submitting the resolution to Plainfield. This amendment was also lost by the same vote as the first.

It seemed to be the general feeling that the wishes of the people should govern in action in the matter, but the Board split on the question of whether it should be one before or after the resolution was sent to Plainfield, and the latter prevailed.

The resolution was then voted upon and carried by the same vote that the amendments received.

In executive session the Board voted to take immediate arrangements for a new school building and will look at several sites and then call a public meeting.

SUBURBAN NOTES.

WATCHUNG.

Willie Dotton, who is suffering with scarlet fever, mention of which was made in this column last week, is more than holding his own, and unless complications set in will recover. He is confined in the old house formerly used by painter's on the Francis Bartel land. The old colored man with whom Willie was left, did not return after discovering the nature of the boy's sickness, and was not arrested and placed in jail as reported last week. The mistake occurred through a case in the borough which another colored man had charge of.

It is hoped to have the question of a side walk between Watchung and the trolley terminus definitely settled at the next meeting of the Township Committee.

* * *

LIBERTY CORNER

Mrs. Annin spent Sunday with Mr. Bartel's family at Martinsville.

Rev. C. B. Condit and Harry Lare spent Friday and Saturday of last week in New York City with W. D. Weeks.

The Village Improvement Society organized last Saturday evening. The following officers were elected: President, Rev. C. B. Condit; vice president, H. B. Rommel. The object is to improve the condition of the roads and walks and to make grounds and lawns attractive.

* * *

WARRENVILLE.

Joel Codington, who has taken up the milk business, will soon remove to this place. C. H. Mundy will act as his foreman.

W. Howard Toms is at Trenton this week attending the State Council of Juniors.

Benjamin Jennings is building a barn on his farm. He has just completed the cow stables.

M. E. Blazier sold his produce business to William Snell and Fred Godfrey. Mr. Blazier will ...

Which never can be forgot,
But Henry Albert sought it out,
And now Johnny has it not.

Messrs Anderson and Dolliver, Republican candidates for county clerk and assembly, were in town last week. They will receive a handsome vote in Warren.

M. C. Jennings, who conducts a milk business, is having the old wheelwright shop in Warrenville converted into a stable for cows. The second floor will be occupied by the cows and the lower floor for storage. Nick VanWinkle has charge of the work.

A. Luko and family are moving to Oak Tree, where they own a large farm.

Mrs. Geibelhouse has had erected a large cattle barn on her summer home "Blumenheim."

Rev. Dr. Charles Moldenke will preach a Reformation sermon next Sunday morning at the Grove Street Lutheran Church. It is hoped that a large congregation will be present.

Miss Elsie and Teresa Smith are visiting their aunt at Bayonne.

It is up to the Town Committee whether Watchung is to have that side walk or not.

Plainfield Ought to Reform.

Plainfield is getting to be a perfectly awful place. They bet there on ball games—real money—and have four gambling houses running full blast! How perfectly horrible! This state of affairs is being denounced from the pulpits, and by the newspapers. People hold up their hands in horror, while right here in Morristown chocolate drops, filled with whiskey, are being sold to our children every day and nobody says a word. We wonder why?—*Morristown Chronicle.*

Temperance Work at Reform Club.

Interesting meetings have been continued all this week at the Reform Club. Mr. Brown has been working very earnestly and faithfully. He was assisted Tuesday night by Geo. E. Monroe, of the 146th street Mission, New York City; Thursday night James ... City of the Bowery Mission, New ... City, ex-saloon concert singer, and John B Oakley, of Elizabeth, assisted Mr. Brown.

Mr. Brown will conduct the meetings tomorrow (Sunday) afternoon and evening. In the evening a member from the Chinatown Mission, New York City will be present.

The meetings will be continued next week.

The earnest, temperance work of the past three weeks has resulted in seventy people signing the pledge.

Democratic Rally.

A Democratic meeting is scheduled for Somerville tonight in Germania Hall. R. V. Lindabury and S. S. Swackhammer will be the principal speakers.

OUR FIREMEN COMPLIMENTED.

Volunteer Firemen Receive Great Praise for Their Efficiency.

At the banquet held at Somerville last week by the local firemen, Hon. S. S. Swackhamer was a guest and made an address of which the following is a part:

"I feel it a high honor to be the guest of this great organization on this splendid occasion. There are two classes of men whom I honor and to whom I am always ready to take off my hat. The one is the Soldier, the other is the Fireman. If there is any one for whom we should have a high admiration and a deep abiding affection, it is the man who is willing to place his life between us and danger or death. Somerset county is to be congratulated upon the fact that there is not a paid Fire Department within her borders; that she is protected by a volunteer service and that the men who assume the arduous labor and the imminent perils incident to such an undertaking do so without a dollar of compensation or profit. It is the highest form of devotion to the cause of humanity, where a man is willing to risk all for another without the hope of reward. Instances might be given of the courage and heroism displayed by firemen where they have lost their lives or received wounds which they carried to their graves, but a scar so received would be more admirable than to flash a diamond or to wear the diadem of the Caesars. This army of firemen is never relieved by furlough, and the enemy cannot be bound by armistice or treaty. The Red Terror attacks alike the hut of the poor man and the mansion of the rich. It assails ... temples of religion and mounts the High Altar of the House of God. It is no respecter of persons and gives no quarter, ... the charred a... first signal of danger these noble men will fly to the rescue and place their lives if need be, between us and the deadly flame.

Somerset county is one of the few if not the only county which has no paid Fire Department, and its record for prompt and skillful service is unsurpassed while its officer have no superiors anywhere. I know the daring, energy and prowess of the North Plainfield Fire Department by observation and it is everywhere recognized that the reputation of the Somerville Department is of the highest order. The achievements of the volunteer firemen like those of the volunteer Soldier have become historic and it is inspiring to remember that the Minute Men of the Revolution secured our independence and that 75,000 volunteers sprang to arms at the call of Abraham Lincoln to save the Union and free the slaves. The patriotic and heroic volunteer has covered the pages of history with deeds of gallantry and self sacrifice. All honor to these noble men.

Up to Mr. Fowler.

It seems to be up to Congressman Fowler to stop, or at least attempt to stop, the revolt of certain Republican leaders in Union County. The Plainfield contingent has announced its purpose to cut the assembly ticket because its Plainfield candidate was not made one of the nominees at the convention. The Plainfield rebels declare the ticket in the field is in the interest of Senator John Kean, and they are opposed to the latter's aspiration for re-election.

Without going into the merits or otherwise, of Mr. Kean's ambition, is the duty of every Republican to support his party ticket next month. While Republican victory seems assured, it should be big enough and emphatic enough to render success a year hence a certainty. Results this year will have their effect upon next year's campaign. It is, therefore, childish to injure the ticket in any locality simply because the candidate of faction was unsuccessful in the nominating convention.

The Plainfield Republicans are friends of Mr. Fowler. They would undoubtedly listen to advice from the congressman. Mr. Fowler has so far remained silent, although he must be aware of the condition of affairs. He should remember that he will want his party's support for re-election next year, and that it is necessary there should be harmony now in order that harmony may prevail when his turn comes. A word from him at this juncture might work wonders, and whether it did or not he would put himself on record as a loyal party supporter and promoter of harmony.

We repeat that it seems to be up to Mr. Fowler.—*Newark Daily Advertiser.*

Plainfield Club Answers MacMurray.

The Republican Club of Plainfield came out in the city dailies this week with another letter against the action of James T. MacMurray and his fellow bolters. The letter pours hot shot without mercy on that would be dictator.

In part the letter reads:

"The letter in your issue of Saturday from James T. MacMurray, of 21 Sandford avenue, presents the peculiar spectacle of a Republican office holder practically advising Republican voters to vote against the Republican Assembly ticket, because he, as the leader of fifteen bolting delegates to the recent County Convention, could not induce the 111 delegates to the convention to nominate his candidate for the Assembly. There is not a single statement in the entire letter to justify such a position nor in any way to justify the bolters in voting against a Republican platform and bolting a Republican convention.

"Abuse of the Hon. John Kean, the senior United States Senator from New Jersey, or of Hamilton Kean, the chairman of the Union County Republican Executive Committee, is not argument, nor does it meet the situation as set forth in this club's recent open letter to Plainfield Republicans. Mr. MacMurray dislikes Senator Kean and Hamilton Kean because he dislikes every one who will not do as he wishes, who will not acknowledge his supremacy, and who will not accept him at his own estimate.

"The issue, as far as Republican voters are concerned, cannot be dodged. Mr. MacMurray has himself made the issue. The issue simply is: Do the Republican voters of the city of Plainfield endorse the Republican platform, or do they not? Do the Republican voters of the city of Plainfield believe that a majority of the delegates to a convention should control that convention in making its party nominations, or do they believe that a small majority of the delegates should control it? Do the Republican voters of the city of Plainfield wish to vote for Republican ... field, has been for many ... the b... of a lucrative office by ... grace of the Republican party, and perhaps thinks more of party spoils than of party principles. He, therefore, speaks feelingly of "crumbs from the political table." But will the Republican voters of Plainfield sacrifice the principles of the party for which they have worked and voted for years merely to uphold an ingrate? The issue is plain, and can not be dodged.

"Why should Mr. MacMurray become dumbfounded at an organization of Plainfield Republicans nailing the false statements made by him on the floor of the recent convention, and telling the plain truth about matters which he has misrepresented? We believe that Plainfield Republicans wish to fight under the banner of truth and not under the banner of falsehood. We believe that Plainfield Republicans want to give full credit to the smallest, as well as to the largest district in the county for whatever vote may be cast for Republican candidates. This is the county of Union, and not the county of Plainfield or the county of any other place. In a county election every part of the county is dependent upon every other part, and Plainfield Republicans, we believe, are glad to do their share in keeping the county in the Republican column."

Annual Sunday School Teachers' Meeting.

Mrs. Alonzo Pettit, of Elizabeth, president of the State primary council, gave a talk on teachers' training work at the morning session of the annual meeting of the Plainfield Primary and Junior Sunday-school Teachers' Union, Tuesday afternoon in the Seventh Day Baptist Church. Miss Nettie J. Beeching, of Watchung, as president of the union, was in the chair. "David and Absalom" was the subject discussed by Mrs. Skillman, president of the New Brunswick Union, and the afternoon's program closed with a talk on the "Duties of Assistant Junior Teacher," by Miss J. L. Baldwin, of Newark. At the session at night, Miss Baldwin again made an address and among the others who spoke were Rev. Mr. Thomson, of Bound Brook, and Miss Edith Cairns and Mrs. W. R. Barnes, both of this city.

Patronize your Home Merchants.

Do not waste your time and money on strange pedlars, when you can get better goods for the same money from Plainfield merchants who pay taxes and contribute liberally to every good cause in the community. With pedlars you have no redress in case the goods are not right, while your local merchant stands ready at all times to make his guarantee good.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

Peach, apple and pear trees and many honeysuckle vines in Cape May County are in full bloom.

George Stites, of Green Creek, has harvested three crops of strawberries since the strawberry season began.

Elijah Harbeson, a farmer living near Pennsgrove, has a Lippincott early apple tree bearing a second crop of fruit of fine flavor.

J. V. Runion, one of the successful farmers of Allamuchy Township, has a monster cabbage that was raised on his farm. It measures four feet in circumference.

The first snow of the season fell in northern New Jersey last week. In Newton it was only a few flakes. Southwest of New York there were heavy killing frosts, but the high gale prevented the fall of frost in Sussex county.

Cinnaminson citizens are happy, it having been announced during the past week that there is enough money in the treasury to run the township for the coming year, as a result of which it will not be necessary to impose any tax for township purposes.

The florists in this State say they have never seen such a demand for cut flowers, especially chrysanth... One man says he cannot fill one... his orders, and is getting his ... for what he sells. This grower... a Glassboro man $500 for his ... was gone ...

... from ... sauce ... Mrs. Voorhees found the rice later, and last Tuesday night she invited the students to her house and they ate an immense rice pudding.

The Lackawanna Railroad is considering the advisability of cutting a tunnel through the mountain of the Delaware Water Gap. For some time this project has been contemplated, and the recent freshet brought the subject to a serious consideration. The tracks of the railroad at this point are close to the river, and there was a bad washout caused by the last freshet. Time could be saved by a tunnel, as the trains are obliged to run slowly around the sharp curve. It is believed that the tunnel will be built in the near future.

The board of trustees of Rutgers College has accepted the plans for the memorial gateway presented to the College by the class of 1883, on the occasion of the twentieth annual reunion of the class. The designs for the gateway were drawn by Hill & Stout of New York. Fredrick P. Hill, of that firm, is a member of the class of '83. The gateway will be erected at the corner of George and Somerset streets. The plans call for an entrance that will harmonize with the college building, and will be in sympathy with the traditions of the institution. The stone pillars will be of red sandstone, of the same sort as that of which Old Queen's College, the first building erected on the campus, is composed. The pillars will be surmounted with the original stone ball which formerly surmounted a gateway removed some years ago. The gates will be of wrought iron scrool and arch work.

Police Sergeant Edward Hyde, of Camden, is suffering from a peculiar affliction caused by his hatband poisoning the left half of his forehead. His forehead and left temple are inflamed to such a degree that it is feared blood poisoning or erysipelas may set in. Sergeant Hyde is subject to attacks of neuralgia, and during these periods he suffers intensely. A few days ago he was confined to his home with an unusually severe spell. His wife placed a poultice on his forehead and temple to allay the pain. It was left there so long that it blistered the skin in several places. During a storm the next day Sergeant Hyde was on duty. At times the high wind that prevailed compelled him to pull his cap down tightly over his head to keep it from blowing away. It is believed that wearing the cap so long under such conditions forced the dye out of the band and into the wounds on his forehead and temple, thus poisoning him.

The Things That Money Cannot Buy

By the Rev. Thomas B. Gregory

THERE are a great many things that money cannot buy, and it must not be forgotten that the things that money cannot buy are the greatest and best in the world.

Money will not buy health. At the sanitariums and watering places are thousands of wealthy invalids, who have lost their health and are unable to buy it back with all their gold.

Said a millionaire to a plain man beside whom he was seated on the deck of a steamboat: "I would give a hundred thousand dollars if I had your health."

"It did not cost me a cent, sir," replied the plain man.

Money cannot buy the faculty for appreciating and enjoying the wonderful nature in the midst of which we live and move and have our being. Money will buy you a splendid telescope and point it toward the heavens, but it cannot provide you with the discerning soul which, looking through the instrument, shall be able to take in and enjoy the full significance of the starry splendor!

Money cannot buy the true, sincere love of the humblest human heart. It can buy the flattery and condescension, and the sleekest of hypocritical assiduity; but the tenderness that is born of affection, the blessed sympathy that comes from the heart, not all the piled up millions of all the millionaires could purchase for you.

To rightly understand, therefore, the limitations of the dollar, to clearly understand what it will buy and what it will not buy, is the most important duty that we owe to ourselves.

To be thoroughly disenchanted regarding the purchasing power of money would at once add immeasurably to the world's true happiness and peace.

A new light would shine in human eyes—because a new joy would dwell in human hearts—if we could once come to see that about all of the best things in our life have nothing to do with money and money nothing to do with them.—New York American.

Game Preservation

Law Prohibiting Sale of Game at All Times Proving a Potent Aid

By Dwight W. Huntington

THE best blow for game preservation was struck when laws were enacted prohibiting the sale of game at all times. A difficulty was encountered at first, owing to the conflict of laws in the different States. Birds were offered for sale in a State where the sale was illegal, and the evidence was always at hand that they were killed in another State where the shooting season was open. The words "wherever killed" were soon added to the laws prohibiting sales, and these were supplemented by laws prohibiting the transportation and exportation of game, and making it a misdemeanor to have it in possession in close seasons.

The National Congress recently enacted a law (known as the Lacey law) enlarging the duties and powers of the Department of Agriculture so as to include the preservation, distribution, introduction and restoration of game birds and other wild birds. This law was passed "to aid in the restoration of such birds in those parts of the United States adapted thereto where the same have become scarce or extinct, and also to regulate the introduction of American or foreign birds or animals in localities where they have not heretofore existed." It prohibits the transportation by interstate commerce of game killed in viola- local laws. That a sentiment has developed in favor of the execution of e laws is well known, to their sorrow, to many innkeepers, common car- d dealers. Constitutional questions have been raised, and cases grow- the killing of a few partridges have gone to the Supreme Court of States. It is gratifying to the sportsmen that the laws have usually on for . This has always been the case exceptin

NOTED LAWYER ACCUSED

I. L. Blair, Counsel For World's Fair, Charged With Embezzling.

FORGED NOTES FOR $400,000

Faces Serious Charges—Son of the Noted Missouri General Falls in a Fit and Collapses While Making Emphatic Denial—One-Time Employe in Role of Accuser.

St. Louis, Mo. — Overwhelmed by charges that have been laid before the Grand Jury, naming him as a forger, an embezzler, a robber of his relatives and a man who has led a double life of startling depravity, Attorney James L. Blair, one of the most prominent men of St. Louis, fell unconscious and frothing at the mouth while talking to reporters, in a most serious state of collapse.

"Judge" Blair, as he is known, was until recently counsel for and a director of the World's Fair, and one of the most prominent men identified with that national enterprise. Rumors affecting his integrity caused him to resign, but not until revelations of his alleged enormous thefts were made public.

The story of Blair's alleged Jekyl and Hyde existence was told to the Grand Jury by James T. Roberts, who was formerly a confidential associate of Blair. In the long list of charges are assertions that Blair had victimized Dick Brothers & Co., bankers, of Philadelphia, his relatives, to the extent of $340,000, and that he had stolen $63,000 from the funds of the Blow estate.

The startling accusations against Blair have caused a tremendous sensation in St. Louis, where he was regarded as a man of the highest integrity and lofty purpose. He was the idol of a certain reform element and a favorite lecturer before Y. M. C. A. meetings, his favorite subject being "Business Integrity." The charges made before the Grand Jury recite that while Blair was making these lectures he was planning deeds of trust, embezzling trust funds, robbing his friends and relatives and breaking promises to reform.

Blair has always been one of the most strenuous fighters for the betterment of municipal conditions. He raised a fund of $15,000 to aid Circuit Attorney Folk in his boodle prosecutions. His wife is President of the Board of Lady Managers of the World's Fair, President of the Morning Choral and the Women's Club, and otherwise a social and musical leader. They have lived for several years in an elaborate house at Kirkwood, a suburb and have entertained extensively, [illegible] at he first dis[illegible] Blair

[illegible] posse ransacked the neighboring country for the man, but have nothing to guide them in their hunt.

[illegible] safe, a bundle of envelopes came into his possession. The envelopes, Roberts declares, bore the names of persons supposed to have borrowed money from Dick Brothers & Co. In the envelopes, he says, he found cancelled interest notes, portions of certificates of title and correspondence.

Investigation convinced Roberts, he declared, that the loans were fictitious, the certificates of title spurious and the notarial and Recorder's seal forged.

It is stated that the embezzlements have been going on for ten years, and that the money was used to pay interest on forged notes, premiums on life insurance policies and for extravagant living.

Mr. Blair is the son of the late Frank P. Blair, one of the greatest and most highly honored citizens Missouri ever produced. His public work has always appeared to be of the highest character. In the political reformations which have been going on in St. Louis he was an important figure.

A NEW BRITISH AMBASSADOR.

Sir Mortimer Durand Succeeds Sir Michael Herbert.

London.—Sir Henry Mortimer Durand has been appointed British Ambassador to the United States to succeed the lte Sir Michael Herbert. His appointment astonishes diplomatic circles, since Sir Mortimer, as he is called, having dropped the Henry, is not a Foreign Office man.

He was imported into the diplomatic service from the Indian civil service, where he attained a high position. Sir Morther was a protege of the late Lord Salisbury, whose exalted opinion of hisdiplomatic skill was based on his conduct with Russia in the delicate matte of the Afghan boundary delimitation.

His father was an eminent general in Ind, but Durand has none of the socialbull which tells so largely in determing big diplomatic appointments. He h often expressed a great liking for Aericans. He has a wife and daugher.

Copper Mines Shut Down.

By decision of a Montana district court he Amalgamated Copper Company prevented from collecting dividendsfrom the Boston and Montana and e Parrott mining companies, whicthe Amalgamated owns. The holdin company at once ordered all its minesand smelters in Montana shut down browing 12,000 men out of employint.

Ohira Reformatory Head Out.

Dr. rank W. Robertson has resigned the ice of Superintendent of the State eformatory in Elmira, N. Y.

Ran 130 Miles an Hour.

An electric car in the high-speed experiments held on the Narienfelde-Zossee line, at Berlin, Germany, attainedthe speed of 130 2-5 miles per hour.The last previous record was 127 1-8, but the engineers say they hope attain a speed of 140 miles an hour.

"Mother" Stewart Dead.

"Mother" Stewart, a noted temperance leader and one of the organizers ofhe W. C. T. U., is dead at Chicago.

SHOT THROUGH A WINDOW

Farmer's Wife Killed and Husband Wounded Near Port Jervis.

Half-Conscious, Bevans Drags Himself to Telephone and Rings Until He Drops Senseless—Neighbors Rush to Aid.

Port Jervis, N. Y.—The country for miles around Bevans, N. Y., is thoroughly excited over the murder of Mrs. Victor Bevans and the wounding of her husband at their home, and hundreds of persons have arrived at the house offering assistance to the stricken family.

At the time they were shot, about 9 o'clock p. m., Mr. and Mrs. Bevans sat by the kitchen fire, in a direct line with the window, the husband with an arm over the back of a chair and his back toward the fire. Two charges came through the window pane and lodged in Mr. Bevan's arm and face and in his wife's head and shoulders. Mrs. Bevans died next morning, but her husband is improving. There is no known motive for the deed. Mr. Bevans had no enemies. He is a thrifty, prosperous farmer and a member of a family of 150 years' standing in the valley.

Bloodhounds were put on the tracks leading from the house. The dogs followed the tracks by a circuitous route to the house of a certain man and thence direct back to the Bevans house. This man is under suspicion, as his reputation is said to be not of the best and he has appeared much agitated since the murder.

It is believed that the murderer fired from a rest, as both of his victims were hit in exactly the same place. The window glass was broken in two places in such a manner as to indicate that the gun was swept from left to right. Both holes in the glass are on the same level.

Woven into the tragedy of the lonely manor house when Bevans and his wife were shot by the assassin lurking in the darkness outside their home, is the extraordinary part played by the telephone which silently notified the neighbors, miles away, of the horrid act in the Bevans home.

His wife dying, himself nearly unconscious, Bevans staggered to the party 'phone, used jointly by fifteen families, scattered for miles around. One turn of the crank rang the bell in every house.

With the last ebbing effort of strength, Bevans twisted the handle madly and shouted into the transmitter. Then he sank down and the receiver was left dangling.

Alarmed by the furious ring, fifteen people sprang to the 'phone and heard, and acted at once.

Strange and fearful sounds came from the Bevans telephone. The peo[illegible]

DISASTER IN NEW YORK TUNNEL.

The Worst Accident That Has Happened in Rapid Transit Subway.

New York City.—In the worst accident that has occurred in the building of the rapid transit tunnel ten men, most of them Italian laborers, were killed by a cave-in following a blast. Many tons of rock fell in in a length of thirty feet, about two blocks below where the tunnel comes out on the surface level at the junction of Nagle, Eleventh and Speedway avenues, just north of Fort George.

Work has been going on night and day on this section, which Contractor McDonald recently took over from Snie-Contractor McCabe. A night shift of twenty men was at work at a heading pushing the tunnel south, the bore having been begun at the north end.

According to one of the men, a light blast was set off to displace a few tons of rock. Nearly fifteen minutes afterward the top and sides of the tunnel fell in for a distance of about thirty feet to the north of the heading, burying the workmen and almost completely blocking the way of escape to the north.

KILLED BOYS TO SPITE WIFE.

Indiana Father Tells How He Gave the Little Fellows Candy to Go With Him.

Marion, Ind.—Jesse McClure, a farmhand, murdered his two sons, aged five and seven, and left their bodies in a fence corner. McClure then drove rapidly to this city and gave himself up.

McClure lived near Frankton. His wife left him a year ago and returned with her children to her father's home. McClure found the children playing in the front yard and induced them with candy to take a ride with him. He drove a mile up the road and then carried the children to a fence corner and shot them with a revolver. The older one was found dead a few minutes later and the younger was dying with a piece of the candy in his mouth.

McClure told the jail turnkey that he killed the children because his wife had left him and refused to see him.

Noted Hawaiian Dead.

Robert Wilcox, ex-Congressional Delegate from Hawaii, and the first man of the Hawaiian race to occupy a seat in the American Congress, died at Honolulu of consumption. He was born in Honolulu, Island of Maui, one of the Hawaiian group, February 16, 1855. His father was a native of Newport, R. I., and his mother was a pure native of Maui who was a descendant of a brother of King Kaulahea.

Divorce a Menace to Society.

Bishop Doane, of Albany, N. Y., in an address in Washington, D. C., declared that the increase of divorce in the United States had become a serious threat to social stability in this country.

Work on Warships Delayed.

Rear Admiral Rowles in his annual report to the Secretary of the Navy says the work on the new warships has been unsatisfactory, the delay being due chiefly to strikes. There are 252 vessels of [illegible] for service.

MABEL BECHTEL'S MURDER

Evidence That Allentown Girl Was Slain in Own Home.

BROTHER AND FIANCE ARRESTED

Girl's Skull Crushed by Ruffians—Mother Discovers Body of Pretty Silk Weaver, Mabel Bechtel, Where Slayers Left It in the Alleyway in Allentown, Pa.—Bullet in Her Brain.

Allentown, Pa.—Concealed in a passageway adjoining her home the body of Mabel H. Bechtel, a pretty silk weaver, eighteen years old, was found by her mother. The head was crushed as if struck by a blunt instrument and had a bullet through the brain.

At the ghastly discovery the girl's mother realized the purpose of the visit to her home during the night of two strange men, who evidently had carried the body to the place where it was found.

The girl was a great favorite among her friends, and was engaged to be married to Alfred Eckstein, a cigar operator, employed in Allentown. David Weisenberger was his rival. The last time the girl was seen alive she was in company with Weisenberger, with whom she went out driving.

On Monday morning Weisenberger called at the Bechtel home and asked Mabel to go for a drive. That was the last time Mrs. Bechtel saw her daughter alive. As the girl did not return in the evening her mother retired early without waiting for her.

During the night she heard the sound of a carriage within a short distance of her house. She arose and saw from a window two men alight from the carriage and carry out a bundle which they placed in the entrance to the alley.

She thought nothing of the occurrence until morning, when she found her daughter's shoes, hat and coat in the dining room, but no trace of the girl. She searched the house, and, directed by the incident of the previous night, looked in the entrance to the alley.

There she saw the body of her murdered daughter. Dreadful as was the sight, she retained her presence of mind, and informed her neighbors and the police.

The police discovered what they regard as almost conclusive evidence that the girl was killed in her own home. This evidence was in the shape of blood stains found on the wall and floor of a room sometimes occupied by the girl, and of a small hatchet with the handle broken in a bureau in the garret. On the hatchet were some stains which the police believe are blood stains.

[illegible] "sweating process" at various times. David Weisenberg, the cigar salesman who gave himself up to the New York police, has been practically eliminated from the mystery. His alibi seemed to be perfect, and he had no trible in getting $1000 bail.

THREE DIE PLAYING WITH FIRE.

Children Fascinated by Flames inDivers Ways.

Pottsville, Pa.—While Mrs. William Bernheiser's back was turned for a moment, Mary, her six-year-old daughter, poked a stick into the grate of he kitchen stove and withdrew it flming, calling attention to her pretty light. Her clothing caught fire and ina few minutes she was a blackened orpse. The mother was seriously burnedwhile trying to save her daughter.

Allentown, Pa.—Annie, the five-year-old daughter of Mr. and Mrs. Curies Heil, of Standard, was burned toleath at her home. Annie got her father's pipe and tried to imitate him in lihting it. The match set fire to her cothes and the little girl rushed out o the house and along a lane to a field, where her parents were working. Before she got there she fell exhausted, and before her parents could reach she hadbeen burned to a crisp.

Pittston, Pa.—Lewis Groppin, five years old, took matches from home in Pittston Township and set fire to some dry leaves. His clothing becam ignited from the flames and he was fatally burned.

SHOT AND KILLED HIS SISTR.

Each Playfully Pointed a Gun at theother and One Happened to Be Loade.

Ogdensburg, N. Y. — Flora Peter, fifteen years of age, while handling an air gun at Walden, playfully pointed it in the direction of her brother, exclaiming: "I will shoot you."

A loaded rifle, the property of a hired man in the family, was resting against the house near by, and the boy, catching the spirit of his sister's fun, seized the weapon, and, pointing at his sister, answered, "I will shoot you, too!"

As he spoke the rifle was accidentally discharged, the bullet entering the body of the girl, killing her instantly.

John C. Russell Dead.

John C. Russell died at his home in Leicester, Mass., of heart disease, after a short illness. Mr. Russell was born at Greenfield, Franklin County, Mass., in 1834. When Mr. Cleveland was elected first time to the Presidency he declined successively the portfolios of Secretary of War and the Secretary of the Navy. He was twice the candidate of the Democratic party for Governor, but was defeated.

A Record Celery Crop.

Kalamazoo, Mich., the centre of a great celery growing region of the country, expects to ship not less than 7,000,000 bunches of celery, which will have a value of $1,400,000. This crop is grown on 5000 acres of reclaimed swamp land, which is worth as high as $800 an acre. The crop of 1902 is the largest on record.

Large Shipment of Farming Tools.

Already this year America has shipped 30,000 tons of agricultural implements into Russia.

DOGS RUN DOWN SUSPECT

Jaggers Arrested and Charged With Shooting Mrs. Bevans.

Lynching Foiled by New Jersey Sheriff—Mad Dash Over Mountains to Save Prisoner's Life—Safe in Jail.

Port Jervis, N. Y. — Sheriff Andress and Deputy Sheriff Thompson arrested George Jaggers, whom the authorities have had under suspicion for several days in connection with the murder of Mrs. Victor E. Bevans and the shooting of her husband at their home near Bevans, N. J. Jaggers was at his home at the time of the arrest. He was taken to the jail at Newton, the county seat of Sussex, after a mad dash over the mountains.

It was to Jaggers' house that the bloodhounds led the chase. The Sheriff, Prosecutor Huston and several other county officials held a long conference at Newton, and it is supposed that the arrest was decided upon at that time. The arrest was made quietly, and the prisoner was at once taken from the neighborhood in a carriage, carefully guarded. Feeling against the suspect ran high, and the neighbors of the wounded farmer and his dead wife were becoming more and more restless and impatient at the delay. It is said that Mr. Bevans had asked the Sheriff to refrain from making an arrest if possible until after the funeral.

The funeral of Mrs. Bevans was held at the Bevans home. It was well attended. The farmhouse was not large enough to hold the people, and many stood outdoors. Jaggers' absence attracted much attention. He said later that he was unable to attend on account of his wife's illness.

Mr. Bevans is recovering from his wounds, and though still weak, rose from his bed for the first time. He sat in a chair throughout the service.

Jaggers lived near Hainsville, about a mile and a half from the place of the murder. He has been in this neighborhood only a short time. He was one of the first at the Bevans home the morning after the murder was committed. It is supposed the motive for the crime was robbery. Jaggers broke down and wept when the Sheriff placed him under arrest, but he soon recovered his composure and refused to answer any questions except to maintain his innocence.

The Sheriff alleges that he is in possession of facts in connection with Jaggers' career, before he moved into this quiet farming community, that will count heavily against him.

A crowd of fully a thousand gathered about the jail in Newton when the prisoner arrived. Twenty armed men formed a cordon around the carriage containing him, and escorted it to the jail. There was considerable disorder, but no outbreak.

CONTROL OF ERIE CANAL

Federal Courts Have Jurisdiction Supreme Court Declares.

CANALBOATS SAME AS

Four Dissenting Justices Dec[illegible] sition an Undue Expansio[illegible] Authority — Sweeping D[illegible] Vests Supervision of [illegible] ways in the National Gov[illegible]

Washington, D. C. — [illegible]preme Court, by a divided [illegible] decided that the Erie Canal, built by the State of [illegible] wholly within its bor[illegible] maritime jurisdiction [illegible] or in Government. Chief J[illegible] Justices Harlan, Br[illegible] dissented.

The controversy arose [illegible] a canalboat. The owner, Perry, in the suit brought [illegible] the lien contended that the N[illegible] statute under which it was [illegible] was an infringement upon the Admiralty jurisdiction of the Federal Government over the navigable waters of the United States, and that the [illegible] therefore could not be enforced.

The Supreme Court of New York denied this contention and upheld the statute, whereupon Mrs. Perry appealed to the Supreme Court of the United States on constitutional grounds.

The opinion of the court was delivered by Justice Brown. The argument that the jurisdiction of the Government did not apply to artificial waterways, he said, had been decided in several cases, both in this country and Canada. There was no question, he asserted, as to the Federal jurisdiction over the great lakes and it would be ridiculous to deny its jurisdiction over, for instance, the St. Clair Canal, which connected two of the lakes and was but a mile long, solely on the ground that it was an artificial waterway.

As to the contention that maritime jurisdiction did not apply to canalboats Justice Brown said the means of propulsion was not material. It had already been decided by the Supreme Court that it applied to all kinds of vessels except rowboats, which were not included. That the boats on the Erie Canal were drawn by horses was not matter, for the enlargement of the canal was in contemplation, when they would be propelled by steam. The case would, of course, be futile to hold that jurisdiction did not apply now and then change that decision.

The dissenting opinion was delivered by Justice Brewer. Until 1840 the Supreme Court had held, he said, that [illegible] all the inland navigation upon waters connected in any way with the ocean, including waters wholly within the boundaries of a State.

The Erie Canal, said Justice Brewer, was built and owned by the State of New York, and the Federal Government could not, of course, interfere to restrict the size of the canal, the depth of its water or the construction of bridges, and how, then, could it interfere in a case like that at bar?

In his opinion the grant to the nation's Government over Admiralty and maritime matters was in furtherance of commerce between the United States and foreign nations and designed to secure uniformity in respect thereto, and did not extend the contracts made in respect to vessels which were incapacitated from foreign commerce designed and used exclusively for all local traffic within a State.

MCB COSTS A COUNTY $5000

Heirs of C. W. Mitchell, Lynched in Urbana, Ohio, in 1897, Get That Sum.

Chicago.—The proceeds of the first verdict under the new Ohio law making a county liable to damages to the estate of a person who is killed by a mob within the county have been distributed to heirs in Cook County.

The beneficiaries are Mrs. [illegible] Brown and Mrs. Daisy Paine, of this city, sisters of Charles W. Mitchell, who was lynched at Urbana, Champaign County, Ohio, on June 4, 1897. Each secures one-fourth of the damages of $5000. The remainder is given to two Ohio heirs by the courts of that State.

Admiral Rowles Quits Navy.

Rear-Admiral Francis T. Rowles, Chief of the Bureau of Construction and Repair, has resigned from the Navy to become President of the Fore River Engine and Shipbuilding Company, of Quincy, Mass. Constructor W. L. Capps was selected to succeed him.

New Counterfeit Note Discovered.

The United States Secret Service has announced the discovery of a new five-dollar counterfeit note on the First National Bank of Lynn, Mass. It is a photographic production and identical with the one discovered on the Miller's River National Bank of Athol, Mass., a few days ago.

French Bark Lost.

The French bark Savoyard, of St. Malo, laden with salt, has been wrecked in the Bay of Audierne. Thirty-one members of the crew, the wife of the captain and four other women were drowned.

Cripple Gets Check For $35,000.

Albert Wadley, a New York florist, living at White Plains, who sued the New York Central Company for $50,000 damages for injuries he received in the Park avenue tunnel wreck, has settled with the corporation for $35,000. Mr. Wadley will be a cripple for life.

Defenses Half Completed.

General George L. Gillespie, chief of army engineers, in his annual report says the United States seacoast defenses are about half completed.

Acquainted With Grief

By Margaret Deland

SHE has her husband and children, and they are well, and they are happy, and they are good, and they are contented; and yet, she was actually unhappy because—her dressmaker disappointed her!" says some poor soul who has paid the price—a woman whose house is left unto her desolate. To such a one, the whimpering and scolding complaint about the unimportant seems an incredible folly, and she is moved to say to her complaining rich friend: "Do stop to remember that you are rich; remember all you possess!" But instead of remembering her wealth, the foolish woman is bewailing her poverty; she is consumed with worry over unimportant things. The dressmaker brings tears to her eyes; the domestic problem keeps her awake at night; an invitation which does not come turns the world black before her.

Shame! says the poor creature, whose sense of proportion has been born in some bitter hour of fear or bereavement or wrongdoing.

And it is a shame—a shame for people who have in their lives the consciousness of love, and character and courage, to fall into the wasteful folly of unhappiness about the unimportant. It would be bad enough if this shameful kind of unhappiness could be confined to the person who experiences it, but, unfortunately, its black edge spreads over on to other lives. No woman who comes down to her breakfast table with what her son frankly calls a "grouch on" is grouchy to herself alone. Her husband feels it; that same candid son feels it; her servants feel it; and so the day falls a little more darkly than it need on the world. It is curious how rarely we stop to reflect upon the duty of being conscious of our happiness, of being pleasant, in fact, for the sake of other people's happiness. And it is so simple a duty, too, always at our hand! It does not need that we shall go out and look for it, as we might look for a high deed to do—a dragon to slay, a movement to reform the world, a vocation, a martyrdom! Sometimes we have to hunt for such things; while right at hand is this great and simple and serious opportunity, the opportunity of being pleasant.—Harper's Bazar.

The Grouchy Man

By a Special Contributor to the Pittsburg Dispatch

WHAT makes a man so grouchy in the morning? Ninety per cent. of the male beings who are obliged to get up and eat, do so bristling like a hungry bear. If you have ever lived in a boarding house or where a dozen fellows were sleeping and eating, you must have noticed that the early morning atmosphere was dangerously surcharged with a kind of spontaneous combustion, verging on the exploding point, but just missing it. And how the women folk scurry around to quickly feed the brute and turn him loose! It takes a rush meal, a rush to a car, a stogie and a newspaper, with a couple of grunts about the weather and a kick because the Pirates lost a game, before his expansion pipes get to working properly, and by the middle of the forenoon it's safe to get within shouting distance of him.

More than two-thirds of the world's kicks are registered before 9 o'clock in the morning, and most of them by men who would take that same thing they are kicking about as a matter of course two hours later in the day. You may take it for granted that a fellow who is grouchy after 9.55 a. m. is a chronic and there's no possible relax until he's asleep.

It's surprising how the women tolerate it. Some of 'em don't. Occasionally she's the grouch, and then it's awful!

A surly man is an intolerable brute. With a selfish lack of consideration for the feelings of every other mortal but himself, he foolishly imagines that he can growl the world into being desperately afraid of him; while, as a matter of fact, there probably aren't three people in the whole world who are the least bit affected or who care whether he likes it or not.

Funny, when you come to think of it, why a man will go off the handle, and vomit forth his anger like a volcano, when he knows well enough that outside of the thousands that quake, only in his imagination, there probably isn't a soul that knew he was mad. But anger is blind, deaf and dumb and knows nothing.

So you can't afford to give way to your temper, ladies. Leave that to those brutes, the men. It isn't at all becoming, and not in the least bit nice, and such havoc as it works in a pretty face is appalling.

FROM A PHOTOGRAPH OF THE PRINCE OF WALES AND THE CZAR OF RUSSIA.

Resemblance ...t is Startling

CASES of mistaken identity would be less likely to take place if more care were taken in observing individual peculiarities of physiognomy, carriage, poise of the head ... physical personal traits and mannerisms. If, however, Nicholas II., Czar of all the Russias, and his English cousin, the heir apparent to the British throne, occupied less conspicuous positions in contemporary history and mingled more freely with ... of least ...

... two men seem to conspire to make themselves mutually indistinguishable. ... forehead of each is low at the ...ntre, but more prominent about the ...mples; the hair is arranged in practically the same way. Each wears a full grown beard and generously flowing mustache. The differences in height, weight, and bearing are hardly perceptible.

The leading members of royal houses, even when closely related, do not have frequent opportunity of meeting, a circumstances which fortunately preserves the individuality of Nicholas and his English cousin. The resemblance was, however, a matter of constant comment when, about nine years ago, the Czarewitch Nicholas Alexandrowitch crossed the English Channel. The close friendship between the Czar and the future head of the British empire can best be shown in the words of an English political writer a few years ago. He said:

"There are only two men in this country who can speak at first hand of the views, aspirations, and desires of the Emperor of Russia. The Duke of York, his cousin, is one. They met at the funeral of the Queen of Denmark and talked long and earnestly concerning the question of peace. It is an event of hopeful augury that the future King of England should have exchanged at the bier of their common relative the ties of friendship based on peace which unite him to his imperial cousin, the Czar. It is significant of much that at the gravest crisis in his life Nicholas II. should have found great sympathy and support from the English royal family. This year, when the Emperor stood almost alone before Europe committed to the most chivalrous and also the most necessary of crusades again war, the young sovereign found a sympathizer and friend in the Duke of York."

The farms of the United States cover 841,998,000 acres and employ nearly 10,750,000 people.

GENERAL LUKE E. WRIGHT.
(Recently appointed Governor Taft's successor in the Philippines.)

The Wonderful City That Russia Covets

When the "Eastern problem" becomes acute, as it does periodically, attention is attracted anew to Constantinople, the wonderful city upon which Russia has so long looked with envious eyes, and which seems destined in the end to fall under the do-

BIRD'S-EYE VIEWS OF THE CITY OF CONSTANTINOPLE.

CONSTANTINOPLE AN... GOLDEN HORN.

minion of the Czar's empire. But the "Sick Man of Europe" although he may be, the Sultan of Turkey is past master in the art of playing the great powers against each other and of inducing one of them at least to champion his cause, secretly if not openly. England, Russia, France each has played the role of protector, and now it is Germany which will no permit the drastic action which the sultan's course richly merits. Time after time, when the crimes permitted, if not instigated by the Sultan have shocked the civilized world, and when he seemed to have passed the limit of endurance, he has escaped punishment by the same old trick of playing powers against the others. Whether ... not he will be able to apply the same methods with success to the United States in the latest complication ... be an interesting problem.

London's Many Tailors.

In 1851, the number of persons engaged in the tailoring trade in London was 37,000; in 1871 these had increased to 38,000; in 1881, to 4... in 1891, to 52,300, and in 1901, to 5... It is rather difficult to account for this increase, says the London Lance, as it is far in excess of ... crease in the population. It must, course, be due to the fact that ... pay more attention nowadays ... appearance than formerly, and ... quently that, more clothes being ... there is a wider area of employment ... but I hardly think this can be the case.

NEW EXPERIMENTS IN GRAFTING

HENRY COUPIN, in La Nature, Describes the Work of M. L. Daniel, of the Rennes Faculty of Science.

M. L. Daniel, of the faculty of sciences of Rennes, has for some years investigated the question of vegetable grafting, and his researches have modified to a considerable extent our conception of this matter and the conse-

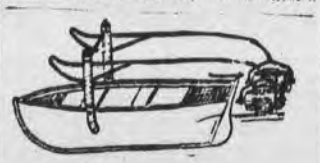
The Samoan Outrigger.

Made the Subject of a Patent by a German Inventor.

Wilhelm Michael von Halein, a subject of the Emperor of Russia, residing at Hamburg, has taken the trouble to patent in this country the outrigger attachment that is so familiar in some of the islands of the Pacific, particularly the Samoan group. In many museums may be seen models of these frail canoes, in which the natives breast the ocean's waves. The essential feature is an outrigger, or arm, at the end of which is attached a wooden float. The effect is to give a larger base and hence to lower the centre of gravity to such a point that it is practically impossible for the boat to capsize, no matter how rough the waves. In the patent above referred to the float is modified, being made in the form of hollow drums, the inventor's



BOAT CANNOT UPSET.

idea being that these being mounted on rollers would thereby minimize the resistance to the boat's headway. In the Samoan Islands these outriggers are usually placed at the boat's side, but in the invention above they are placed just aft the stern, the supports being of such shape, and so disposed as not to interfere with the comfort and convenience of the boat's occupants. As a lifeboat equipment such an attachment might have some value, as its use would prevent capsizing in lowering or hoisting in rough seas.

MAKING NAVAL HEROES.

An Officer's Training is One Which Never Ends.

The education and training of an officer of the United States Navy, says Success, have in view the single purpose of fitting him to execute properly and without faltering command in battle. His education is obtained at the Naval Academy; his training never ends. Upon the completion of four years of study at Annapolis, where he learns the theory and some practical knowledge of his future profession, he spends two years at sea, acquiring information which will be useful when he places his foot upon the first rung of commissioned rank. Returning to Annapolis, he receives his commission, and then is sent back to sea, an "insect" among old settlers, but an ensign and an officer to his family and his friends. As a midshipman he has performed the duties of an enlisted man, and as an ensign he is consequently equipped to drill the division placed under his command. He imparts to the men the intricacies of their calling, displaying patience surprising to a civilian unused to the ways of the service. While recently on board the United States ship Prairie, a training ship for landsmen, I saw Lieutenant Edward H. Watson, one of the young watch and division officers, teach a man how to tie a knot. The knot was simple, but the man was dull. Again and again Watson took the rope and twisted it, directing attention to each stage of the operation as he advanced. At last the student grasped the idea. During the afternoon when free from other duties, he occupied his time in perfecting himself in his lesson. When next he was asked by Lieutenant Watson to tie the knot, there was celerity in the movement which brought forth a word of commendation. The pride that flushed the landsman's face repaid the trouble his officer had taken.

When Philip Was Called Brown.

The late Captain Philip was fond of relating an experience he once had when he was stationed at the Cramps shipyard in Philadelphia as inspector of the cruiser New York, which was ... building there. One day, when ... stopped for the noon hour, ... orderly looking man come ... the ladies, and proceed ... the ship with as ... were the designer and ... soldierly man stopped beside ... ventilators which were lying ... to be put in place, and, ... with his little cane, rem... air of profound wisdom: ... the smokepipes," and approach... his cap as he said: "Excuse me, sir, that is not the place for the arter. That is a hammock netting, where the men stow away their hammocks during the day. And there are not smokepipes, but ventilators." The military man drew himself up to his greatest height and surveyed the man in dungarees with glacial dignity. "Excuse me," he said, with heavy emphasis on the me, "but I am Captain Blank, of the army, and I think I know a smokepipe when I see one." Captain Philip declared that it would have been almost a crime to take down a conceit so that, ... he made no reply to the military man whatever; but turned and went about his work, leaving Captain Blank to finish explaining the intricacies of the cruiser to his friends.—Argonaut.

What Paris Does For Poor Children.

In Harper's Magazine Stoddard Dewey gives some interesting facts concerning the fresh air colony maintained by the municipality of Paris for the children of the poor:

"In 1889 there were 200 children in the profit by this colony of Mandres-les-Vair; now there are 1000 each year. ... the property has been handed over permanently to the Eleventh Ward. The movement has become general in the Paris schools, and the municipality has come to the aid of the insufficient ward school funds. In 1891 the city raised its contribution for these school colonies to 200,000 francs, and the school funds of the twenty wards gave 94,000 more; and 5536 children, under the care of 220 teachers, had the summer outing. Mandres is the largest of these colonies; the total expense of journey back and forth and three weeks' stay is fifty-three francs and eighteen centimes for each child—a little over $10, as exchange goes."

A British Floating Exhibition.

A scheme is reported to be on foot for the organization of a floating exhibition of British manufactures which will make a tour of the British Empire. The plan is to fit out a large ship with samples of all classes of manufactured articles which Great Britain supplies or can supply to her colonies, including even fairly heavy machinery. Austria did the same thing some time ago, when a steamer carrying all kinds of samples left Trieste for the Far East, Australia, etc., but in the end the enterprise was an absolute failure.

Reflections of a Bachelor.

A widow and her fun are soon started.

The thing that interests a woman most about a joke is trying to see the point.

A man's stomach has a lot more to do with reforming him than has conscience.

The wonderful thing about a woman making love to a man is that when she is doing it she acts as if he were.—New York Press.

North Plainfield Weekly Review.

Founded March 24, 1900.

An Independent Republican Newspaper published every Saturday at 33 Somerset Street, North Plainfield, N. J.

HARRY H. WEBB, Editor and Proprietor.

TERMS OF SUBSCRIPTION.

If paid in advance $1 per year; if not paid in advance $1 25 per year. The REVIEW is delivered by carrier in Plainfield and North Plainfield, and is on sale at news stands

Long distance and local telephone 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, OCTOBER 31, 1903.

REPUBLICAN NOMINATIONS.

FOR COUNTY CLERK:
A. G. ANDERSON,
of Somerville.

FOR MEMBER OF ASSEMBLY
CHARLES M. DOLLIVER,
of North Plainfield.

FOR CORONER:
W. HOWARD TOMS,
of Warren.

FAIR PLAY.

We have placed at the head of our columns the full Republican ticket for the reason that it embraces the party nominations and because the REVIEW is a Republican newspaper and believes in Republican principles. The endorsement or not of the entire ticket at the ballot box we leave to the voters, as we do not consider it our duty to give it our uncondi-

county clerk. The term is for five years. The duties of a clerk are very exacting and call for sobriety, intelligence and capacity. As the Republican candidate possesses all these attributes, and they are well known to everybody who is acquainted with him, we have no doubt the voters of the county will endorse him at the polls without hesitation. A. G. Anderson is a man of correct personal habits, agreeable temperament, courteous to everybody, clean and educated; he will make an ideal clerk. He is above the usual class of politicians who seek public office, and he should therefore have a very large majority, irrespective of his party affiliations.

In the matter of the nomination for Assembly, mixed questions are presented, and it would be absurd for the REVIEW to ignore them when everybody concedes their existence and importance.

At the Republican County Convention only one candidate was mentioned for Assembly and that candidate was brought forward by Mayor Smalley and his immediate friends without any knowledge on the part of the voters of North Plainfield that a local candidate would be produced. It was not until the morning of the convention that it was made known that there would be a candidate from this borough. The Mayor had his friends, as usual, at the primary and captured the delegation, and it was his delegation that agreed (when, or how, or why, was not made known to other Republicans who are supposed to have an interest in good politics) to support Mr. Dolliver, a young man just admitted to practice law, unheard of in politics before, and who had not (so he states) sought the position. Mayor Smalley made a public speech applauding Dolliver's nomination and stood sponsor for its good results.

We have no thought of saying a word derogatory to the Republican candidate, the situation not being of his choosing, and his personal character being above reproach, but we do believe that men of experience should be sent to the Legislature. Possibly this is a matter of opinion, depending as much upon the man as upon his exact age.

But there are other facts to be considered, if we are to be fair to both candidates.

Mr. Swackhamer was elected a year ago by the spite votes of Mayor Smalley and his followers in the annexation scheme, which a majority of North Plainfield voters had previously condemned. Both parties in sympathy with annexation voted for Mr. Swackhamer. He went to the Legislature and made a record which was heard of from Sussex to Cape May. He was uniformly right upon all questions not political and there he was conservatively Democratic. Then came the annexation repealer, which the county he represented demanded. Threatened and cajoled by his annexation friends, he stood manfully by his guns and refused to betray his trust. "My office is a county trust," he declared, "and I cannot betray that trust though it cost me friends and my office."

At that point he was told that if he made a speech in favor of the repealer he could not expect to be returned to the Assembly! He replied "all right; if I am to die, I will die an honest man."

As a sequence to that threat, everything possible is now being done by Democrats and Republicans who are in sympathy with annexation, to defeat Mr. Swackhamer.

That is the situation briefly stated, and so we leave it entirely with the people, who know that no United States Senator is to be voted for this year and no National issue is at stake, therefore it is an admirable opportunity to select a man

views and hi

THE NEW SCHOOL LAW.

It is claimed that no law on the statute books of New Jersey has been so thoroughly discussed before it passed the legislature as the present school law, which became operative last week at a special session of the legislature.

Four years ago the Governor appointed a commission to revise the school laws, which had become contradictory on account of the piecemeal manner in which they had for years been accumulating.

A year was spent by the commission in the attempt to frame as nearly a perfect law as possible. Hearings were had with educators and municipal officers all over the state. Hundreds of letters were sent out asking for suggestions and criticisms of the law. In 1900 the commission presented to the legislature a bill which was passed, with several amendments, and subsequently declared unconstitutional.

A new act was then prepared by the best legal talent in the state and presented to the legislature and became a law in 1902. This law was recently declared unconstitutional in that it provided for an erroneous classification of districts. That decision was of such vital importance that Governor Murphy called a special session of the legislature, as a result of which we now have one of the best, if not the very best school laws of any state in the Union. It represents the result of four years of active and untrammeled public discussion, of the action of two legislatures, and of two reviews by the court of errors and appeals. No law upon our statute books ever had a more complete advertisement than the present school laws.

It is not to be expected that it is perfect, but it will render order out of the chaos into which our public school system was thrown by reason of the decision referred to, and allow plenty of time to thoroughly discuss the question and prepare the way for the next legislature to amend it if necessary.

NEW YORK CITY POLITICS.

The success of the Low ticket, says the *Review of Reviews*, will be the best thing that has ever happened for the municipal well-being of a great American city. But in any event, the waging of the fight will in itself have been a very great thing. While a triumph of the Fusion cause at the polls would be a matter for congratulation throughout the country, it should be borne in mind that the greatest triumph was gained in the very fact of the persistence of the Fusion movement. New York City, with its nearly four millions of people, its variety of languages, its clashing of interests and race prejudices, furnishes what, in the language of the day, might be called an exceedingly difficult municipal "proposition." To raise this Fusion standard in such a community as New York, to place the cause upon the basis of commonly recognized principles, and to win for it the support of so large a number of elements and groups, is a marvelous achievement in the sphere of popular self-government. Few events of more hopeful tendency have marked the beginning of this twentieth century than the persistence of the Fusion cause in 1903 after its victory in 1901. Its lessons will have their effect in every city of the United States.

TUESDAY'S ELECTION.

Next Tuesday, November 2nd, is the day appointed for the election in Somerset County of a County Clerk, a member of the Assembly, and a Coroner.

Both Republican and Democratic candidates are making a thorough canvas, and both sides are equally confident of success.

For County Clerk the Republicans have named A. G. Anderson, of Somerville; and the Democrats have named John L. Anderson, of Bridgewater township. As both ... bear the same name ... voters should be su... they vote for A... and not John L...

A... Anderson, coun... for an honest, effi... popular man—a man ... all over Somerset county as ... fifteenth anniversary by appearing in a new and enlarged form, last week, showing unmistakable marks of properity. The *Herald* is one of the outspoken, fearless Republican newspapers which deserves success, and judging from its appearance this week it has received its reward.

PLAINFIELD is another town that is waking up. She is coming to realize the fact that the trading stamp is a detriment to her and her business men. A movement is being inaugurated that bids fair to knock out the stamps in the first round. Morristown not behind her in this, but has a fair start and from present appearances the obnoxious stamp will soon be a thing of the past.—*Morristown Chronicle.*

S.s the Elizabeth *Daily Journal*: "Jaes T. MacMurray, the leader of the Plainfield Republican bolters is out with a card of explanation. He attempts to answer the Plainfield Republican Club, which showed the bolters in the recent county convention to have been wholly inexcusable, but the only thing he is really successful in owing is his animosity toward Senator Kean and the chairman of the County Republican Committee."

C. HOWARD TOMS, of Warren Township, candidate for Coroner on the Republican ticket, is well known and respected throughout Somerset county and needs no introduction to the voters of the county. At the last election Mr. Toms was also a candidate for the same office, and was the only Republican on the county ticket who was elected.

It was no fault of his that there was no vacancy for him to fill, and he should receive a most flattering vote next Tuesday.

ue of the above-stated writ of Fi. Fa.,
irected and delivered, I will expose for
ublic vendue, on
, THE SECOND (2) DAY OF NO-
VEMBER NEXT,
e hours of twelve and five o'clock in
n of said day, that is to say, at two
at the Court House in Somerville,

ing tract or parcel of land and
nafter particularly described, sit-
l being in the borough of North
the county of Somerset and State of
bounded and described as follows

a stone in the middle of the road
and corner of Isaac Manning's
g the middle of Warren st north
and one-quarter degrees west
eighty-four links to a stone,
Manning's corners; thence north
and one-half degrees east ninety
in David Coon's corner; thence
wo chains and eighty-four links
ri a reet; thence along said Pearl
ty-two and one half degrees west
to the point or place of beginning
g one-quarter of an acre of land, more
. Being the same premises conveyed by
a P. Gamberton, now Emma F. Hobbs, to
George M. Merrill, by deed dated December 18
1901.

CALVIN D. McMURTRY, Sheriff.
JOHN H. O'CONNOR, Solicitor.
Dated September 21, 1903. [8.10]

SHERIFF'S SALE
IN CHANCERY OF NEW JERSEY.

Between John D. Kirch et al., Ex'rs, etc., complainant, and Walter P. Lindsley et al., defendants.—Fi. Fa. for sale of mortgaged premises.

By virtue of the above stated writ of Fi. Fa. to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE TWENTY-THIRD (23) DAY OF NOVEMBER NEXT.

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit:

All that tract or parcel of lands and premises, situate, lying and being in the township of North Plainfield, in the county of Somerset and State of New Jersey:

Beginning at a stone planted for a corner in line of other lands of Elias Allen and being the southeast corner of lands this day conveyed to said Elias Allen by Aaron Allen, and running (1) thence along the line of other lands of the said Elias Allen in a magnetic course of north sixty-seven degrees and four minutes east (N. 67° 04' E.) a distance of one hundred and twenty-three and no tenths (123.0) feet to a cedar stake where there formerly stood a white wood tree; (2) thence continuing the line of other lands of the said Elias Allen north fifty-nine degrees and forty-five minutes east (N. 59° 45' E.), a distance of three hundred and ninety-eight and thirty-six one hundredths (398.36) feet to a stake and stone heap [illegible] the line of lands

[illegible] north eighty-nine degrees and forty-five minutes west (N. 89° 45' W.), a distance of two hundred and one and seventy-eight one hundredths (201.78) feet to a [illegible] and corner; (5) thence along the line of lands of formerly Dr. Osborn on the northerly side of the second mountain south eighty-nine degrees and twenty minutes west (S. 89° 20' W.), a distance of eight hundred and ninety-five and [illegible] one hundredths (895.95) feet to a stone planted for a corner in line of lands of formerly said Osborn, said stone being the northeast corner of lands this day conveyed to Elias Allen by Aaron Allen; thence along the line of lands this day conveyed to Elias Allen by Aaron Allen, running first over and down the mountain (through lands of the grantors), making and establishing a division line for property of Aaron and Elias Allen, south no degrees and nineteen minutes west (S. 0° 19' W.), a distance of thirteen hundred and fifty and no tenths (1350.0) feet, more or less, to a stone planted for a corner; then second along the edge of woods north eighty-nine degrees and forty-one minutes west (N. 89° 41' W.) three hundred and twenty-five and ninety-five one hundredths (325.95) feet to a stone planted for a corner at the northerly end of the old lane; then third south five degrees and thirty-eight minutes east (S. 5° 38' E.) down the old lane six hundred and three and three tenths (603.3) feet to a stone planted for an angle point; in the old lane, then, fourth, south twenty-eight degrees and fifty-three minutes east (S. 28° 53' E.) across the valley road and the valley, a distance of eighteen hundred and ninety seven and thirty-seven one hundredths (1897.37) feet to the first above mentioned stone and place of beginning. Containing 76 68-100 acres, more or less.

Being the same premises conveyed to the said Walter P. Lindsley by deed of Elizabeth D. Turney (single, bearing date April 10, 1902, and recorded in Somerset County Clerk's office, in Book S No 9 of Deeds for said county, on pages 292, etc.

THE LOST GALLEON.

Her decks are drowned in sea-wrack, her guns are sunk in sand,
Where she lies in the still water, hard by the Irish strand;
There are dead in her gilded cabins, there are white bones in her hold,
With the coffers rotting plank from plank, brimming o'er with gold.

Broad o' the beam they built her, that they might load her deep,
They sowed a goodly harvest for the fierce salt seas to reap,
They freighted her with merchandise, with gold they weighted her well,
Ere they steered slowly to her bourne their castled citadel.

God rest their souls where they lie low, where she swirled down of yore
With chanting priest and shrieking slave, a stone's throw from the shore!
Nor all their piled-up ingots, nor all their gold could save—
Under the cliff together, the Don and the chained slave.

Far o'er the gray-green waters goes sound of gull and gale;
White caps are on the breakers and the sun on a patched sail,
But she lies lost and moldered, with her captains swart and bold
Dead in her gilded cabins, and weighted down with gold.

—London Outlook.

The Lightning Express

BY LIEUT. MURRAY.

HAS the reader ever ridden on a locomotive at top speed? It is a queer experience, especially to one not at all accustomed to that peculiar mode of traveling, and is calculated, under some circumstances, to try the nervous system to its utmost tension. If you would realize the power and irresistible force of a locomotive under headway, step on the rails for a moment, on a dark night, and look up the long line of perspective at an on-coming engine with its blazing signal lantern in front, like the eye of Cyclops, and its roar, echoed by the trembling earth, like some fabled giant's breath. It is the very epitome of mechanical power harnessed to the service of human intelligence. What a frightful means of sacrifice, what a marvelous agent for good!

Again, stand on the platform of a side station while the express train passes at its average speed of thirty miles an hour, and you have another example of the amazing power of steam. Your nerves will involuntarily contract themselves as the train rushes swiftly by, your eyelids will close mechanically, and you almost gasp for breath as the air vacuum surrounds you, caused by such huge and rapid atmospheric displacement.

But it was upon an engine itself that the experience of which we write was gained, and though some years have now intervened it is as fresh in the memory as though it had occurred

"How far ahead can you see?" I asked.

"About a couple of rods such a night as this, unless a strong signal lantern is shown, then we can see farther."

"Two rods would be of no real advantage if we were to encounter an obstacle on the track," I suggested.

"Well, no; you can't stop an express train much inside of a quarter of a mile with the style of brakes we now have."

"Ah, that's it. You require a more powerful sort of brake; is that what I understand you to mean?"

"Exactly, one that will act with greater power, and yet not bring a train up all standing, as it were. That would be almost as bad as to run into an object dead ahead," replied the engineer.

"Something of that sort will be invented."

"Oh, yes, one of these days; I've always said so."

In the meantime, the Lightning Express was rushing on its way, straight into the intense darkness, which, if possible, was now rendered more apparent by a fleecy fall of snow, which was packed all about us by reason of the great speed at which we were running. I could not but admire the perfect coolness of the two men who were my companions, though my own senses were in a constant state of nervous excitement. The intense darkness, the blinding snow into which we drove, as it seemed to me not knowing

could not quite suppress an ejaculation, at which my companions would glance at me with an amused smile. Custom had inured them to these occurrences, so that they gave them no heed.

On, on, and still the driving snowstorm and the darkness reigned supreme. The stoker fed the fire, and the engineer, watchful as ever, peered ahead. I was perhaps getting to be a little sleepy from the force of the wind and the lateness of the hour, for it was now about midnight, when, fearing to drop asleep, I arose from a stool on which I had been sitting, and determined to change to the passenger cars at the next stopping place. Just as I had made this mental resolve, there came suddenly a crash at the front window of the engine that sent every drop of blood back to my heart with a sickening thrill. I had time to draw one long breath when the engineer whistled "down brakes," and shut off steam from the engine, exclaiming:

"My God what is that?" while both he and myself shook the broken glass from our faces and necks, and he still further reversed his engine.

"It's a lantern," said the fireman, picking up what remained of the article which had come crashing in at the window.

"Throw at us," said the engineer. "That means danger if it means anything."

In the meantime, the train had been brought to a standstill, the conductor had appeared at the side of the locomotive to consult with the engineer, the bell was rung, the whistle started, and gradually we ran backward toward the spot where the lantern had struck us. We had retraced our way for nearly a quarter of a mile, when a man suddenly appeared through the darkness, and came to the locomotive.

"Did you throw that lantern?" asked the engineer.

"To be sure I did, and worse luck if I hadn't hit ye!" was the answer that came to our ears with unmistakable Milesian accent.

"Who are you?" asked the conductor.

"I'm trackman between here and Brandon."

"Well, what's the matter?" asked the engineer.

"The matter is a broken rail, just beyant, as would have sent ye all to glory!" replied the Irishman.

The affair was soon explained. During the winter season the frost often renders the rails very brittle, so that they break under a passing train. In consequence of this liability to danger a corps of trackmen are so placed as to walk over and examine every mile of the northern roads, in extreme weather, after the passing of each train. These trackmen are supplied with the ordinary tools for reparing

CHILDREN'S DEPARTMENT.

How to Build a Barrel Boat.

The barrel boat can be put together in one day, and the only part of the boat which need be bought is the material for the sail.

Figure 1 shows the hull of a barrel boat. It consists of a bow barrel and a stern barrel joined together by one strong plank and a simple outrigger which extends from the plank.

In order that the barrels may not present a flat front, which would be difficult to push through the water, they are fastened to a plank at an angle.

The angle is made by placing between each barrel and the plank a triangular-shaped brace, such as shown in Figure 4.

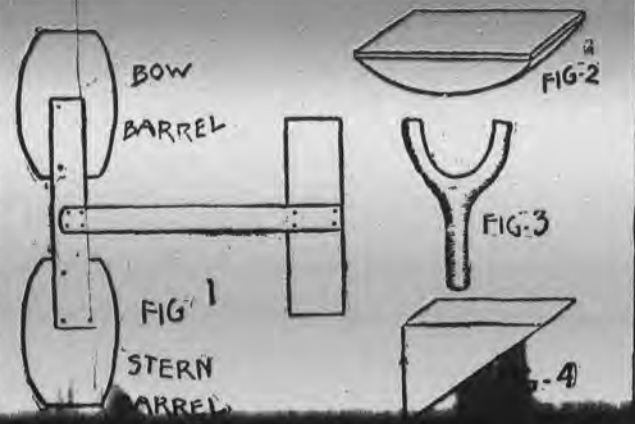
Both barrels must be covered with tar, and painted, so that they will be absolutely water tight.

The outrigger, shown in Figure 2, is a small scow-shaped affair, about two and one-half feet long and one foot wide.

An ordinary oar or paddle is used for steering.

A notched stick, such as is shown in Figure 3, or an iron rowlock can be fastened over the stern barrel to hold the steering oar.

The barrel boat, consisting as it does of two large air-tight compartments, is



ing father's pipe upside down, with father's gun trailing on behind, and with a strange look about the stomach, as though father might have been resting on the inside.

"We won't go home till mornin'," sang the bear, as he staggered along.

"Ah! my love, I shall soon enfold thee in these loving arms," he cried, as he saw the girl on the shore.

"Help! Help!" she cried. "Who will save me?"

"Madame, leave him to me," said a miner, who, taking his ax, cut a large hole in the ice.

Mr. Bear, who had tasted too much from father's flask before swallowing father, did not see it.

Crack! Swish! Down he went. As he passed under the miner hit him a blow with the ax. "Some animiles do'n' know when they's well off," he said dryly.—Greene Street, in Pittsburg Dispatch.

MONKEY DISCIPLINE.

One of the monkey cages in the New York "Zoo" contains a mother monkey and her baby. Some visitors one day gave the mother a chocolate peppermint. She tasted it, smacked her lips,

SCIENCE & MECHANICS

In Europe improvements in rail and steam transportation promise a vastly increased output from ore fields in Norway and Sweden which lie north of the Arctic circle. Only a beginning has been made with the ore deposits of Eastern Cuba.

The coal-handling machinery installed at the Lincoln Wharf Power Station of the Boston Elevated Railroad Company recently lowered the world's record for rapid unloading. The coal was raised ninety feet above tide water at the rate of 320 tons per hour.

A combination of tire manufacturers has been effected in New York City and henceforth automobile manufacturers must submit to the dictation of the rubber men concerning what size of tires they may use on vehicles of certain weights and also what style of rims they shall use.

Egypt is to have a traveling hospital for the benefit of sufferers from ophthalmia who are unable to use the hospitals already in existence. The experimental dispensary is to visit country districts where the disease pevails. If its work is successful, the number of dispensaries will be increased.

A scientific expedition to explore the northern parts of the Pacific Ocean will leave Stockholm next April by railway for Port Arthur by way of Siberia. At Port Arthur the expedition will embark on a ship under the leadership of Mr. Kolthoff, who will be accompanied by five or six other Swedish naturalists.

One reason why modern silk wears so badly is because it is adulterated with tin. The silk has to be boiled to get rid of its natural gumminess, and as this process reduces the weight the tin is added to restore the balance. Black silk contains the greatest proportion of weighting, and the soft tussore and wash silks are unweighted.

The astronomical expedition organized by D. O. Mills, the American millionaire, is now installed on a hill 1000 feet high close to Santiago, Chile. The mission of the expedition is to throw additional light on the motion of the solar system through space. The principal object in going there is to ascertain the velocity of the brighter stars of the Southern Hemisphere.

Americans.

Among the ancient peoples none were more curious than the Americans.

Their god was Noise.

The worship of Noise was very similar to the worship of Moloch, practiced in still more remote times, for both consisted mostly in the sacrifice of children.

Beginning each year with the summer solstice, it was the custom of the American children to maim themselves in honor of the god Noise.

Some enthusiasts carried the orgy to such lengths that they died. This was called Tetanus.

There were Americans who did not believe in the god Noise, as there were skeptics and infidels in all ages.—Detroit Free Press.

The average depth of the ocean is about two miles. N. Y.—44

The Oldest Ferry.

Perhaps the oldest ferry in the w is the cross-channel service from lais to Dover. It has been in ence for more than twenty cent and the vessels which have be gaged in it include every va shipping, from Caesar's ... propell...

ary thaw had ... pearance that year, and ... that northern region had b... bedding the frost to a great... the soil. After purchasing our ... for the Lightning Express, as ... called, and placing valise and s... coat safely in one of the passen... cars, we had strolled about the depo... until we finally paused beside the large ... and powerful locomotive which was to draw the train on its downward trip. It was a superb piece of mechanism, with its brass mountings as bright as patient toil and incessant care could make them, while the iron and steel parts conveyed a sense of enormous strength even at a glance. The huge engine seemed almost endowed with animal life as it paused there with restrained power, like a thoroughbred horse impatiently at the bit which curbs him. The engineer and firemen were both in their places, quietly awaiting the signal which should start the train for the South. A sudden thought struck me—I had never ridden upon a locomotive; it would be a new sensation. Was it possible to do so to-night? I asked the engineer, who shook his head, but still answered me pleasantly:

"There is the superintendent yonder; ask him."

Seeking the individual designated as the superintendent, I was both pleased and surprised to recognize in him an old friend, who whom, years ago, I had been on intimate terms. I finally told him that I had a singular request to make, and expressed my desire to ride with the engineer. He somewhat reluctantly assented to my desire, but not without numerous cautions, and the remark that it was quite exceptional to grant such a privilege to any one.

Walking to the side of the locomotive, the superintendent introduced me to the engineer, and gave him directions to accommodate me as it regarded the intended purpose.

Five minutes later the signal bell was rung, the shrill whistle sounded, steam was gradually let into the cylinders, and the train rolled out of the depot into the darkness, which for a moment was rendered more dense by contrast with the well-lighted depot left behind. I at once bestowed myself so as not to be in the way of the engineer or fireman, and curiously watched the novel scene immediately before me, for that was all I could possibly see.

"Never on a locomotive before?" questioned the engineer.

"No."

"Can't see much such a night as this."

"No; it's as dark as a pocket," I replied.

"Of a nice summer's day it's all very well," continued the engineer, "but of a dark night—well, I don't think it's very jolly." All the while he was looking straight ahead, with his hands on the valves, to shut off steam and to whistle "down brakes" at an instant's notice.

wreck the train. Finally, my excited brain began to recall some of the many railroad accidents of which I had ever read or heard, until, as I had just ...ived at the height of miserable an...tion, I suddenly exclaimed:

"...t is that?" on hearing some... ...e a prolonged whistle ahead.

"Bedad! It was the only thing I could do," said the honest fellow, as he gratefully pocketed a purse of fifty dollars made up by the passengers.

We crept carefully on to the dangerous spot, where a detention of twenty minutes served to mend the track sufficiently to permit the passage of the train, and we once more dashed ahead in the darkness; but I shall never forget that experience upon the Lightning Express.—New York Weekly.

Tame Squirrels at Harvard.

Probably nothing makes a greater impression on the visitor to classic Cambridge than the surprising tameness and absolutely fearlessness displayed by the squirrels and pigeons to be found in the college yard. This impression is especially emphasized if the visitor happens to come from the West, for in that section it is difficult to get even within gunshot of the little rodents, which are there treated only as wild game. It is a very ordinary thing when a person is passing through the yard for one of the squirrels to jump upon his shoulder from some neighboring tree perhaps, or run up his legs, and, having thus unceremoniously "boarded" him, with the greatest business-like dispatch, not to say with brusqueness that verges on impudence, to go through his pockets in search of nuts. And these squirrels are very particular about the kind of nuts they eat. They scorn peanuts, and will eat them only when hard pressed for food; but once let them understand that you have pecans about you, and you will have difficulty in escaping them until the last nut is gone. The peanuts seem to make them thirsty, but their appetite for pecans never seems to be satisfied.—Leslie's Weekly.

BEAR WHO LOVED THE MAID.

Way up in the frozen country near the North Pole there lived a large polar bear. He was a handsome fellow of enormous size, with a silky white coat of great beauty, of which he was very proud. He was the beau of all the lady polars in the district where he lived, and would have been made a "lion" if he had not already been a bear.

Near by there came to live a company of miners who were after gold. One of these miners had a very lovely daughter, and as soon as Mr. Polar Bear saw her, he fell desperately in love with her, and imagined that of course as all the ladies of his own set had loved him, she ought to return his love. But she refused him, and he, growing very savage, determined to have her if he had to carry her off instead.

"Father," she said one day, "you must kill that bear; he's getting too familiar."

"All right, daughter, never fear; I'll fix him."

But he little knew with whom he had to deal.

The hours went by, and father did not return. Calling one of the men, she started from the house across the ice to find him. Just as they reached the shore a strange sight met their eyes. There came Mr. P... at, smoking father's pipe upside down, with father's gun trailing on behind, and with a strange look about the stomach, as though father might have been resting on the inside.

"We won't go home till mornin'," sang the bear, as he staggered along.

"Ah! my love, I shall soon enfold thee in these loving arms," he cried, as he saw the girl on the shore.

"Help! Help!" she cried. "Who will save me?"

"Madame, leave him to me," said a miner, who, taking his ax, cut a large hole in the ice.

Mr. Bear, who had tasted too much from father's flask before swallowing father, did not see it.

Crack! Swish! Down he went. As he passed under the miner hit him a blow with the ax. "Some animiles do'n' know when they's well off," he said dryly.—Greene Street, in Pittsburg Dispatch.

It Grew and Flourished.

Practical ... ... such an extent in the vicinity ... ...ple, Montgomery County, Md., ... that residents of that section of the country are constantly on the lookout for some joke to be played on them.

It happened some time ago that a number of the residents of Poolesville became interested in what was said to be the seed of a new kind of plant. Among those who received samples of the seed was a woman who was unsuccessful in its propagation.

Despite all her care, the seed failed to come up. She was telling of her bad luck to a mixed company, when one of the jokers said he had met with success in growing the seed and would be pleased to give the lady one of the plants he had raised. The lady was delighted at the offer, and expressed her thanks accordingly.

In due time she received a small plant, supposed to have sprouted from the seed which she had tried in vain to propagate. The plant was handled by her very carefully, placed under glass and treated as a pet.

It grew and flourished beyond her fondest expectations, and when it had reached its maturity she found she had nurtured a specimen of the Jamestown, or Jimson, weed, which the joker had palmed off on her.—Baltimore Sun.

The Ancient Breton Tongue.

Ethnologists and philologists in England have this summer made an interesting discovery. In the fall of every year large numbers of boys come to England and peddle around the country side strings of onions. It is a custom which has been in existence for several years, and has been increasing annually. These have only the barest smattering of English, but it is an interesting fact that they have little difficulty in making themselves understood among the Cornish, and no difficulty in Wales. The latter fact is not so remarkable, since the connection between the Welsh language and the Armorican, which is spoken by the Bretons, is very close. But the last person able to speak the ancient Cornish tongue—also closely allied to the Armorican—died in the 70's; yet enough of it remains to enable the Cornish to get along with the Breton lads.

Growth of Cement Industry.

Although the first plant in America for the manufacture of cement was laid down in 1865, the progress of the work was slow up to the year 1890. In that year the production of Portland cement was about 200,000 barrels, but eleven years late, in 1901, the production was 8,000,000 barrels; the production for 1902 for the Lehigh district alone is estimated at 12,000,000 barrels.

PUTNAM FADELESS DYES cost but 10 cents per package.

Chief Cleverness.

A magistrate's clerk has been known to have his tie pin stolen while in court, and one in Birmingham a few years ago lost his coat in the same way; but a more remarkable example, perhaps, of a thief's cleverness under the very eyes of the police was that of the burglar at Clerkenwell, who managed to conceal two diamond rings while the police were searching him, and passed one of them to his wife in the cell while the police were looking on. The rings were under his tongue, and one of them passed from his mouth to his wife's when he was kissing her good-bye.

A VOICE FROM THE PULPIT.

Rev. Jacob D. Van Doren, of 57 Sixth street, Fond Du Lac, Wis., Presbyterian clergyman, says: "I had attacks of kidney disorders which kept me in the house for days at a time, unable to do anything. What I suffered can hardly be told. Complications set in, the particulars of which I will be pleased to give in a personal interview to any one who requires information. This I can conscientiously say, Doan's Kidney Pills caused a general improvement in my health. They brought great relief by letting the pain and correcting the action of the kidney secretions."

over the bust. The cape is cut in deep points over the shoulders and is square across the back. The sleeves are tucked above the elbows and are full below and the finish is cut in points at both back and front.

The quantity of material required for the medium size is five and one-fourth yards twenty-one inches wide, five yards twenty-seven inches wide, or two and seven-eighth yards forty-four inches wide.

"The Ribbon Round Her Slender Waist."

The suede belts, wide in the back, so as to drape prettily around the waist, are the newest thing. Large silver or gold rings are used to join the back to the straight front pieces. These belts are in all colors, but with blue serge the natural suede color is prettiest. In soft kid are some of the newest belts. They may be drawn tight around the waist or left straight, for they are broader in the back than in the front. Belts of ribbon should be made on boned frames and broad in the back.

Improvement of the Low Hat.

The days of the plateau and "pan-cake" hat are numbered, if one can judge by the display at the leading millinery departments. Every bit of headgear has a crown of some kind, higher or lower, as the case may be, but yet a decided elevation above the flat, far-spreading brim. Perhaps the most artistic shape among the collection is a Duchess of Devonshire in black velvet, with a slight bell crown four or five inches high. It has, moreover, a gradual flare at the left side, and is dented gracefully here and there to receive the two long plumes, without which no "swell" hat is complete this year.

velvet bonnet in a sort of a toque shape has a decoration of pale blue orchids on one side and a twist of blue velvet where the lace strings are attached.

Shirt Waist

Shirt waists with yoke effects are conspicuous among all the latest designs. This May Manton one is exceedingly novel and effective and suits the entire range of washable fabrics. As illustrated, however, it is made of blue French flannel stitched with corticelli silk. The double box pleated effect at the front is peculiarly noteworthy and desirable and the points that extend over the yoke are essentially novel. With the waist are worn a linen collar and a silk tie, but a collar of the material can be substituted if preferred.

The waist consists of one smoothly fitted lining, that can be omitted whenever it is undesirable, the fronts, back and yoke. The fronts are laid in wide box pleats with a tuck at each edge, but the back is tucked to simulate box pleats only. The sleeves are ample and form fashionable wide puffs at the wrists, where they are finished with shaped cuffs.

The quantity of material required for the medium size is four and one-

A SERMON FOR SUNDAY

A DISCOURSE ENTITLED "AN OLD QUESTION FOR THE NEW AGE."

The Rev. C. R. McNally Talks Instructively on a Subject of Vital Importance to Us All—The Highest Type of Life is That Spent For Others.

BROOKLYN, N. Y.—In the Sixth Avenue Baptist Church Sunday morning, the pastor, the Rev. Charles R. McNally preached on "An Old Question for the New Age." His text was from John x:24: "If Thou be the Christ, tell us plainly." Mr. McNally said:

The men who asked this question were dead in earnest. They asked it because the answer was of vital import to *them*. That word "Christ" was laden with a wealth of meaning for these Jewish questioners. Our word Christ is the offspring of the Greek "Christos," which in its turn inherits all the *meaning that the Hebrew* embodied in his word "Messiah." Around this word for hundreds of years all Jewish life, political and religious, had centered. The Psalmists had made it the dominant note in *many of their sweetest songs*. Its multi-colored shadings had formed the warp and woof of prophetic visions. The mother as she lulled her little one to sleep sang of a Messianic hope. The little lad as he came to *his father's knee asking for* a tale had his imagination fired by the story of what would be when Messiah should come. More than the name of Cromwell or Wesley to England, and of *Washington or Edwards* to America, was the name of Messiah to a Jew, for it was at once the battle cry of his political liberties and the keynote of his religion.

The Jews as they thought of the Messiah may be divided into two classes, those whose conception was predominantly religious and spiritual, and those whose thought was predominantly political. I say predominantly because the two views were commonly blended. The more spiritual hoped for the deliverance of the nations from the bondage of sin, and the religious supremacy of the Jewish nation *through the ministry of the Messiah*, while the less religious looked for the political pre-eminence of the Jews under the leadership of the Messianic King. However divergent the views, in two things all were agreed—the coming of the Messiah meant Jewish pre-eminence, and he in his coming would be the especially anointed of God, having the powers, the words and the spirit of God, he was to be the instrument of God, the voice of God's will to and for the nation. Earlier in the history of the nation the conception was more spiritual, but by the time of the coming of Jesus of Nazareth their hope had lost its higher and more spiritual character.

One morning toward the close of His earthly ministry, when the chilling blasts of winter had driven Him from the open courts of the temple to a sheltered spot, Jesus, the now far famed teacher and claimant of Messianic honors, might have been seen pacing up and down the paved inclosure known as Solomon's Porch. It was the feast of dedication and the fathers of the nation were gathered in Jerusalem. There was much agitation and conflict among them. The fame and claim of Jesus of Nazareth was known to all. Many of these very men had followed in the crowds to see and hear Him. The more spiritual had felt a strange stirring of the soul in response to the call of this strange teacher to a purer and more exalted life, but surely they reasoned *this* could not be the Christ—He was of different from what they had expected the Christ to be. The less religious were even more puzzled. The life of Jesus from the creature comfort side was nothing to be envied. There were [illegible] with his shabby clothing. Of one thing they were sure. He was a dangerous man, for while by implication and even openly He claimed to be the Christ, He in no way corresponded to their idea of what the Christ should be. Surely He was not the Messiah of God! Upon what could such a man as this base such a claim!

While Jesus paced thoughtfully up and down within the porch He was quickly surrounded by an eager, pressing crowd, some intense with yearning for assurance *and satisfaction of soul, others dark with* the clouds of stricken conscience and the maliciousness of disappointed hatred. Notwithstanding their varied feelings, all alike were anxious to ply Him with questions. *Eagerly they pressed upon Him the vital* question "How long wilt Thou hold us in suspense?" literally, "How long wilt Thou lift up our souls?" excite us, hold us between hope and fear? "If Thou really art *the Christ, then tell us plainly.*" Such is the inevitable question which must be asked by every soul when brought face to face with the claim of Jesus to be the Christ of God. Was He the anointed of God? Was He "the King's Son" who should be called "Wonderful, counselor, the mighty God, the everlasting Father, the prince of peace?" Was He indeed the Christ, or was He an imposter or a weakling, illumined by the fervor of His own enthusiasms? These questions as old as Christianity are vital to our day and hour. If He is not the Christ we may be done with Him and go our way. If He is in very truth "the anointed," "the sent of God," we are bound to listen to His voice as the voice of God, to learn His precepts and obey.

To our question "Art Thou the Christ?" Jesus makes answer; note His words:

"I told you, but ye believe not." The immediate appeal of Jesus was to His verbal attestation of His Messiahship. Already He had told them that God was His Father, that the Father had sent Him into the world in His name, to establish His kingdom among men, but they would not believe. Of what use was it to tell them that which they had already heard and had refused to believe? Nor was it altogether strange that His verbal attestation of His Messiahship was not readily accepted, for His assertion to be one with God was a most startling one. Men give credence slowly to the claims of others; they must *see* reasons or they will not believe. Should a man come to our National Government claiming to be the Ambassador of England the first thing that would be required of him would be that he should furnish credentials. Failing to furnish them he would be laughed at for a fool. Jesus saw that He must found His claim on something more convincing than His verbal attestation. He recognized the necessity for proof and furnishes that proof in His words "the works that I do in My Father's name, these bear witness of Me." This appeal of Jesus to His works as proof that He was the Christ requires that we for a moment examine them.

Strenuous efforts have been made during this, the new age, to read out of the works of Jesus all that is supernatural and divine. He is unintellicible, we are told, unless accounted for on human grounds alone. Consider, then, that when viewed in the light of human action, His works were *beautiful and powerful* beyond compare, and in themselves point to a higher divine life. The advanced thinkers of our day have, within comparatively few years, reached the conclusion that the highest *type of life is that which they* call altruistic, i. e., a life spent for others. The highest personal life is realized only as that life, forgetting self, rises above self and exhausts itself for others. The ethical *world rejoices in this newly found truth.* Go back 1900 years and there you will find One whose days were spent in doing others good. Follow Jesus through His ministry and you will soon discover that you are *following the footsteps of the world's one* unselfish man and its greatest philanthropist. Every act is designed to help another. You seek for the least trace of selfishness in vain. Every work bears the *seal of humanity's best. Indeed so far* are they above the world's best that they bring in their wake sweet thoughts of God. See Him as He works A little while ago He fed the hungering thousands. It was but yesterday He touched new life into the maniac boy and smoothed the deep furrows from a father's brow. This morn He drove the fever from the sick one in Peter's home, and mayhap, ere the day is done He will whisper the hope of a pure and holy life to the *harlot at the well.*

We have not too much thought of the works of Jesus as the acts of one fellow man toward others. When viewed according to the standard they are seen to be the *highest realization of man's highest* ideal. Christ was wise when He said, "Behold My works," for according to the findings of the best thought of all the ages no works are more beautiful or higher God. The *mere force, beauty and holiness of* His acts prove His kinship with the divine. But this was not enough to satisfy a Jew. The Christ they were looking for was to demonstrate His divine power by the *might and conquest of arms. They had it* all cut and dried just what the Christ should be and do. He was suddenly to appear out of the heavens or out of some sequestered way of life, attended by great *wonders. With the sword* He was quickly to overrun the world and set up in Jerusalem a power that would rule all nations. Any love or philanthropy that could be worked in would be all right, but before *all else Messiah* must be the messenger of God's wrath against the nations, visiting them with defeat and disaster, that the Jew might rule supreme.

Thus it was that to the questioners of His day Jesus proved to be a stumbling block. Did they find in Him a more than human power? Yes, they conceded that they did. As they saw Him restore the emaciated body of the leper, or infuse new life into the palsied form or open the eyes of the blind, or raise the dead from the grave, they were bound to recognize a more than human power. The gross and malicious said this power is of the devil, but the more intelligent said, as they saw the unselfishness, the love and tenderness of His acts, "We have never seen it done or this wise before!" "No man could do these works except God be with him!" "Surely this must be the Christ!" The answer of Jesus to the questioners of His day given in the terms of love, an answer which they would not or could not understand, is that which satisfies the heart and reason of the inquirer of to-day. It is as though Jesus said, "You ask if I am really the Christ of God and in Him you look for divine power. Look at My works, are they not of the highest type? Aye, more they are fraught with the power of God and prove not only that I am the Christ, but that the nature of God is better than the thought of man has made him. He is a God of tenderness, of love." Pressed answer, for it teaches that character is supreme, and that the highest life is one of simple ministry to the needs of others.

To the inquirer of to-day the answer of Jesus should be convincing. Since it is ours to look from the mountain peak of many centuries we may, however, see still other proofs and find still other answers to the all important question, "Was Jesus the Christ?" History gives a two-fold answer, first as seen in the preparation of the world for the coming of the Messiah and then in the development of the world's thought since the days of Jesus. Paul declares that "when the fulness of time was come, God sent forth His Son" into the world. By the fulness of time he must have meant the period that was to elapse, according to the wisdom of God, before His Son, the Christ, *should come. Now, if* Jesus was the Christ, we may expect to find the circumstances of the time in which He lived peculiarly fitted for His coming. What were these circumstances?

The vast Roman empire afforded a broad and accessible field for the spread of a new religion. The sceptre of Roman power ruled the world. Radiating from Rome as a centre were splendid highways which extended to the remotest [illegible] opening of ocean routes [illegible] as compared with previous [illegible] People [illegible] disseminating a new truth were better than ever before in the world's history.

But the most notable preparation was that of the Jewish people. They had long striven with their desire to worship idols. At last their vision was clarified in this regard, and the way was open for a further revelation. Moreover, the discerning among them, from reading the annals of their fathers, had come to long for the *promised Messiah* until that longing was kindled to a fervent heat. All these things peculiarly fitted the time in which Jesus lived for the reception and spread of great religious truths.

Nor is history since that time less remarkable. He died a death of shame; none could according to the common notion be more ignominious or disgraceful. His friends apparently were few. That He *would soon be forgotten would seem* natural. But it was not so. His followers multiplied with marvelous rapidity. Persecutions began and thousands of them were burned, roasted, speared and given over to *wild beasts.* Notwithstanding all this, within 300 years one-twentieth part of the empire were professed Christians, the Emperor himself among the number. From that time until the present Christianity and civilization have gone hand in hand. Many of the great upheavals of the world's life is the story of Christianity asserting herself against the powers that would stay her triumphant march. It was so in the time of Charlemagne, of Luther, of Cromwell and of Plymouth Rock. The lines of history converge toward Jesus Christ. In all things truly He has pre-eminence. Surely, this must be the Christ. From the historic point of view was He not more than man? His works and the voice of history declare Jesus to be the God-man.
